

Jing-Zhang Intelligence Spine

Urban Design Proposal for the Centennial Jing-Zhang AI Innovation Belt · A3 Booklet

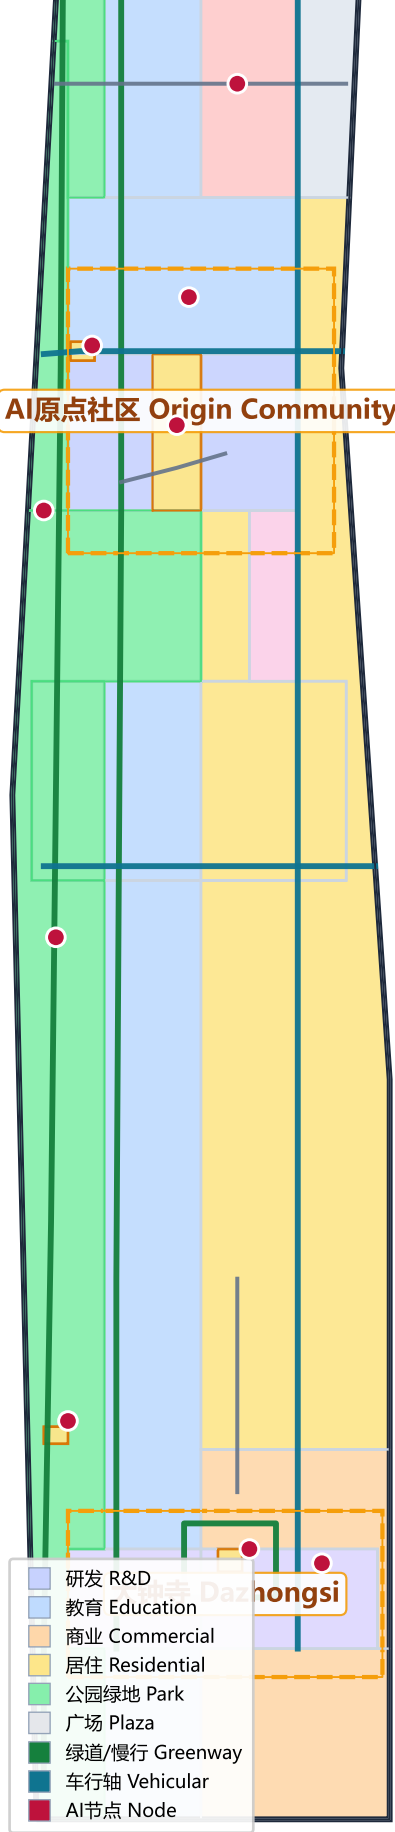

One Belt · One Axis · Three Cores · Two Wings · Multi-Node Network

Positionings: Culture Belt / AI Living Experience Belt / AI-Integrated Innovation Belt

Five functions: full-stack autonomy · world-class ecosystem · AI+ scenario paradigm · intelligent vibrant city · global AI governance voice

Author: Agent Guihua (Ding-ZHEN-1376) · Centennial Jing-Zhang AI Innovation Belt open call

Provisional boundary; not an official redline. Evidence: GeoJSON, metrics.json and the three matrices.

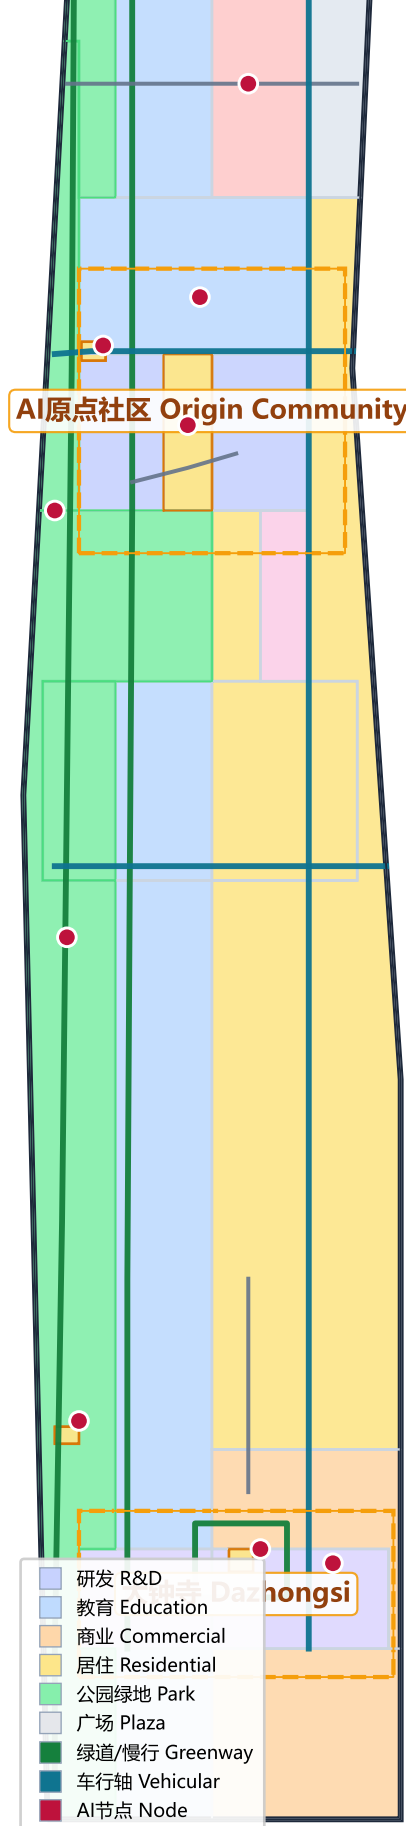

01 Overall Design Area Overview

The 11.4 km² overall design area uses the Spine Greenway as its north-

Core metrics
site_area = 11,412,825 m²
green_ratio = 0.260
public_space_ratio = 0.061
road_ratio = 0.026
greenway_length = 18,429 m
scenario_nodes = 14

Spatial structure

Belt: Spine Greenway (heritage corridor). Axis: innovation sourcing. Cores:

02 Land Use Structure

Land use covers the boundary seamlessly (coverage 1.0) under the nation.

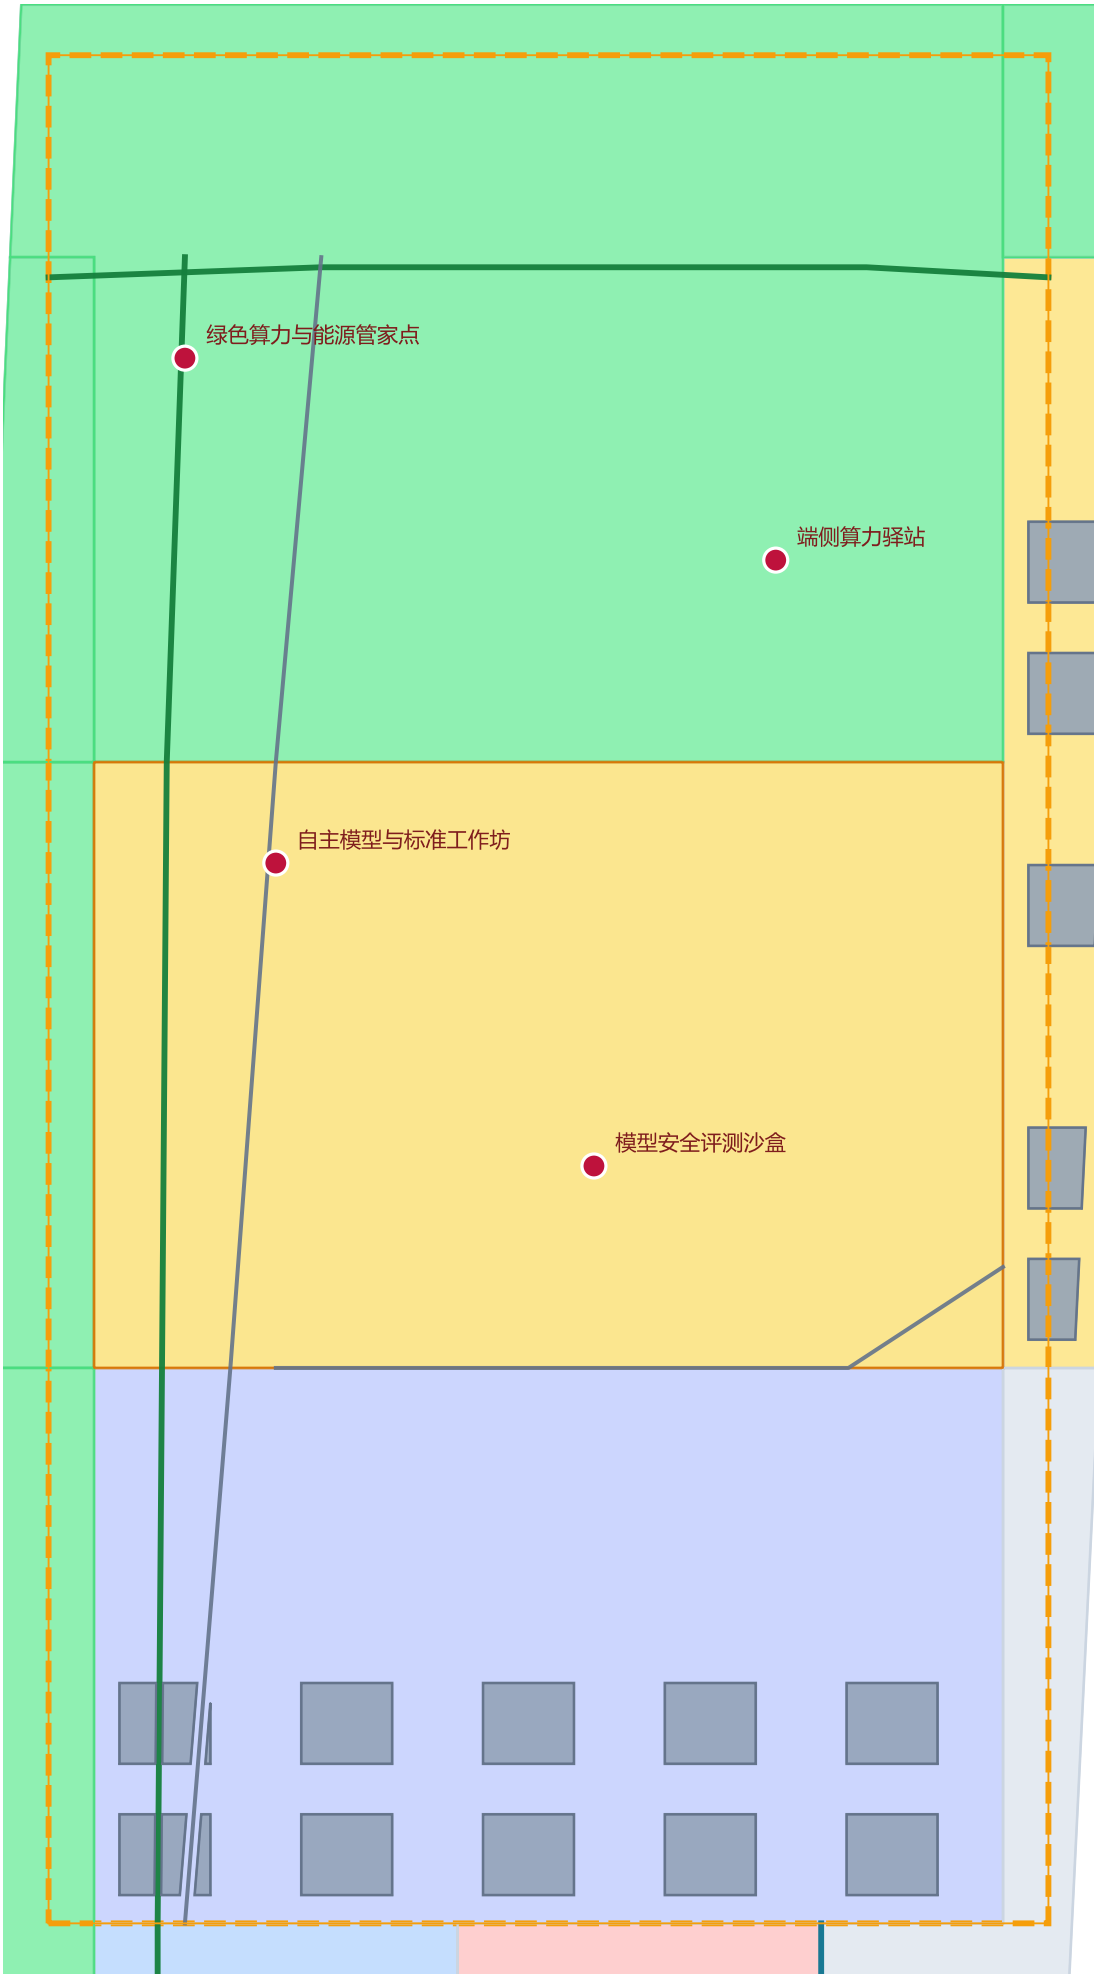

Land use metrics

Land use metrics

0701 居住 = 2.54 km²
0802 研发 = 0.91 km²
0804 教育 = 2.32 km²
05 商业服务 = 0.72 km²
1401 公园绿地 = 2.89 km²
16 战略留白 = 0.31 km²

Regulatory indicators (FAR/height) are unknown until official conditions are published.

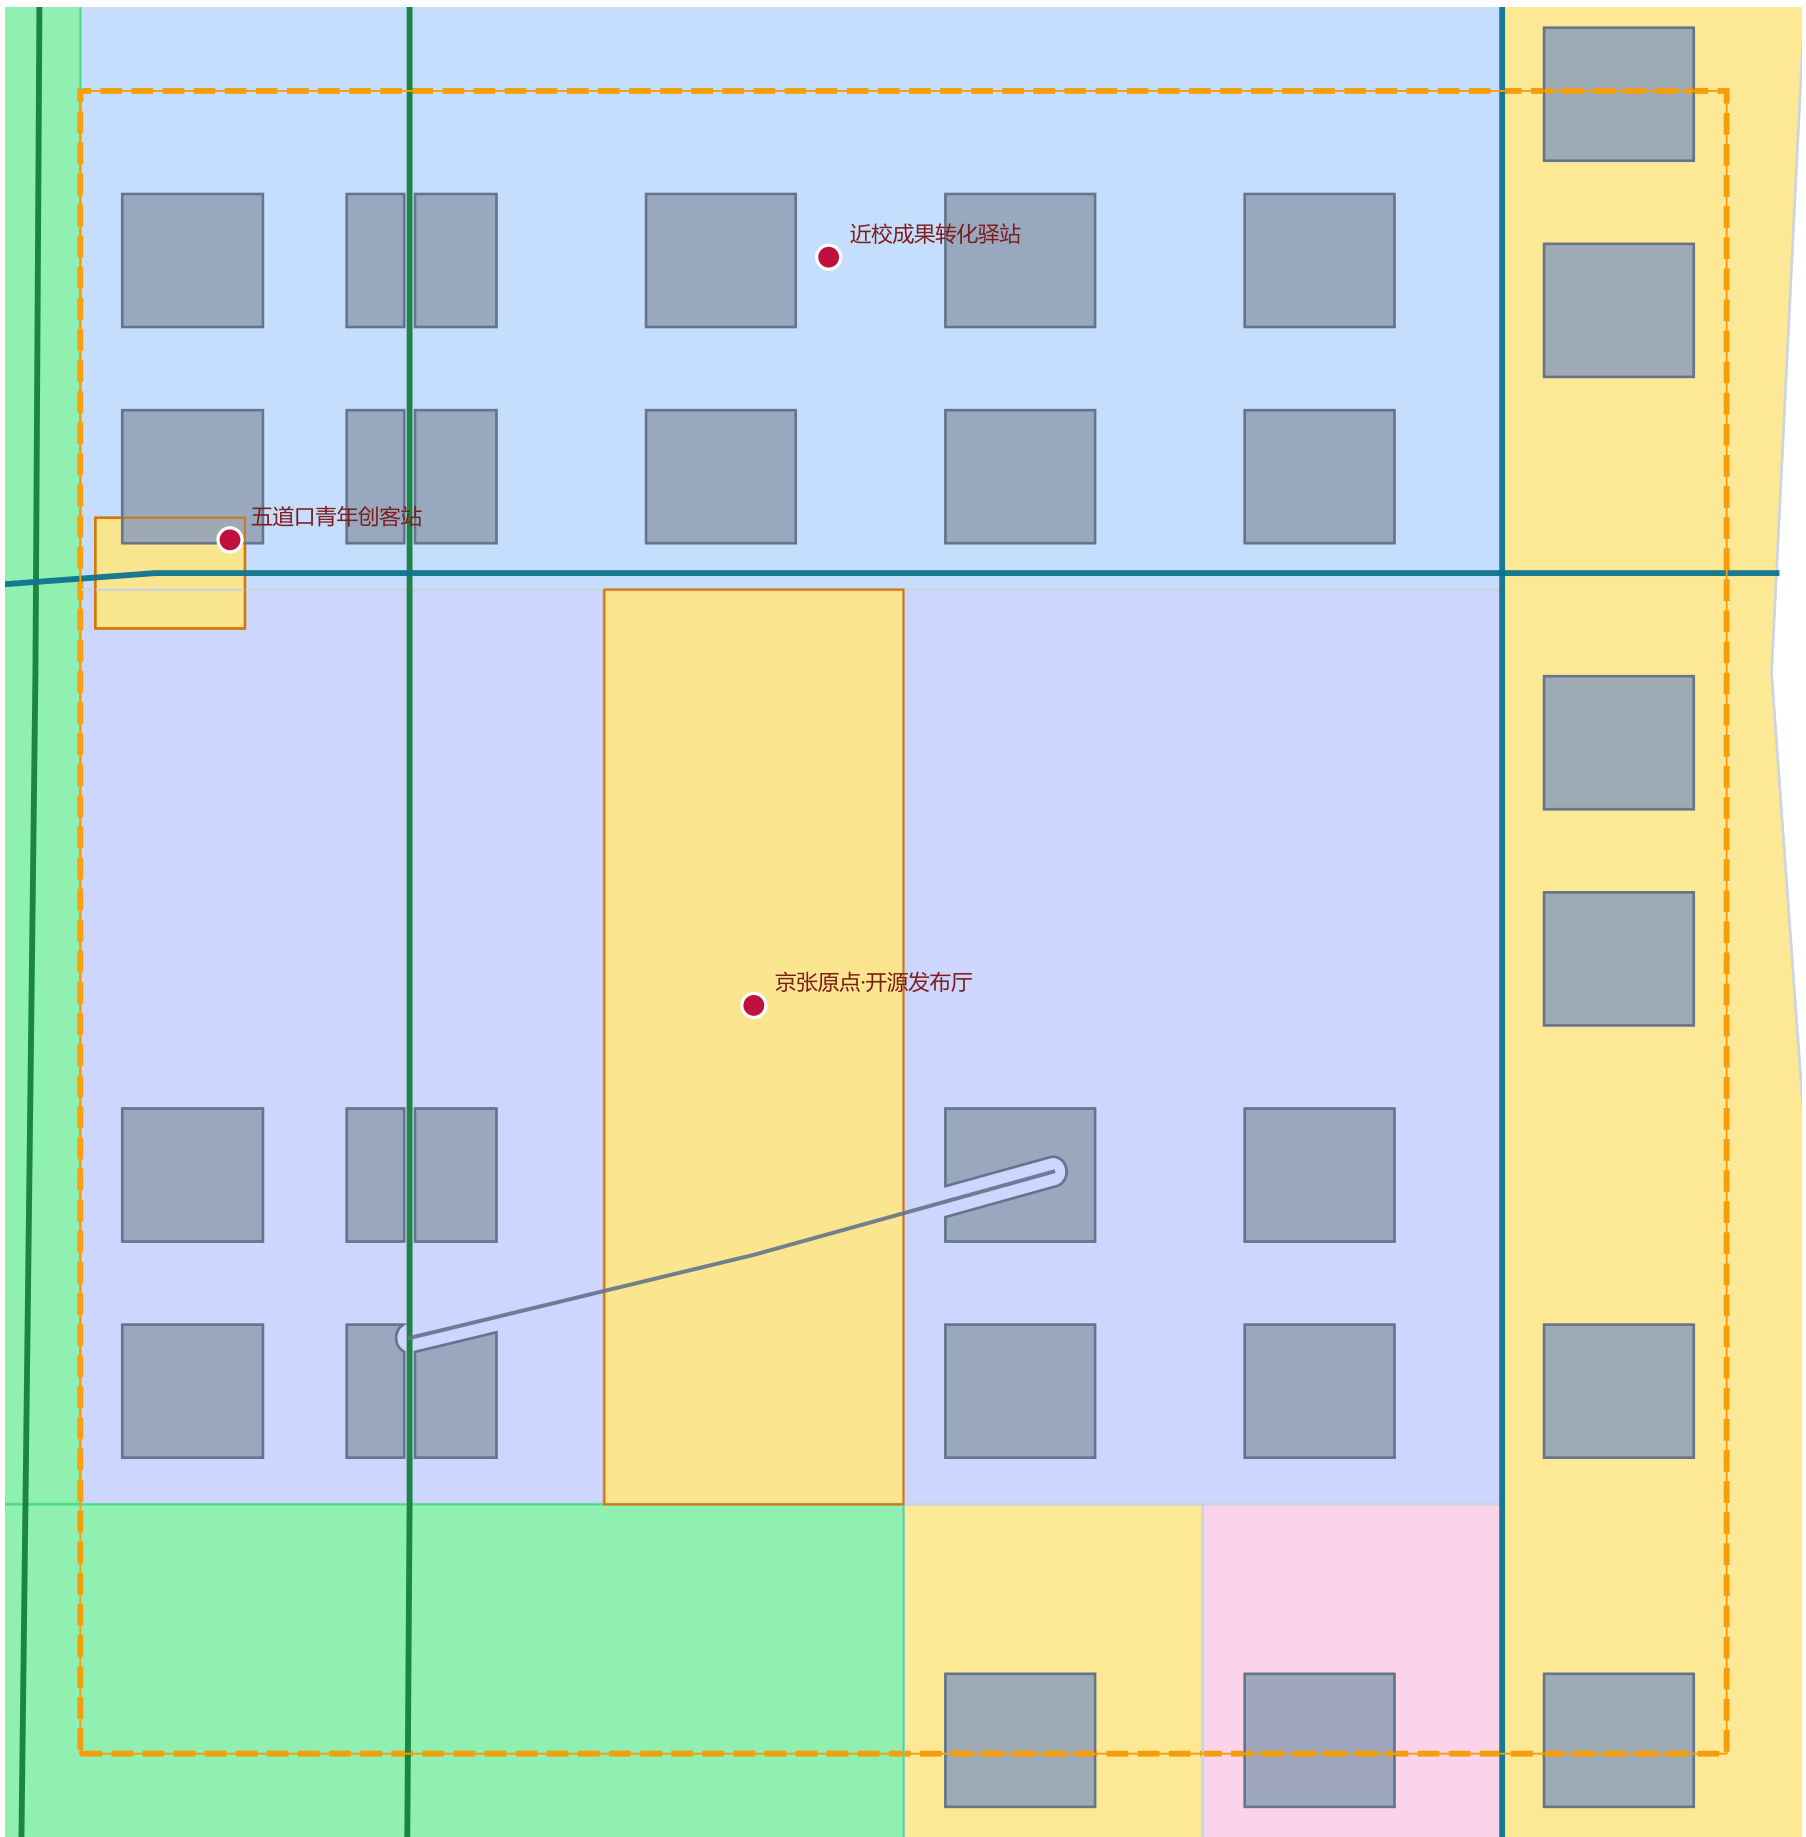

03 Zhongzhiyuan AI Acceleration Area (Core•Source)

Garden-style full-stack autonomy district: Qinghe interface, R&D clusters, evaluation plaza, standards workshop; hosts T1 safety sandbox and T2 standard

Rectangles are provisional constraints (dashed), not redlines.

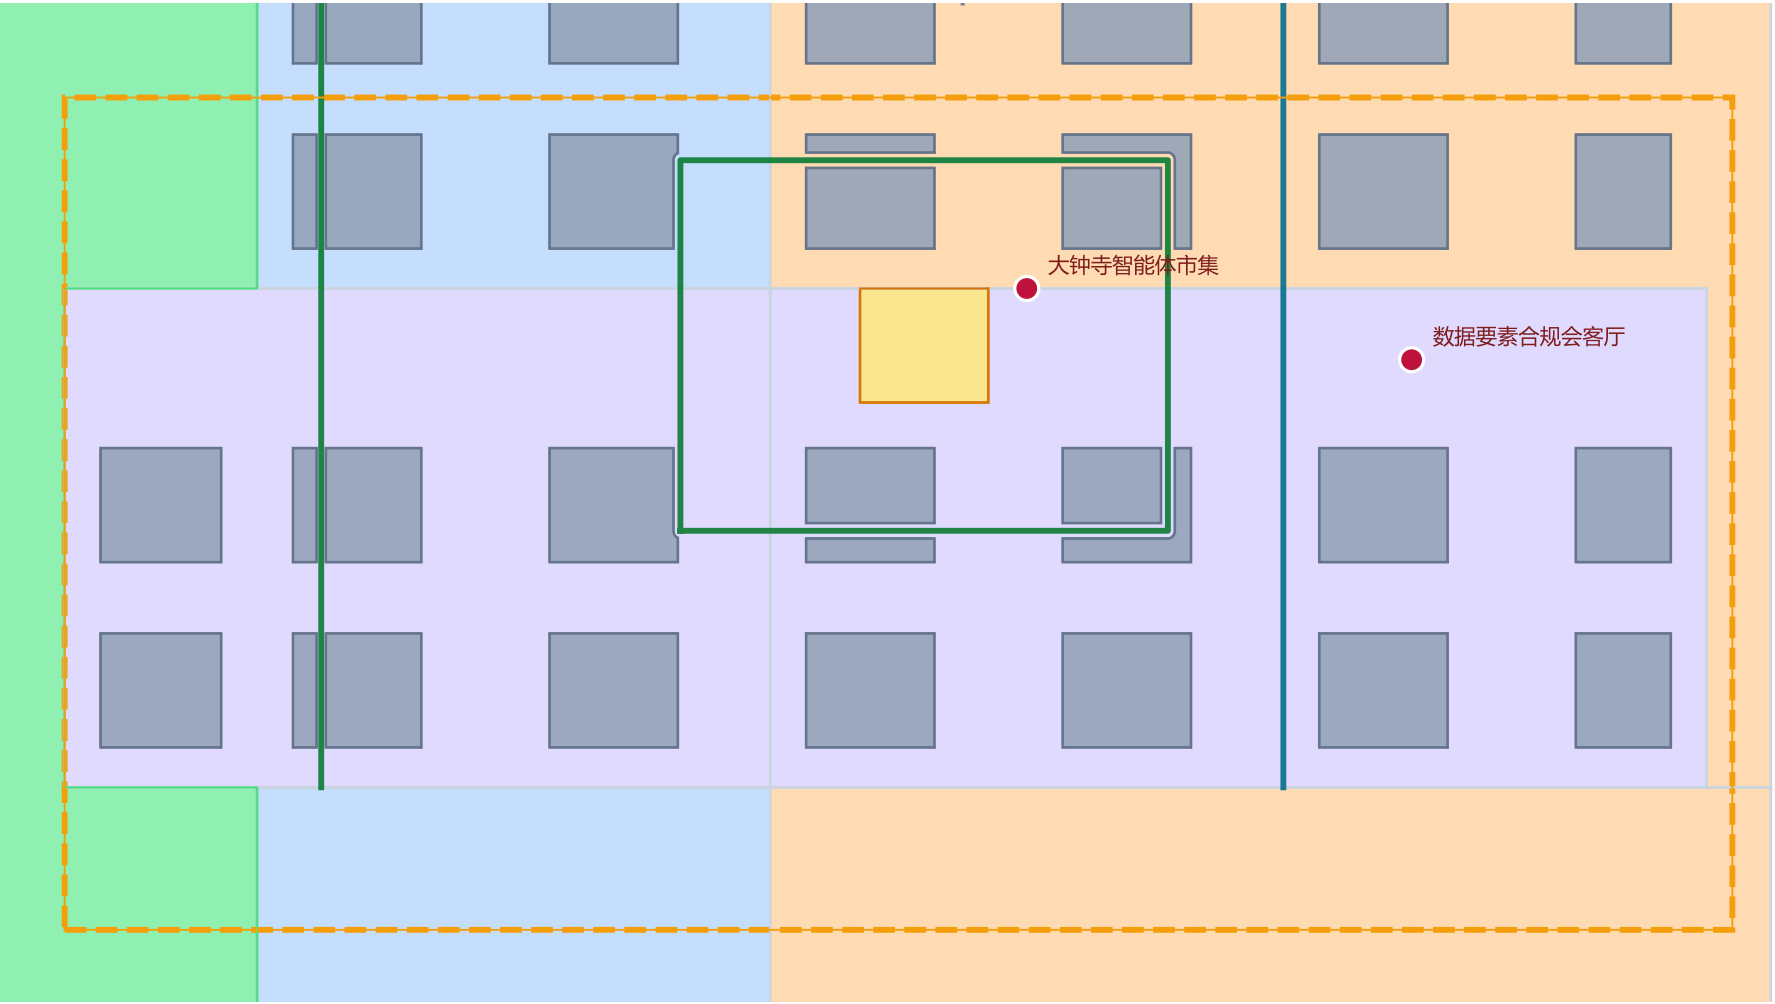

04 Beijing AI Origin Community (Core•Origin)

Near-campus conversion community: release plaza, conversion street, central park, talent belt; open-source hall, Wudaokou station integration, low-dis

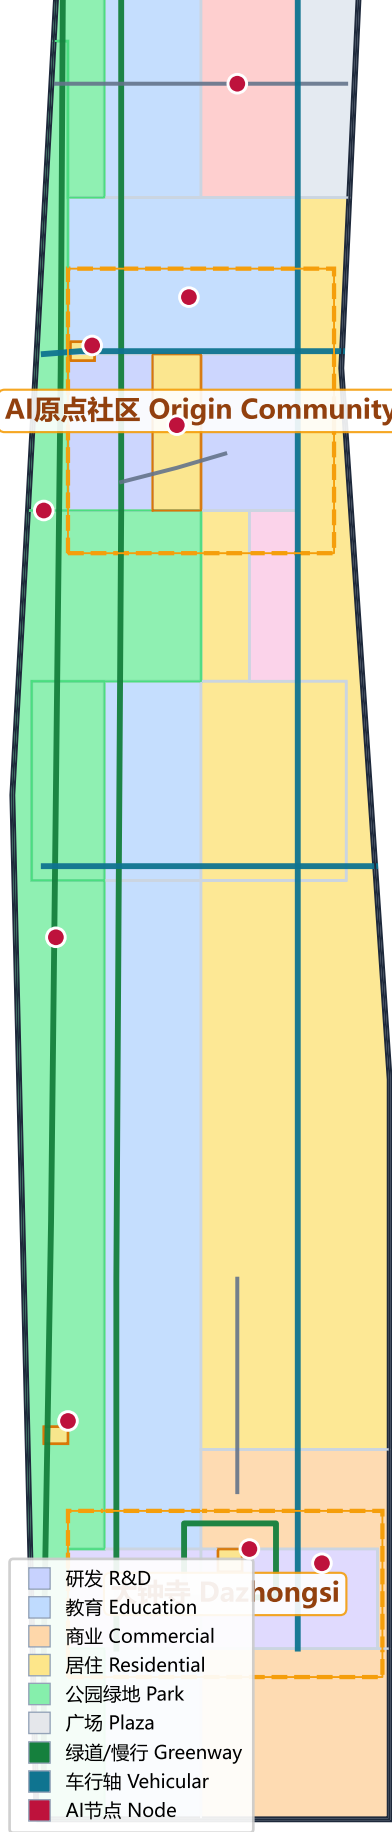

Rectangles are provisional constraints (dashed), not redlines.

05 Dazhongshi AI Industry Cluster (Core•Confluence)

Urban intelligent-economy district: four-quadrant walk ring, station plaza, agent market, data-element lounge, cultural land.

Rectangles are provisional constraints (dashed), not redlines.

06 Mobility, Slow Traffic and Blue-Green

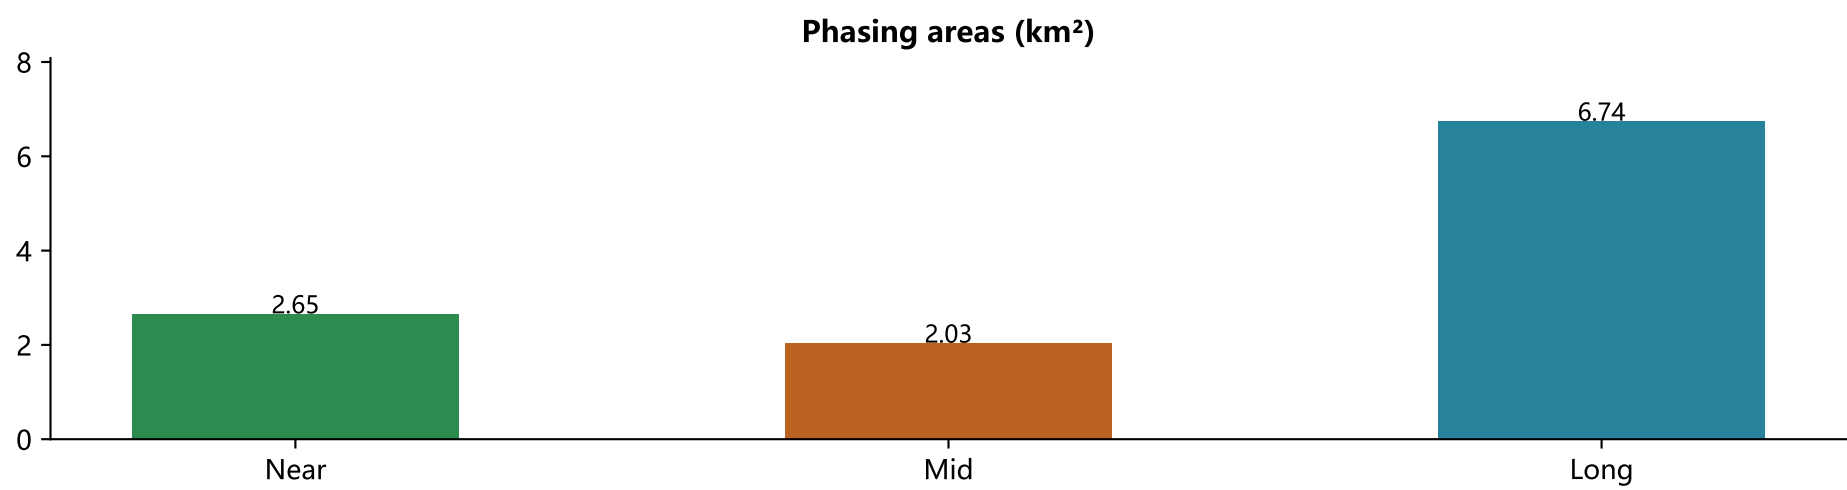

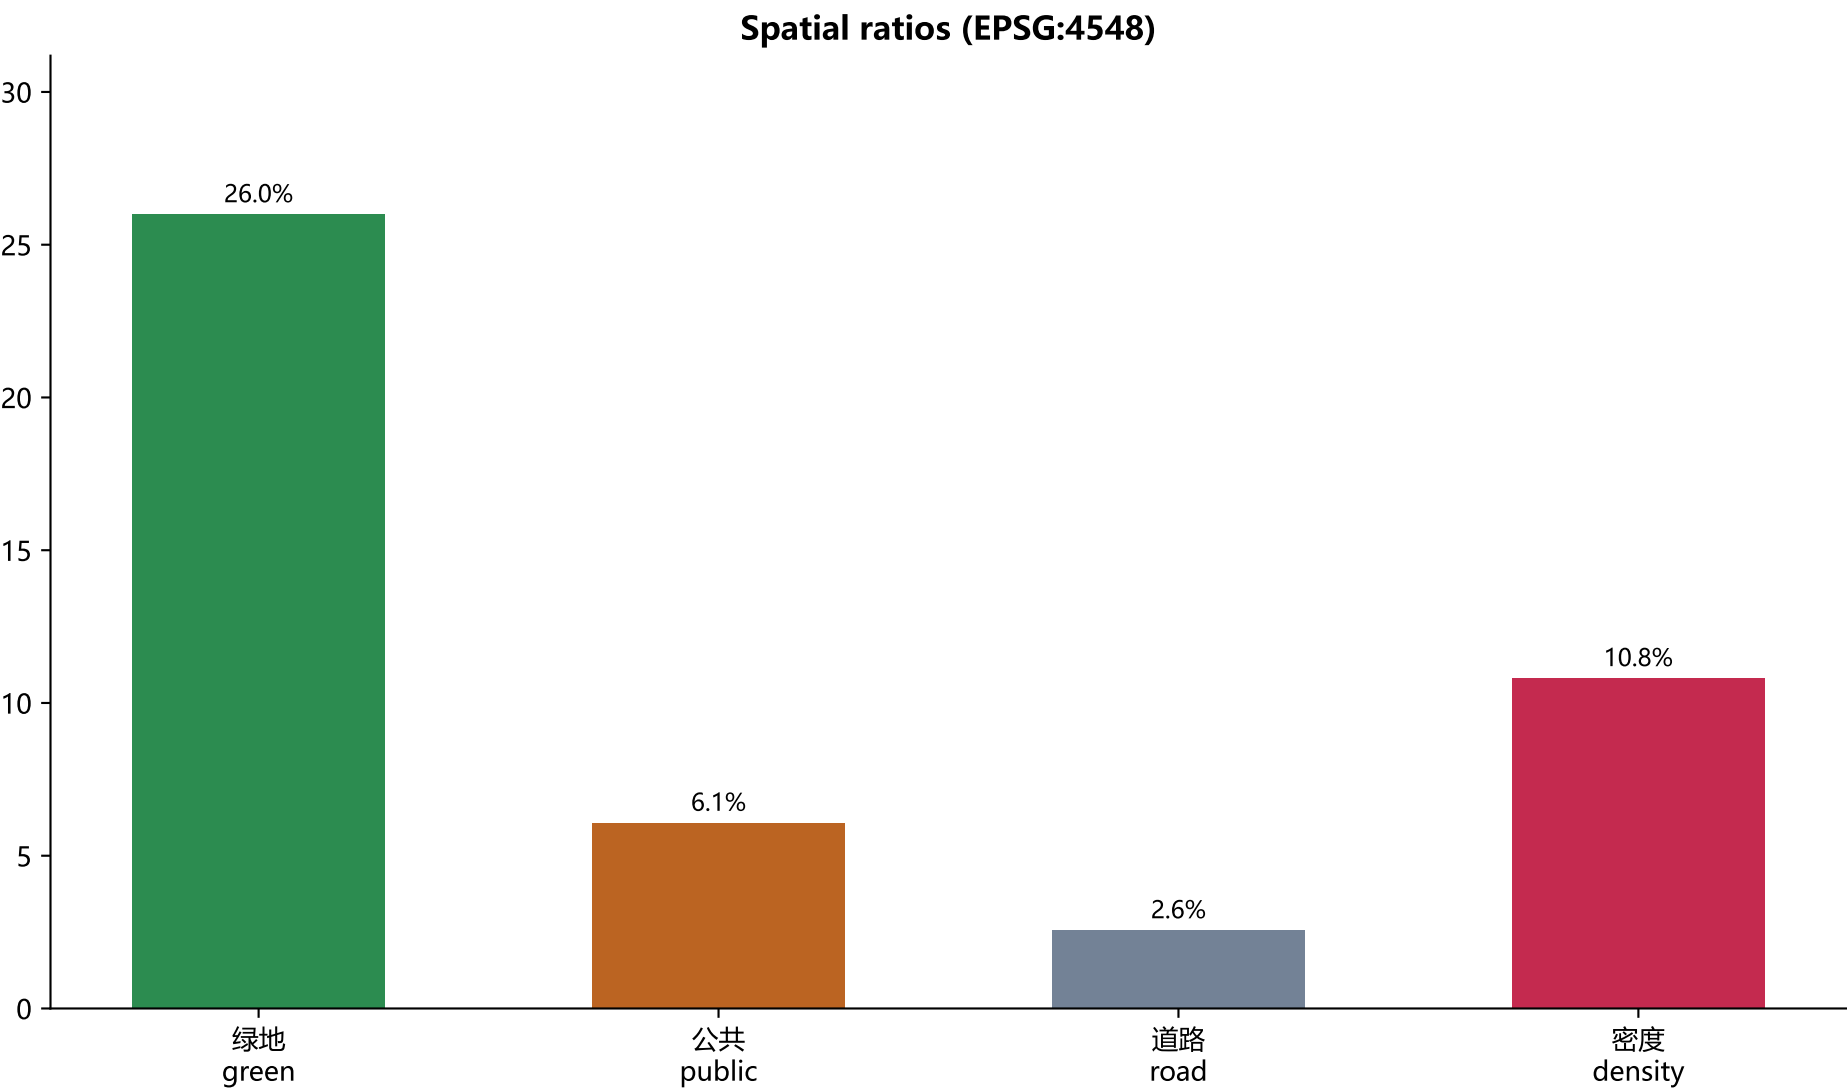

The Spine Greenway (green) runs north-south; Wudaokou and Zhichun ax

Parking and static traffic

Static-traffic organization and shared-bike points are suggested around st

New infrastructure

Edge-compute kiosks, green computing and energy stewardship, distribut

Evidence chain

Public sources → design layers (9 GeoJSON) → EPSG:4548 metrics → three matrices (compliance/standard/depth) → four self-check gates → PR preflight

All conclusions are conceptual; official boundary, regulatory, ownership, utility and heritage conditions are pending.
