

PILOT LINE MANIFESTO

JING-ZHANG AI PILOT LINE

From AI prototype to trusted urban product

OPEN CHALLENGE - ADMISSION - TEST - REMEDIATE - RETEST - DELIVER / EXIT

# ONE LINE, THREE STATIONS, TWO WINGS, THREE GATES

## Zhongzhiyuan Integration Pilot Station

Assemble models, hardware, data and safety capabilities into systems ready for real-world trials.

## Beijing AI Origin Trust Co-testing Station

Let residents, developers and public-service staff verify public value under pausable and appealable conditions.

## Dazhongsi Market Delivery Station

Translate test evidence into procurement, operations, training, insurance, exit and replication packages.

# THREE SCOPE LEVELS + INDUSTRY LOGIC

STRATEGIC STUDY

Industry ecosystem, talent and global mechanisms

OVERALL DESIGN

Spatial structure, land use, mobility and blue-green systems

KEY AREAS

Three detailed station prototypes and twelve scenarios

Zhongguancun Technology Services Wing

Connect intellectual property, capital, professional services and global innovation resources.

Xiaoyue River Scenario Enablement Wing

Provide open scenarios, everyday-life testing and a continuous public-space experience.

# RECALCULABLE LAND-USE STRUCTURE

## JING-ZHANG AI PILOT LINE RECALCULABLE LAND-USE STRUCTURE

Six conceptual classes cover the provisional site while preserving statutory confirmation interfaces

land\_use\_0802\_area\_sqm

1.84 km2

land\_use\_1401\_area\_sqm

2.01 km2

land\_use\_0805\_area\_sqm

2.08 km2

land\_use\_0701\_area\_sqm

1.94 km2

land\_use\_0806\_area\_sqm

1.77 km2

land\_use\_1207\_area\_sqm

1.77 km2

# THREE STATION PROTOTYPES

JING-ZHANG AI PILOT LINE  
THREE STATIONS · TWELVE SCENARIOS · THREE LANDMARKS

Zhizhiyuan verifies, AI Origin tests, and Dazhongsi prepares delivery through an auditable loop

## Zhongzhiyuan Integration Pilot Station

One Spine · Two Loops · Four Test Courtyards. Assemble models, hardware, data and safety capabilities into systems ready for real-world trials.

## Beijing AI Origin Trust Co-testing Station

One Co-test Street · Three Interfaces · Six Micro-courtyards. Let residents, developers and public-service staff verify public value under pausable and appealable conditions.

## Dazhongsi Market Delivery Station

One Hub · Four Quadrants · One Delivery Salon. Translate test evidence into procurement, operations, training, insurance, exit and replication packages.

# TWELVE TEST SCENARIOS

01 Multi-robot Coordination Yard

Complete the task while meeting preset avoidance, stop, recovery and coordination criteria.

02 Edge-cloud Coordination Loop

Maintain graceful degradation under disconnection, latency and compute switching.

03 Safety Red-team and Failure Library

High-risk paths are found, reproduced, fixed and closed in regression testing.

04 Open-standard Toolchain

Different teams reproduce tests with the same scripts and identify licence duties.

05 Community Assistive Co-test Yard

Users opt in knowingly, tasks complete, and human service remains available.

06 Public-service Co-test Street

Navigation is accurate, sources visible, stale content detectable and human access unimpaired.

07 Privacy and Fairness Sandbox

Bias, leakage and unexplained disparity are detected with a remediation path.

08 User-research Micro-courtyard

Users of different abilities and ages understand tasks, withdraw data and receive results.

09 Terminal Experience and Training Field

Different roles complete onboarding, incident response and shutdown tasks.

10 Urban-product Delivery Hall

Buyers use one evidence base to judge operating limits, total cost and exit duties.

11 Compliance Translation Workbench

Technical evidence is translated into verifiable duties, controls, exceptions and human accountability.

12 International Delivery Salon

External partners distinguish reusable modules, locally retested items and non-transferable conditions.

# MOBILITY, BLUE-GREEN + NEW INFRASTRUCTURE

JING-ZHANG AI PILOT LINE

MOBILITY · BLUE-GREEN · NEW INFRASTRUCTURE

The Pilot Line is a connector and an interface for open tests, railway memory and public experience

CONCEPTUAL SCALE / NOT A SURVEY

COORDINATED LAYERS

PILOT LINE / TEST SPINE

RAIL MEMORY / WALKING

BLUE-GREEN / PUBLIC REALM

BOOKABLE PORTS / EDGE AI

HUMAN REVIEW / REVERSIBLE

CONCEPT DESIGN · PROVISIONAL BOUNDARIES · SUBJECT TO PROFESSIONAL AND STATUTORY REVIEW

DESIGN-STAGE EVIDENCE ATLAS · MATRIXWEAVER-GIT

Engineering Qualification Gate

Verify reliability, interoperability, failure boundaries, energy use, edge-cloud coordination and red-team results.

Public Value Gate

Verify explainability, fairness, privacy, accessibility, human takeover, appeals and real-use feedback.

Delivery Readiness Gate

Verify procurement interfaces, operating manuals, training duties, insurance links, replication and exit conditions.

# JING-ZHANG CULTURE, LANDMARKS + GLOBAL CASES

# PHASING + FOUR-PARTY GOVERNANCE

**0-12 months: system first, lightweight launch**

Set up the joint office, establish baselines, publish open challenges and launch three stations with movable elements.

**12-36 months: connect three stations and network evidence**

Share instruments, scripts and booking systems; run annual red-team tests and public review.

**After 36 months: expand evidence and update dynamically**

Replicate verified modules, exit weak or high-risk scenarios and connect cross-regional testing and procurement partners.

**Public authorities**

The Jing-Zhang Pilot Line Joint Office maintains protocols, admission, evidence passports, cross-station scheduling and annual reports.

**Universities and institutes**

The Jing-Zhang Pilot Line Joint Office maintains protocols, admission, evidence passports, cross-station scheduling and annual reports.

**Communities and the public**

The Jing-Zhang Pilot Line Joint Office maintains protocols, admission, evidence passports, cross-station scheduling and annual reports.

**Companies and operators**

The Jing-Zhang Pilot Line Joint Office maintains protocols, admission, evidence passports, cross-station scheduling and annual reports.

# METRICS, EVIDENCE + RISK BOUNDARIES

## JING-ZHANG AI PILOT LINE FROM SPATIAL DATA TO PUBLIC LEDGERS

Every judgment links recalculable metrics, evidence passports, gate reviews and accountable owners

FOUR PUBLIC LEDGERS

INNOVATION

PUBLIC VALUE

SAFETY

OPERATIONS

CONCEPT DESIGN · PROVISIONAL BOUNDARIES · SUBJECT TO PROFESSIONAL AND STATUTORY REVIEW
