

Urban Design Proposal, Centennial Jingzhang AI Innovation Belt · 2026 Open Call

JINGZHANG PLATFORM 京张月台

Turning a centennial station platform into an open platform for the AI era — the station is a place to wait, meet, and depart; the platform is a place of open source, openness, and collaboration.

World-class AI innovation ecosystem

University seeding → open-source collaboration → enterprise conversion → public experience → international communication

New urban form for AI productivity

One gallery (≈9 km green corridor), three platforms, two tracks

A high-quality district for global AI talent

Centennial Jingzhang culture belt · urban AI-life experience belt · AI-integrated innovation belt

Site 11.41 km²

Green ratio 13.39%

Public space 2.34%

Key areas 3

Key area total 3.69 km²

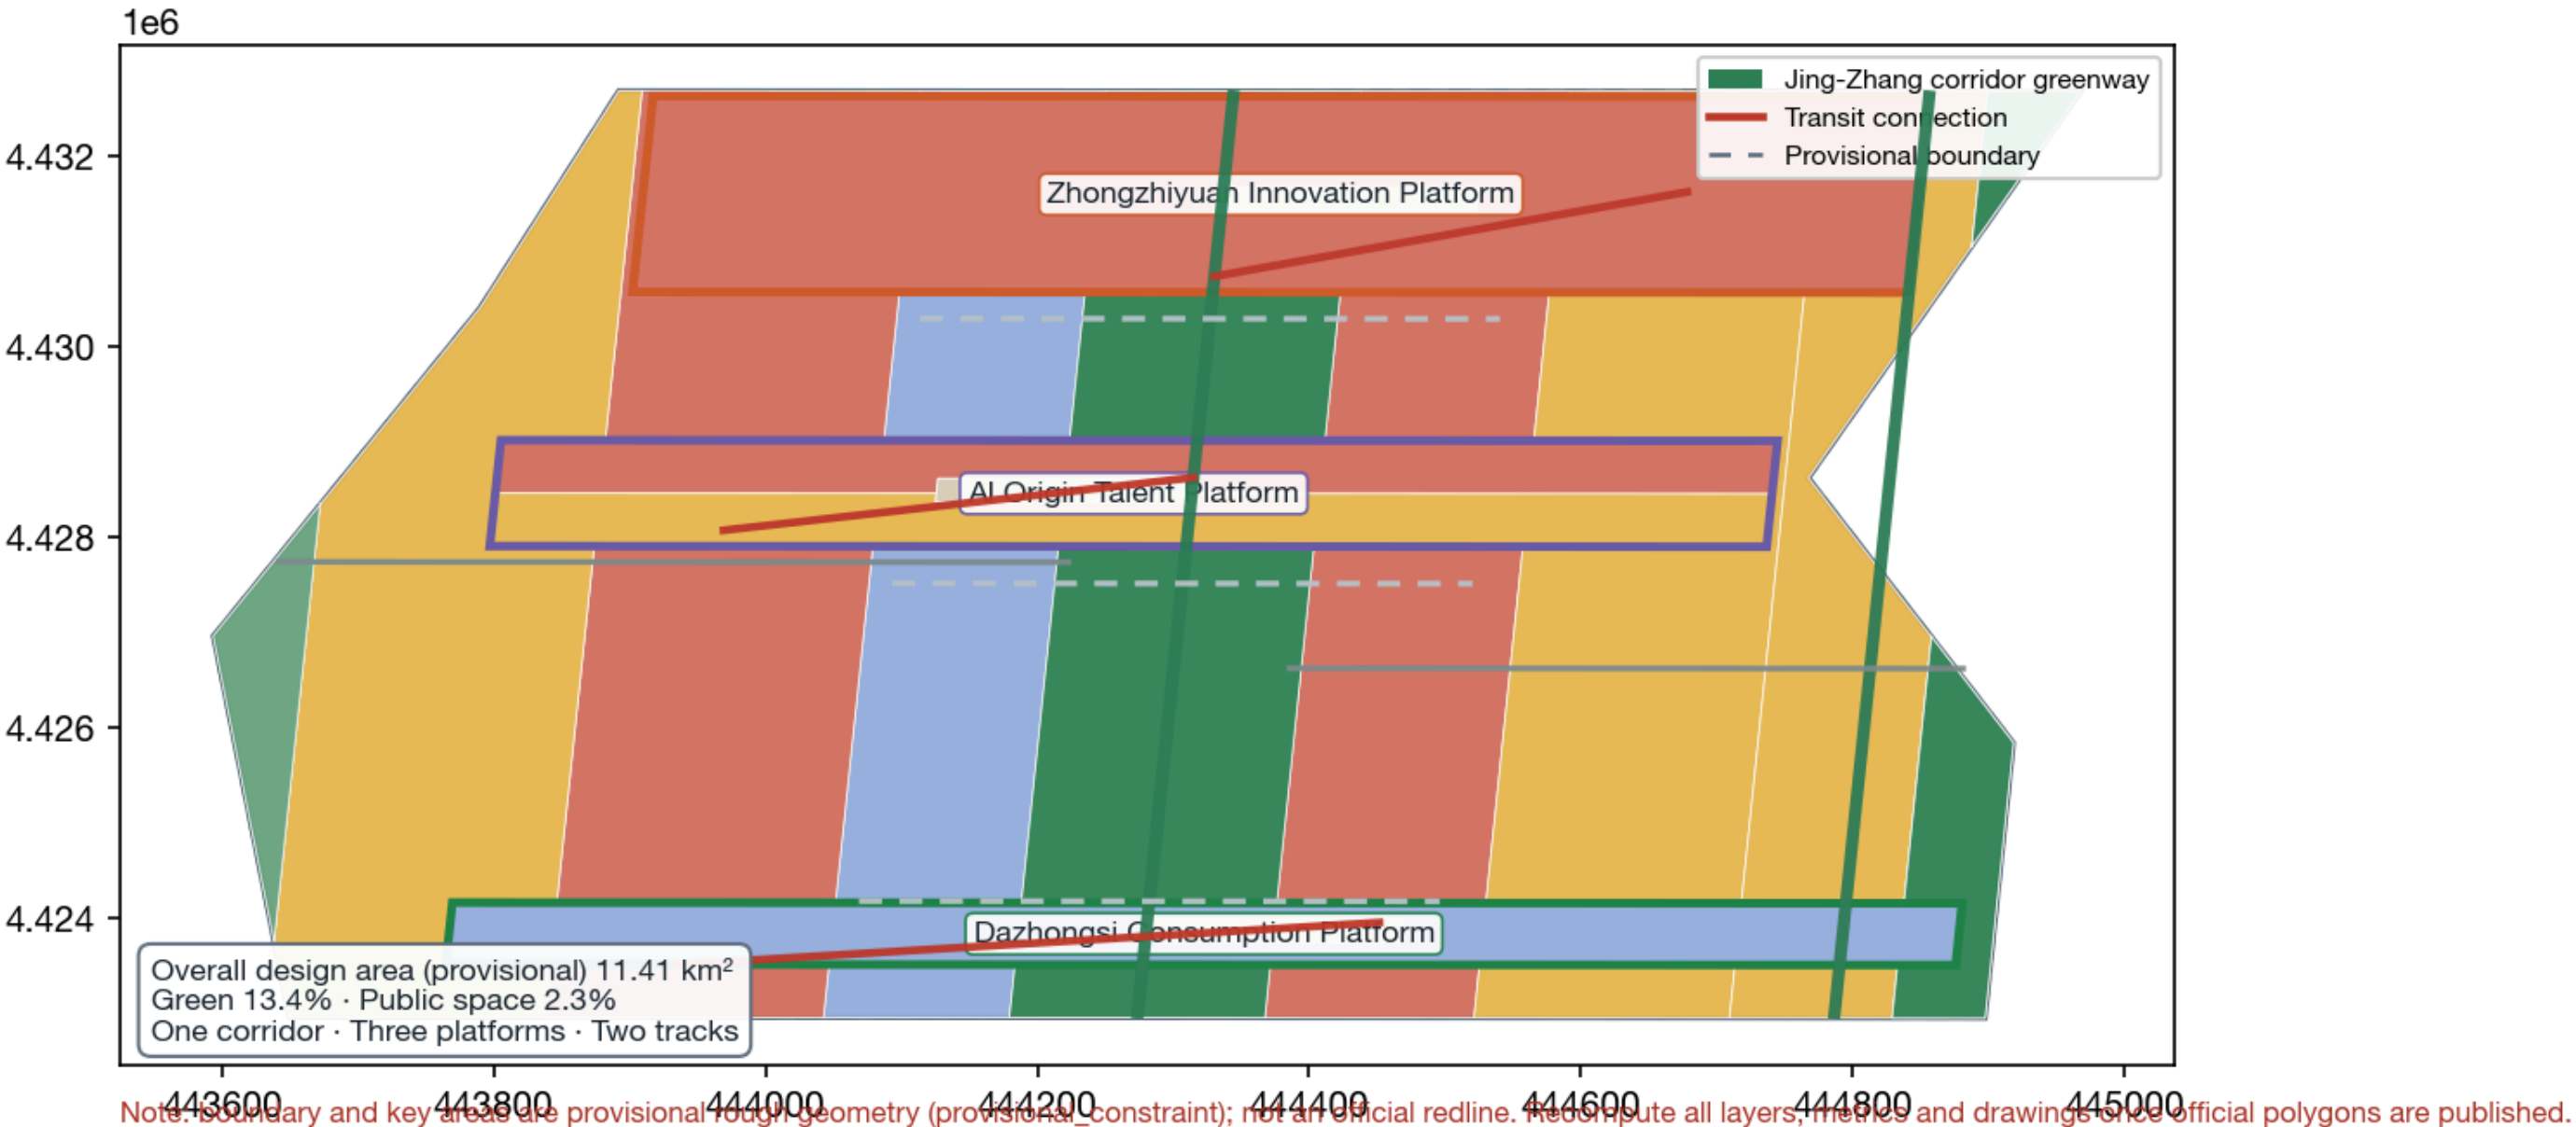

All areas and ratios on this page are recomputed from the organizer's provisional geometry (provisional_constraint) in EPSG:4548; they must be recomputed by tools/recompute_metrics.py and redrawn when official polygons are published.

One gallery, three platforms, two tracks

The ≈9 km north–south green corridor along the Jingzhang heritage park is the spine of heritage and public life; the three platforms correspond to the key areas; the two tracks are the Zhongguancun service track (west) and the Xiaoyuehe scenario track (east).

Coordinated research area Industry and future–city research for a world–class AI ecosystem	Overall design area Regulatory–plan–depth urban design: renewal, transport, character	Key areas Detailed design of the three required key areas
--	---	---

JINGZHANG PLATFORM · Overall design area and evidence chain

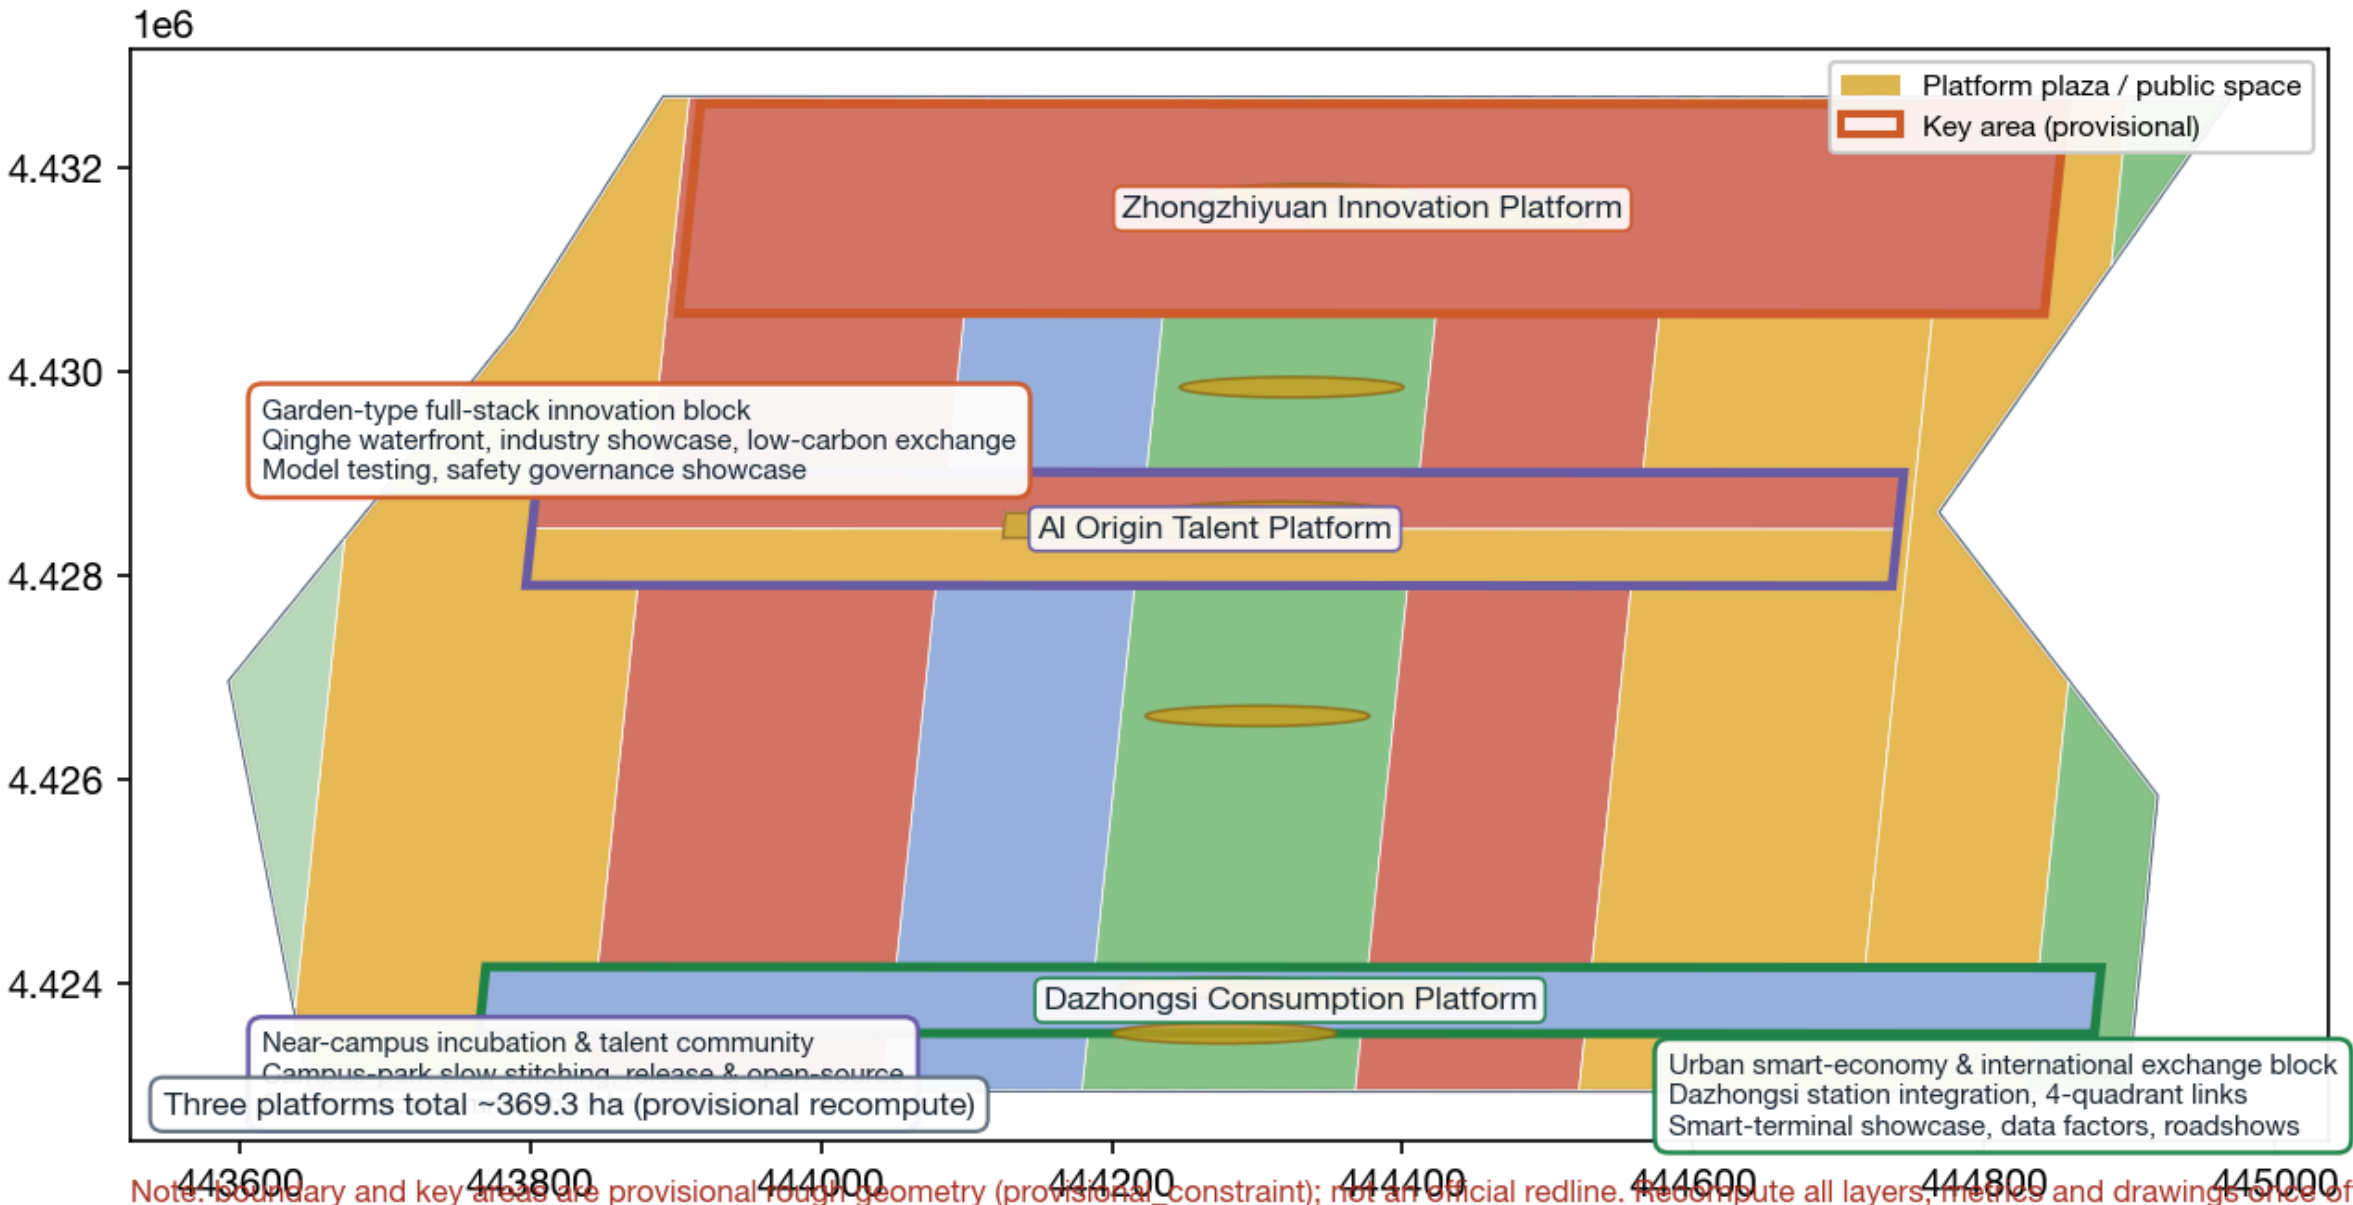

Overview map: land use, slow traffic, blue–green and public space, buildings and renewal, AI scenario nodes · 总览地图：用地分区、交通慢行、蓝绿公共空间、建筑与更新项目、AI场景节点

Detailed design of the three key areas is mandatory. Areas below compare the announced approximate values with recomputed values from the provisional geometry; the announcement gives no extents, so rectangle edges must not be read as plot or road redlines.

Key area	Design position	Announced approx.	Recomputed (EPSG:4548)
众智园AI自主创新加速区	Zhongzhiyuan AI Acceleration Area	192.1 ha	192.9 ha
北京AI原点社区	Beijing AI Origin Community	104.3 ha	104.3 ha
大钟寺AI产业聚集区	Dazhongsi AI Industry Cluster	72.0 ha	72.0 ha
Total (announced 368.4 ha / recomputed 369.3 ha)		368.4 ha	3.69 km²

JINGZHANG PLATFORM · Three key areas (three platforms) index

Three key areas index and design-task map · 三处重点区域索引与设计任务图

Land-use classification follows the Land-sea Classification Guide for National Territory Surveys, Planning and Use Control (MNR, 2020); regulatory-plan depth follows the Procedures for Formulation and Approval of Regulatory Detailed Plans (MOHURD Order No. 7). The phasing polygons fully cover the design boundary.

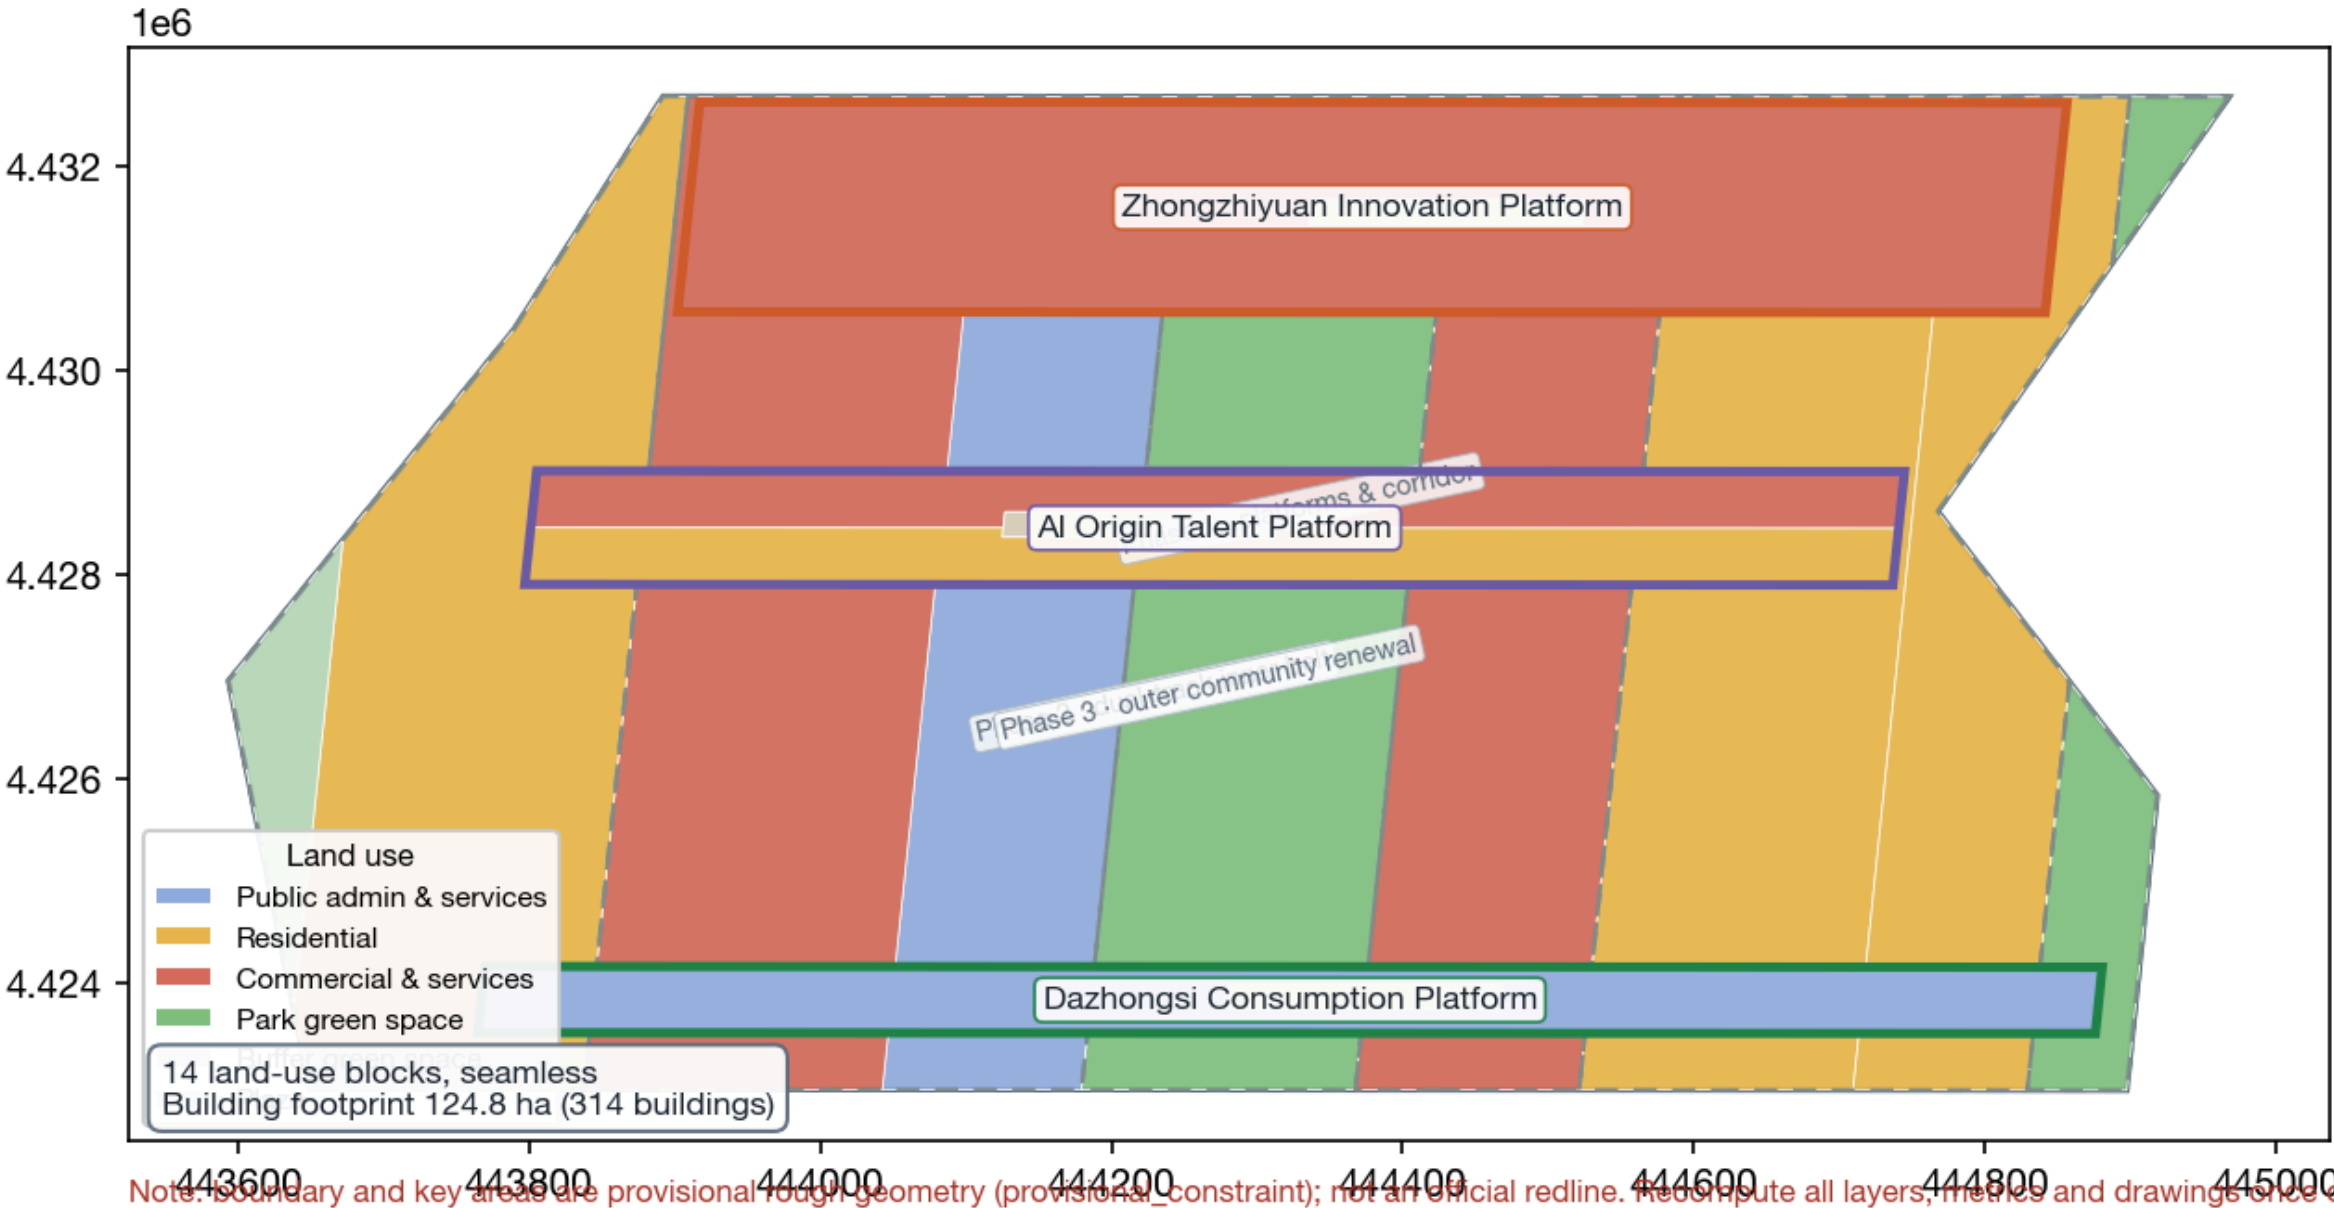

Land-use blocks 14

Phasing coverage 11.41 km²

Building footprint 124.8 ha

Buildings 314

JINGZHANG PLATFORM · Land-use structure and phasing

Land-use structure, phasing, and retain-renoate-demolish strategy · 用地结构、分期与拆改留方案

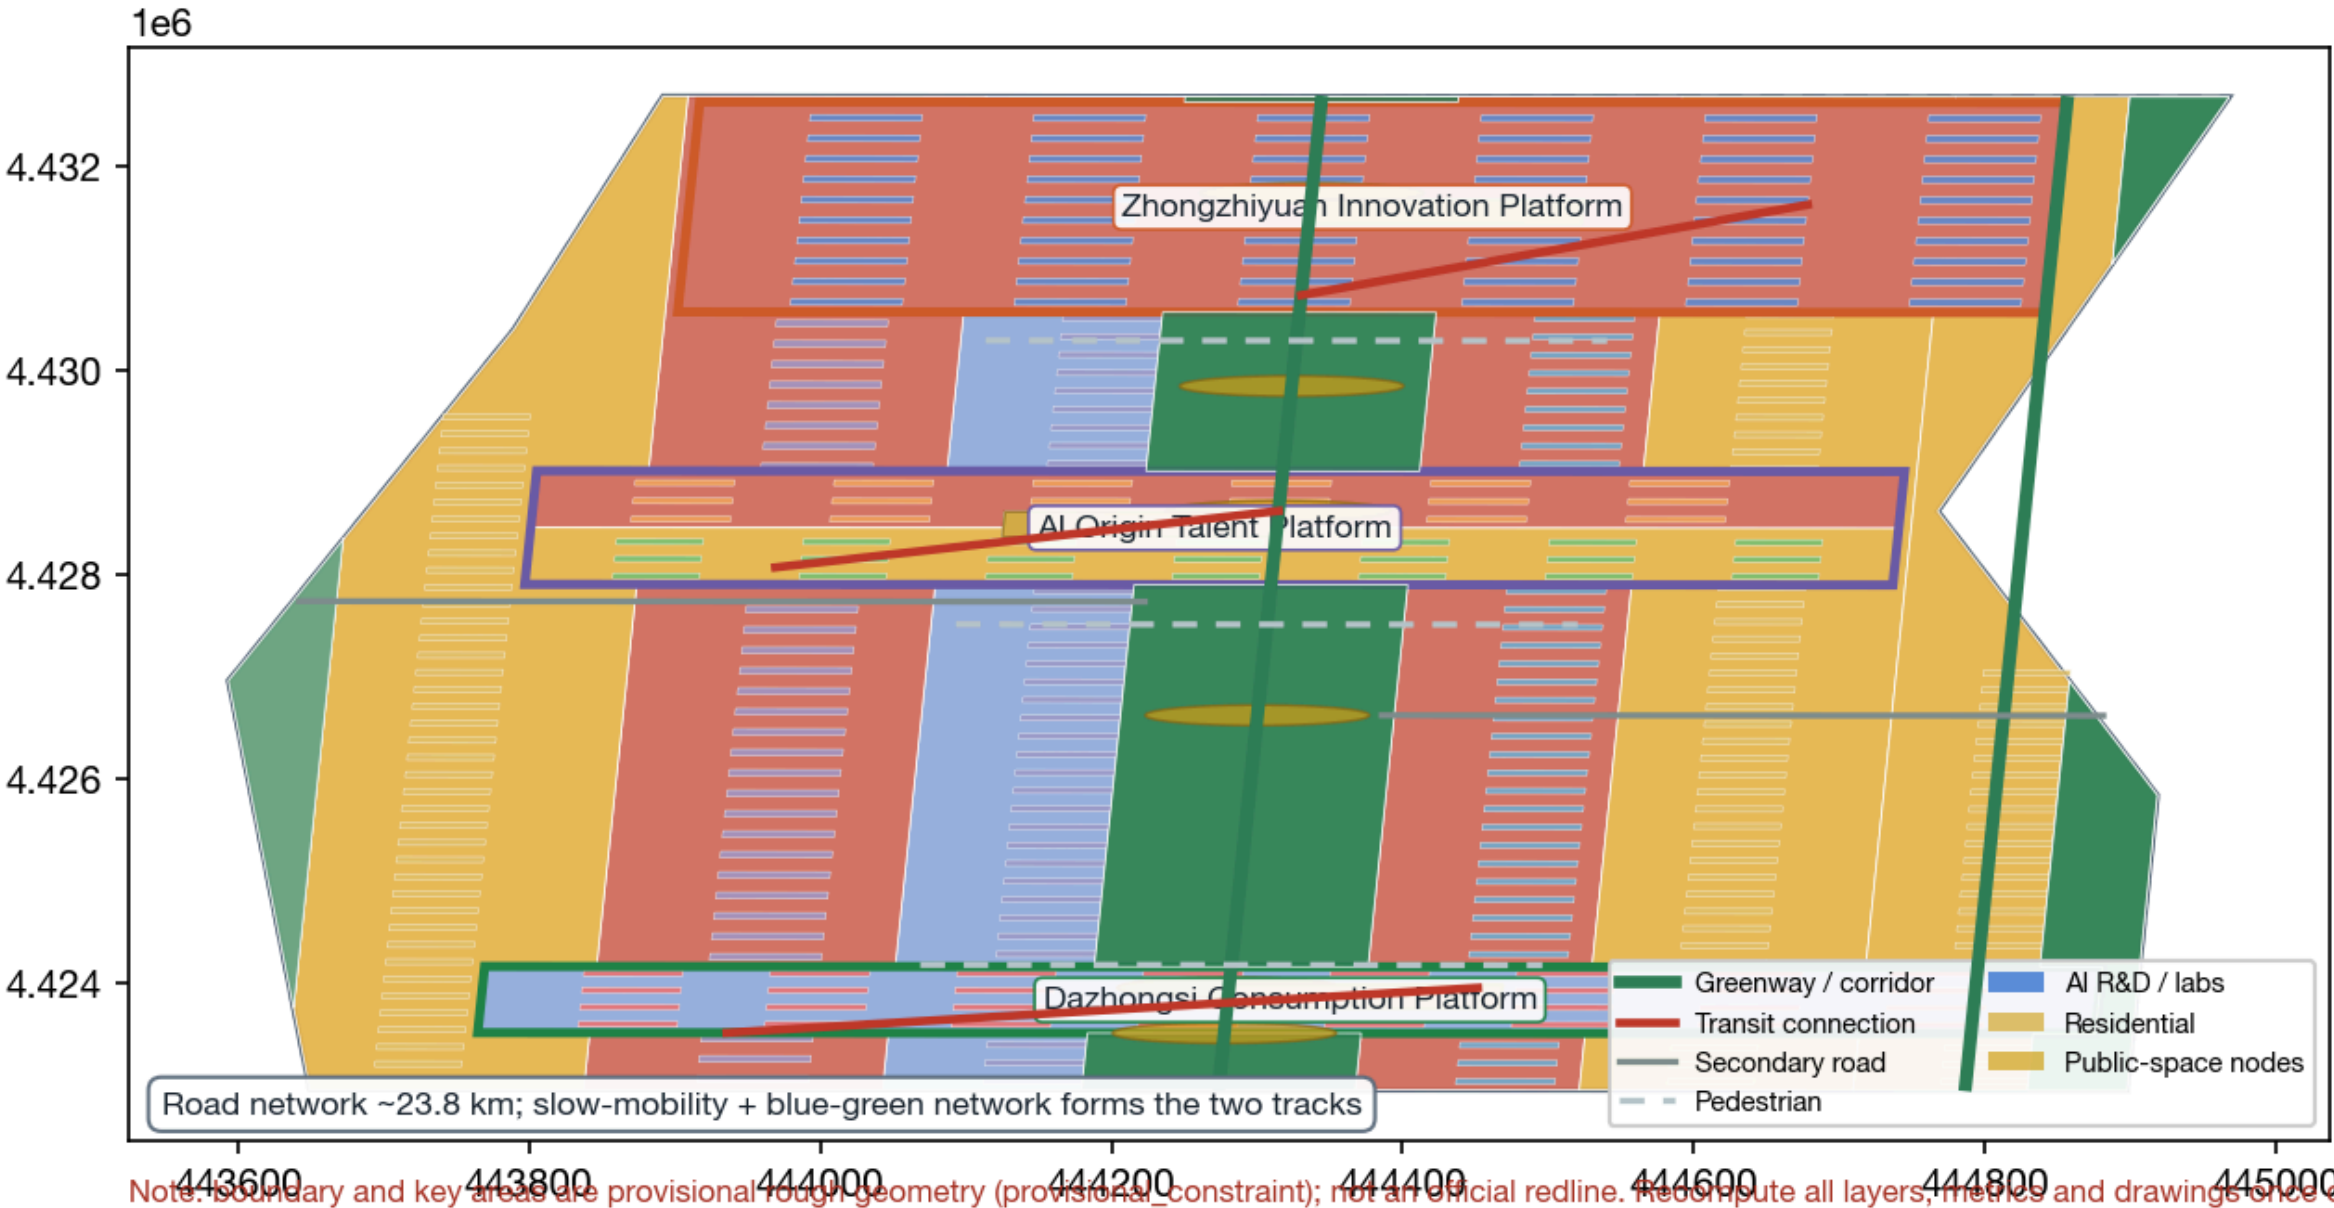

The Jingzhang heritage-park vitality belt frames the Qinghe and Xiaoyuehe systems and slow traffic; gaps, overpass nodes, and north/south landscape nodes are identified, with station-integrated pedestrian links around rail stations.

Road network 23.8 km

Green 152.9 ha (13.39%)

Public space 26.7 ha (2.34%)

JINGZHANG PLATFORM · Mobility and blue-green network

Mobility, slow traffic, blue-green and public space: buildings, roads, green space, public space · 交通慢行与蓝绿公共空间：建筑、道路、绿地、公共空间

AI ecosystem map (conceptual)

University seeding → Open-source collaboration → Enterprise conversion → Public experience → International communication

Regional coordination (conceptual):

Plate	Relation	Mechanism
North-wei communities (Haidian north)	Pilot scale-up and R&D spillover	Shared industry-recruitment map and talent service network
Future Science City (Changping)	Large-facility coordination from frontier science to industry	Seeding-pilot-manufacturing division of the innovation chain
Huairou Science City	Source-side seeding of large facilities and basic research	Talent exchange and roadshow mutual visits
Beijing E-Town (Yizhuang)	Scaled conversion of smart devices and manufacturing	Scenario opening, supply-chain collaboration, fair recognition
Beijing-Tianjin-Hebei hinterland	Manufacturing, scenario, and data-factor hinterland	Scenario-open city alliance and industrial enclave (conceptual)

12 scenario cards + 3 test scenarios

01 Open-source release hall AI Origin Community · ground floor / community node	02 Safety governance sandbox Zhongzhiyuan · garden-block open node	
03 Edge-compute service station Overall design area · public-service node	04 AI slow-traffic navigation Jingzhang heritage-park vitality belt · corridor	
05 Dazhongsi international roadshow hall Dazhongsi · station-city commercial node	06 Qinghe low-carbon innovation gallery Zhongzhiyuan Qinghe frontage · waterfront	
07 Campus-near transfer street AI Origin Community · campus-park seam	08 Data-element salon Dazhongsi · commercial and rail composite node	
09 AI daily-life sample street Community-commerce junction · small block	10 Global AI activity-week route Belt public-space system · gallery and square nodes	
11 Platform shared waiting pavilion Three platform squares and gallery nodes · hybrid waiting space	12 Open-source collaboration wall AI Origin Community & Dazhongsi quadrant · public interface	
T1 Open model evaluation field · Zhongzhiyuan innovation platform	T2 Edge AI civic service sandbox · Overall-area service node	T3 Smart-device consumption experience field · Dazhongsi consumption platform

Six governance dimensions per scenario

Data governance Data sources, privacy boundaries, authorization first	Maturity stages M0 concept → M1 pilot → M2 operation
---	--

Inclusive design covers six personas; every digital scenario provides offline equivalent services and an algorithm appeal channel, with an annual third-party manual accessibility inspection (conceptual).

Persona	Typical needs	Offline equivalents / self-check boundary
Older adults	Large-type/voice wayfinding, rest along routes, service without smart devices	Offline window, phone, and home-visit equivalents
Children	Safe routes, parent-visible activities, no data collection in AI education	Staffed activity zones, teacher-reviewed educational content
People with disabilities	Full-barrier-free routes, Braille/tactile maps, human-reviewed AI navigation	Monthly accessibility inspection reports, 30-day work-order closure
Low-income residents	Free public services, affordable commuting and leisure, skills opportunities	Free basic tier kept for paid AI services
Caregivers	Wide corridors, mother/care rest rooms and assistance points	Staffed care points with published response times
Non-smart-device users	Query, booking, and feedback without an app	Public terminals, phone, and window equivalent service chains

Four mechanisms

Offline equivalent services
Every AI scenario keeps window, phone, or counter equivalents; digital enhances, never replaces

Public participation channels
Annual open days, block assemblies, and online feedback in parallel; records never used for commercial profiling

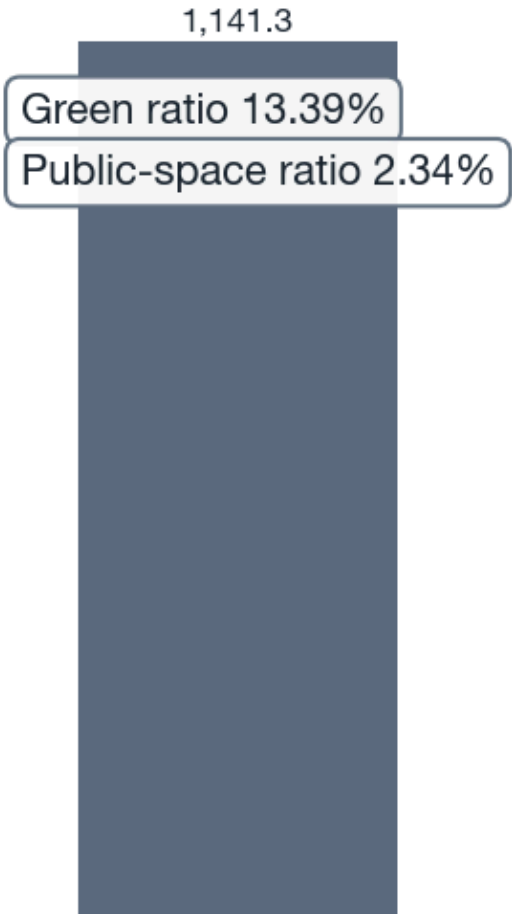

Algorithm appeal channel
Agent suggestions/scores/dispatch can be appealed; reviewed by non-algorithm staff with a deadline

Manual accessibility inspection
Annual third-party manual inspection of public space and interfaces; reports published

All metrics are recomputed by tools/recompute_metrics.py from the same geometry in EPSG:4548; figures, metric cards, and text use the same normative values.

Metric	Unit	Recomputed value	Source	Confidence
场地面积	Site area	11,412,825.4 m ² (11.41 km ²)	geometry/site_boundary.geojson	high
绿地面积	Green space area	1,528,718.5 m ² (152.9 ha)	geometry/green_space.geojson	medium
公共空间面积	Public space area	266,790.4 m ² (26.7 ha)	geometry/public_space.geojson	medium
绿地率	Green ratio	13.3947 (13.39%)	green_space_area_sqm / site_area_sqm	medium
公共空间占比	Public space ratio	2.3376 (2.34%)	public_space_area_sqm / site_area_sqm	medium
重点片区数	Key area count	3	geometry/key_areas.geojson	high
重点片区合计面积	Key area total area	3,692,893.0 m ² (3.69 km ²)	geometry/key_areas.geojson	medium
用地块数	Land–use block count	14	geometry/land_use.geojson	high
建筑基底面积	Building footprint area	1,248,218.6 m ² (124.8 ha)	geometry/buildings.geojson	medium
建筑栋数	Building count	314	geometry/buildings.geojson	medium
路网长度	Road network length	23,849.4 m (23.8 km)	geometry/roads.geojson	medium
分期覆盖面积	Phasing coverage area	11,412,842.2 m ² (11.41 km ²)	geometry/phasing.geojson	medium

JINGZHANG PLATFORM · Core metrics and evidence chain

Renewal project list (examples; dependencies in the report)

Project	Type	Key dependencies
JZ-01 Jingzhang heritage-park slow-traffic gap stitching	Public space / transport	Road redlines, underpass space, traffic review
JZ-02 Zhongzhiyuan Qinghe innovation frontage	Blue-green / industry display	River blue line, ecology, flood conditions
JZ-03 Origin community campus-near transfer street	Urban renewal / industry service	Campus boundary, ownership, ground-floor uses
JZ-04 Dazhongsi station four-quadrant pedestrian link	Rail integration / slow traffic	Station, junctions, municipal utilities
JZ-05 AI public service & edge-compute node	New infrastructure / public service	Energy, compute, safety, operator
JZ-06 Global AI activity-week public route	Operation / branding	Public-space permit, event safety, rights clearance

Long-term operation and conversion (conceptual)

Annual events AI developer festival, scenario open days, competition roadshows, memory experience month; ≥30 events/yr, ≥100k participants/yr	Developer community Open-source camps, contribution-wall honor board, tech night talks; ≥60 projects/yr, ≥300 volunteers
Scenario opening Annual scenario list, open application, public evaluation; ≥10 opened/yr, ≥5 pilots converted	International communication Bilingual theme map, activity-week route, international roadshow season; ≥20 international exchanges/yr

Public-space component library (conceptual)

Platform waiting-pavilion kit Platform-eave imagery + co-working/pop-up/rest hybrid, modular and demountable	Wayfinding & milestone-stone kit Three-level wayfinding + heritage symbols, bilingual, multimodal accessible
Contribution-wall kit Digital contribution display + physical honor board, opt-out available	Gallery seat & shade kit Barrier-free seating strips + shade trees + tiered lighting
Accessible ramp & tactile-map kit Full-route accessibility + Braille/tactile maps, monthly inspection reports	Pop-up & exhibit kit Mobile display frames, roadshow stage, lighting/sound interfaces

Copyright and sources (asset-level ledger: report/copyright_statement.md)

- All text, tables, figures, and metrics are self-produced or use cleared public/organizer materials; no unauthorized third-party images, photos, trademarks, or fonts.
- 19 sources registered in sources.json: 7 global cases (KINGS-CROSS, KENDALL-SQUARE, STATION-F, MARUNOUCHI, JURONG-LAKE-DISTRICT, PANGYO, HETAO), 5 standards (MOHURD/MNR), and organizer materials.
- Submitted under COMMUNITY-DISPLAY-ONLY: competition review display only, attribution required, no commercial use.

Assumptions and risks (assumptions.json, 7 items)

ID	Statement
A-CONTROLS-001	Statutory controls, redlines, ownership, engineering conditions pending professional confirmation
A-BOUNDARY-001	Site and key areas are provisional geometry; full recompute when official polygons publish
A-CASES-001	Global cases are not transplantable; facts follow their public sources
A-SCENARIO-KPI-001	Scenario and operation KPIs are conceptual indicators, not commitments
A-OPERATION-001	Annual events and operation mechanisms need permits, safety filings, and rights clearance
A-HERITAGE-001	Heritage symbols and historical narratives pending authority and rights-holder confirmation
A-ACCESSIBILITY-001	Inclusivity mechanisms are design intent; verified against standards at implementation

All areas and ratios on this page are recomputed from the organizer's provisional geometry (provisional_constraint) in EPSG:4548; they must be recomputed by tools/recompute_metrics.py and redrawn when official polygons are published. Scenario and operation KPIs are conceptual; heritage symbols pending clearance; operation mechanisms pending authorization.
