Design Notes

1. Structure: one belt (Heritage Park), one loop (Origin Loop slow circuit), three cores, two wings.
2. Key areas: Zhongzhiyuan (validation), Origin Community (creation), Dazhongsi (transfer).
3. Land-use partition fully covers the site without gaps or overlaps; green ratio ~19.4%.
4. Boundary is provisional (rough); for discussion and recalculation only, not an official redline.
5. Building footprints are representative, not survey or approved results.

交通慢行与蓝绿公共空间复合系统

System Notes

- 1. Slow spine (orange) + wing roads (green) + connectors (blue) form the Origin Loop network.
- 2. Existing water (Qinghe, Xiaoyue) and the Jingzhang high-speed tunnel are locked constraints, shown schematically.
- 3. Public-space nodes along the loop host launches, roadshows, exhibitions and daily life.
- 4. Road redlines and alignments are conceptual, pending official conditions.
