

Jing-Zhang Reversible Commons

AI is an option, not a prerequisite for access.

Choice is made spatial: visible, refusable, appealable, exitable, and reversible.

Concept proposal | provisional rough boundaries | recalculate after official polygons

01

Overview: choice as spatial structure

One memory spine + three reversible fields + two open interfaces + three triggers

AI is an option, not a prerequisite for access.

Choice is made spatial: visible, refusable, appealable, exitable, and reversible.

11 AI scenarios

6 reversibility gates

3 commons + triggers

Concept proposal | provisional rough boundaries | recalculate after official polygons

Dashed lines denote provisional_constraint only; official_boundary=false. They are not official redlines, parcels, or roads.

Sources: call brief, site package v0.1.0, and this submission's GeoJSON / metrics; drawings are interpretive.

Dashed lines denote provisional_constraint only; official_boundary=false. They are not official redlines, parcels, or roads.

03

Key areas: three roles, three spatial triggers

All key-area polygons are provisional rough; area labels are official text values, not inferred from rectangles.

Zhongzhiyuan · Making Commons

192.1 ha

Three spatial triggers

Reversible Assembly Yard

Assemble, test, remove, restore

Industry tests first prove removability and recovery before occupying long-term space.

Removable · Refusable · Reversible

AI Origin · Learning Commons

104.3 ha

Three spatial triggers

Centennial Time Garden

Learn, interpret, co-propose

Rail memory, AI literacy, and public understanding share one walkable place.

Removable · Refusable · Reversible

Dazhongsi · Everyday Commons

72.0 ha

Three spatial triggers

Dual-Path Service Hall

Dual paths, human review, daily service

Every AI entry is paired with an equally reachable non-AI path and appeal desk.

Removable · Refusable · Reversible

Sources: call brief, site package v0.1.0, and this submission's GeoJSON / metrics; drawings are interpretive.

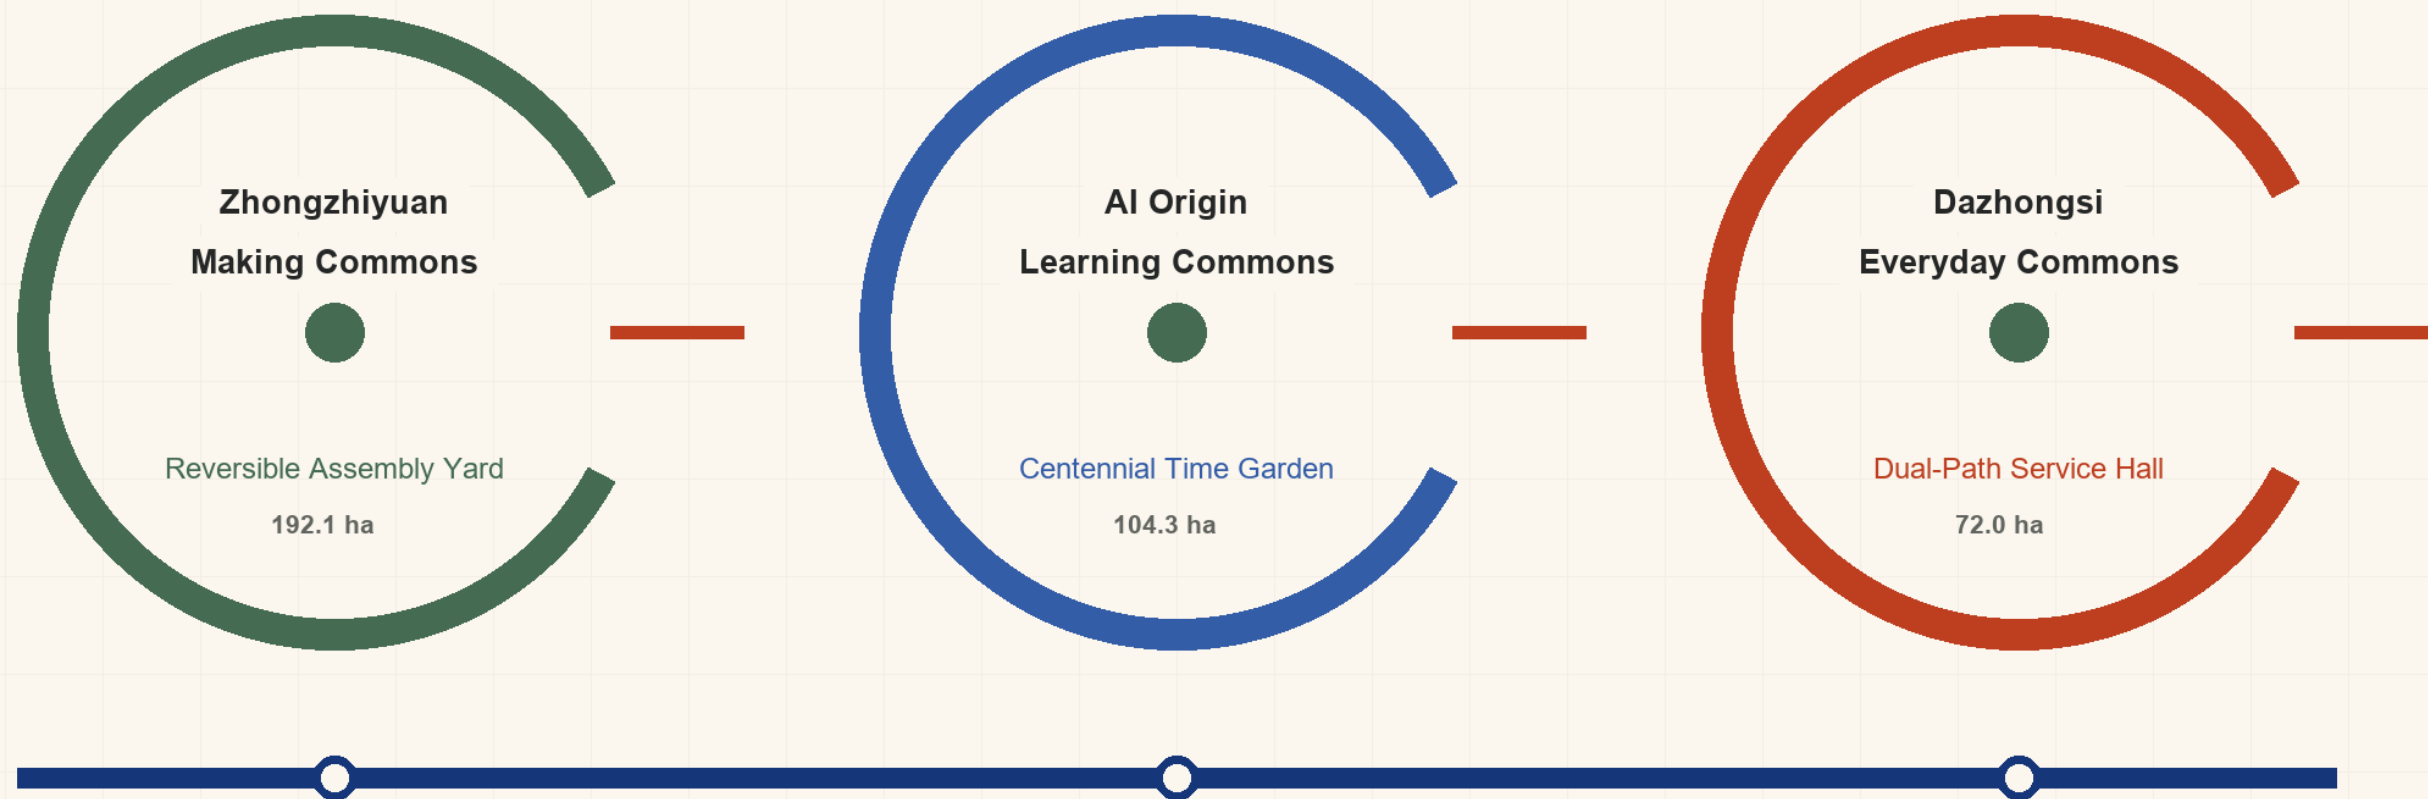

Dashed lines denote provisional_constraint only; official_boundary=false. They are not official redlines, parcels, or roads.

02

Spatial structure: three commons, not a linear pipeline

Three reversible fields share six gates; the memory spine is cultural and civic, not regulatory.

One memory spine

A cultural and public-space narrative, not a new official alignment

Six gates for every AI scenario

Non-AI baseline

Minimum data

Visible status

Human review & appeal

Refusal & exit

Stop & rollback

Sources: call brief, site package v0.1.0, and this submission's GeoJSON / metrics; drawings are interpretive.

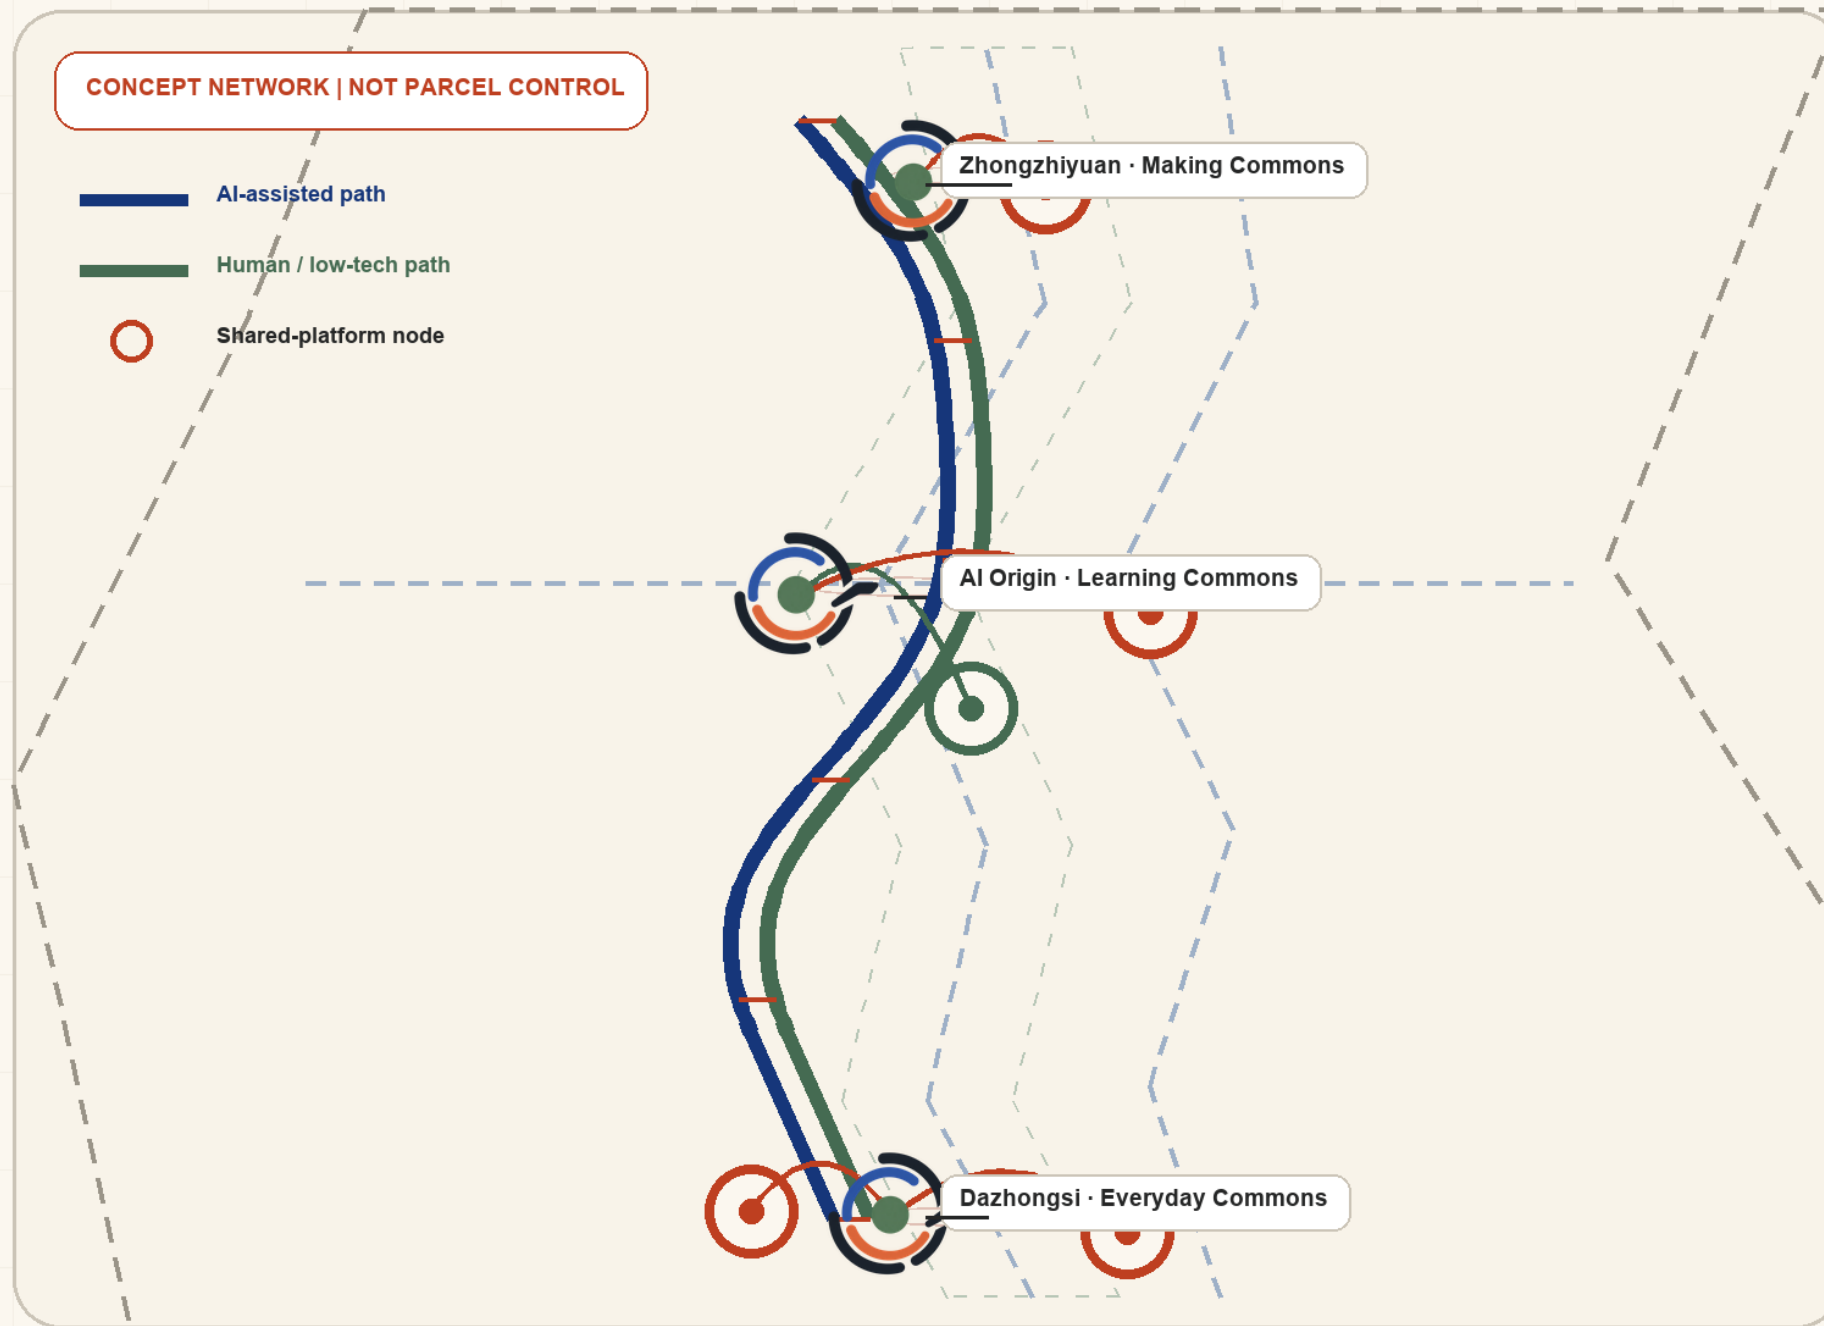

Dashed lines denote provisional_constraint only; official_boundary=false. They are not official redlines, parcels, or roads.

04

Mobility and blue-green public space: dual paths made spatial

A high-tech path never cancels the low-tech path; public space remains visible, reachable, and stoppable.

DUAL PATH

AI is an option, not a prerequisite for access.

AI guidance	Clearly marked
Human counter	Equally reachable
AI suggestion	Refusable
Human review	Appealable
Online path	Offline fallback

Dashed lines denote provisional_constraint only; official_boundary=false. They are not official redlines, parcels, or roads.

Sources: call brief, site package v0.1.0, and this submission's GeoJSON / metrics; drawings are interpretive.

Dashed lines denote provisional_constraint only; official_boundary=false. They are not official redlines, parcels, or roads.

FOUR OPERATING SEASONS

Annual umbrella: Room to Choose Week

Dates, budget, and accountable operator are unknown / not authorized; this is not a confirmed programme.

05

Metrics and evidence: separate knowns, unknowns, and promises

GeoJSON → metrics → gates → matrices → drawings; presentation never upgrades evidence.

SUBMISSION-CONTRACT COUNTS

11 scenarios / 3 industry tests / 7 profiles / 3 catalytic interventions

Sources: call brief, site package v0.1.0, and this submission's GeoJSON / metrics; drawings are interpretive.

Dashed lines denote provisional_constraint only; official_boundary=false. They are not official redlines, parcels, or roads.

Time-limited Public Evidence Plaque

Purpose	Current state
Beneficiary	Limits
Failure / stop record	Human path
Review date	Removal condition

- 05

Archive / hand over / exit

Archive and hand over work without a maintainer, with expired evidence, or with rising risk; individual exit never requires persistent tracking. Organisation, platform, scale, and IP arrangements remain unknown.

UNKNOWN

Official boundaries, controls, ownership, road redlines, utilities, and heritage controls are unavailable.

NOT AUTHORIZED

Accountable operator, budget, procurement, construction, and long-term operation are not authorised.

NOT RUN

Fieldwork, public participation, engineering verification, and performance measurement have not been run.

STOP

Stop a scenario after harm, discriminatory exclusion, appeal backlog, data overreach, or human fallback failure.

Rollback order: pause automation → switch to human / non-AI path → freeze new data → notify affected users → log and review → restore or retire.

The open circular commons

The circle is shared space; the opening is refusal and exit; the orange threshold makes choice visible; the green centre is public benefit. The mark is built from spatial relationships rather than initials.

Sources: call brief, site package v0.1.0, and this submission's GeoJSON / metrics; drawings are interpretive.

Dashed lines denote provisional_constraint only; official_boundary=false. They are not official redlines, parcels, or roads.

The mark, figures, PDF layouts, HTML, and builder are original to this proposal; external facts and standards follow sources.json. No remote images or third-party map screenshots are embedded.
