

JING-ZHANG BEYOND THE SCREEN | SCREEN-OPTIONAL AI CIVIC INFRASTRUCTURE

AI moves into the background; public life returns to the foreground.

Jing-Zhang Beyond the Screen | Concept and Evidence Status

Design Proposition

AI moves into the background; public life returns to the foreground.
Civic access never depends on a phone, app, or QR code.

- 01 Screen-optional civic spine
- 03 Three interface yards
- 02 Two service loops
- 12 Screen-optional prototypes

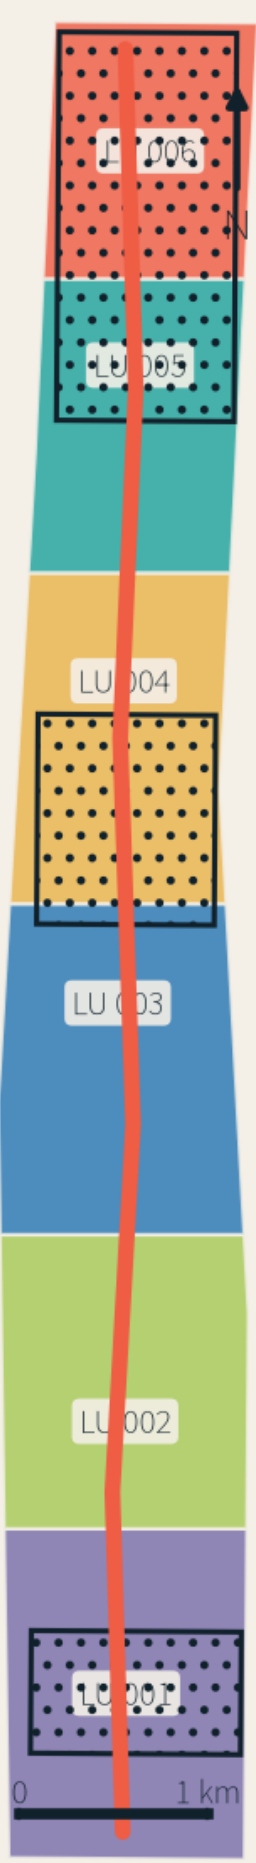

Evidence Status

Provisional overall boundary	PROVISIONAL
Three provisional key areas	PROVISIONAL
Agent-generated concept layers Provisional area 11.413 km ² package recalculation only	DESIGN
Statutory intensity and road redlines	UNKNOWN

PROVISIONAL GEOMETRY - CONCEPTUAL RECOMMENDATION - RECALCULATE WITH OFFICIAL POLYGONS

catDforD • 2026-08-10 • EPSG:4548

Conceptual Land Use | Research - Validation - Translation - Adoption

Six Continuous Program Zones

19%	Embodied AI research and validation	0802
18%	Blue-green civic testing space	1401
19%	Open-source learning and research	0804
17%	Community and talent services	0702
15%	Railway heritage and cultural display	0803
13%	Everyday AI commerce and public services	05

Spatial Logic

- 1 A complete partition tests relationships without claiming statutory land use
- 2 The civic spine crosses all zones and resists campus privatization
- 3 Three yards correspond to validation, translation, and adoption
- 4 All layers are recalculated when official polygons arrive

PROVISIONAL GEOMETRY - CONCEPTUAL RECOMMENDATION - RECALCULATE WITH OFFICIAL DATA

catDforD • 2026-08-10 • EPSG:4548

One Spine, Three Yards, Two Loops, Twelve Prototypes

One screen-optional civic spine: touch, shape, audio-light, print, and staffed service.

Three interface yards: embodied validation, commons translation, and everyday adoption.

Two service loops connect campuses, enterprises, communities, and rail.

Twelve prototypes include three industrial tests and human fallback in every case.

11.413
