Core Metrics Recomputation & Evidence

FIG.05 · metrics-evidence

Overall design area	11.41 km²	conf:high	site_boundary.geojson
Building footprint	0.31 km²	conf:medium	buildings.geojson
Green ratio	12.3%	conf:medium	green_space / site_boundary
Public-space ratio	7.3%	conf:medium	public_space / site_boundary
Key-area count	3	conf:high	key_areas.geojson
Floor area ratio	pending official	conf:unknown	pending official control

Evidence: formula → GeoJSON.polygon_area → metrics.json → manifest sha256. All known metrics recomputable; *FAR etc. listed unknown without official control, no fabricated values.
