

WAKE THE CORRIDOR / 京张醒楼

The park is open — now wake the buildings: stock regeneration driven by an open space ledger

Edmunds · v1.0
Provisional boundary · concept

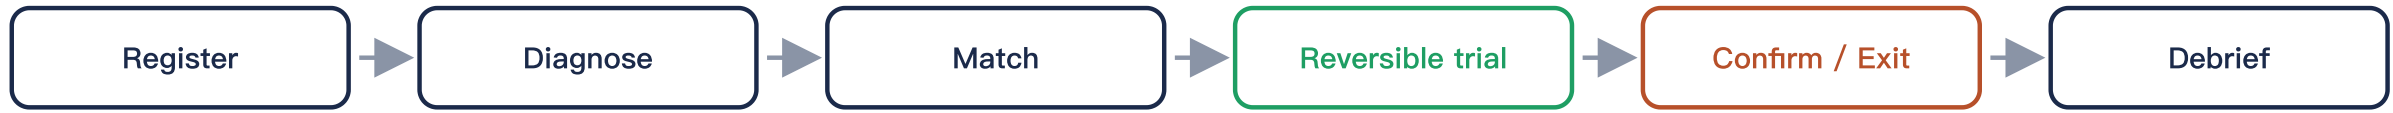

Overall concept: one ledger, one line, three yards, many points

总体概念图：一账、一线、三场、多点

京张醒楼 / WAKE THE CORRIDOR
FIG 01

The six-state wake loop · 醒楼六态循环

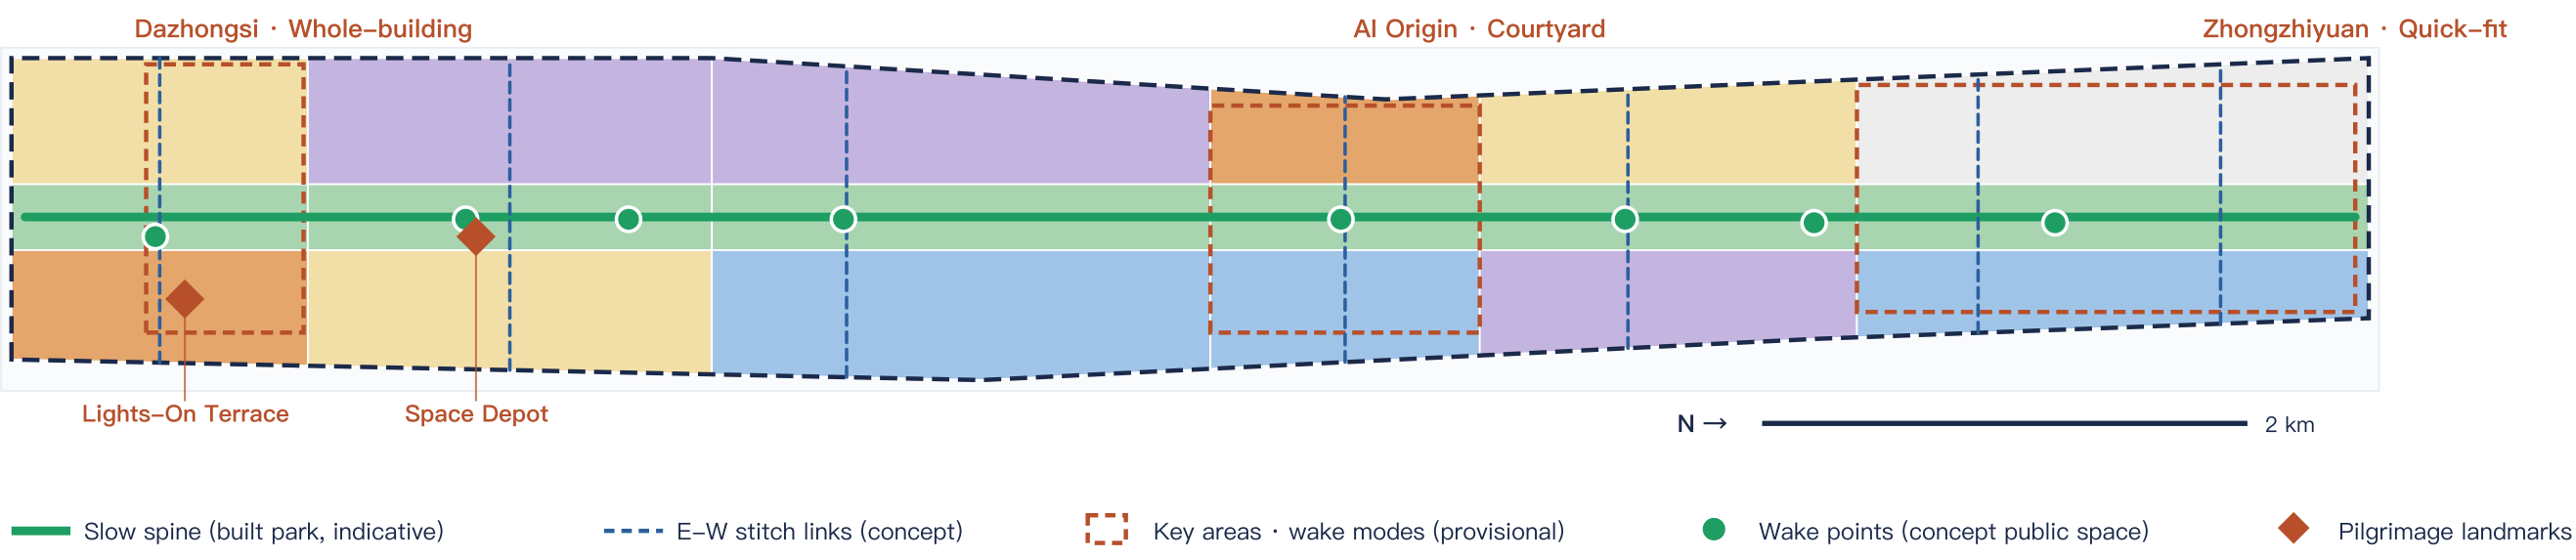

AI: retrieve, match, simulate, summarize. Humans: tenure, safety, approval, public interest.

Four ledger asset classes · 台账四类空间

One line: the built 9 km heritage park is the ledger's public interface (opened 2026-08-06).

Awakened spaces are displayed (Space Depot), lit (Lights-On Terrace), and commemorated (Wake Milestones) along it.

Provisional rough boundary. Concept suggestion only — not an official redline, approval basis, or precise area. Data: package geometry/*geojson, metrics.json, sources.json. North → right. Edmunds · wake-the-corridor · v1.0

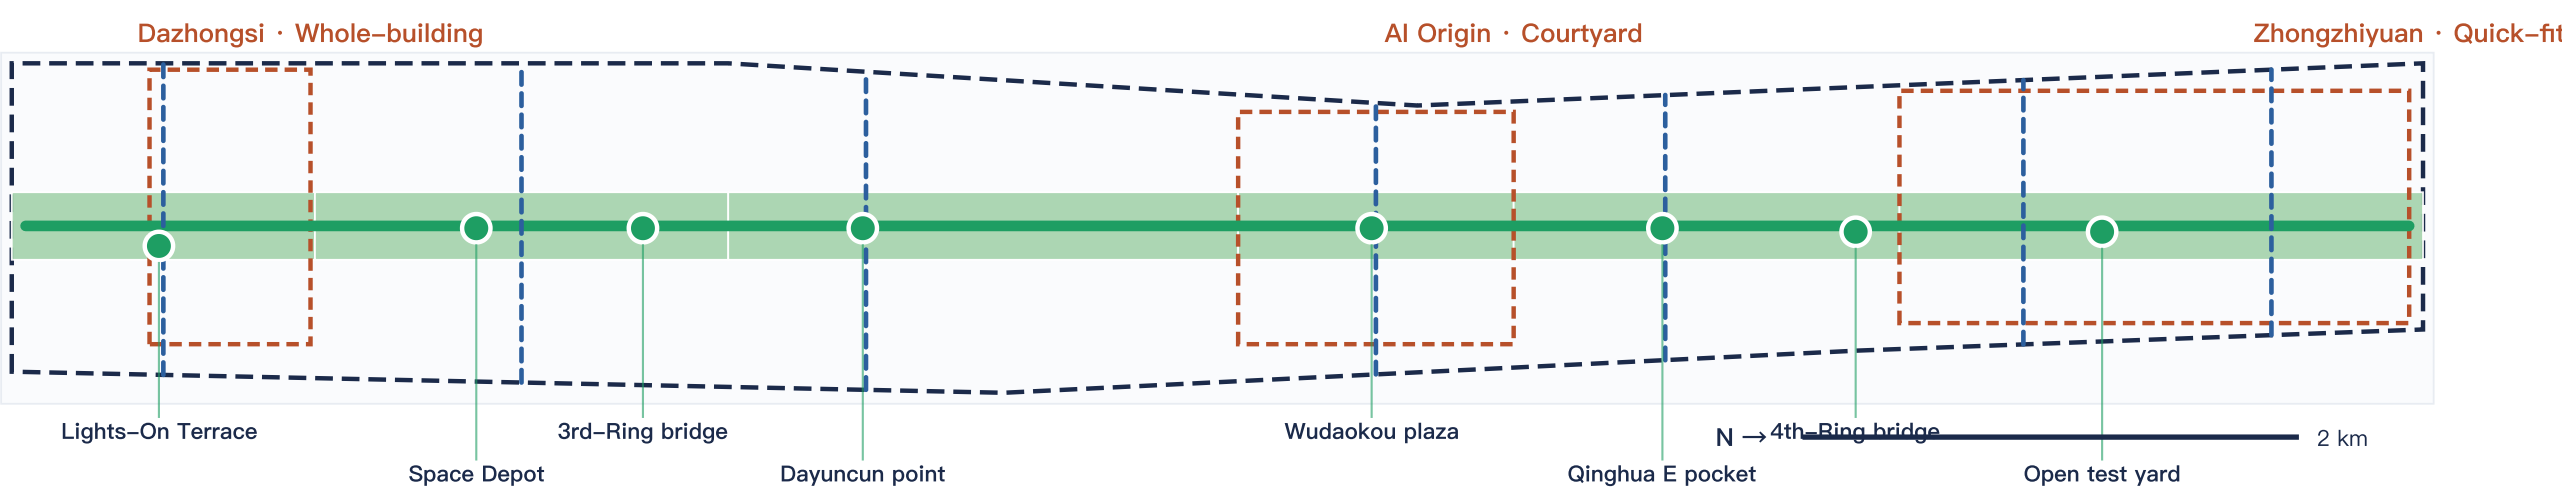

Slow mobility and blue-green public space composite

交通慢行与蓝绿公共空间复合系统

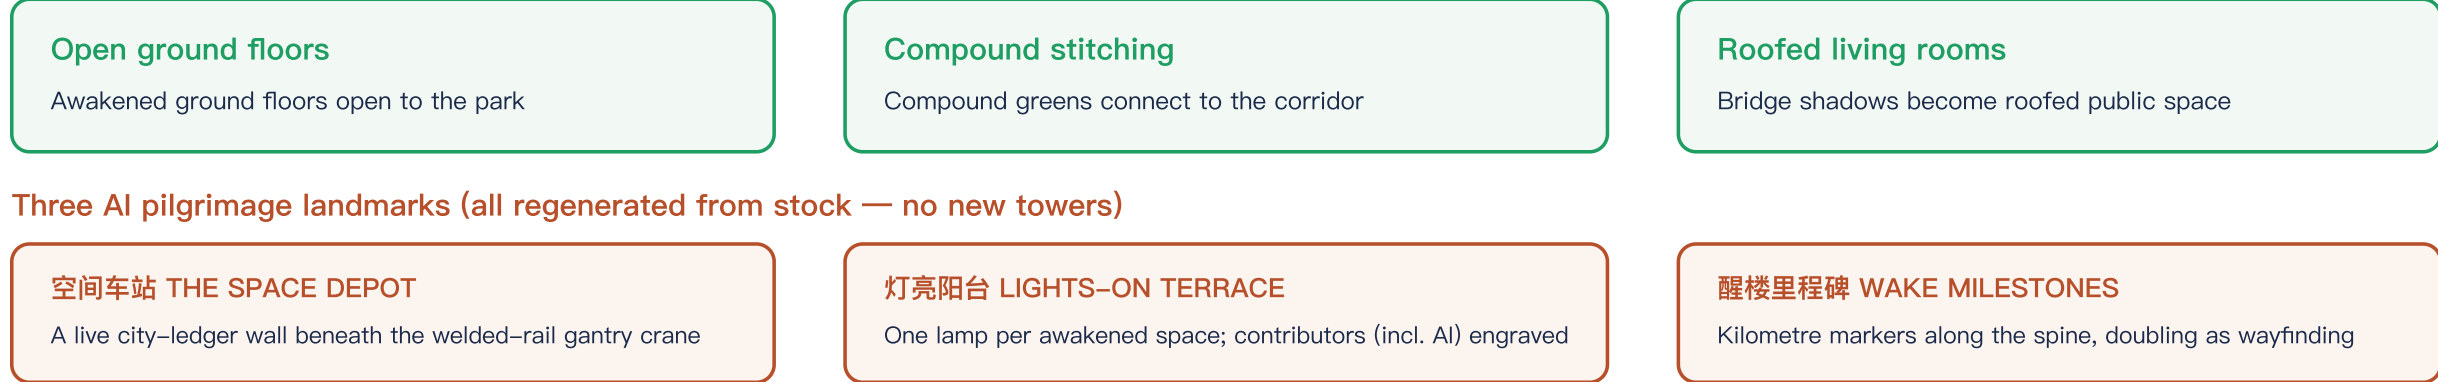

京张醒楼 / WAKE THE CORRIDOR
FIG 04

Relay, not redraw: the 9 km park and its slow lanes are built; design effort goes to interfaces, stitching, and wake points.

Spine ≈ 9,605 m · 7 stitch links · 8 wake points · green ratio ≈ 23.3% (all recomputed from geometry)

Three interface principles · 绿廊界面三原则

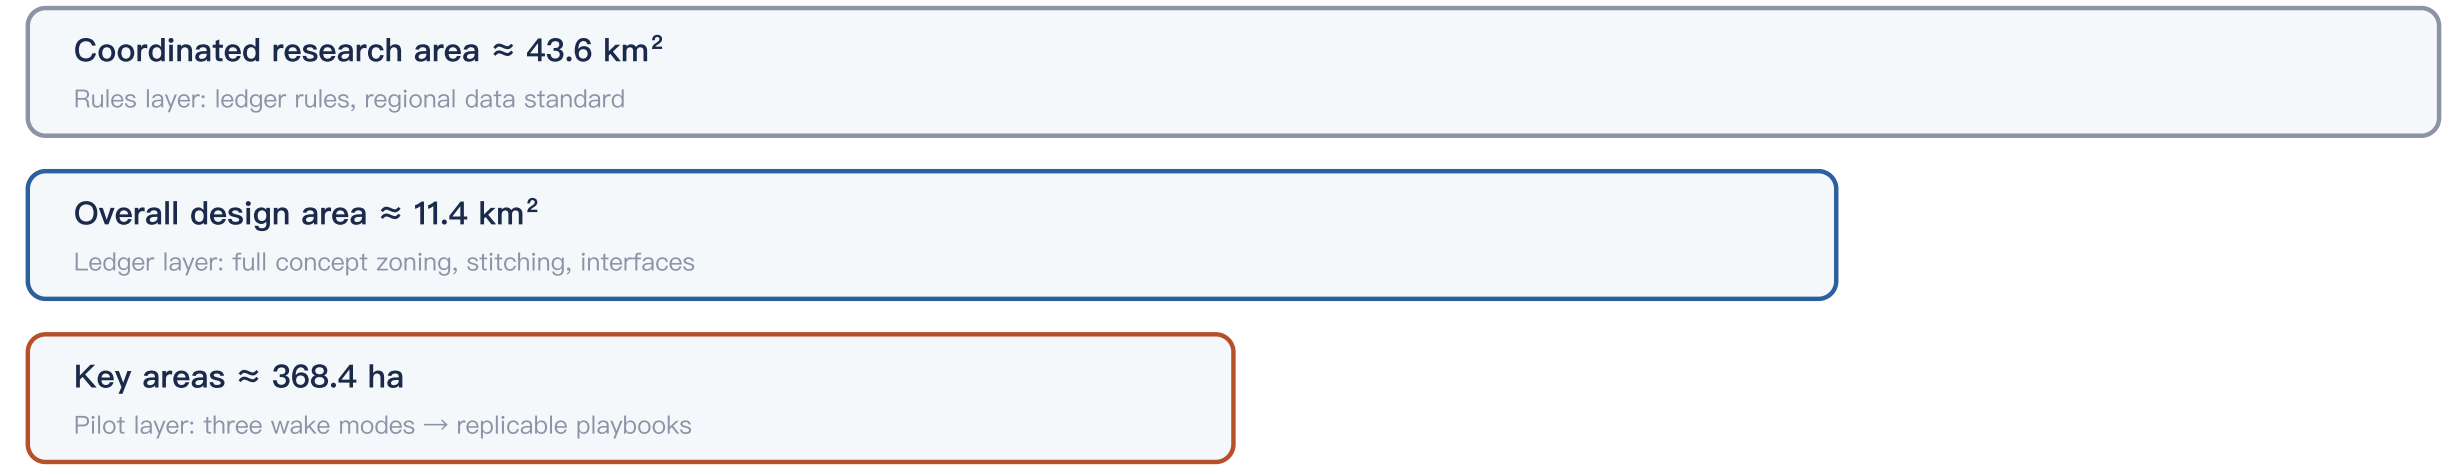

Provisional rough boundary. Concept suggestion only — not an official redline, approval basis, or precise area. Data: package geometry/*geojson, metrics.json, sources.json. North → right. Edmunds · wake-the-corridor · v1.0

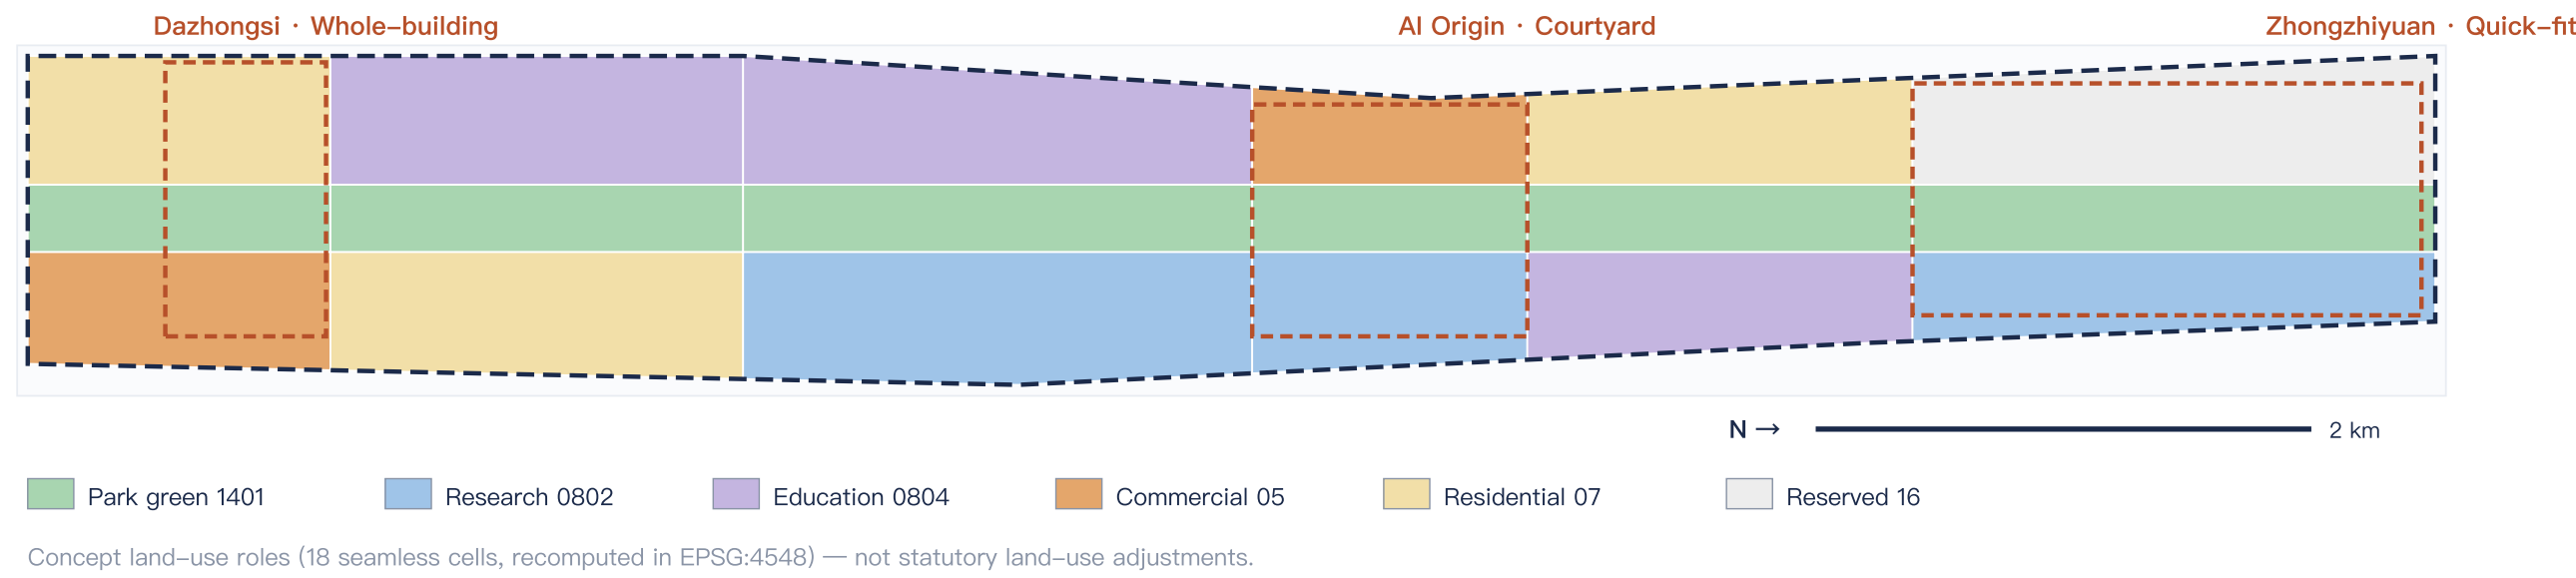

Three-level scopes and concept land-use structure

三层范围与概念用地结构

京张醒楼 / WAKE THE CORRIDOR
FIG 02

Provisional boundaries: once official polygons arrive, all nine layers, every metric, five figures, both drawing sets, and both HTML deliverables are recomputed.

Concept land-use roles (18 seamless cells, recomputed in EPSG-4548) — not statutory land-use adjustments.

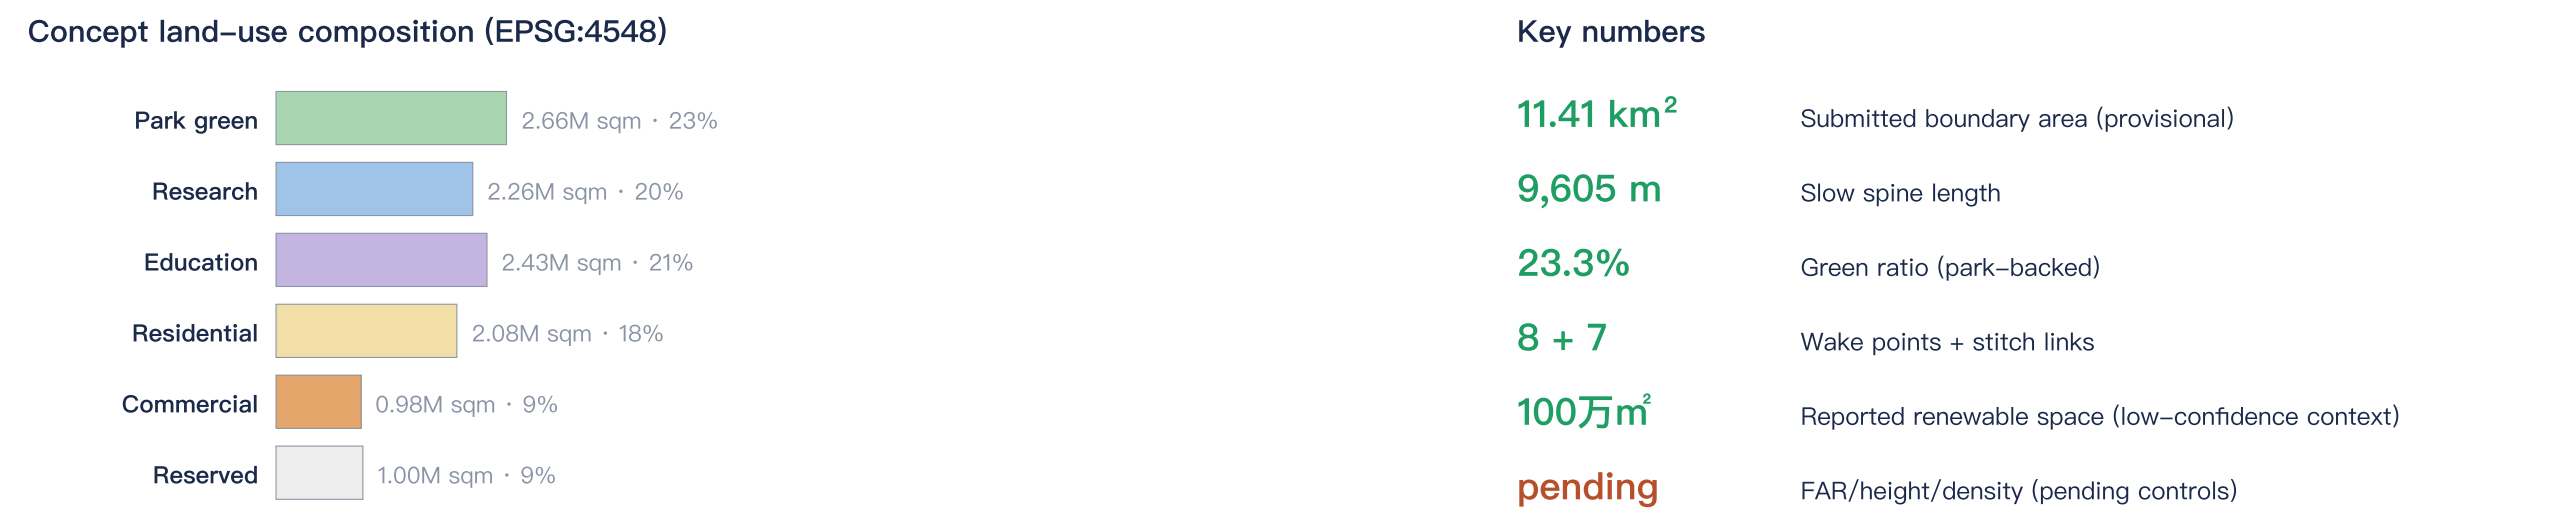

Provisional rough boundary. Concept suggestion only — not an official redline, approval basis, or precise area. Data: package geometry/*geojson, metrics.json, sources.json. North → right. Edmunds · wake-the-corridor · v1.0

Core metrics recomputation and the evidence chain

核心指标复算与证据链

京张醒楼 / WAKE THE CORRIDOR
FIG 05

Evidence chain: sources → layers → metrics → matrices → self-check

Mechanism metrics (proposed open dashboard): registered area · area in trial · awakened area · demand-to-keys days · vacancy-to-program days · trial exit rate

Reported figures are context only, replaced once the verified ledger exists; statutory indicators await official controls.

Identify: the lit window → a city progress bar

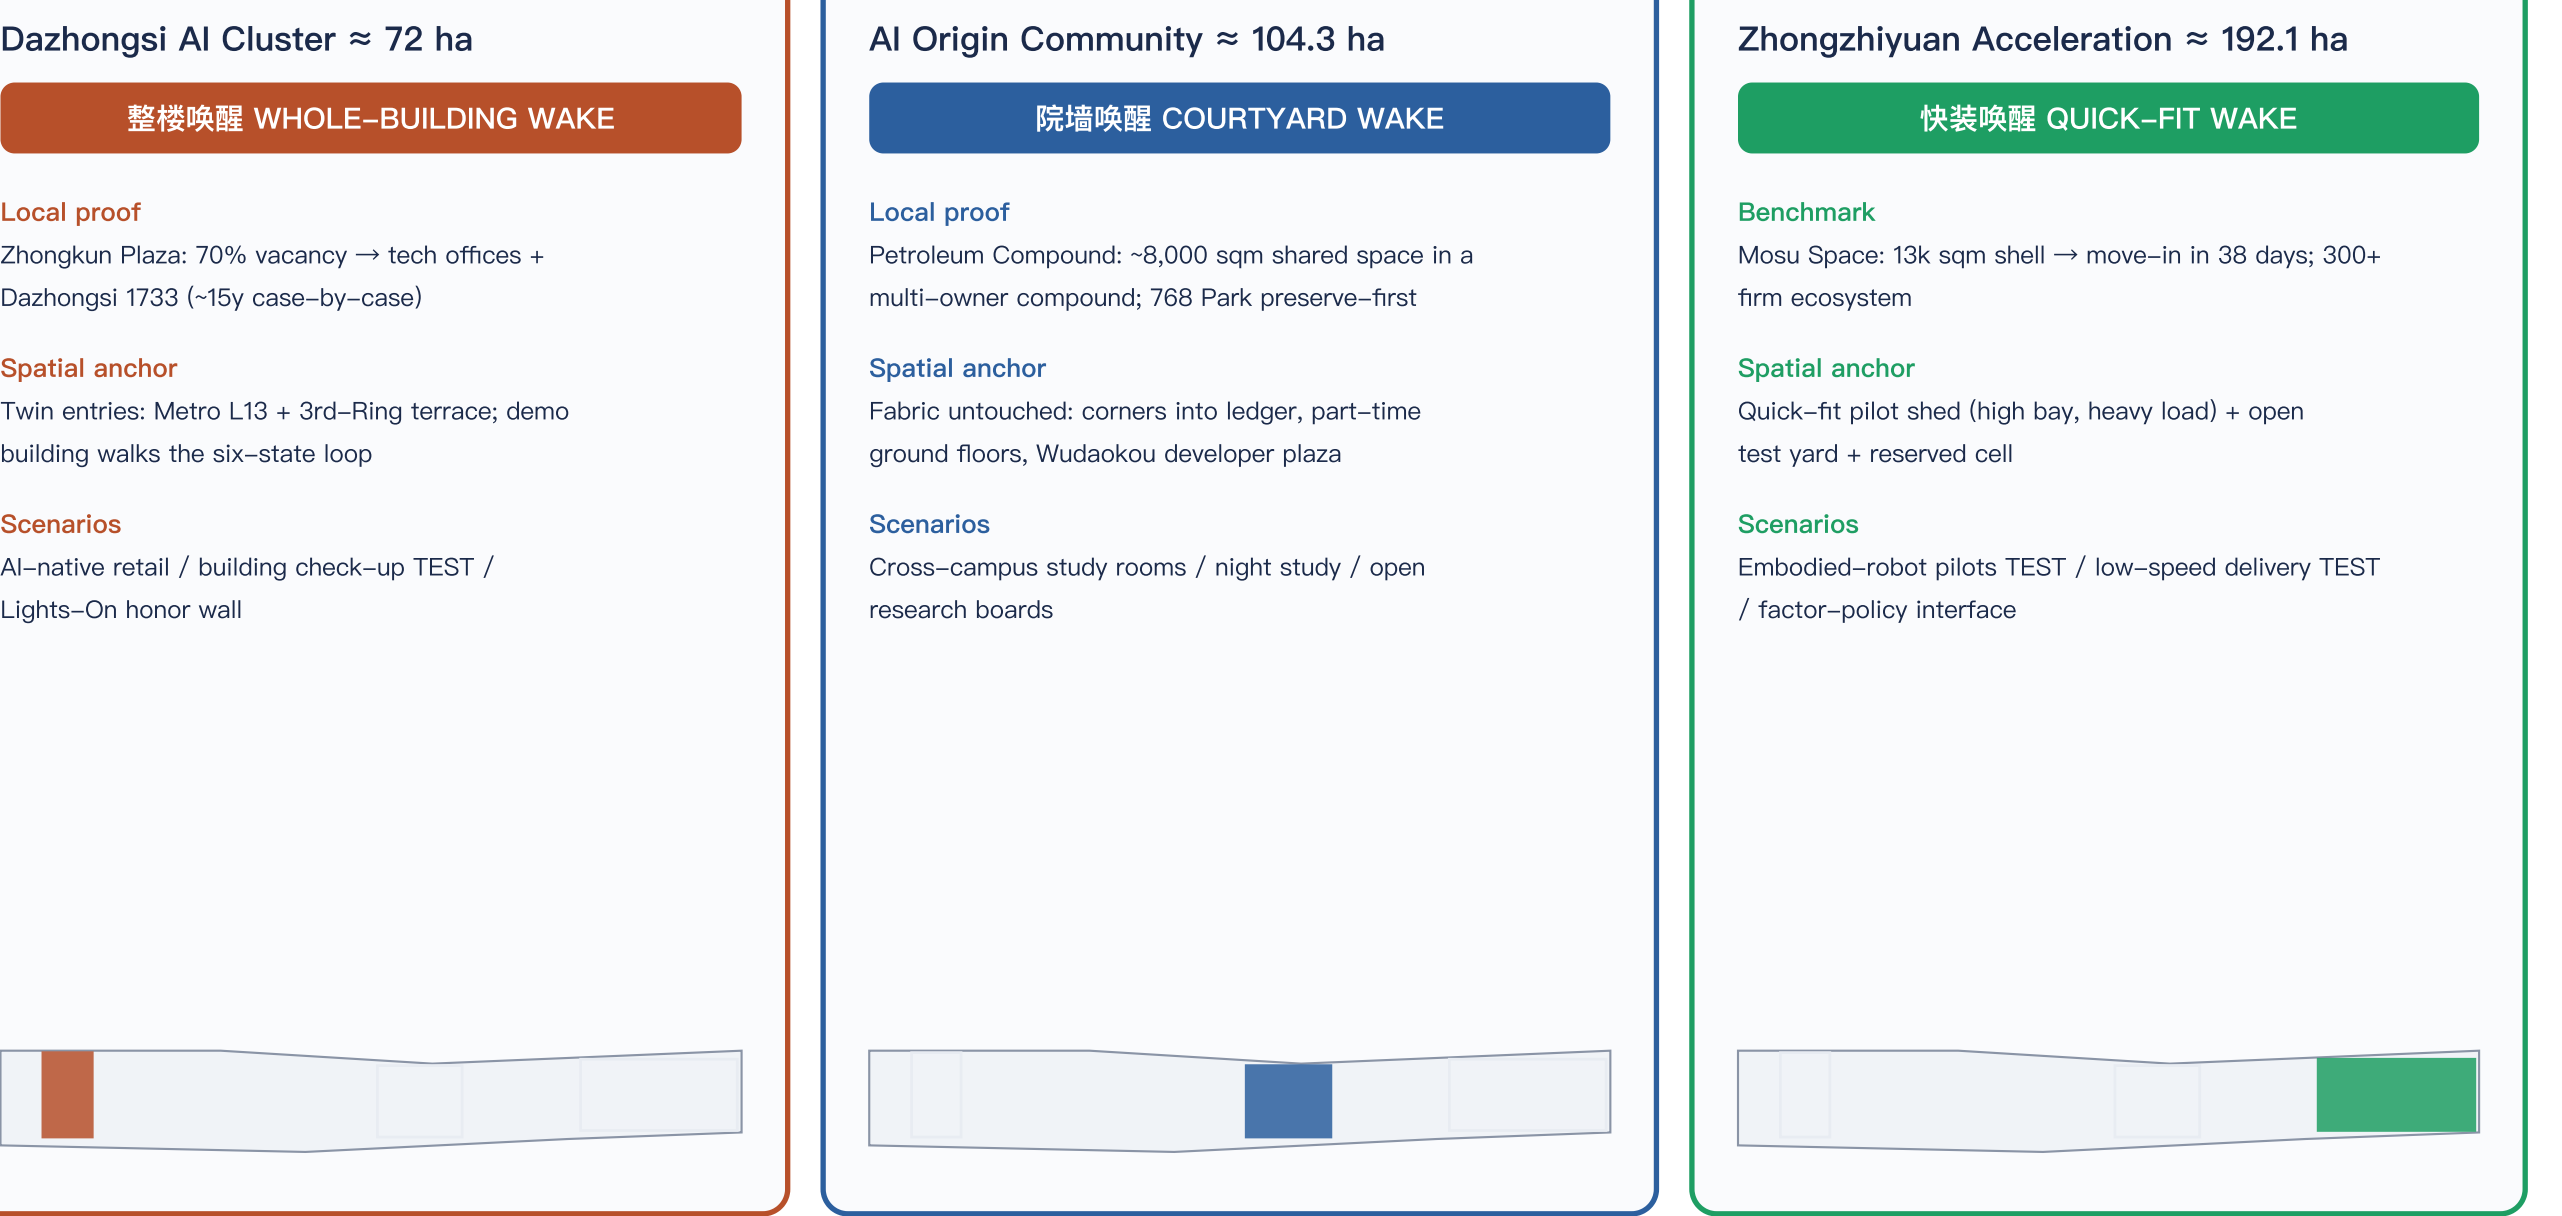

Provisional rough boundary. Concept suggestion only — not an official redline, approval basis, or precise area. Data: package geometry/*geojson, metrics.json, sources.json. North → right. Edmunds · wake-the-corridor · v1.0

Three key areas x three wake modes

三处重点区 × 三种唤醒模式

京张醒楼 / WAKE THE CORRIDOR
FIG 03

All three polygons are provisional; everything above is directional concept design pending tenures, structural, fire, and regulatory confirmation.

Provisional rough boundary. Concept suggestion only — not an official redline, approval basis, or precise area. Data: package geometry/*geojson, metrics.json, sources.json. North → right. Edmunds · wake-the-corridor · v1.0

Mechanism summary

One ledger (four asset classes, plugging into the required base ledger). One line: the built 9 km park as public interface. Three yards: whole-building, courtyard, quick-fit wake modes. Many points: eight micro wake points.

Six-state loop: register → diagnose → match → reversible trial → confirm/exit → debrief. AI retrieves and matches; humans decide.

Contrast: ~15 years case-by-case at Zhongkun Plaza vs 38 reported days at Mosu Space — the gap is the information and institutional interface, exactly what an AI belt should let AI help solve.

Open co-creation suggestion · no official redline/approval basis/approved conclusion · full recomputation once official polygons arrive
