

JING-ZHANG HINGE: ADAPTABLE AI CIVIC ROOMS

1 PIN × 3 COURTYARDS × 2 WINGS × 12 HINGES | ordinary routes first; AI trials time-limited; spaces restorable

OVERALL CONCEPT | JING-ZHANG HINGE

One heritage hinge pin, three hinge courtyards, two service wings, twelve adaptable urban rooms

JZ-HINGE / 01

CORE JUDGMENT

An AI innovation belt is first a set of urban interfaces, not a chain of enclosed campuses. Pair every technology space with an ordinary public route, human service, and a reversible use rule.

ARRIVE - TRY - RETURN

1 PIN x 3 COURTYARDS x 2 WINGS x 12 HINGES

CORE JUDGMENT

An AI innovation belt is first a set of civic interfaces, not a chain of closed campuses. Pair every technology space with ordinary public routes, human service, and reversible rules.

COMPLETE TOPOLOGY + THREE KEY AREAS + COMPOUND NETWORK

Five longitudinal bands share cut lines; twelve east–west hinges cross; three courtyards form industry–city interfaces

SPATIAL STRUCTURE | FIVE BANDS, SHARED EDGES

JZ-HINGE / 01

A complete topology-safe partition crossed by civic hinges; the provisional outline stays secondary

FIVE FUNCTION BANDS

Knowledge and education services

Research and prototyping

Heritage park and continuous green hinge

Adoption and urban services

Community life services

SPATIAL RULE
Continuous central green hinge; adaptable cross-hinges; reversible additions; ordinary routes always available.

THREE KEY AREAS | THREE DIFFERENT HINGES

JZ-HINGE / 01

One open rule set, distinct industry roles, civic interfaces, and data prerequisites

01

PROTOTYPE HINGE YARD
Full-stack prototyping / standards

- Demountable prototype rooms
- Weather-testing yard
- Public explanation gallery

PREREQUISITES
Transport, water, ecology, and Fifth Ring evidence pending

02

TRANSLATION HINGE COMMONS
University research / civic questions

- Paper-reading room
- Prototype clinic
- Talent life services

PREREQUISITES
Station works, ownership, and buildings pending

03

ADOPTION HINGE SALON
AI-native services / public adoption

- Four-quadrant walking
- Adaptable ground floors
- Adoption echo gallery

PREREQUISITES
Crossing works, company sites, and operating approvals pending

All three extents are rough provisional polygons; the figure shows no parcel, road redline, or approved construction.

COMPOUND NETWORK | CONNECT ORDINARY ROUTES FIRST

JZ-HINGE / 01

Walking, blue-green space, accessibility, human help, and time-limited AI scenarios in one hierarchy

NETWORK PRIORITY

01

Ordinary walking and accessibility

02

Shade, rest, water, and human help

03

Two service-wing links

04

Time-limited, stoppable AI scenarios

LEGEND
Blue: hinge pin. Cyan: wings. Orange: scenarios

EVIDENCE CHAIN | WHERE NUMBERS COME FROM

JZ-HINGE / 01

GeoJSON -> EPSG:4548 recomputation -> metrics.json -> figures / HTML / PDFs -> four-gate self-check

PROVISIONAL AREA

11.41 km²

CONCEPT GREEN

17.6%

PUBLIC SPACE

8.9%

HINGE NODES

12

01

GEOMETRY
9 GeoJSON files

02

RECOMPUTE
EPSG:4548

03

METRICS
known / unknown

04

DISPLAY
PNG · HTML · PDF

05

SELF-CHECK
4 gates

MUST REMAIN UNKNOWN
FAR · building height · statutory coverage · statutory green ratio · road redlines · utility capacity · ownership · engineering feasibility

Provisional polygons do not block content scoring, but must never appear as official boundaries.

TWELVE SCENARIOS + SIX PERSONAS + THREE PHASES

Every scenario requires an ordinary alternative, human help, an accountable operator, stop conditions, and an exit path

01 Edge energy and latency	02 Accessible robot co-test	03 Multilingual model red team	04 Paper translation clinic
05 Continuous accessible navigation	06 Park comfort advice	07 Care resource assistant	08 AI-native shop
09 Railway heritage guide	10 Cycle-parking coordination	11 Contribution honour wall	12 Night quiet mode

PERSONAS: older adult, child, wheelchair user, night-shift worker, researcher, neighborhood merchant.
LANDMARKS: north Test Gate, central Translation Table, south Adoption Hall.
PHASING: low-risk connections → reversible operations → professional development after official data.
