

FROM MODEL TO MEAL

A Common-Table Spine links AI research, talent life and the civic everyday

EN

SPATIAL SYSTEM

One spine

tables + slow mobility + rain gardens

Three stations

food lab + talent court + market

Six gateways

hot meals + water + toilets + staff

Two wings

15-minute food and surplus network

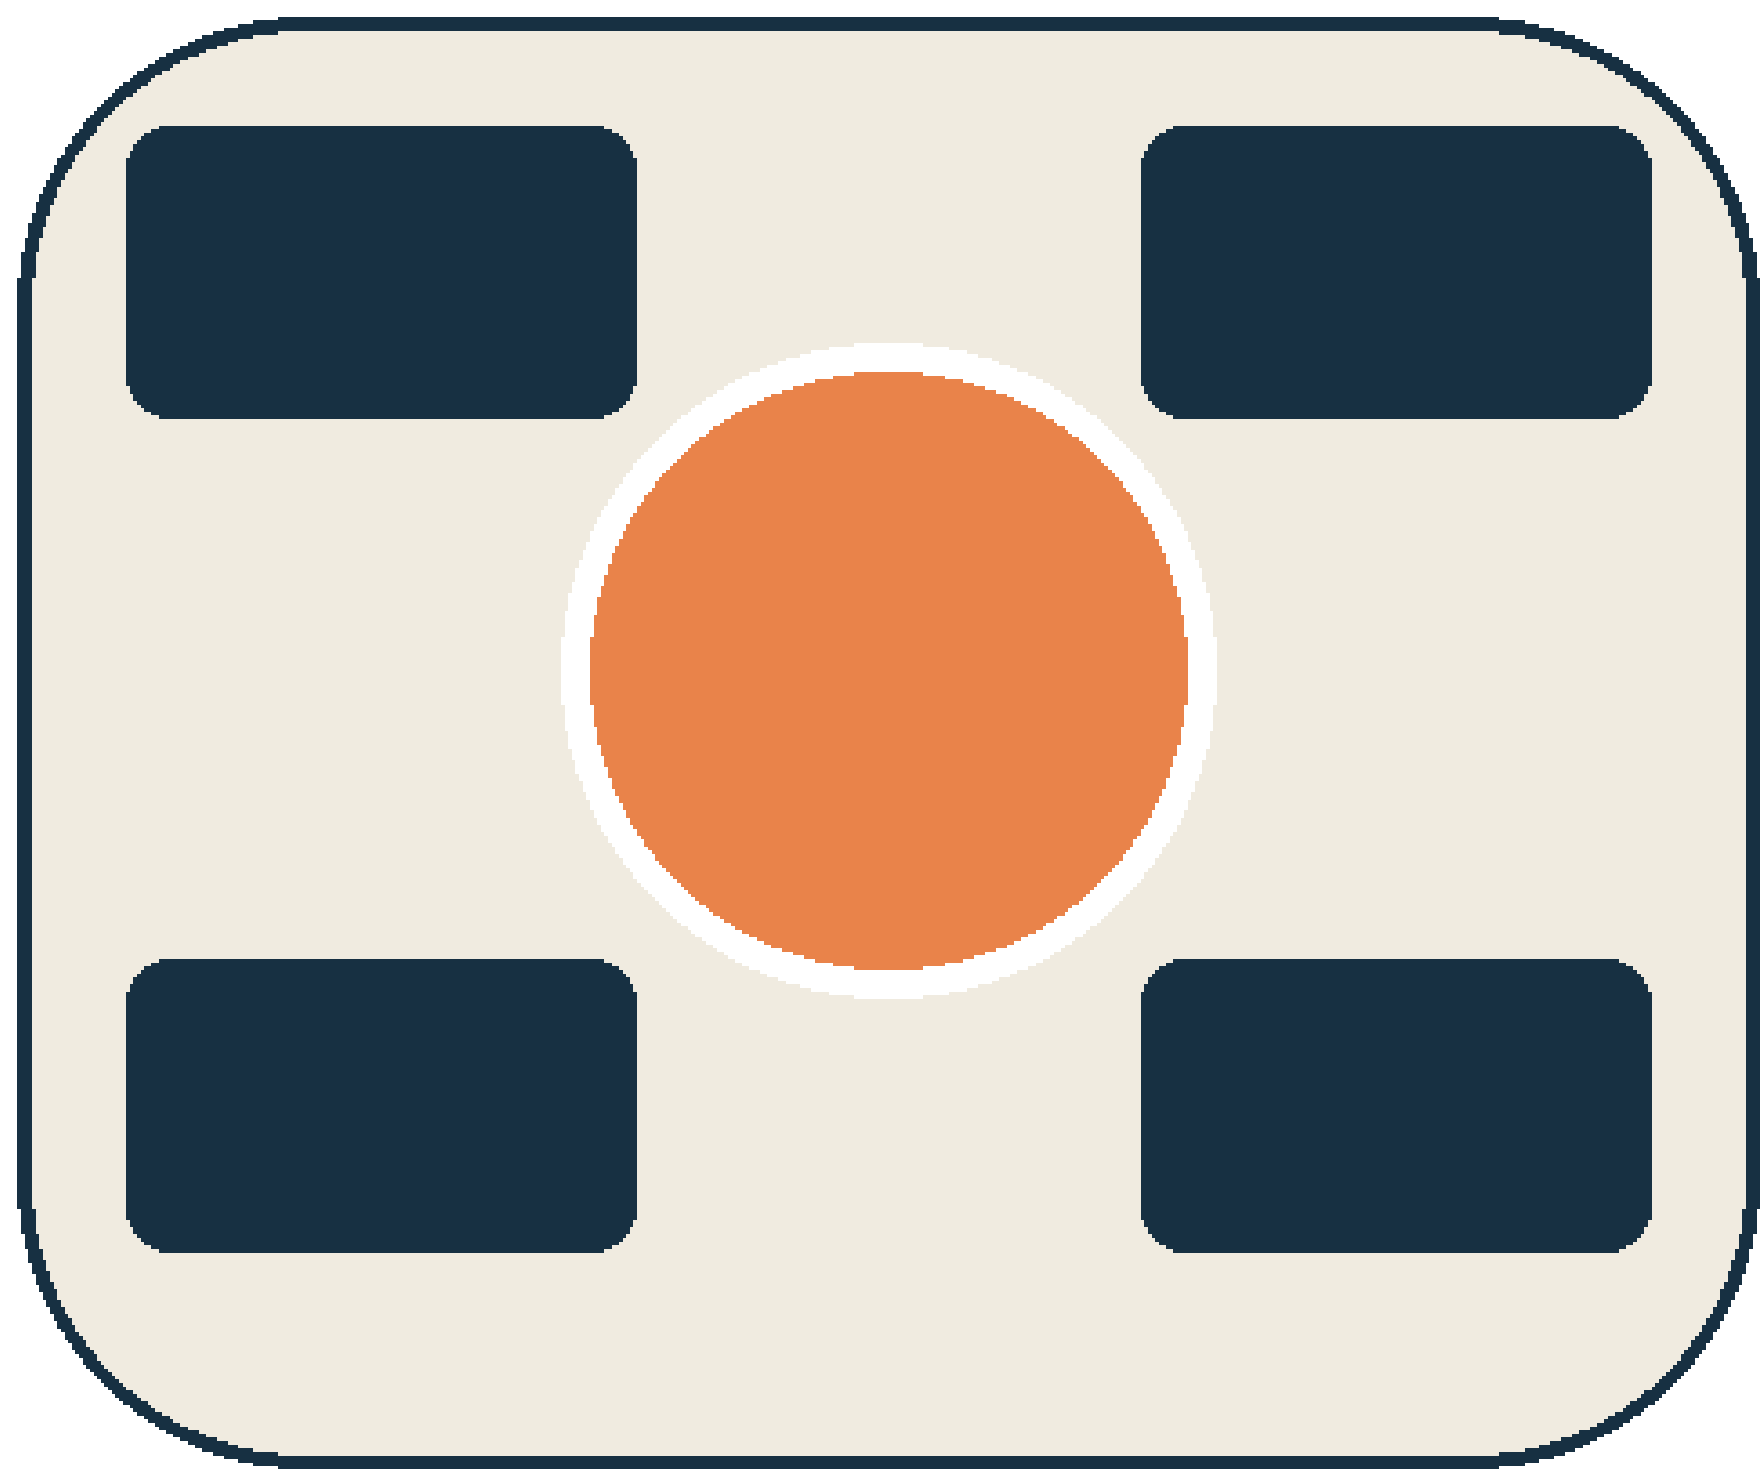

AI is never a gate to a meal: turn recommendations off, keep service running, hand faults to people.

THREE STATIONS, NOT THREE ISLANDS

Each station has a usable landmark, public entry, separate logistics, staffed service and shutdown path

EN

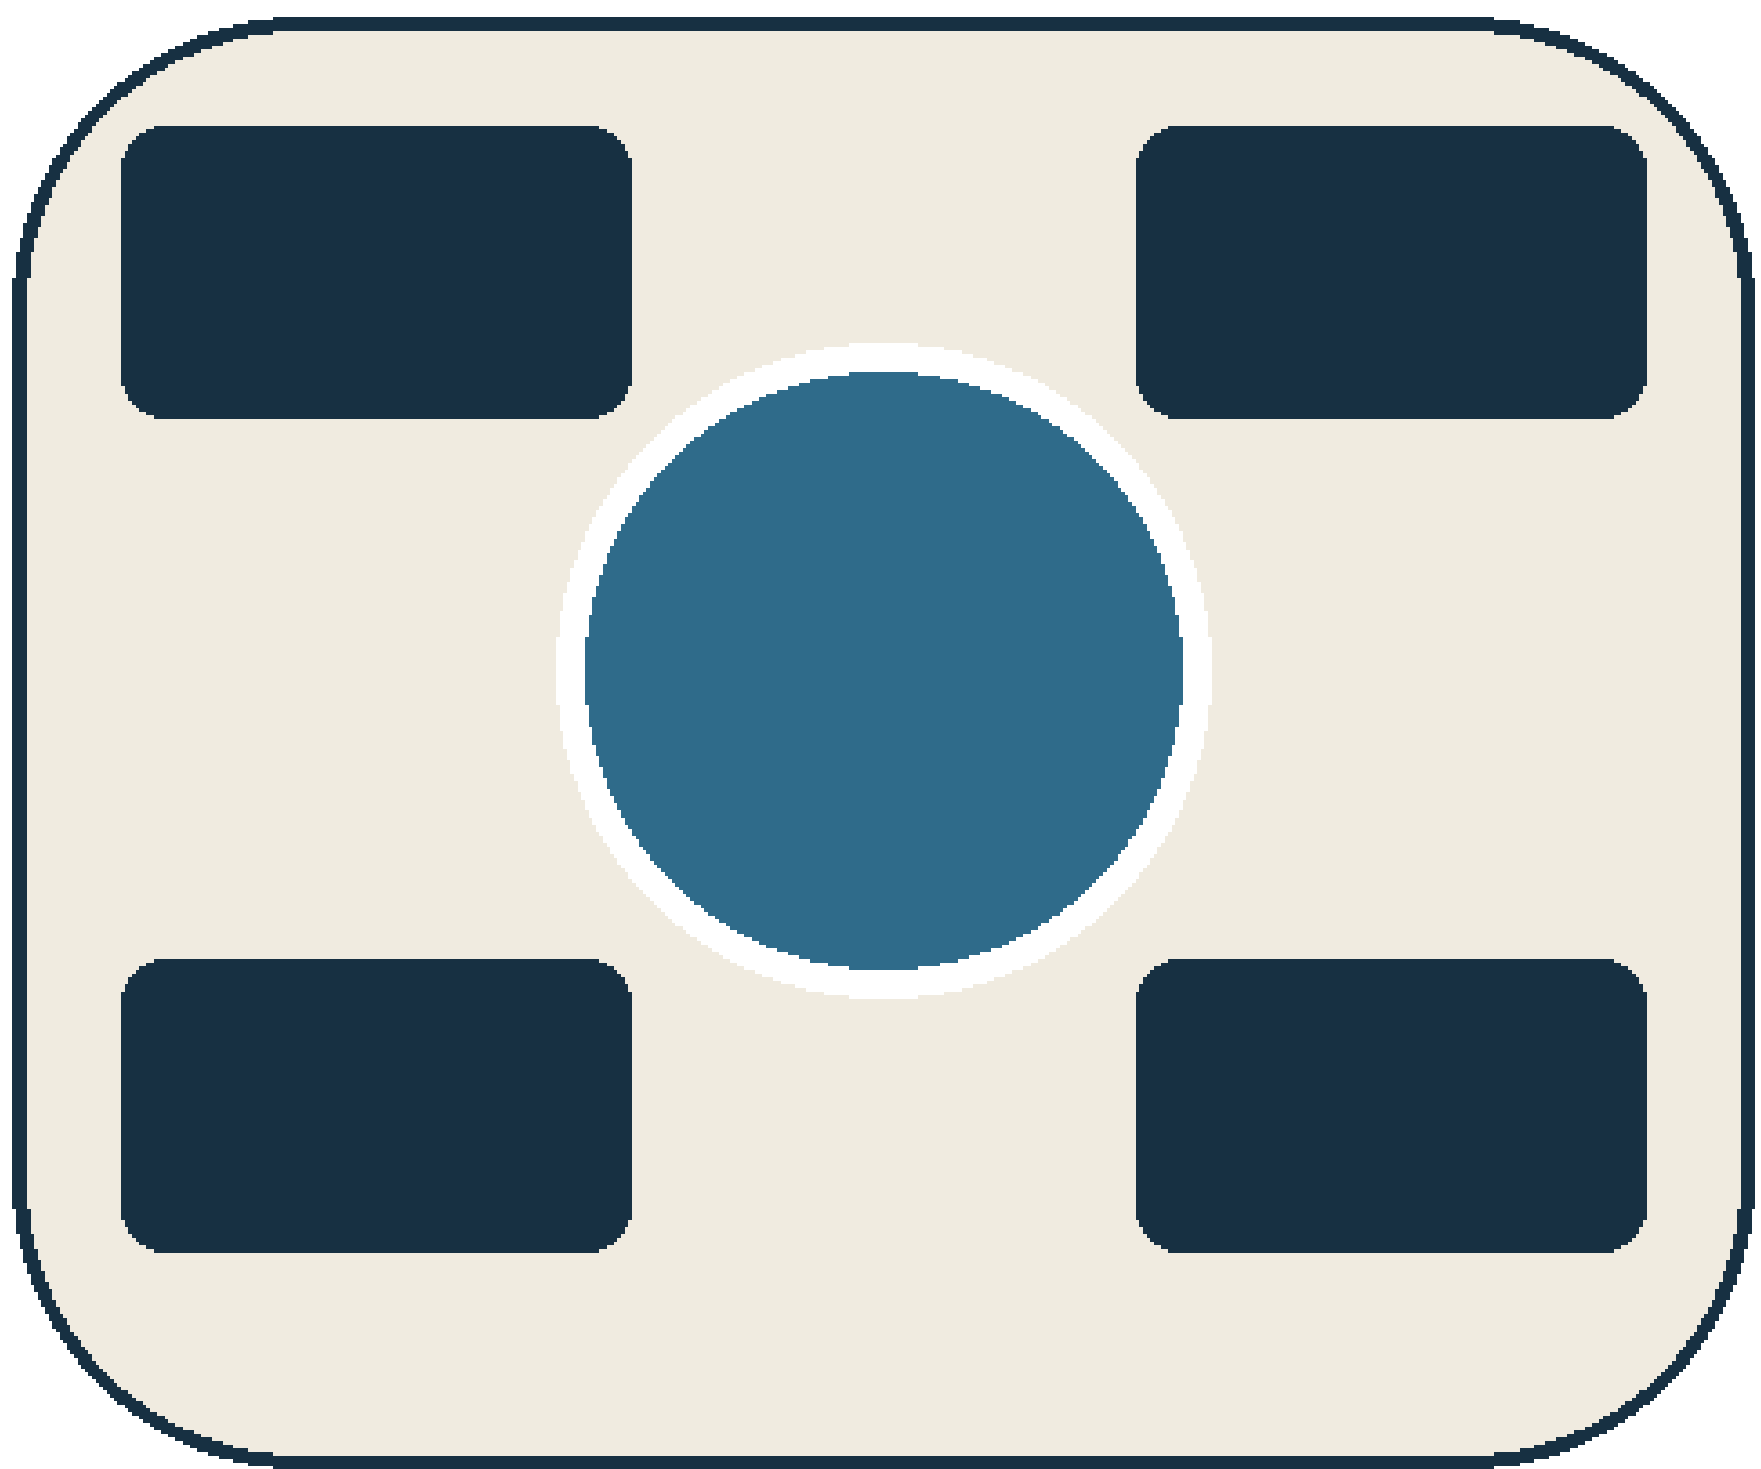

Zhongzhiyuan | Open Food Lab

Transparent Hearth

- robot test gallery
- safety calibration
- shared production kitchen
- public viewing ring

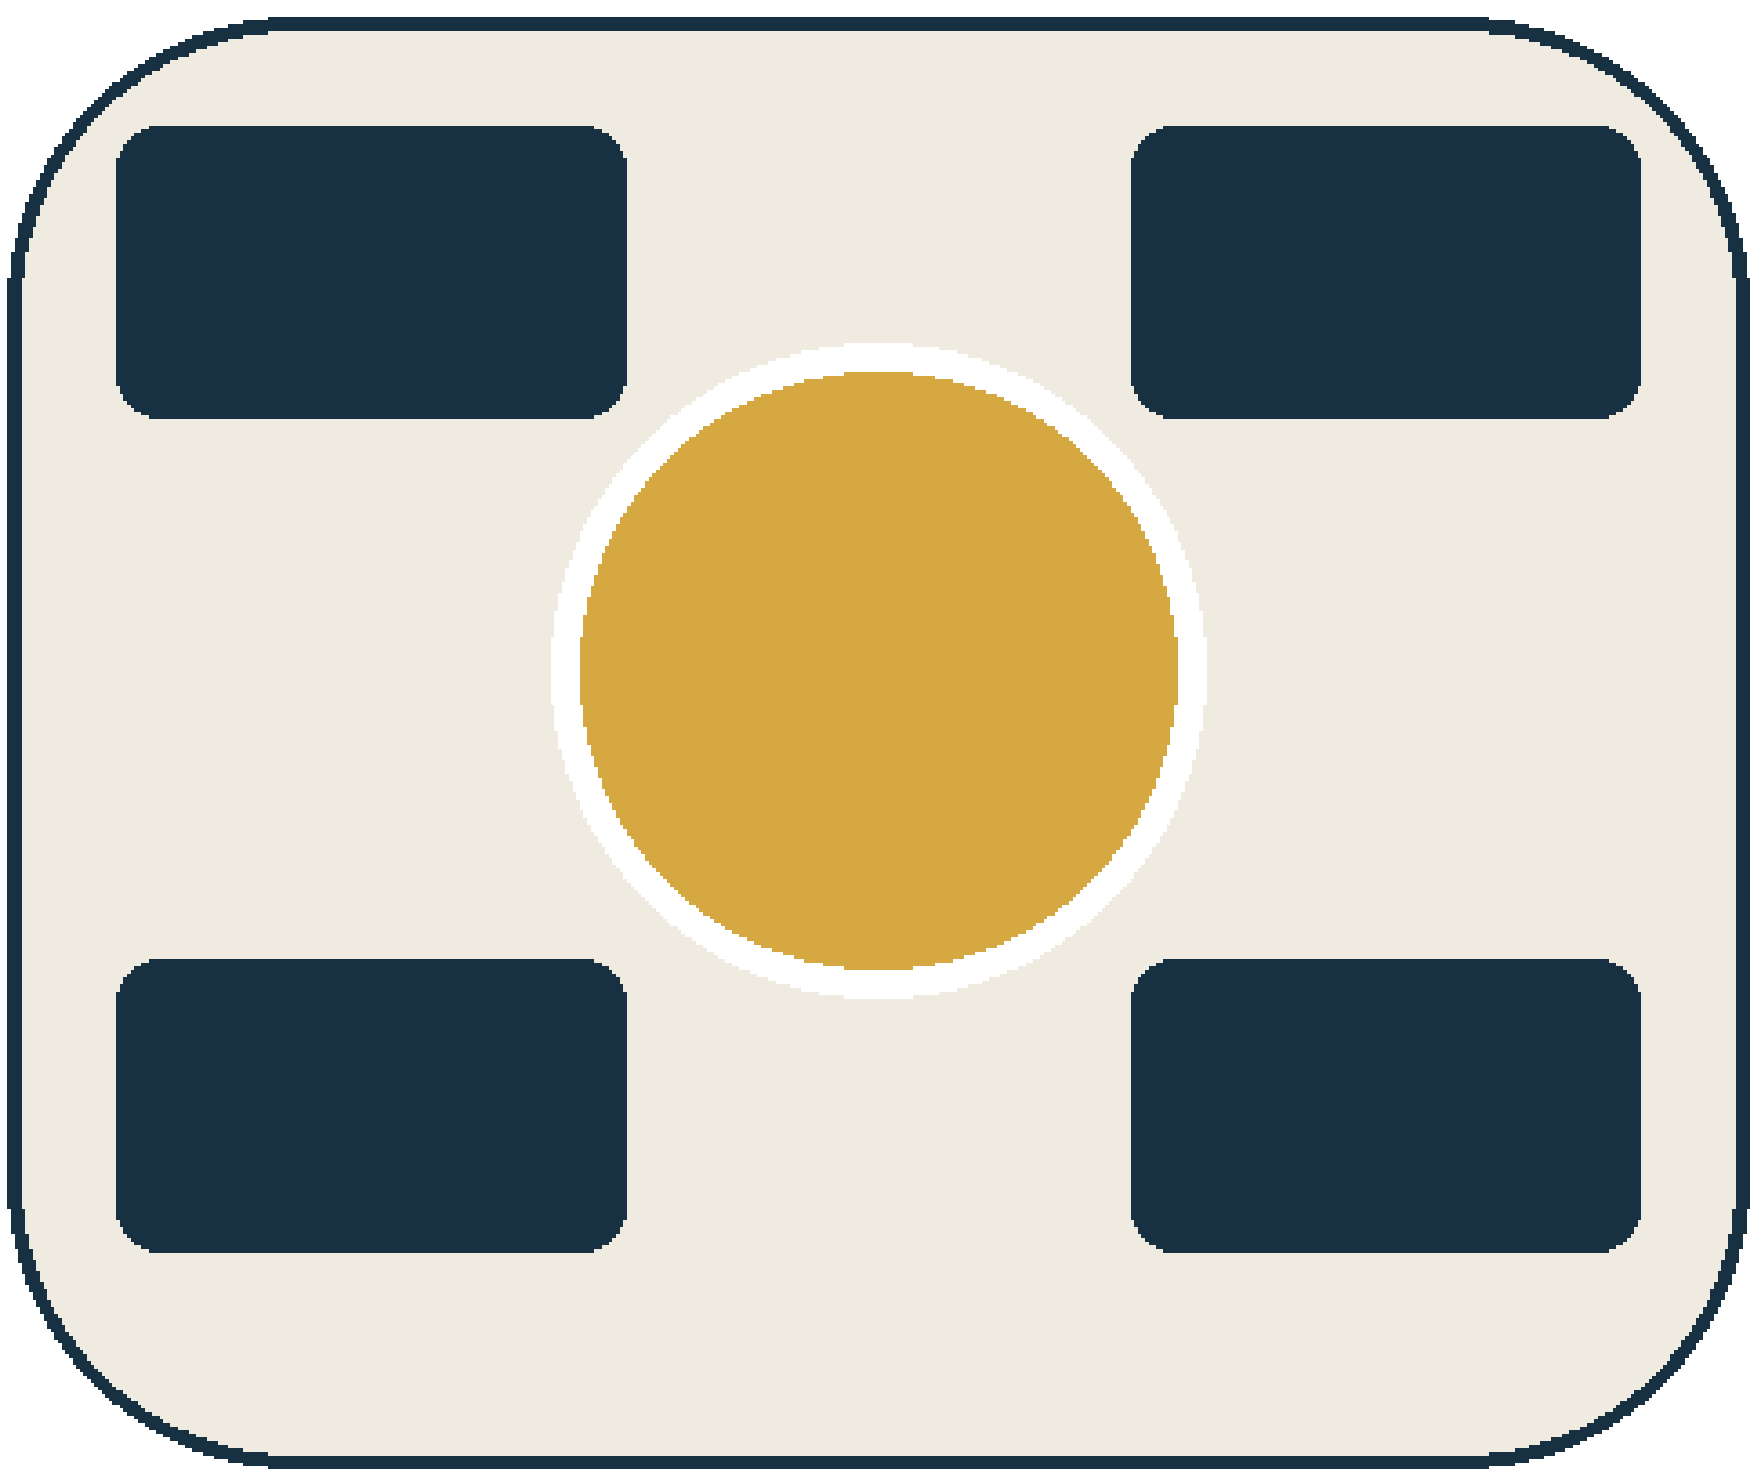

AI Origin | One-Meal Talent Court

Hundred-Person Table

- affordable canteen
- childcare kitchen
- quiet work rooms
- all-weather walk

Dazhongsi | Centennial Food Market

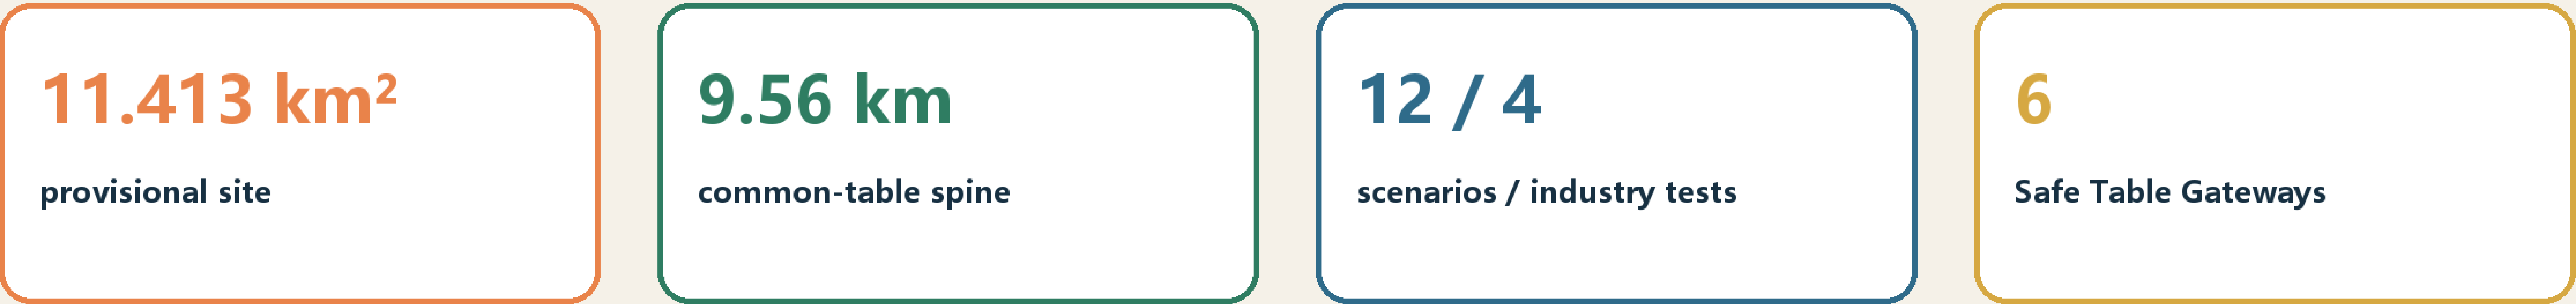

Centennial Recipe Gallery

- market and first stores
- international launch hall
- oral archive
- transit walk link

EVERY CLAIM HAS A RECOMPUTATION PATH

EN

Spatial metrics recompute from GeoJSON; statutory controls stay unknown; every AI scenario has human release

UNKNOWN = FAR / building height / road redlines / ownership / utility capacity / heritage boundaries

Provisional geometry supports content review and concept recomputation; it proves neither official boundaries, statutory controls nor implementation eligibility.
