Centennial Jingzhang AI Belt urban design · AI-agent concept scheme (A3 booklet)

Site: Haidian, Beijing · N-S corridor around Jingzhang Rail Heritage Park

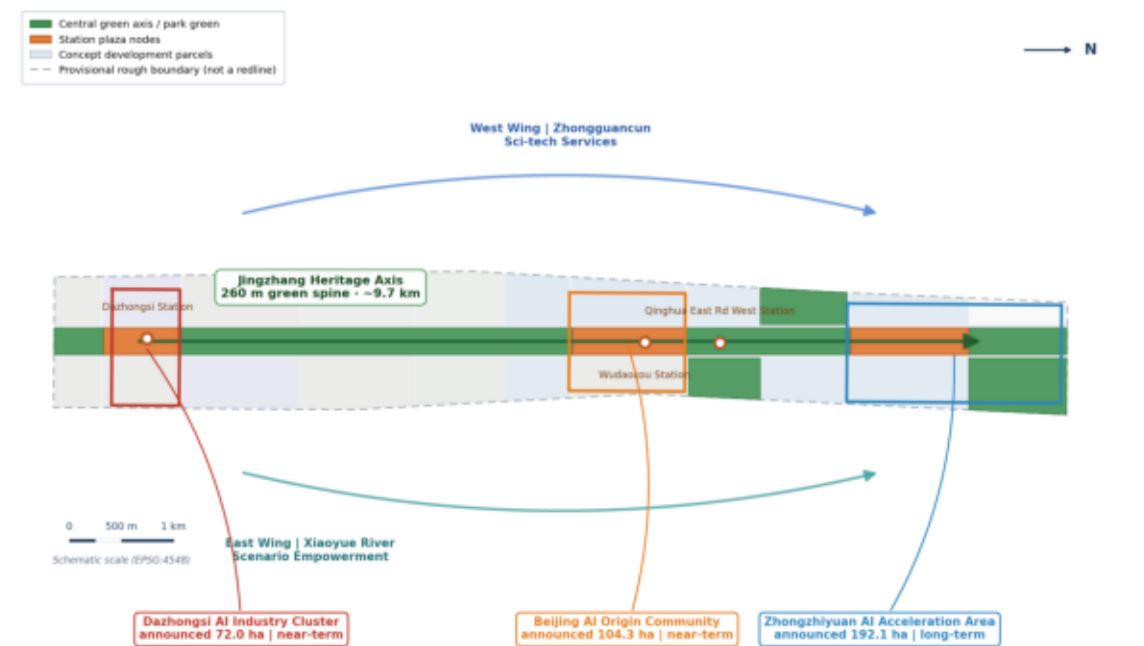

Structure: One Axis · Three Cores · Two Wings · One Loop

Overall design area: ~11.4 km² (1,141.3 ha recomputed on provisional boundary)

Key detailed-design areas: 3 (368.4 ha announced total)

ORIGIN LINE | Overall Spatial Structure

One Axis · Three Cores · Two Wings · One Loop — Centennial Jingzhang AI Belt (approx. 11.4 km², provisional boundary)

Note: overall boundary and key areas are provisional rough boundaries, pending official data; not valid as redlines. Areas recomputed from provisional geometry in EPSG:4548. Sources: call announcement (2026-05) + open site package provisional geometry; AI agent concept scheme ORIGIN LINE.

Centennial Jingzhang AI Belt open call · package century-rail-ai-origin

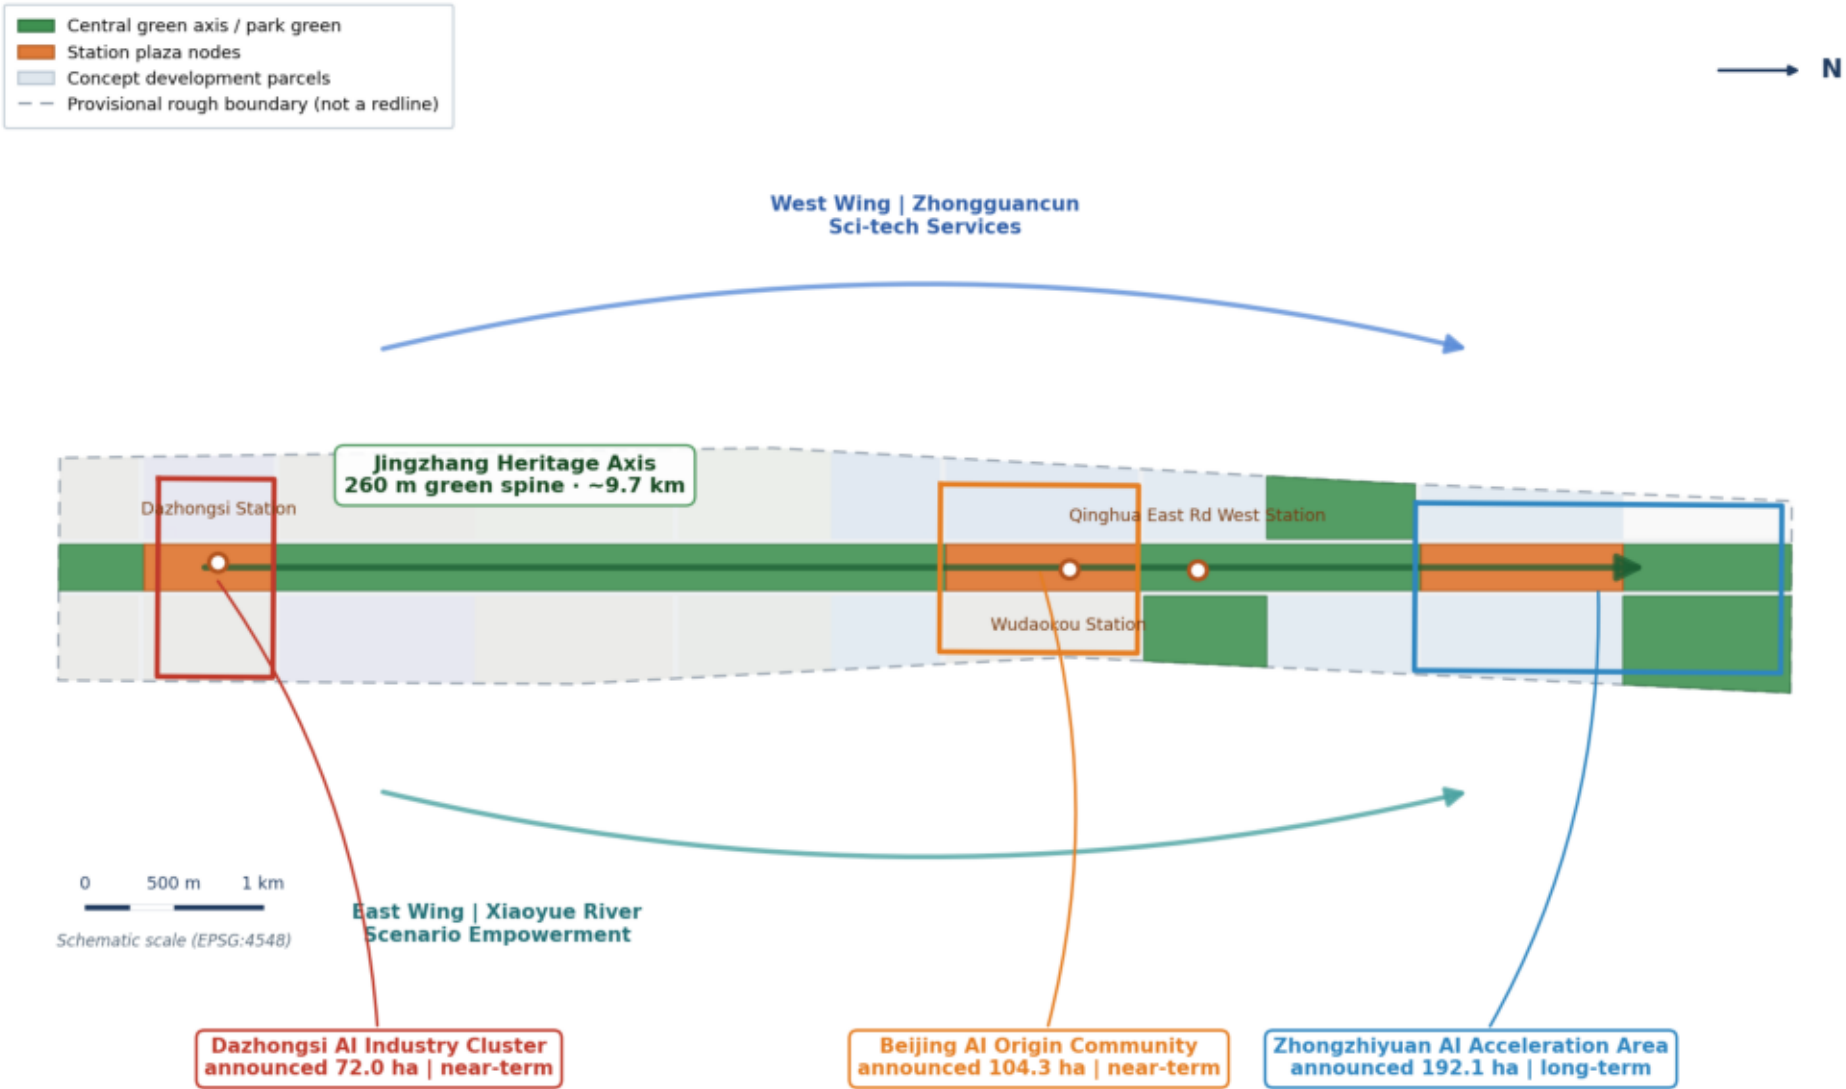

Provisional rough boundary pending official data; all metrics recomputed in EPSG:4548.

Overall Spatial Structure

One axis, three cores, two wings, one slow-mobility loop

ORIGIN LINE | Overall Spatial Structure

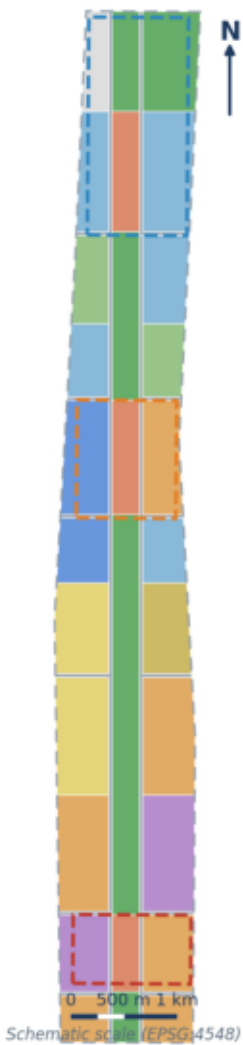

One Axis · Three Cores · Two Wings · One Loop — Centennial Jingzhang AI Belt (approx. 11.4 km², provisional boundary)

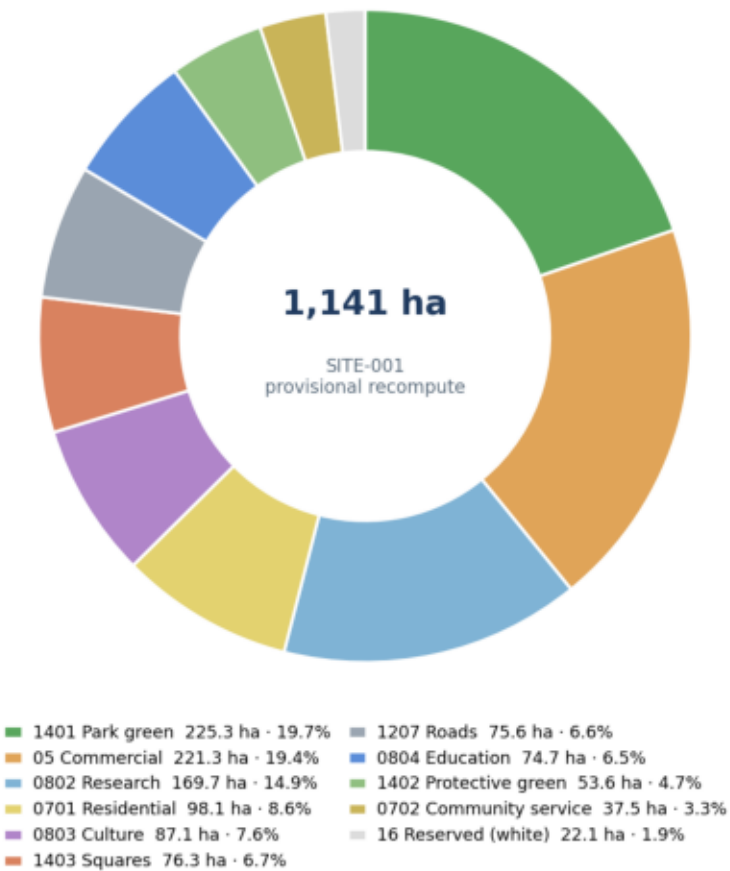

Note: overall boundary and key areas are provisional rough boundaries, pending official data; not valid as redlines. Areas recomputed from provisional geometry in EPSG:4548. Sources: call announcement (2026-05) + open site-package provisional geometry; AI-agent concept scheme ORIGIN LINE.

Land-use Structure | Seamless Topological Partition

29 parcels tile SITE-001 without gaps or overlaps; shared edges share vertices; areas recomputed in EPSG:4548

Land-use area mix (ha / share)

Note: overall boundary and key areas are provisional rough boundaries, pending official data; not valid as redlines. Areas recomputed from provisional geometry in EPSG:4548. Sources: call announcement (2026-05) + open site-package provisional geometry; AI-agent concept scheme ORIGIN LINE.

Key Area 1 · Zhongzhiyuan AI Acceleration Area

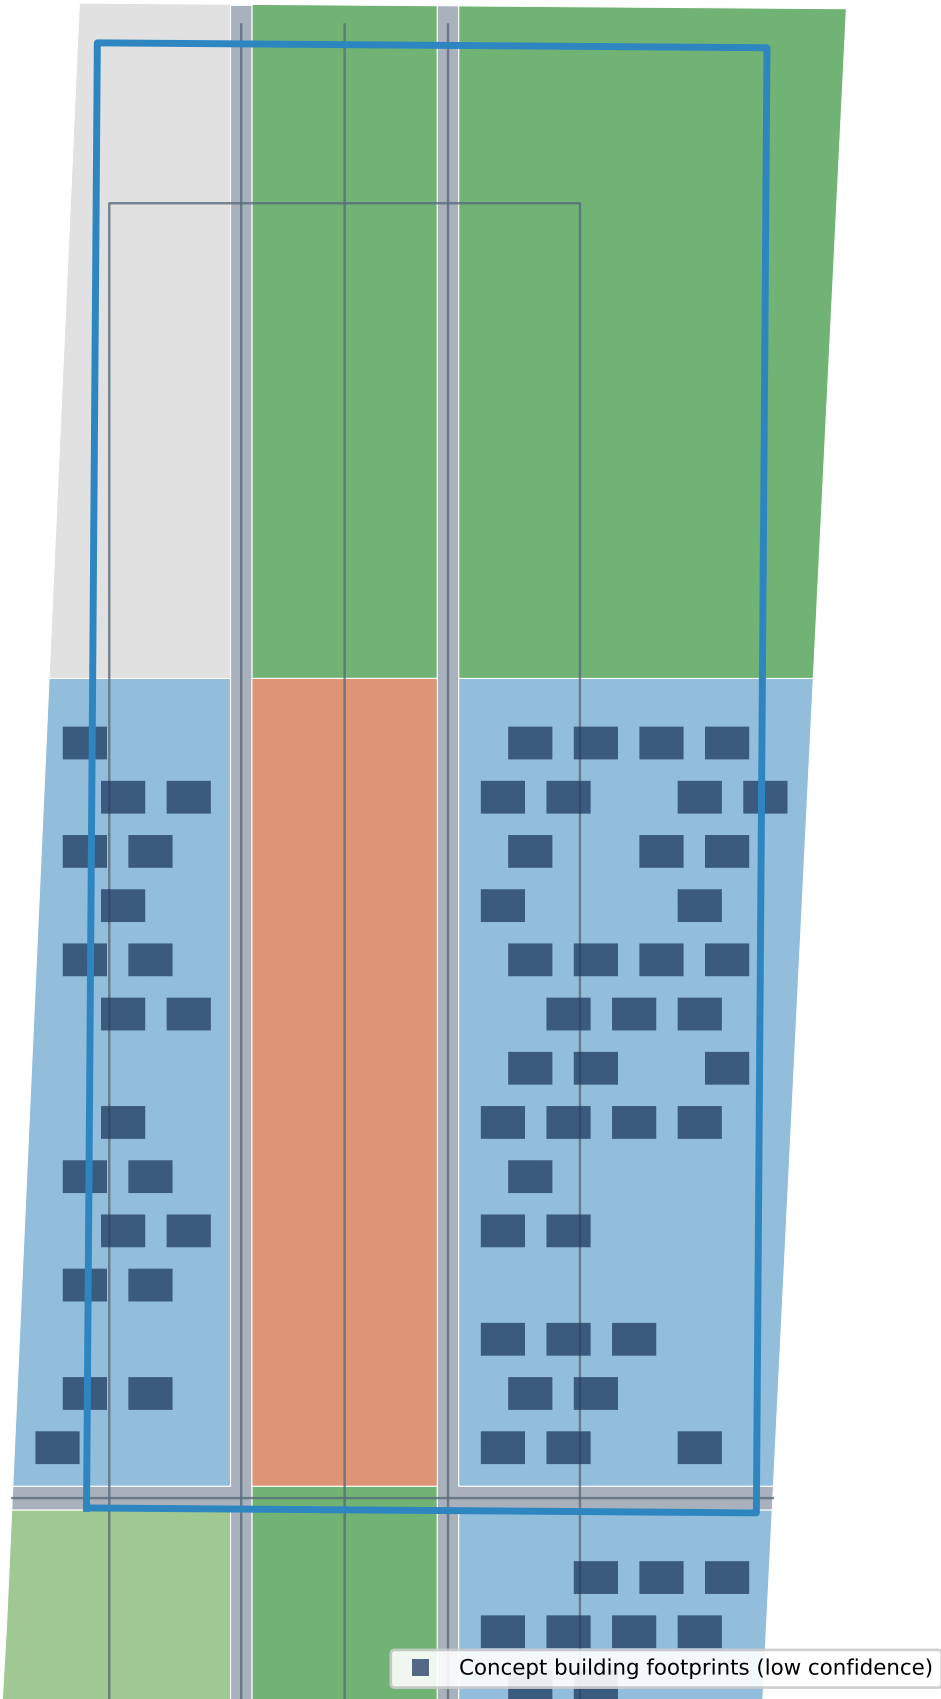

North innovation pole · R&D pilots and HQs · long-term

Design points

- Role: AI indigenous-innovation accelerator, north pole
- R&D pilot bases + HQ clusters, low intensity (concept 3-10 floors)
- North gateway of the axis + Qinghe country park segment
- Reserved white land (16) for future interfaces
- announced 192.1 ha | recomputed 192.9 ha
- Phasing: long-term (2035-2040)

Renewal strategy

- retain: sound existing research and housing stock
- renovate: functional conversion and infill of stock
- new_build: around stations and axis interfaces

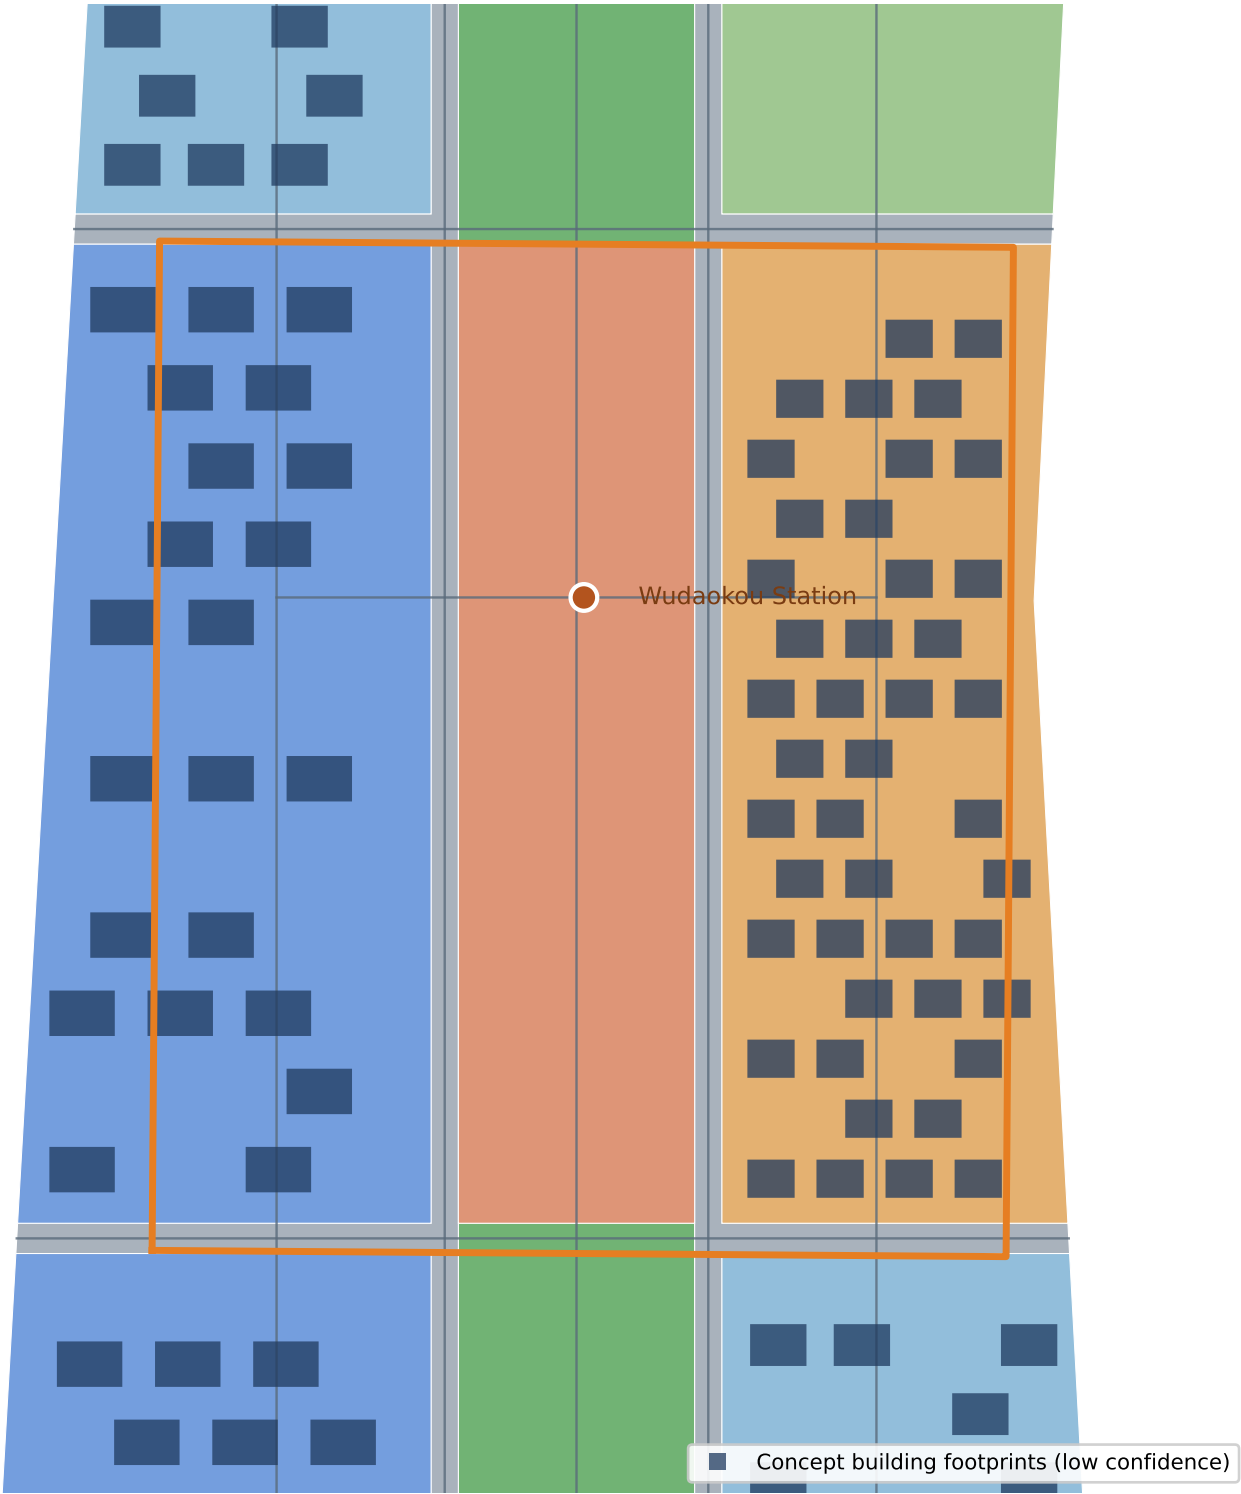

Key Area 2 · Beijing AI Origin Community

AI origin · Wudaokou TOD · near-term

Design points

- Role: AI innovation origin, global talent community
- Wudaokou TOD + Origin Living-Room plaza (1403)
- Education (0804) / research (0802) / retail (05) mixed blocks
- Medium intensity (concept 6-18 floors)
- announced 104.3 ha | recomputed 104.3 ha
- Phasing: near-term (2026-2030)

Renewal strategy

- retain: sound existing research and housing stock
- renovate: functional conversion and infill of stock
- new_build: around stations and axis interfaces

Key Area 3 · Dazhongsi AI Industry Cluster

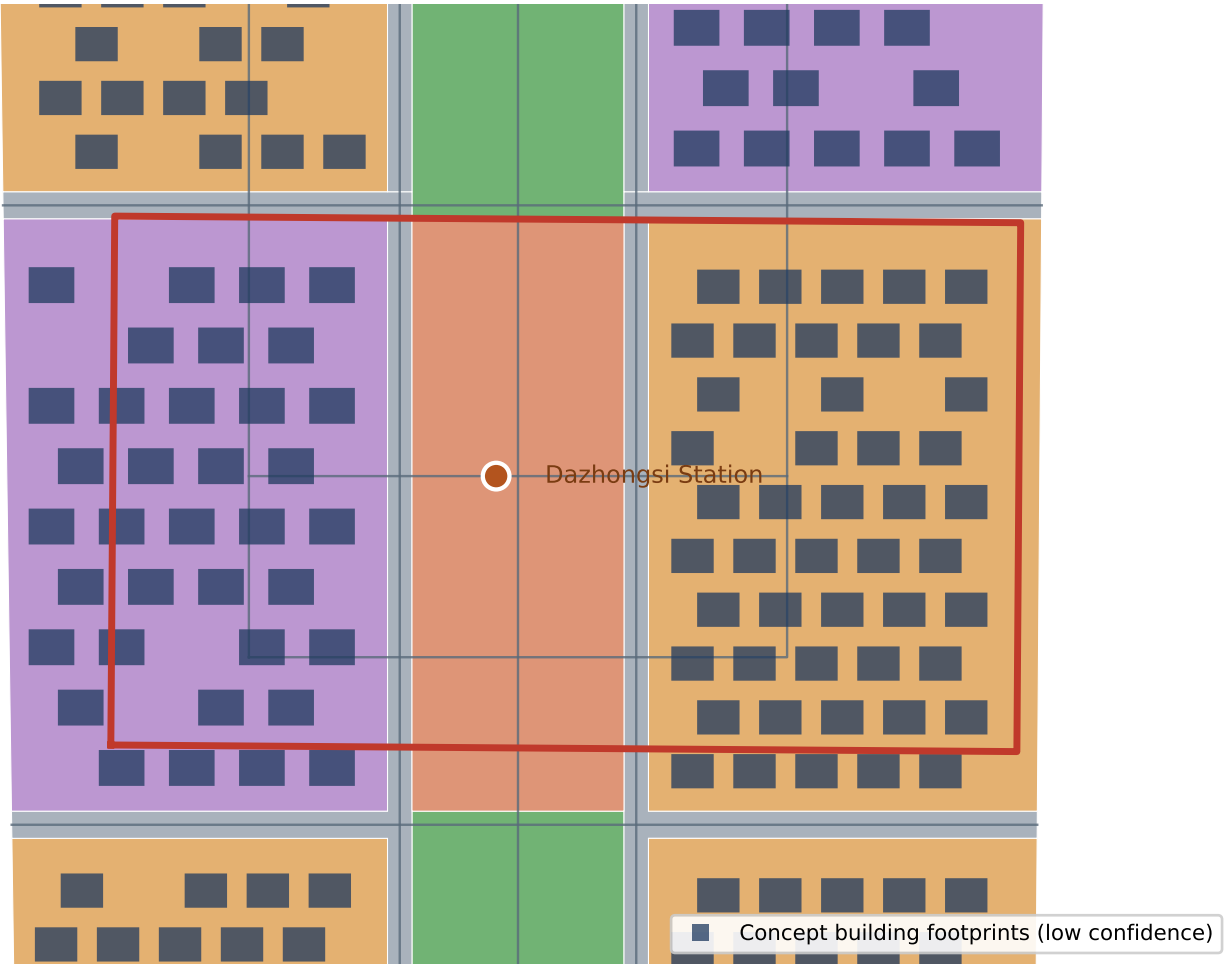

Culture-tech fusion · station plaza trailhead · near-term

Design points

- Role: AI industry cluster, culture-tech fusion
- Dazhongsi station plaza, axis trailhead (1403)
- Ancient-bell culture core (0803) + retail renewal (05)
- High intensity mixed development (concept 12-28 floors)
- announced 72.0 ha | recomputed 72.0 ha
- Phasing: near-term (2026-2030)

Renewal strategy

- retain: sound existing research and housing stock
- renovate: functional conversion and infill of stock
- new_build: around stations and axis interfaces

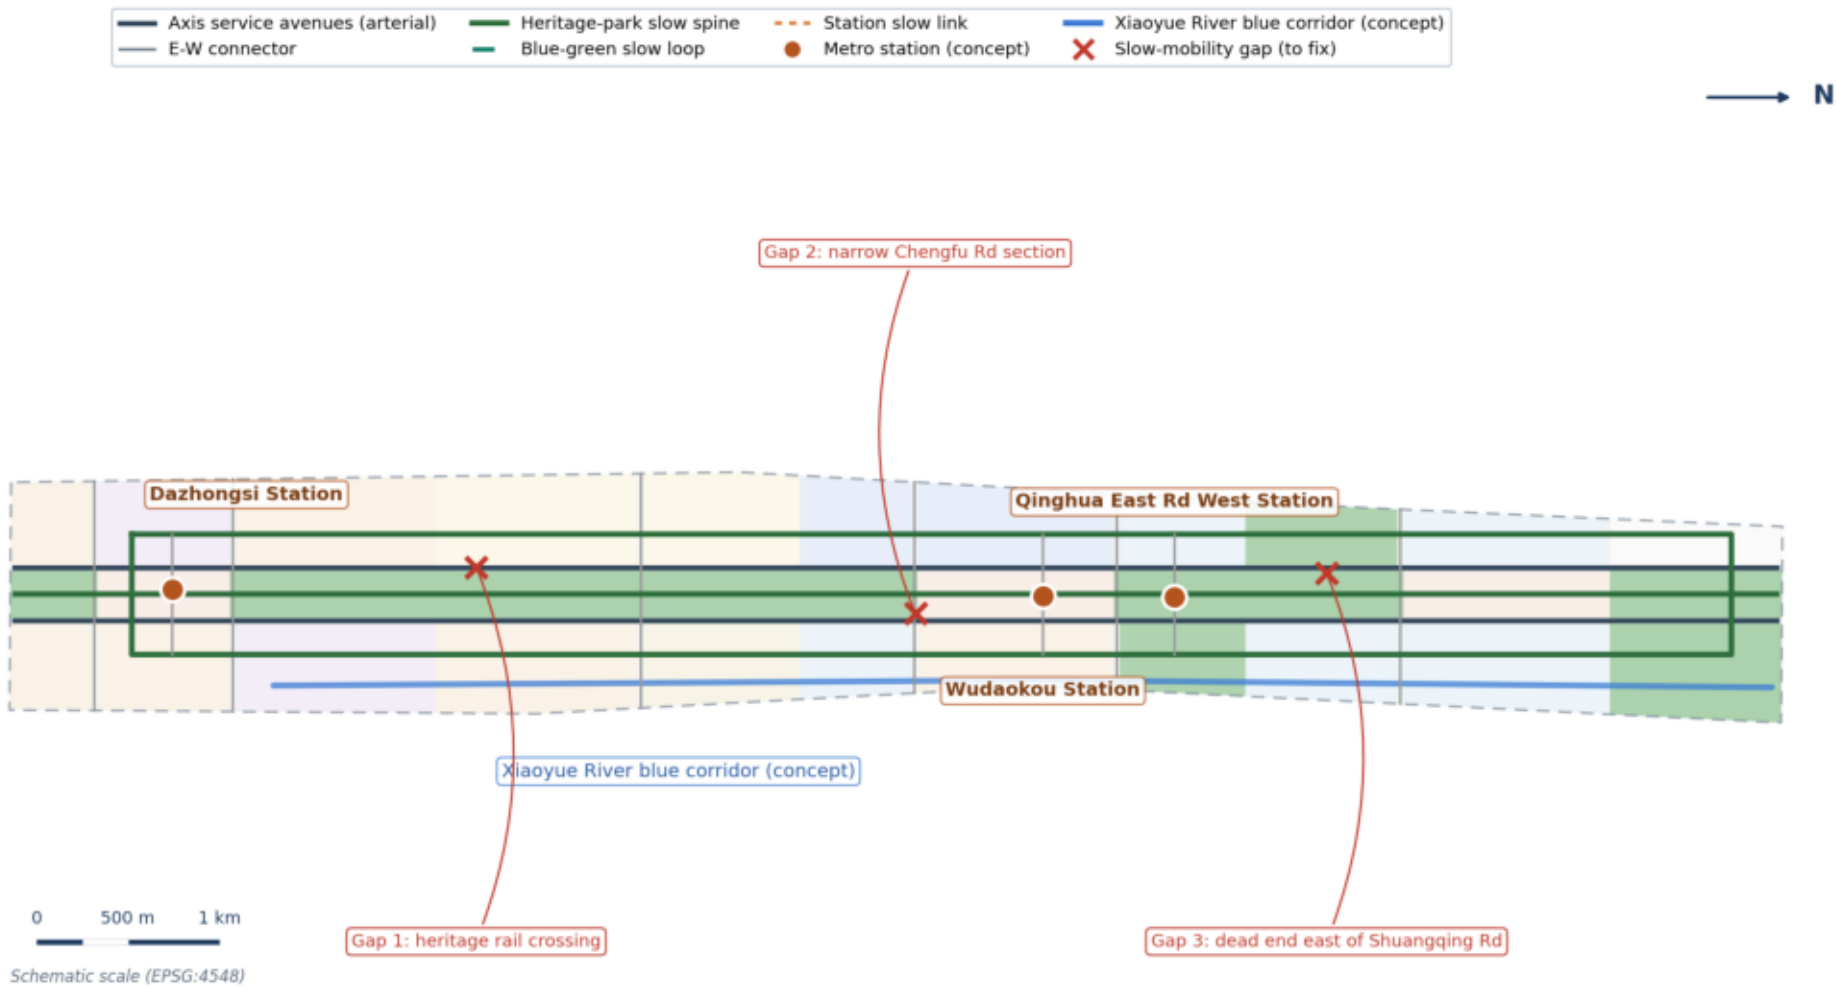

Mobility & Blue-green Network

Axis + avenues + connectors + slow loop + three station links

Mobility & Blue-green Network

Heritage axis + flanking service avenues + E-W links + slow-mobility loop; three metro stations (concept locations)

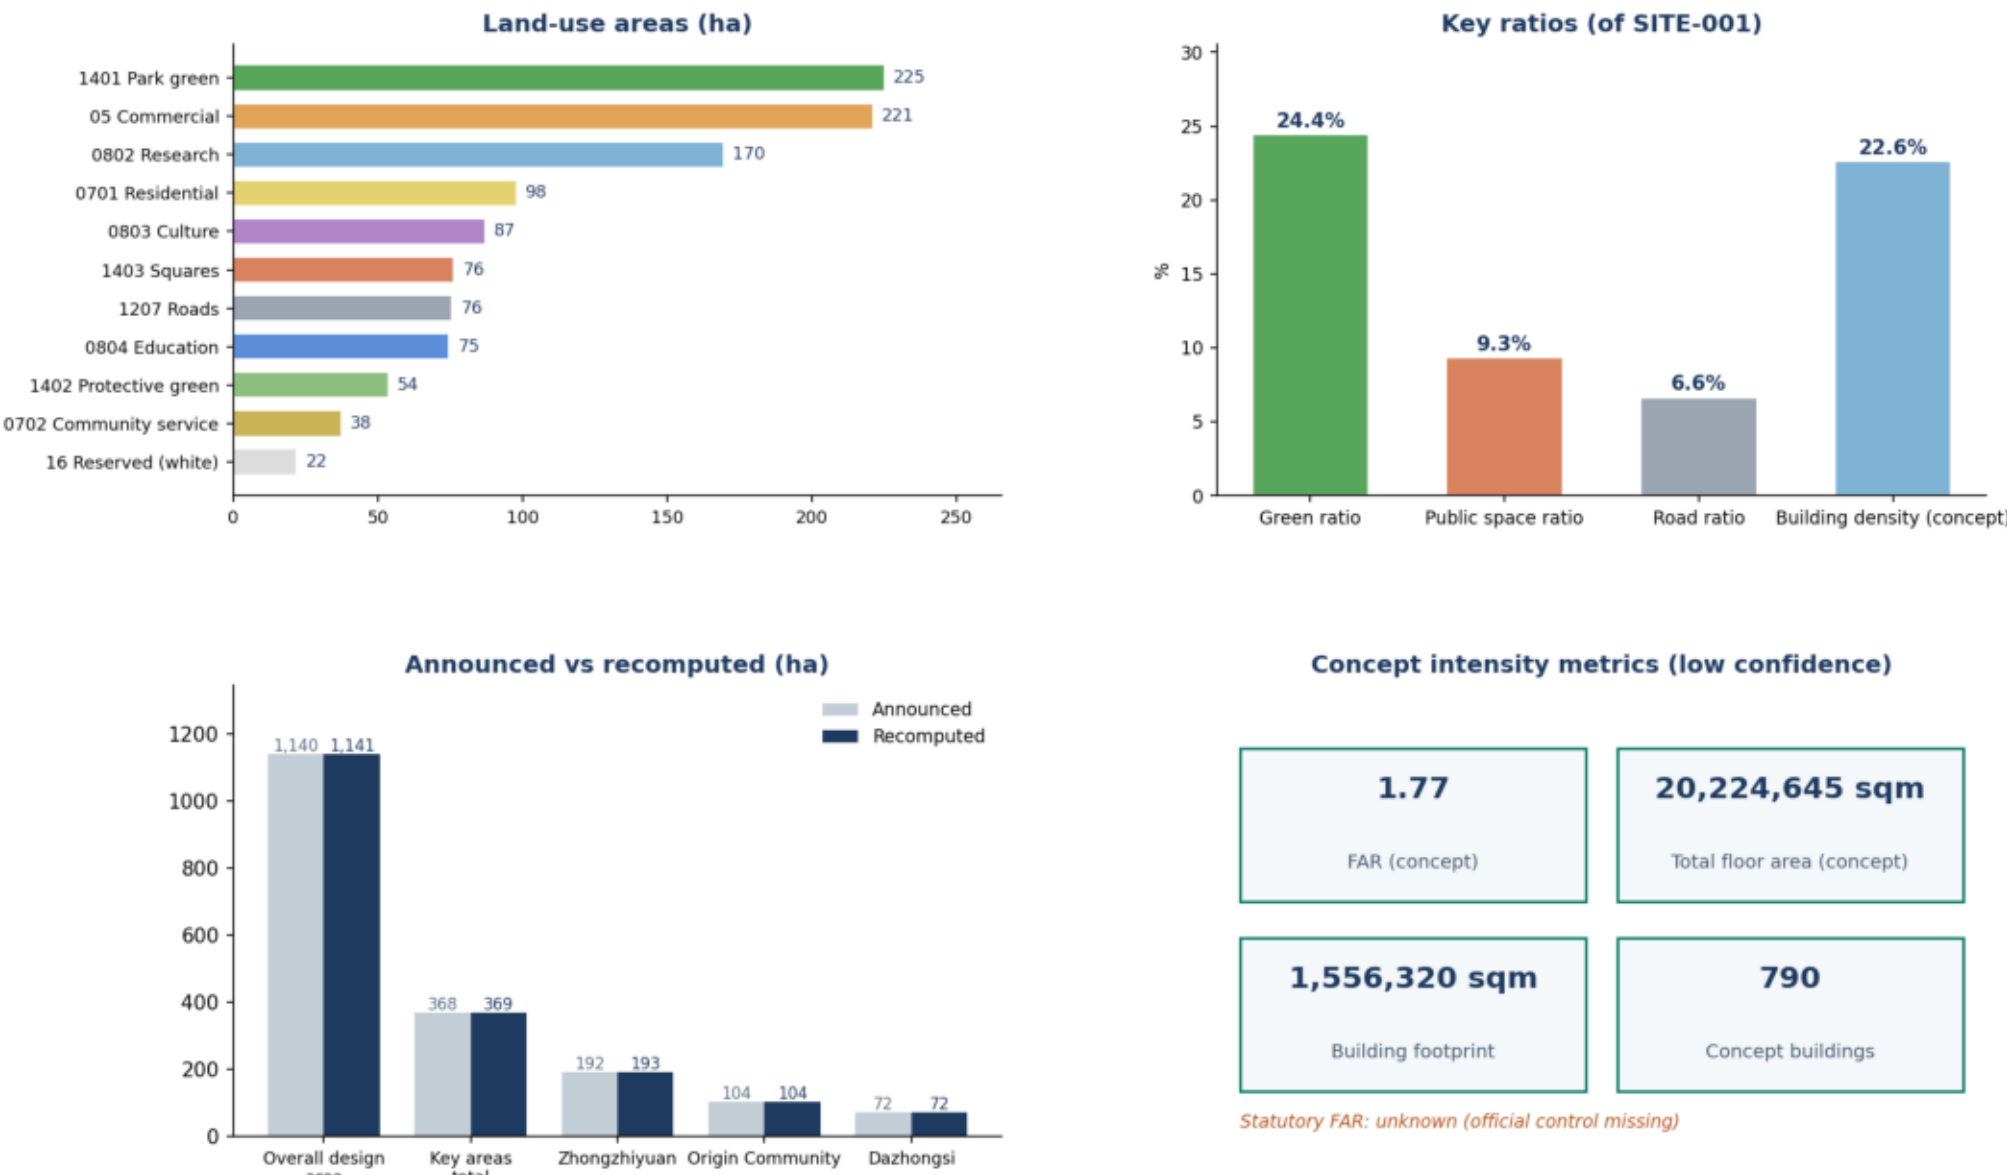

Note: overall boundary and key areas are provisional rough boundaries, pending official data; not valid as redlines. Areas recomputed from provisional geometry in EPSG:4548. Sources: call announcement (2026-05) + open site-package provisional geometry; AI-agent concept scheme ORIGIN LINE.

Metrics Evidence

All metrics recomputed from geometry · concept metrics low-confidence

Metrics Evidence Dashboard

All metrics recomputed from design geometry in EPSG:4548; concept metrics are low-confidence design quantities, not statutory controls

Note: overall boundary and key areas are provisional rough boundaries, pending official data; not valid as redlines. Areas recomputed from provisional geometry in EPSG:4548. Sources: call announcement (2026-05) + open site-package provisional geometry; AI-agent concept scheme ORIGIN LINE.

AI Scenario Cards

agent.1-agent.6 mapped to brief tasks 1.3 / 1.4 / 1.5

agent.1

Autonomous shuttle loop

Low-speed driverless loop flanking the green axis

Task 1.4 mobility

agent.2

Heritage digital-twin corridor

Full-length digital twin + AR guide of Jingzhang relics

Task 1.3 heritage

agent.3

AI first-release hall

Wudaokou Origin Living-Room, first tests and shows

Task 1.5 AI scenarios

agent.4

Community energy-carbon brain

Dual energy-carbon control demo in Origin Community

Task 1.5 AI scenarios

agent.5

Blue-green carbon sensor net

Eco-sensing across the axis and Xiaoyue River corridor

Task 1.4 blue-green

agent.6

Zhongzhiyuan open pilot platform

R&D pilots + HQs + open data sandbox

Task 1.5 AI scenarios
