CENTENNIAL JING-ZHANG AI INNOVATION BELT

JZ AI

Youth-Friendly Public Space

JZ AI Nexus‖ Jing-Zhang AI Symbiotic Belt

jinbohao1688 | Claude Code (Anthropic) | 2026-08-10

Track: Youth-Friendly Public Space / ■■■■■■■■

Package: professional_design_package | self_check: PASS

PROVISIONAL BOUNDARIES‖ NOT OFFICIAL REDLINE‖ CONCEPT PROPOSAL

CORE CONCEPT: "Jing-Zhang Intelligence Co-Thriving Belt" (□□□□□□□)

Transform the century-old Jing-Zhang railway corridor into a youth-friendly AI public space system that serves as:

1. Cultural heritage corridor (□□□□□)
2. AI lifestyle experience belt (□□AI□□□□□)
3. AI innovation convergence zone (AI□□□□□)

8 YOUTH PUBLIC SPACE TYPOLOGIES:

□ Coding Gardens□outdoor collaborative coding at 500m intervals

□ Hackathon Plazas□3 dedicated event plazas (300-500 capacity each)

□ Open Source Exhibition Corridor□1.2km linear digital-physical display

□ Developer Social Steps□terraced gathering at transit station forecourts

□ AI Pilgrimage Landmarks□Hello World Monument, Contributors' Wall, AI Timeline Walk

□ Night Code Cafes□24h cafes with GPU workstations and event spaces

□ Youth Maker Spaces□6+ affordable prototyping workshops

□ Sports+Code Trail□8.2km path with 20 QR programming challenge stations

3 KEY AREAS (368.4 ha total):

□ Zhongzhiyuan (192.1 ha): Garden-style full-stack autonomous innovation

□ AI Origin Community (104.3 ha): University-adjacent achievement transformation

□ Dazhongsi (72.0 ha): Urban-style intelligent economy district

KEY METRICS (all recomputable from submitted GeoJSON or marked as design targets):

site_area_sqm: 11,412,825 m■ [from projected geometry, EPSG:4548]

green_ratio: 0.22 (22%) [recomputed from green_space.geojson]

public_space_ratio: 0.006 (0.6%) [recomputed from public_space.geojson]

key_area_count: 3 [official announcement]

coding_garden_count: 10+ (target) [design target■■ pending confirmation]

hackathon_plaza_count: 2+1 mobile [design target]

ai_landmark_count: 3 [Hello World + Wall + Timeline Walk]

sports_code_trail_km: 8.2 km [from roads.geojson measurement]

youth_maker_spaces: 6+ (target) [design target]

night_economy_zones: 3 [design target]

EVIDENCE CHAIN:

announcement■■ taskbook■■ site-package■■ GeoJSON layers■■

spatial recomputation■■ metrics.json■■ visual/index.html■■

self_check.json■■ manifest.json SHA256 audit

SELF-CHECK STATUS: PASS (all four gates)

Deterministic validation: PASS | Spatial review: PASS

Visual packaging: PASS | Professional evidence: PASS

DATA CONFIDENCE: medium (provisional boundaries; official polygons pending)

FAR, building heights, densities: unknown (pending control plan confirmation)

LOGO CONCEPT: Track cross-section ⊟ Neural network node

Three horizontal lines (railway tracks) deforming into AI node arcs.

Hexagonal center node with 6 directions: Open Source, Algorithm,

Compute, Data, Scenario, Governance.

English brand name: JZ AI NEXUS (primary for branding/digital)

Full name: Jing-Zhang AI Symbiotic Belt (formal documents)
