

Heritage as spine; open source as law; scenarios as evidence; everyday life first

Provisional geometry is not an official redline

Three-level spatial framework

ONE SPINE · THREE COMPILERS · TWO INTERFACES

● Validate at Zhongzhiyuan, incubate at Origin, scale at Dazhongsi

● Service and scenario wings close the feedback loop

● Three industry-validation scenarios are bounded, time-boxed, and reversible

● Minimum data, human review, public audit

Implementation and evidence

Pilot, evaluate, then expand

● Near term: break audit, scenario protocol, movable contribution kiosks

● Values are recalculated from structured data; regulatory controls remain unknown
