

Provisional Boundary and Index Structure

CONCEPTUAL WORKING EXTENT

This working extent explains relationships and an evidence chain. It is not an official redline, statutory parcel plan, or precise siting record.

Index walk and human-review interface

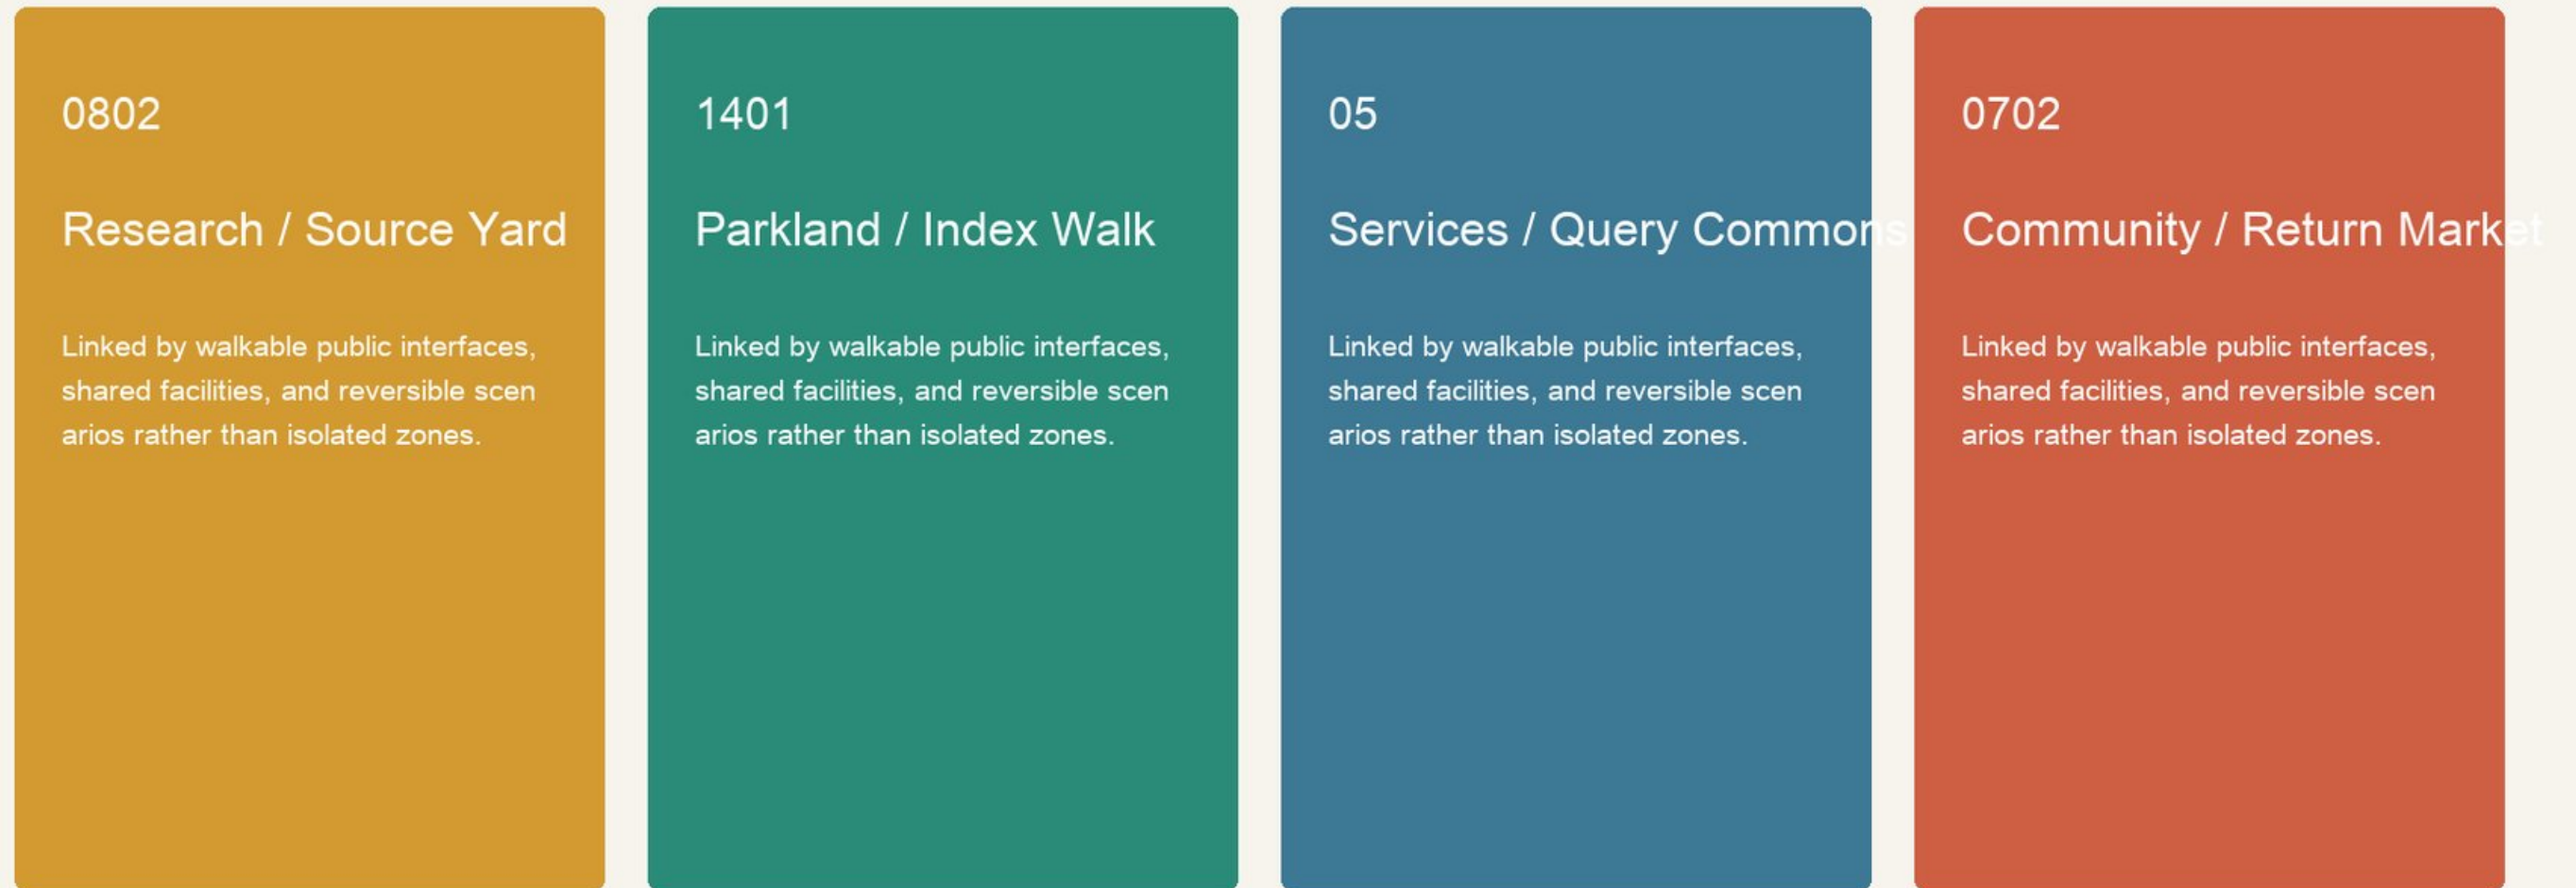

Source Yard: trusted R&D and standards

AI Origin: open translation and learning

Dazhongsi: feedback, service, and display

Concept Land Use: Functions Are Not Islands

PROGRAMMATIC PARTITION

These four classes are a conceptual spatial language. Statutory parcels, compatibility, and intensity require later verification.

Three Areas, Two Wings, One Accountable Public System

DISTINCT ROLES, SHARED PUBLIC PURPOSE

Source Yard / Zhongzhiyuan

All-stack R&D, standards, and safety discussion meet a low-impact garden interface. Test: auditable agent logs with human review.

Query Commons / AI Origin

Campus research becomes city questions, linking learning, incubation, life, and open collaboration. Test: research provenance chain.

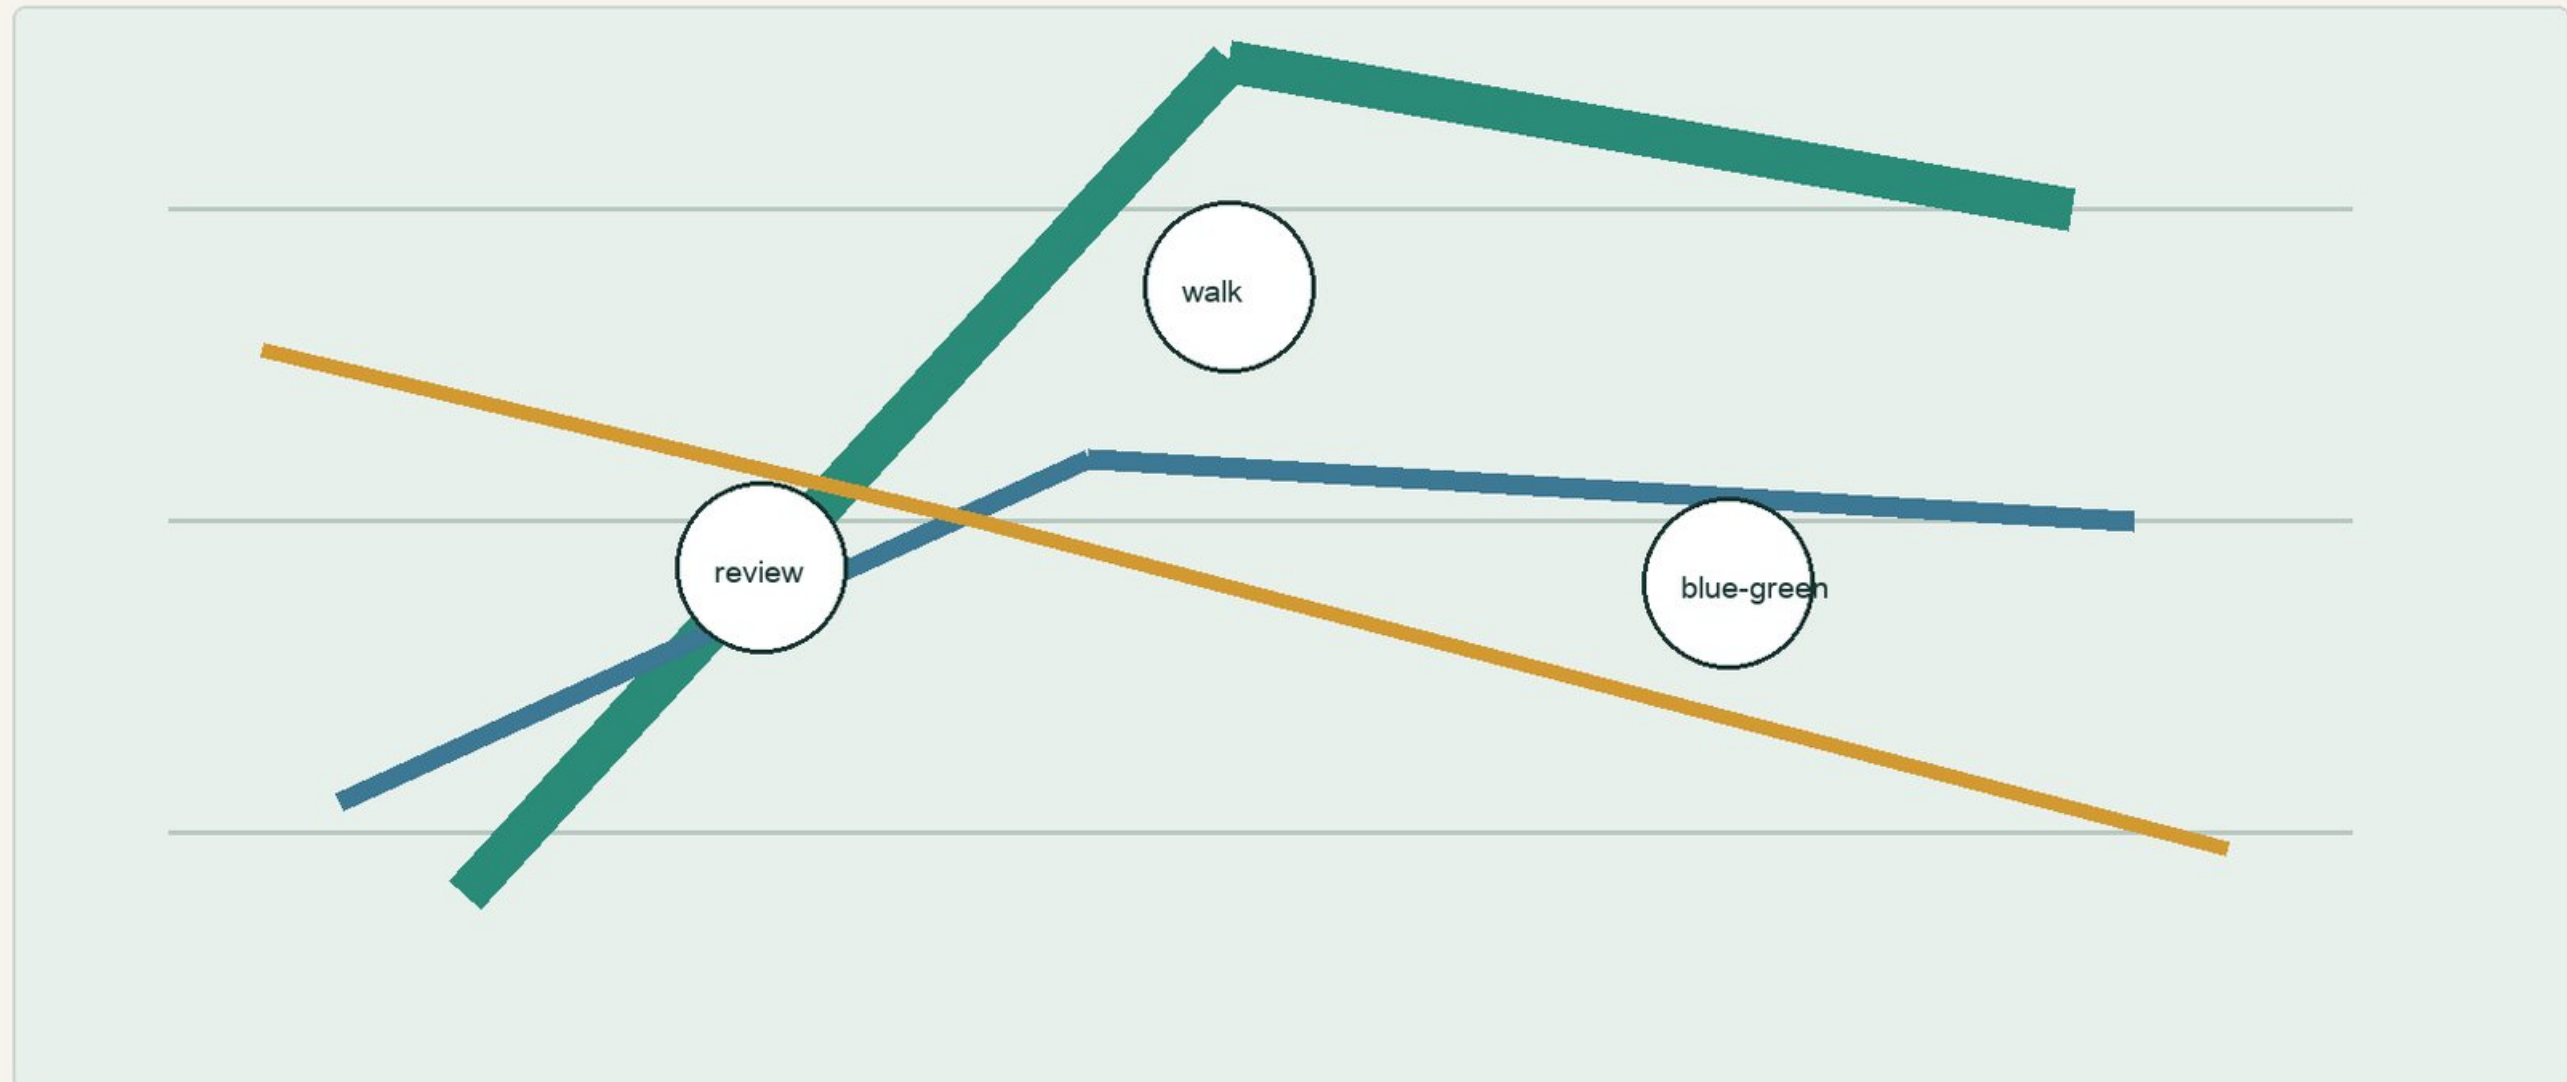

Return Market / Dazhongsi

Devices, content, and services return results to public space with public feedback, staffed service, and analogue alternatives. Test: feedback loop.

Service Catalogue: talent, open-source/IP, capital, and enterprise support. Scenario Manual: low-risk, observable, reversible public experiments.

Mobility, Blue-Green, and Human Review

A REVERSIBLE PUBLIC INTERFACE

- Index walk: shade, sponge landscape, pause, and guidance
- Public service: transfer, accessibility, and staffed support
- Scenario floor: observable, explainable, stoppable, with an analogue route

Evidence Chain: Claims, Layers, and Recalculation

WHAT IS KNOWN, CONCEPTUAL, AND OPEN

Working extent 11.41 km² provisional, to replace	Concept green ratio 14.2% recomputed from layers	Concept public ratio 1.1% recomputed from layers	Key areas 3 / 368.4 ha announced area, provisional polygons
--	---	---	--

sources → assumptions → GeoJSON → recalculation → drawings & visual → human review
