

QUIET COMMONS JINGZHANG

Quiet is not silence; it is the right to adjust the city's sensory intensity.

合成概念 | SYNTHETIC CONCEPT | NOT SITE EVIDENCE

One spine • three adjustment commons • two wings
/ six units • twelve sensory switches

Author: ImbaJade | Formal bilingual package v1.2

review

01 | Evidence and Scope

Separate announced text, registered sources, provisional geometry and design intent.

FIGURE 01 | PROVISIONAL BOUNDARY / DESIGN INTENT

Overall Quiet Commons System | Choice, Exit and Human Equivalence

- 43.6 km² coordinated research | about 11.4 km² overall design | about 368.4 ha key areas
- Provisional constraints are low-contrast dashed; design intent is high-contrast solid
- Official polygons trigger full rebuild of layers, metrics, figures, HTML and PDFs

Content-review contract ready | geometry provisional | awaiting organizer review

02 | Diagnosis and Data Gaps

AI does not fill missing parcel, rights, building or approved-control facts.

FIGURE 05 | METRICS / EVIDENCE / GOVERNANCE

Metrics, Evidence and Governance | KNOWN / UNKNOWN / PROVISIONAL Separated

- Known: tasks, announced areas, three key areas and provisional boundary
- Unknown: FAR, height, density, setback, road redline, utilities and rights
- Personas, comfort thresholds and operating ownership await co-design or professional review

Content-review contract ready | geometry provisional | awaiting organizer review

03 | Core Concept

Six sensory loads and four public rights define the system.

FIGURE 01 | PROVISIONAL BOUNDARY / DESIGN INTENT

Overall Quiet Commons System | Choice, Exit and Human Equivalence

- Loads: sound, light/glare, thermal, crowding, speed and information
- Rights: choose, bypass/exit, human handoff and non-AI equivalence
- Zero default personal profiles and biometrics; ambient anonymous or manual input first

Content-review contract ready | geometry provisional | awaiting organizer review

04 | Regional Interfaces + Ecosystem

Five opt-in interfaces and eight exchange gates; no alliance claimed to exist.

FIGURE 01 | PROVISIONAL BOUNDARY / DESIGN INTENT

Overall Quiet Commons System | Choice, Exit and Human Equivalence

- Beiwei • Future Science City • Huairou Science City • Beijing E-Town • Beijing-Tianjin-Hebei
- Land • space • industry • capital • talent • compute • data • scenarios
- Exchange briefs, protocols, de-identified findings and components; no funding or approval promise
- Six global cases provide mechanisms, never local planning controls

Content-review contract ready | geometry provisional | awaiting organizer review

05 | Land Use and Renewal

Six complete conceptual areas carry sensory programs without claiming statutory land use.

FIGURE 02 | LAND USE / SENSORY PROGRAM

Land Use and Sensory Programs | Complete Partition, Not Statutory Land Use

TOPOLOGY: 0 OVERLAP / 0 GAP (WITHIN TOLERANCE) | FAR, HEIGHT, DENSITY, SETBACK: UNKNOWN

- Standards R&D | staffed community service | heritage translation and learning
- Low-stim commerce | restorative blue-green | reversible pilot reserve
- Retain first, adapt lightly and reversibly, require four levels of evidence before demolition

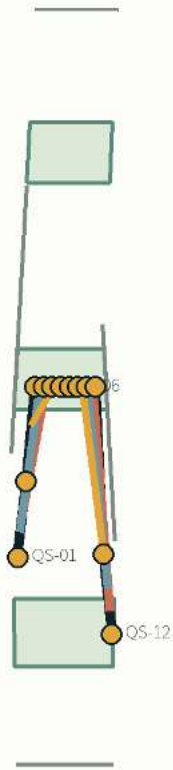

Content-review contract ready | geometry provisional | awaiting organizer review

06 | Mobility and Blue-Green

Speed becomes a choice; every route retains bypass, rest and staffed help.

FIGURE 04 | MOBILITY / BLUE-GREEN

Slow Mobility, Blue-Green and Restorative Routes | Bypass, Rest and Staffed Help

LEGEND / ROUTES

- Quiet Commons spine
- Heritage translation walk
- Low-stim cycle route
- Rail-to-staffed-service
- Restorative blue-green
- Sensory switch

Route choice is not a personal recommendation profile: one time choice, paper map, fixed signs and staff enquiry coexist.

- The spine links twelve switches; the heritage walk supports railway narratives
- Low-stim cycling reduces conflict; rail-to-staffed-service links do not require a phone
- Shade, water, seating and low-information signs form restorative routes

Content-review contract ready | geometry provisional | awaiting organizer review

07 | Zhongzhiyuan: Quiet-Tech Test Yard

Test sound, light, heat and speed before devices enter public space.

合成概念 | SYNTHETIC CONCEPT | NOT SITE EVIDENCE

- Visible test state, retreat zone, physical stop and human safety supervisor
- 3 modes × 10 stops, design target ≥ 30 ; any failure/breach/near miss = STOP
- Non-AI equivalent: manual handling or fixed display; image is a synthetic concept

Content-review contract ready | geometry provisional | awaiting organizer review

08 | AI Origin: Many-Ways Room

Captions, tactile media, plain language and staffed service make communication equivalent.

合成概念 | SYNTHETIC CONCEPT | NOT SITE EVIDENCE

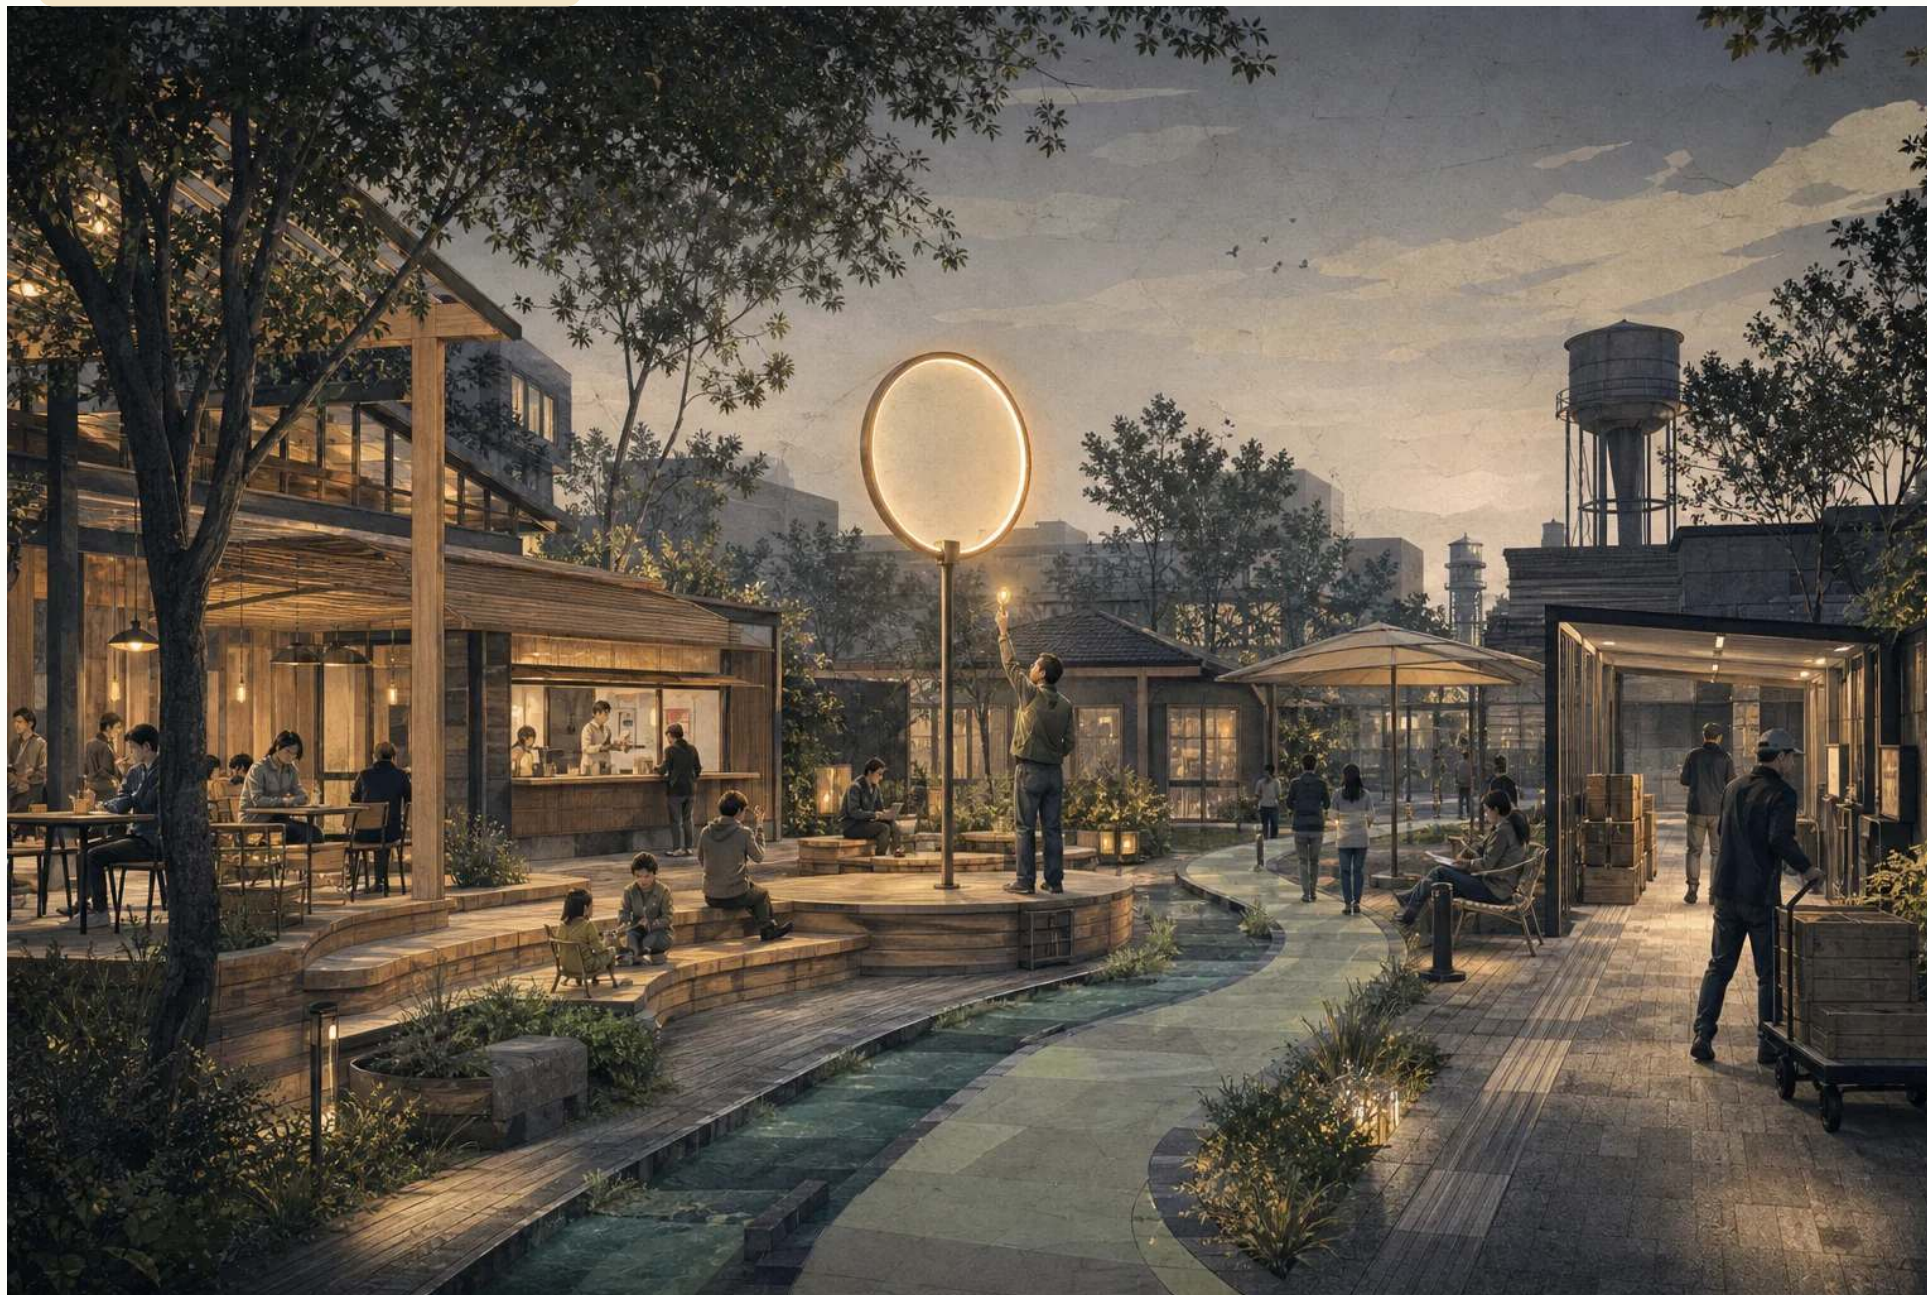

- Continuous tactile route; quiet learning, public translation and staff service do not obstruct one another
- Rights/payment/identity/low confidence 100% to staff; paper path 100% available
- One-time choice, no profile; image is a synthetic concept

Content-review contract ready | geometry provisional | awaiting organizer review

09 | Dazhongsi: Rhythmic Civic Hub

A visible timetable coordinates low-stim commerce, service and night logistics.

合成概念 | SYNTHETIC CONCEPT | NOT SITE EVIDENCE

- Regular, low-stim and event modes announced in advance; clock shows only public state
- Night logistics design target ≥ 40 loops; pedestrian priority/anomaly pause 100%
- Staffed service and manual delivery remain; image is a synthetic concept

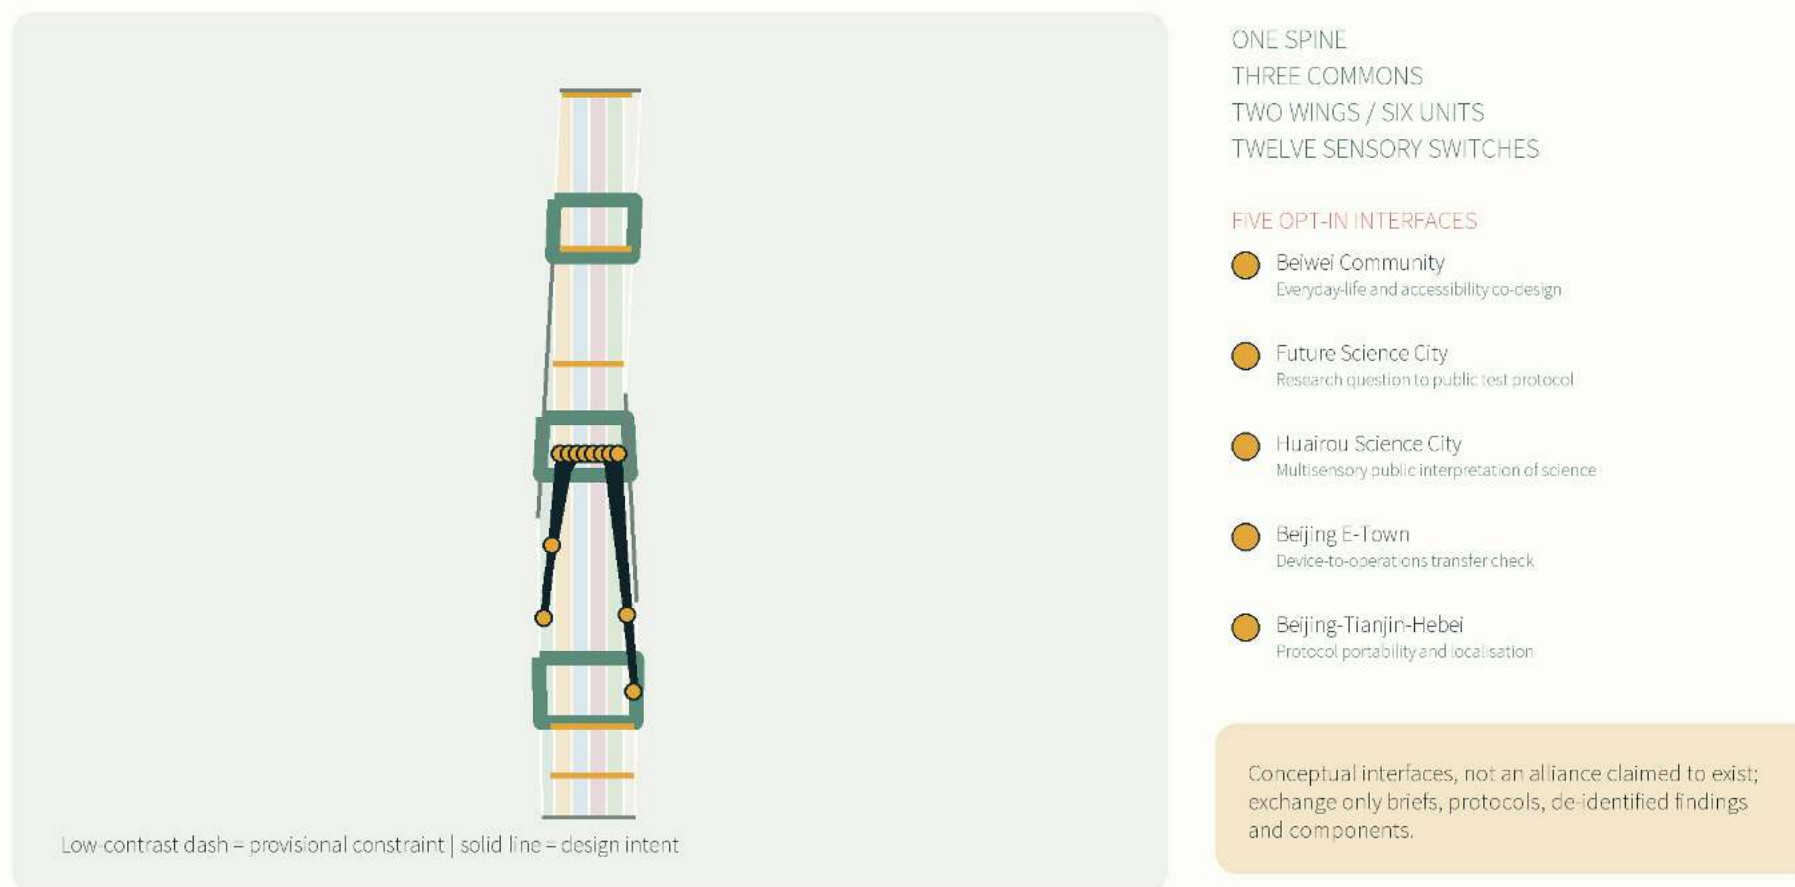

Content-review contract ready | geometry provisional | awaiting organizer review

10 | Twelve Scenarios / Eight Personas

Personas are working hypotheses pending co-design, not invented research findings.

FIGURE 01 | PROVISIONAL BOUNDARY / DESIGN INTENT

Overall Quiet Commons System | Choice, Exit and Human Equivalence

- Route, heritage, event, staffed service, device testing and night logistics
- Lighting, cooling, crowd hint, cognitive wayfinding, quiet hours and emergency communication
- Neurodivergent, vision, hearing, older, child/caregiver, shift, international and maintenance

- Lighting, cooling, crowd hint, cognitive wayfinding, quiet hours and emergency communication

- Neurodivergent, vision, hearing, older, child/caregiver, shift, international and maintenance

11 | Four Pilot Protocols

Numbers are professionally reviewable test designs, not completed results.

- P1 ≥30 stop trials | P2 ≥24 sessions | P3 ≥60 scripts/≥24 sessions | P4 ≥40 route loops
- GO: two consecutive hard-gate passes + human review; PAUSE: soft target or maintenance shortfall
- STOP: harm, serious near miss, stop failure, rights error or unapproved data processing
- 4/4 handoff • 4/4 non-AI equivalent • 4/4 recovery/exit

Content-review contract ready | geometry provisional | awaiting organizer review

12 | Annual Operations + Conversion

Four annual modules, five accountable seats and a six-stage exit-capable funnel.

- Q1 Protocol Lab | Q2 Open Test | Q3 Quiet Commons Week | Q4 Standards & Maintenance
- Public need • developer • accessibility • operations/safety • data/rights seats
- Need→screen→sandbox→supervised pilot→standard candidate→independent procurement/exit
- Leaving is not failure; no stage guarantees funding, policy, contract or replication

Content-review contract ready | geometry provisional | awaiting organizer review

13 | Metrics, Compliance and Risk

Structured data is the sole source of truth; known, unknown and provisional stay separate.

- EPSG:4326 publication | EPSG:4548 recalculation | zero land-use overlap/gap
- 23 tasks • 9 standard responses • 15 design-depth items
- Top risk: misreading provisional geometry, working personas or AI suggestions as facts
- Public status: content-review contract ready; geometry provisional; awaiting organizer review

Content-review contract ready | geometry provisional | awaiting organizer review
