

京张智脉 JING-ZHANG INTELLIGENCE SPINE

Overall design area - one belt, one axis, three cores, two wings, multi-node network

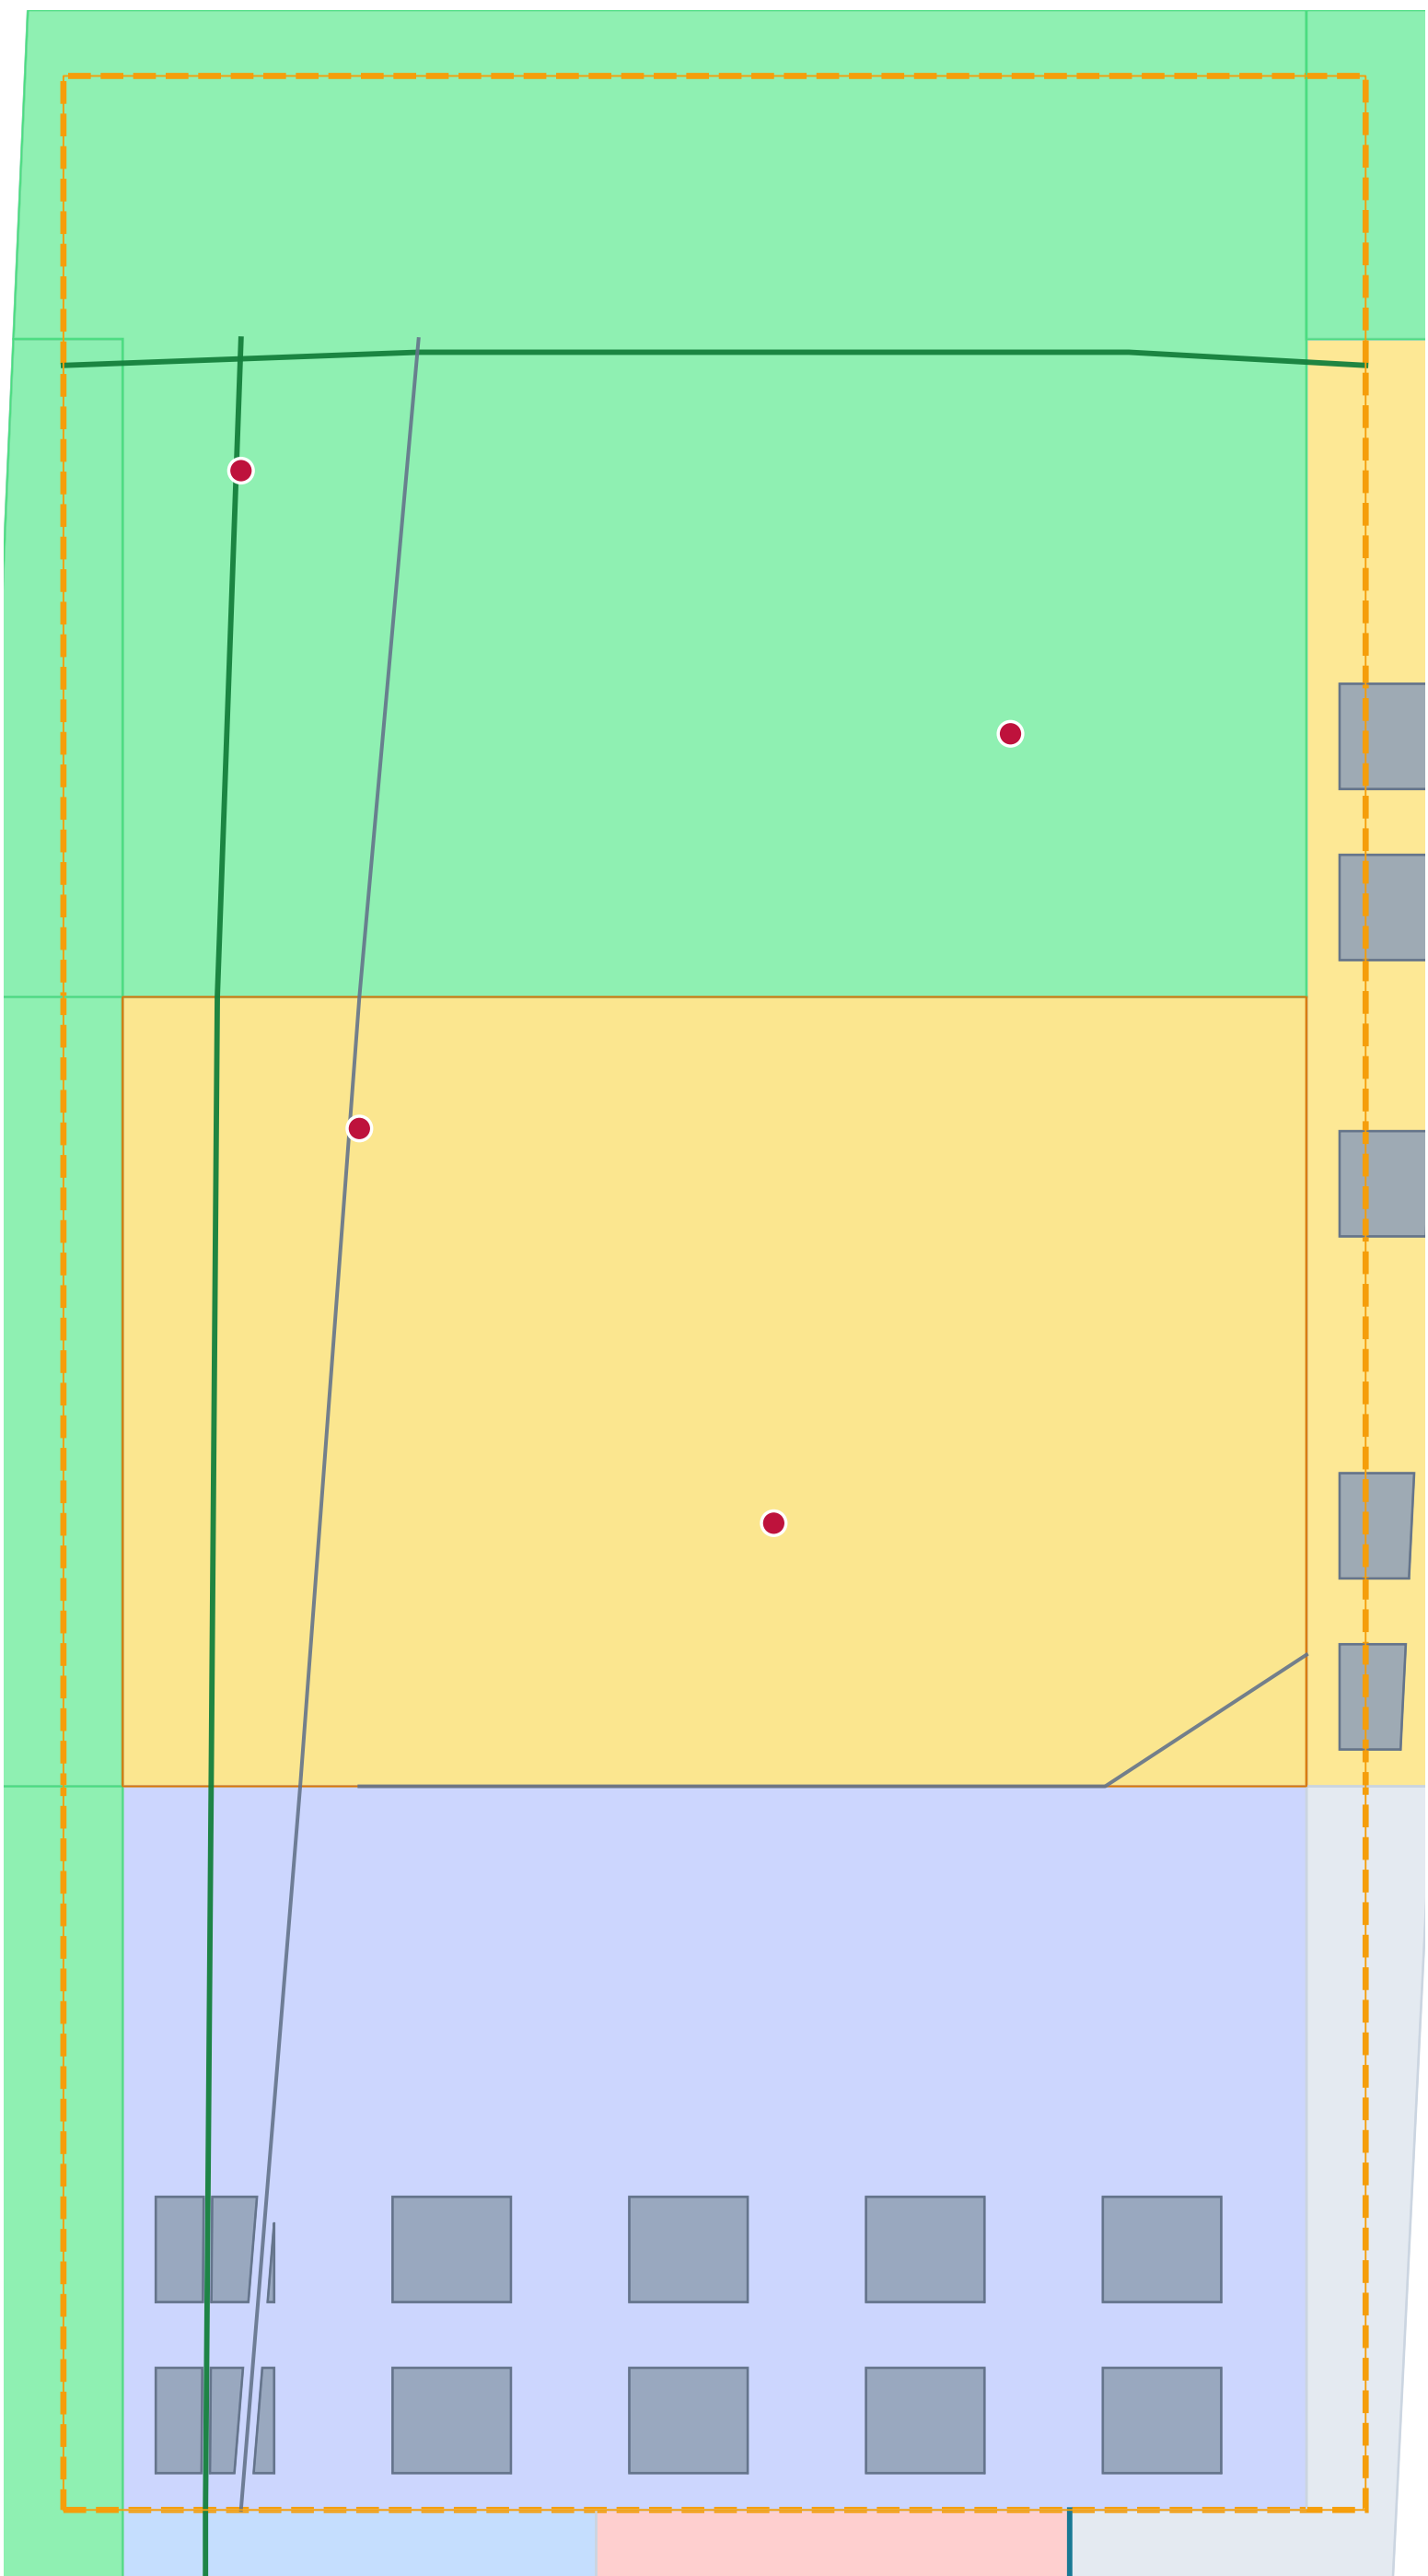

Spatial structure

Belt: Spine Greenway (heritage corridor)
Axis: Xueyuan–Zhichun innovation sourcing
Cores: Core-Source / Core-Origin / Core-Confluence
Wings: Zhongguancun service · Xiaoyuehe scenario (concept interfaces)
Nodes: 14 AI scenario nodes (Smart Points)

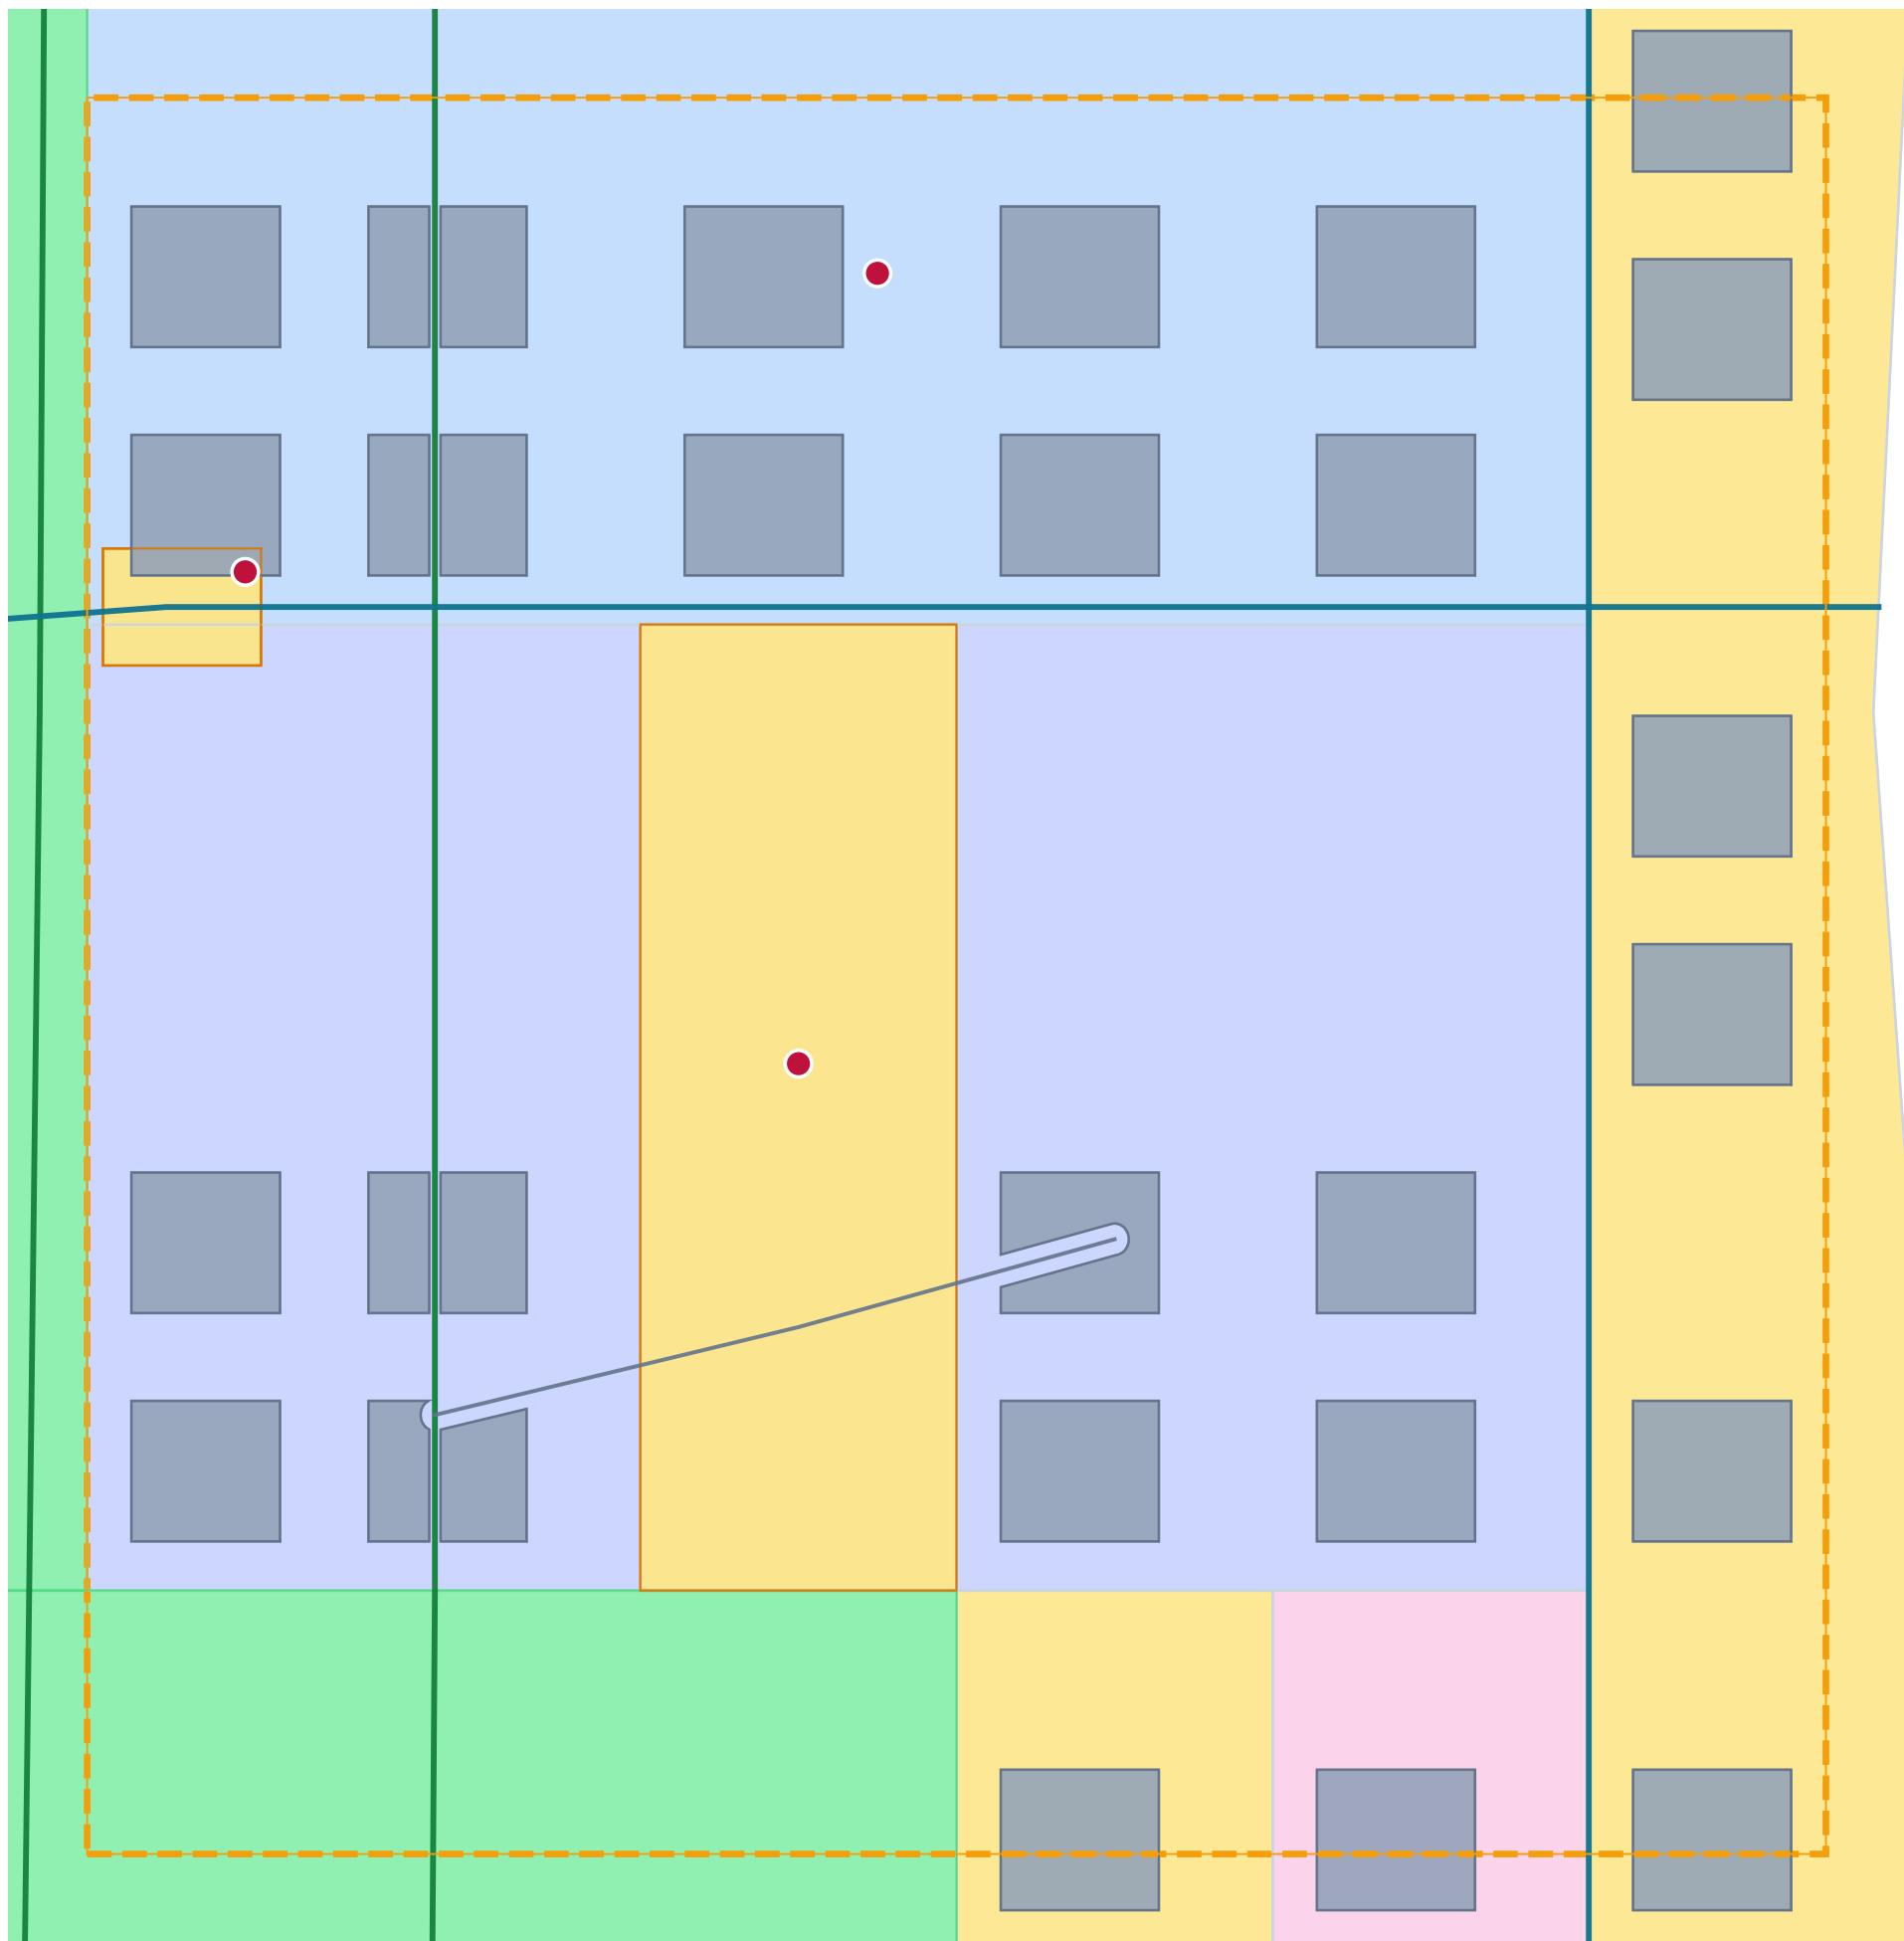

Core metrics

site_area = 11,712,825 m²
green_ratio = 0.260
public_space_ratio = 0.061
road_ratio = 0.026
greenway_length = 18,429 m
scenario_nodes = 14
key_areas = 3

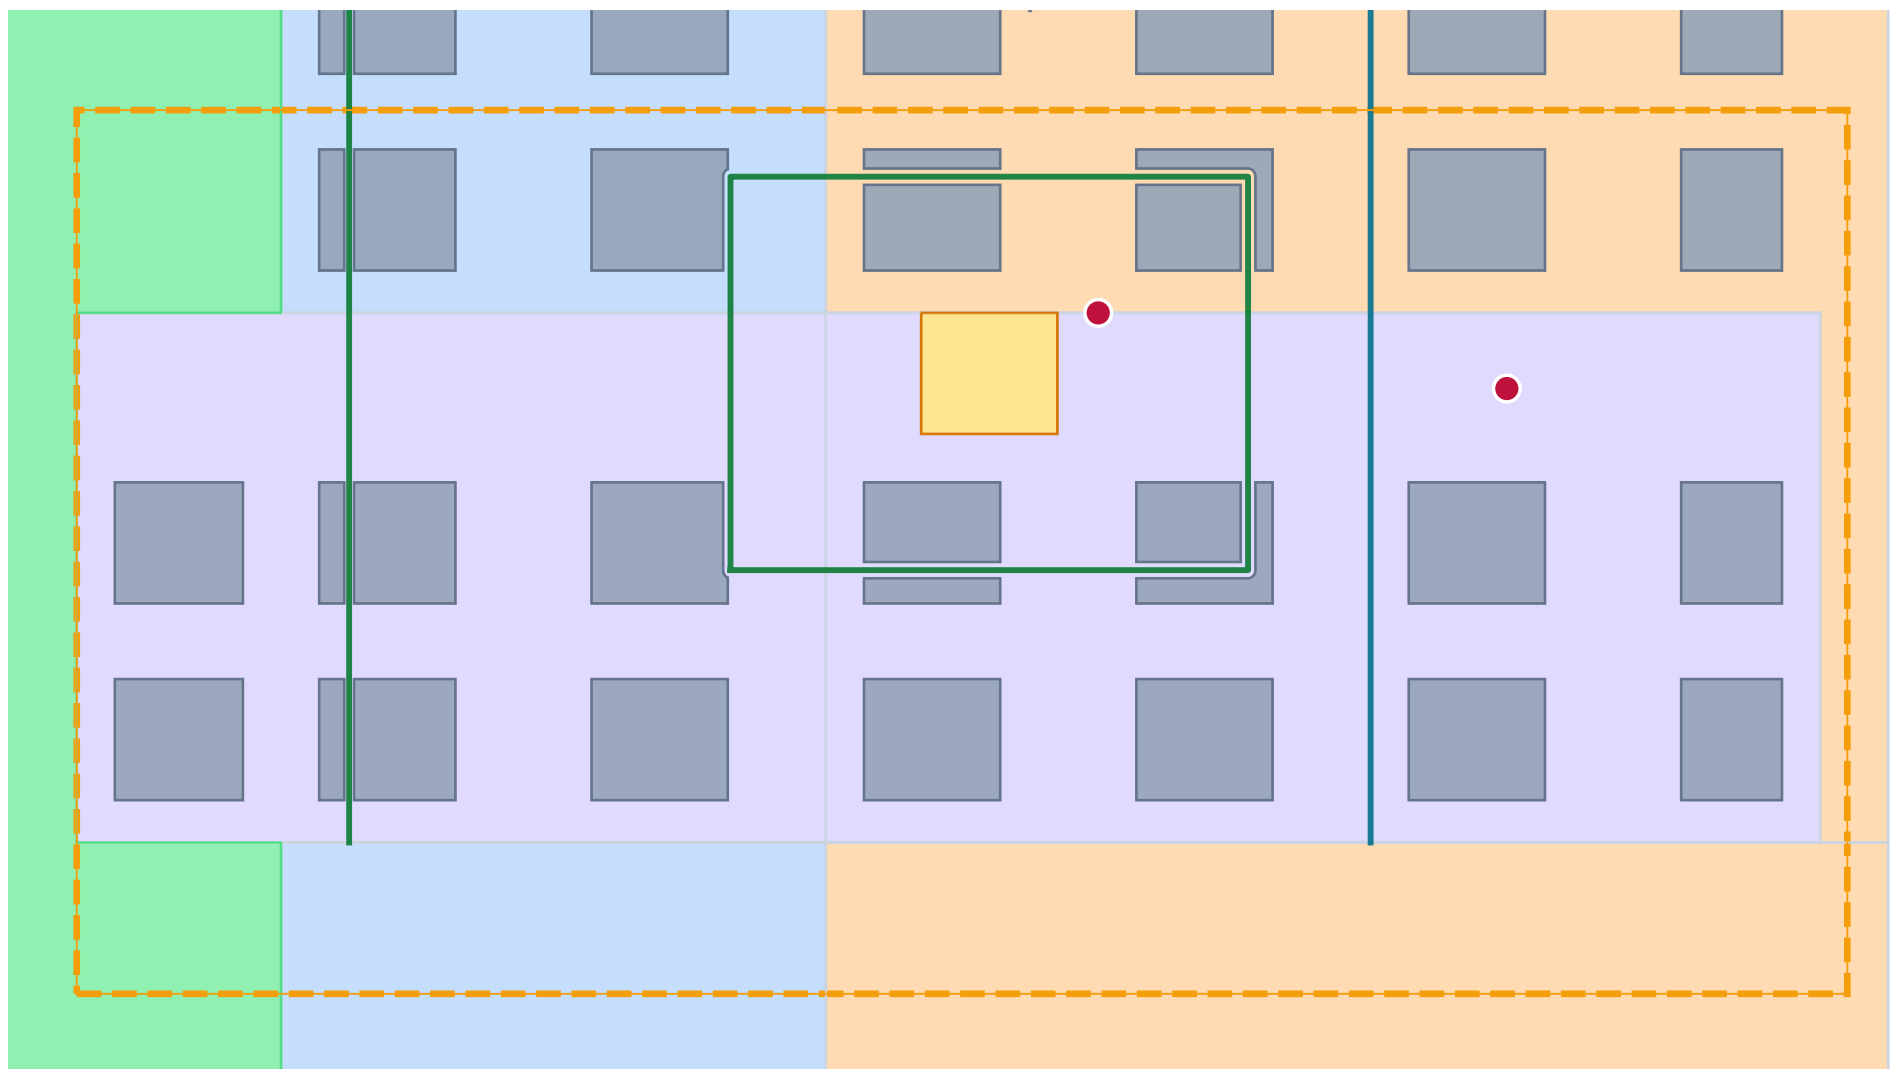

Zhongzhiyuan • Core•Source

Origin Community • Core•Origin

Dazhongsi • Core•Confluence

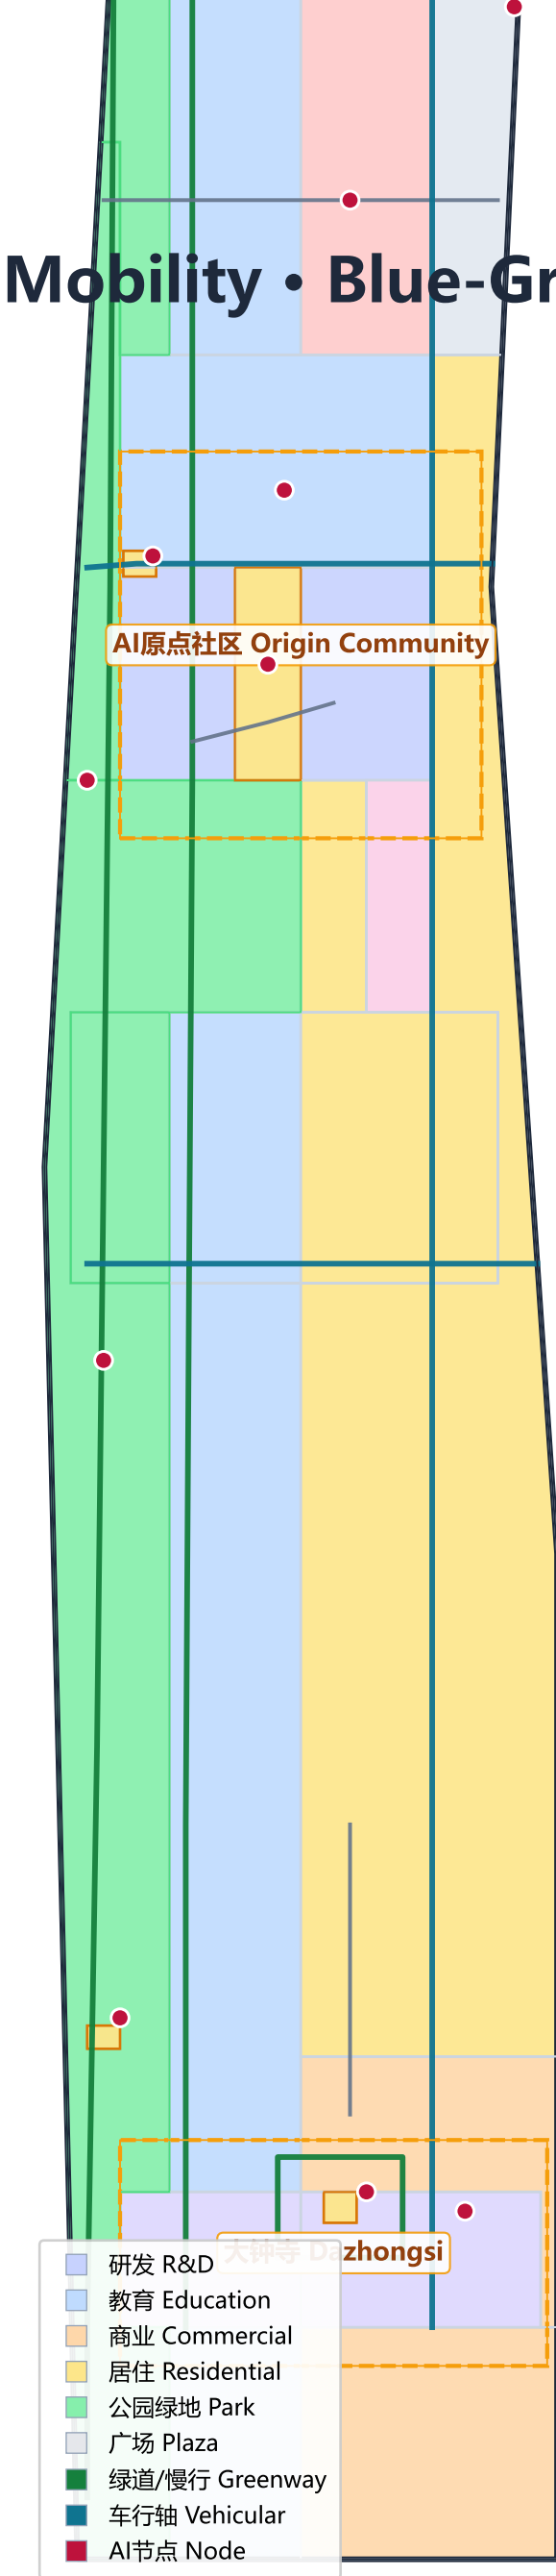

Garden-style full-stack autonomy: Qinghe interface, evaluation plaza, T1 sandbox, T2 standards workshop.

Near-campus conversion community: open-source hall, central park, Wudaokou station integration, low-disturbance renewal.

Urban intelligent economy: four-quadrant walk ring, agent market, data-element lounge.

Mobility • Blue-Green • Urban Character

Blue-green skeleton

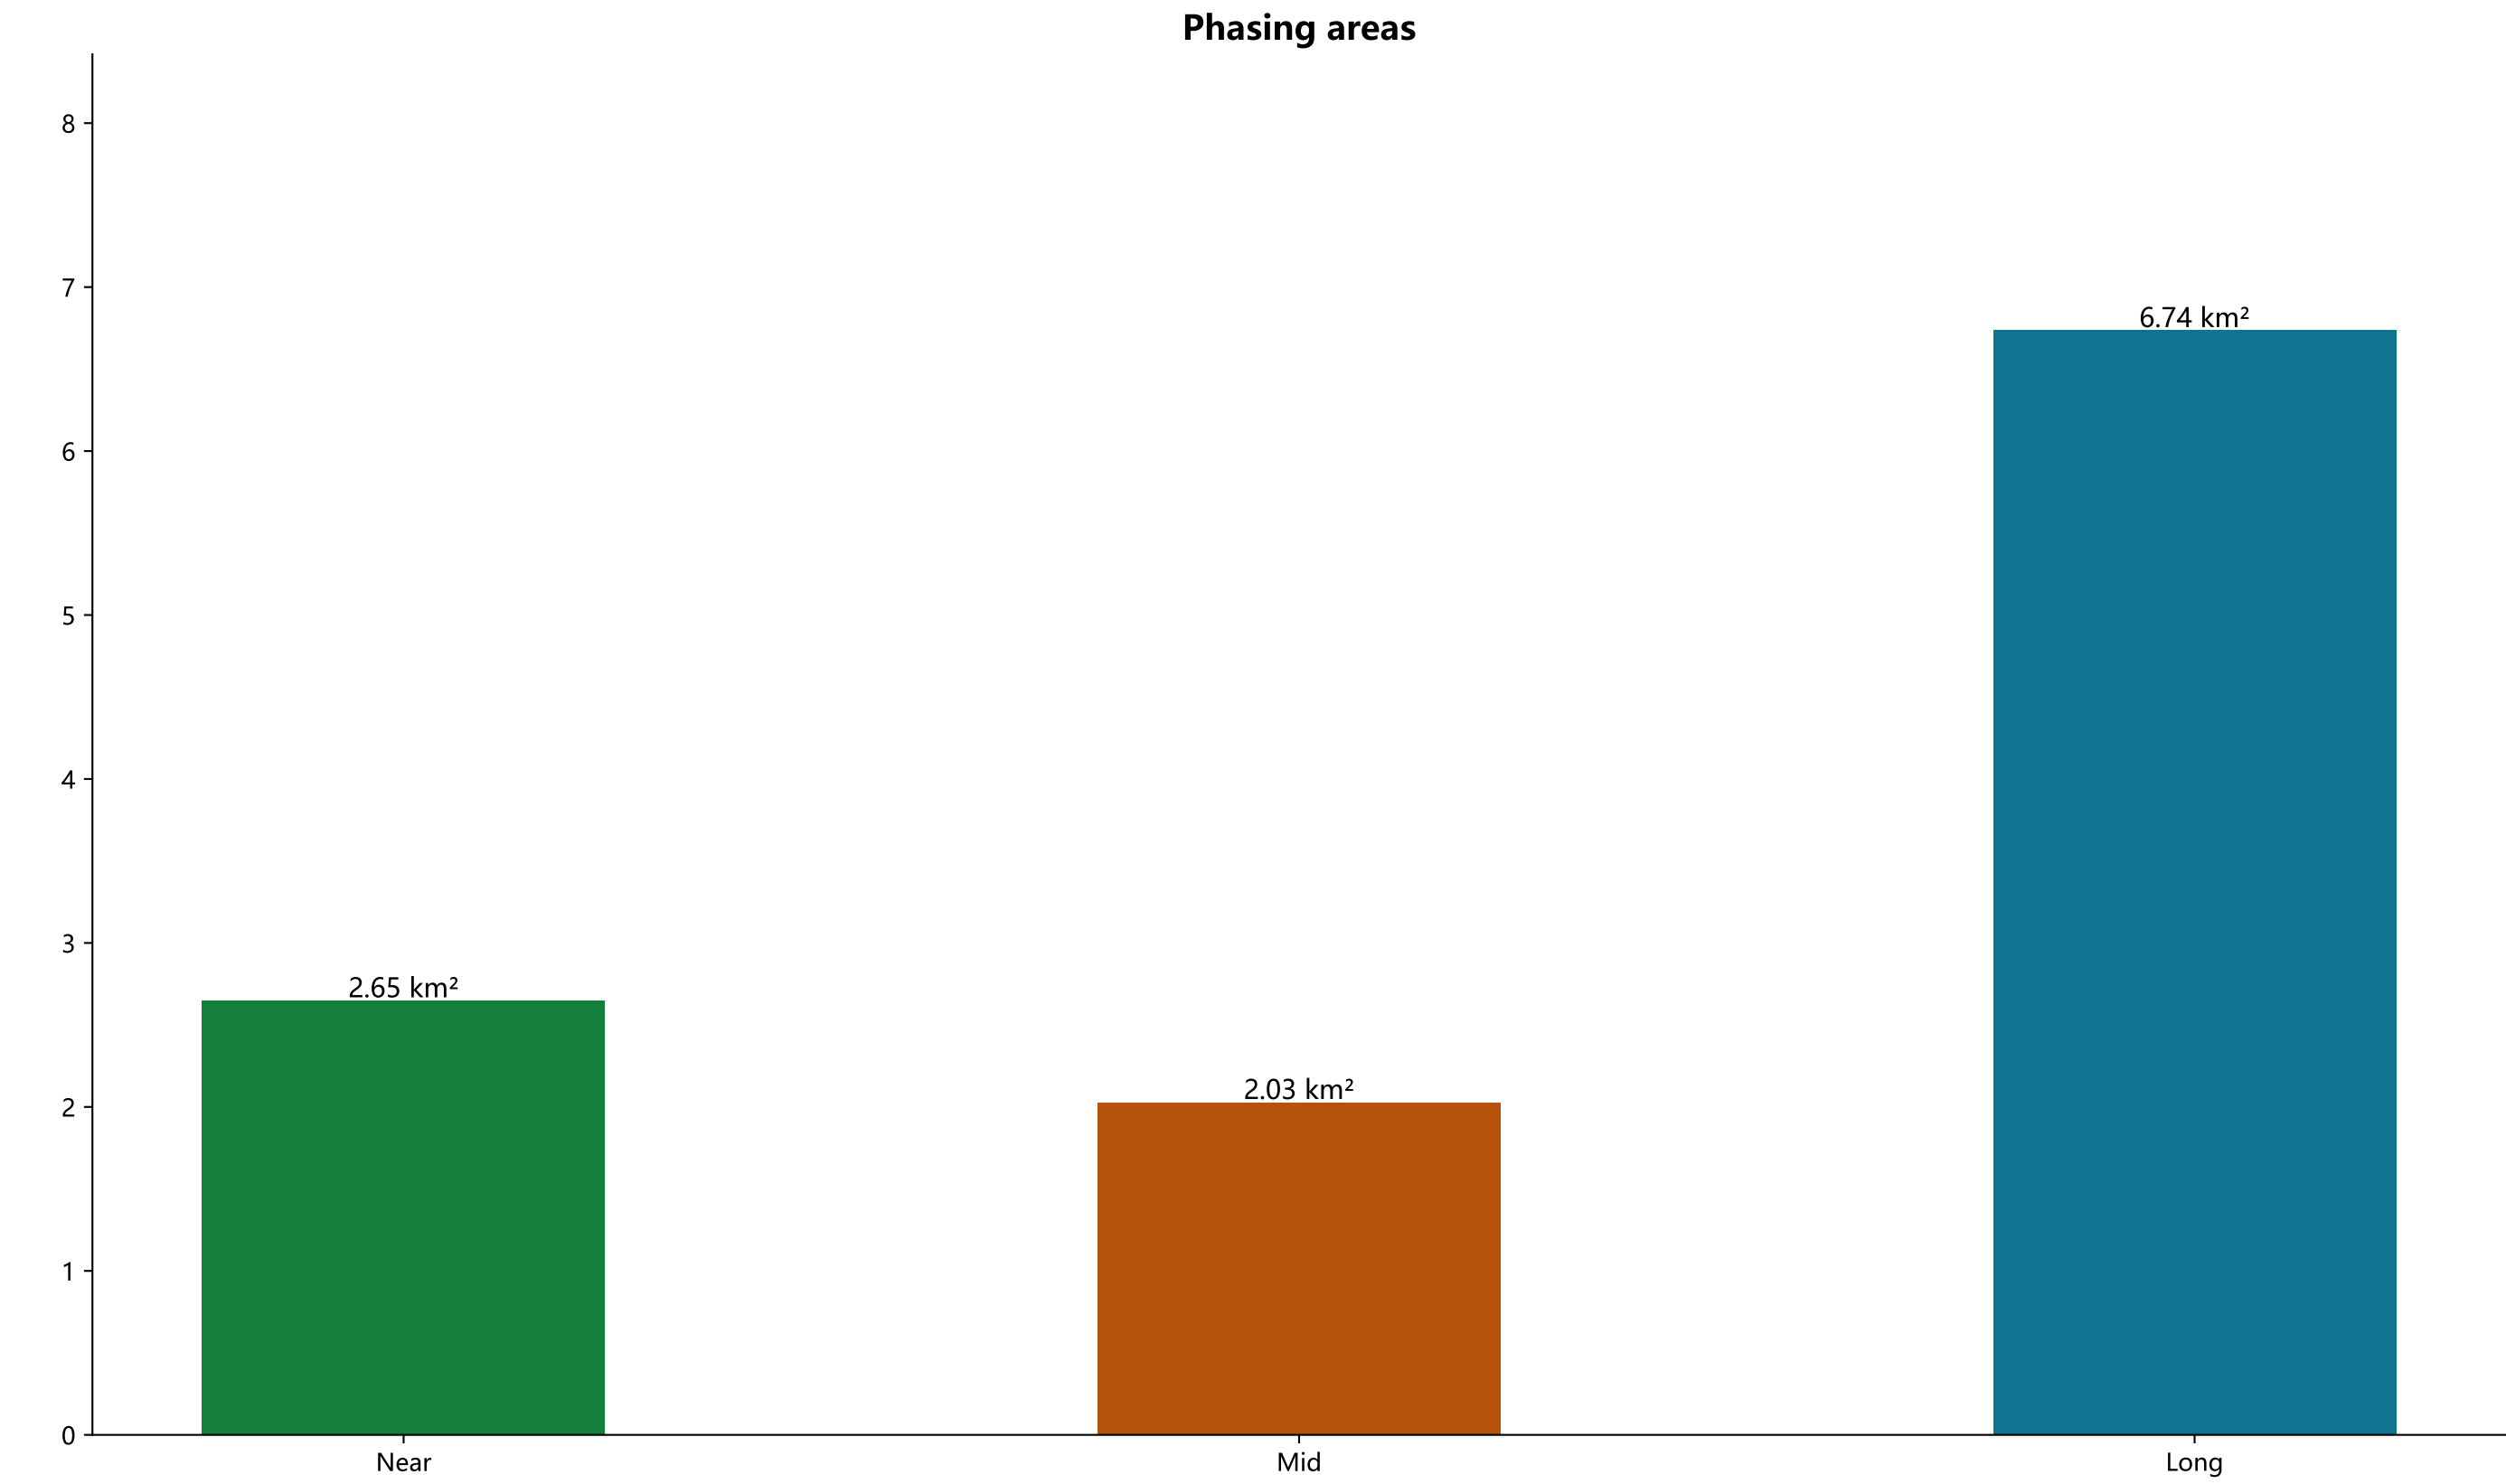

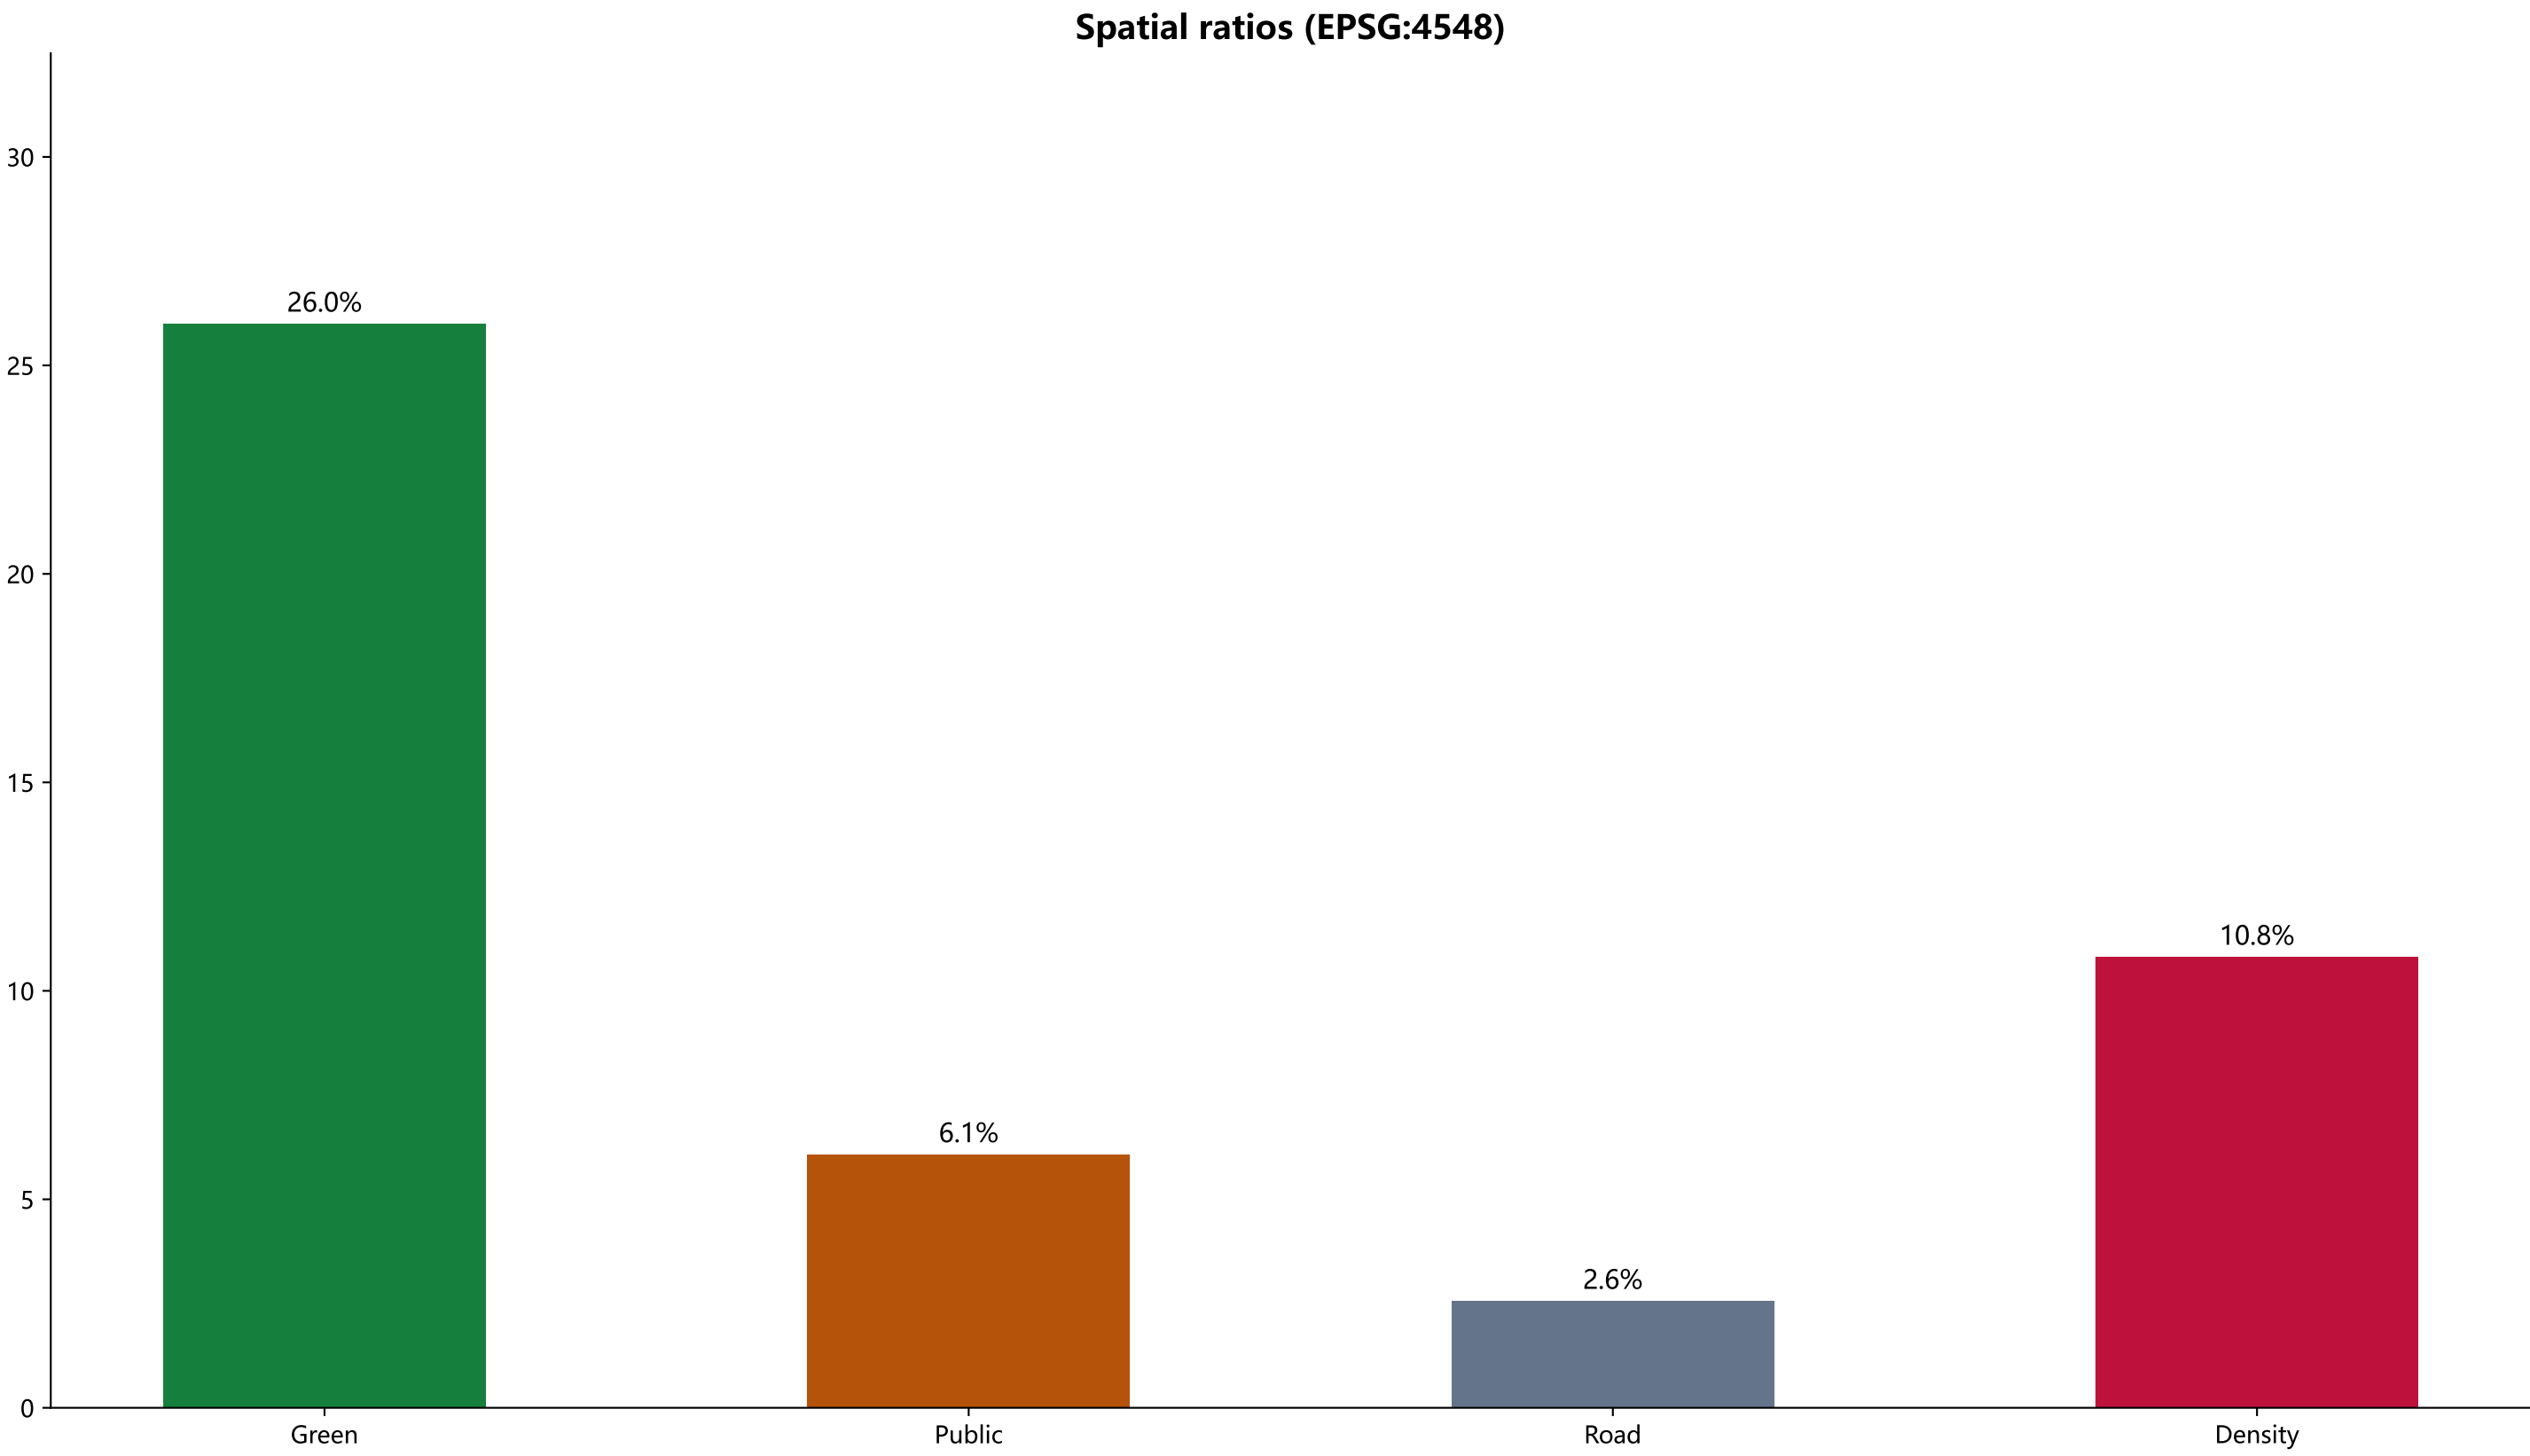

The Spine Greenway runs north-south linking the Qinghe interface, Origin Central Park and Dazhongsi station plaza; public space is organized in four tiers.

AI pilgrimage landmarks

- 1 Origin Monument + Agent Honor Wall 2 Open-Source Gallery
3 Gateway of the Spine (N5R) 4 Dazhongsi AI Epoch Plaza

Cultural narrative

Three chapters of self-reliance: 1910 railway → 1980 technology → 2026 AI; signage motif of rail-sleeper-circuit; bilingual international narrative.

Operations

Global AI Developer Pilgrimage Week (Aug) · Jing-Zhang AI Innovation Festival · quarterly Scenario Open Days · monthly Open-Source Nights · Origin Forum · Zhongzhiyuan Grand Prix; developer community ties contribution points to the honor wall, scenario opening uses negative lists and sandbox licensing, and international communication converts via the Pilgrimage Week and Festival.

Evidence chain

Public sources → 9 GeoJSON layers → EPSG:4548 metrics → three matrices → four self-check gates → PR preflight; regulatory, ownership, utility and heritage conditions are marked to-be-confirmed.
