

JINGZHANG RENZI LOOP

Urban Design Proposal for the Centennial Jing-Zhang AI Innovation Belt · Concept

Overall Concept

- Named after the herringbone (renzi) switchback at Qinglongqiao on the Jing-Zhang Railway - the historical origin of China's self-reliant innovation.
- Translates the switchback into an AI-era 'innovation loop': data-compute-model-scenario-talent circulate along the loop.
- Spatial structure: one belt, two wings and three districts form the renzi - the Heritage Park belt as the vertical stroke, the Zhongguancun Service Wing and Xiaoyuehe Scenario Wing as the two slants, and Zhongzhiyuan, the Beijing AI Origin Community and Dazhongsi as the three districts.
- Governance: echoes the 'human-in-the-loop' principle, placing human dignity and public welfare first.

Detailed Design of Three Key Areas

Zhongzhiyuan AI Acceleration Area	Garden full-stack self-reliance block; national AI platform, standards & safety, Qinghe frontage, low-carbon exchange.
Beijing AI Origin Community	Near-university conversion and talent community; campus-park suturing, open source, talent services, station integration.
Dazhongsi AI Industry Cluster	Urban intelligent-economy block; agents/terminals/content, data elements, four-quadrant walking.

Core Metrics (recomputed in EPSG:4548)

Overall design area	11,412,825.386
Key detailed-design area	3,692,893.005
Green ratio	35.08%
Public-space ratio	0.77%
Building footprint area	3,729,287.732
Road centerline length	17,920.097

Ten AI Scenario Cards (incl. 3 industry test/validation scenarios)

01 Open-source release hall	02 Safety-governance sandbox (test)
03 On-device computing hub	04 AI walking navigation
05 International roadshow lounge	06 Qinghe low-carbon corridor (test)
07 Near-university conversion street	08 Data-element lounge
09 AI life-service model street	10 Global AI week route (test)

Phasing

- 阶段 1：Near-term pilots (walking-gap suturing, Qinghe interface)
- 阶段 2：Mid-term renewal (conversion street, Dazhongsi connectivity, computing nodes)
- 阶段 3：Long-term framework (Global AI Week, operation and brand assets)

Sources: official announcement, cleared taskbook, maintainer provisional boundary, public policies and standards; full index in sources.json / metrics.json / compliance_matrix.json / standard_matrix.json / design_depth_matrix.json.

Provisional boundary (provisional constraint) is for generation and display only; recalculate the whole package when official polygons are released. This booklet is presentation material; statutory conclusions follow formal planning deliverables.

Open-source co-creation suggestion by an AI agent - does not replace formal planning - concept for professional deepening
