

A0-01 | 30-Second Claim + System

Choice, exit, human handoff and non-AI equivalence are public rights

合成概念 | SYNTHETIC CONCEPT | NOT SITE EVIDENCE

- One spine, three commons, two wings/six units and twelve switches; six adjustable sensory loads
- Zero default personal profiles; zero biometric identification; human approval for consequential action
- Low-contrast dashed provisional constraint; high-contrast solid design intent

Content-review contract ready | geometry provisional | awaiting organizer review

A0-02 | Five Interfaces + Eight Factors

Regional coordination is opt-in; the ecosystem is a set of pre-pilot exchange gates

FIGURE 01 | PROVISIONAL BOUNDARY / DESIGN INTENT

Overall Quiet Commons System | Choice, Exit and Human Equivalence

ONE SPINE
THREE COMMONS
TWO WINGS / SIX UNITS
TWELVE SENSORY SWITCHES

FIVE OPT-IN INTERFACES

- Beiwei Community
Everyday-life and accessibility co-design
- Future Science City
Research question to public test protocol
- Huairou Science City
Multisensory public interpretation of science
- Beijing E-Town
Device-to-operations transfer check
- Beijing-Tianjin-Hebei
Protocol portability and localisation

Conceptual interfaces, not an alliance claimed to exist; exchange only briefs, protocols, de-identified findings and components.

Beiwei • Future Science City • Huairou Science City • Beijing E-Town • BTH; no alliance claimed

Land • space • industry • capital • talent • compute • data • scenarios; each reviewed

Six case studies translate roles, outputs and failure evidence, never planning parameters

A0-03 | Spatial Frame + Quiet-Switch Kit

Sensory programmes, restorative mobility and a human-scale switch work together

FIGURE 02 | LAND USE / SENSORY PROGRAM

Land Use and Sensory Programs | Complete Partition, Not Statutory Land Use

TOPOLOGY: 0 OVERLAP / 0 GAP (WITHIN TOLERANCE) | FAR, HEIGHT, DENSITY, SETBACK: UNKNOWN

Six complete conceptual programmes; FAR, height and setbacks remain unknown

Vestibule • quiet bay • tactile strip • staffed window • status beacon • physical override

Routes retain bypass, shade, rest, low-information signs and staffed help

A0-04 | Three Spatial Prototypes

Zhongzhiyuan tests | AI Origin translates | Dazhongsi synchronises

COMMON SPATIAL CONTRACT | CONTINUOUS WITHOUT A PHONE

ZHONGZHIYUAN | QUIET-TECH TEST YARD

合成概念 | SYNTHETIC | NOT SITE EVIDENCE

- SPATIAL MOVE: observer retreat and test limits are visibly separated
- ON-SITE CONTROL: status beacon + physical stop + human safety supervisor
- NON-AI EQUIVALENT: manual handling or fixed-device display
- OUTPUT: sensory footprint, failure record and admission/exit decision

AI ORIGIN | MANY-WAYS ROOM

合成概念 | SYNTHETIC | NOT SITE EVIDENCE

- SPATIAL MOVE: a continuous tactile route bypasses the optional AI zone
- ON-SITE CONTROL: low-confidence, rights, payment and identity go to staff
- NON-AI EQUIVALENT: paper signs, plain language and staffed window
- OUTPUT: completion, handoff, correction, exit and maintenance ledger

DAZHONGSI | RHYTHMIC CIVIC HUB

合成概念 | SYNTHETIC | NOT SITE EVIDENCE

- SPATIAL MOVE: regular, low-stim and event modes share time visibly
- ON-SITE CONTROL: public clock shows mode; dispatcher pauses anomalies
- NON-AI EQUIVALENT: fixed timetable, staffed service and manual delivery
- OUTPUT: conflict, wait, recovery and night-maintenance record

All three prototypes share one exit contract; public-space duties, human roles and reviewable outputs remain site-specific.

A0-05 | Quiet Switch + Twelve Scenarios

A human-scale public prototype that is understandable, tactile and stoppable

FIGURE 04 | MOBILITY / BLUE-GREEN

Slow Mobility, Blue-Green and Restorative Routes | Bypass, Rest and Staffed Help

- Text + symbol + tactile state; normal/transition/test/stop-recovery never rely on colour alone
- Every card has minimum data, handoff, non-AI path, stop gate and expiry
- Six sensory symbols always carry labels; tactile versions await real-user co-design

A0-06 | Four Pilot Protocols

Baseline, sample design, hard gate, owner, stop and recovery share one page

P1 Device sensory footprint and stop6 WEEKS

BASELINE	Device-off ambient reading + manual-handling equivalent
SAMPLE DESIGN TARGET	3 modes × 10 stops each; design target ≥30 trials
HARD GATE	30/30 physical stops; zero boundary/high-severity near miss; any failure = STOP
HUMAN OWNER	Safety supervisor + device operator
NON-AI EQUIVALENT	Manual handling / fixed-device display
RECOVERY AFTER STOP	Lock device, preserve record, safety sign-off to reset

P2 Public-space mode switching8 WEEKS

BASELINE	Fixed-mode periods and exit-route reachability
SAMPLE DESIGN TARGET	Design target ≥24 voluntary guided sessions across eight personas/advocates
HARD GATE	Text/graphic/staff state display; quiet bypass and legitimate-activity alternative 100% available
HUMAN OWNER	Public-realm duty manager
NON-AI EQUIVALENT	Fixed mode + paper map + staff explanation
RECOVERY AFTER STOP	Restore fixed mode, publish reason, verify alternative space

P3 AI public service and human handoff8 WEEKS

BASELINE	Staff-only completion, waiting and correction record
SAMPLE DESIGN TARGET	3 non-entitlement tasks, ≥60 scripted cases and ≥24 voluntary sessions
HARD GATE	Rights/payment/identity/low confidence 100% to staff; paper path 100% available
HUMAN OWNER	Public-service supervisor
NON-AI EQUIVALENT	Staff-only service + paper path
RECOVERY AFTER STOP	Finish with staff, correct record, delete unapproved data

P4 Night logistics sound/light/speed6 WEEKS

BASELINE	Manual-delivery sound/light/speed, conflict and wait record
SAMPLE DESIGN TARGET	Design target ≥40 route loops across human and device modes
HARD GATE	Pedestrian priority/route compliance/anomaly pause 100%; no public test before professional thresholds
HUMAN OWNER	Night dispatcher
NON-AI EQUIVALENT	Manual delivery + fixed timetable
RECOVERY AFTER STOP	Human route takeover, conflict log, professional threshold review

A0-07 | Operations, Conversion + Evidence

Four modules, five seats, six-stage funnel and known/unknown/provisional

ANNUAL OPEN RHYTHM | A REVIEWABLE OUTPUT EACH QUARTER

FIVE ACCOUNTABLE SEATS | NO PUBLIC PILOT WITHOUT QUORUM

SIX-STAGE CONVERSION FUNNEL | EXIT AT EVERY STAGE

CONVERSION LEDGER | PUBLIC OUTPUT, HUMAN DECISION AND EXIT EVIDENCE AT EVERY STAGE

EVIDENCE BOUNDARY | DELIVERABLE, UNKNOWN AND PROVISIONAL STAY APART

Leaving the funnel is not failure; no stage guarantees funding, contract, policy, procurement or replication.
