

One Axis, Three Cores, Two Wings; 43.6 / 11.4 km² / 368.4 ha.

REN-Axis · Concept Structure

Jing-Zhang AI Belt · One Axis · Three Cores · Two Wings

概念方案

One axis, three cores, scenarios along the belt

red axis=spine · ①②③=cores · red=landmarks · blue=AI-scenario nodes · blue lines=E-W stitches · bands=phasing · dashed=provisional

三核 1

Source-Stack

North · full-stack innovation

三核 2

Origin

Middle · near-campus transfer

三核 3

Bell-Hub

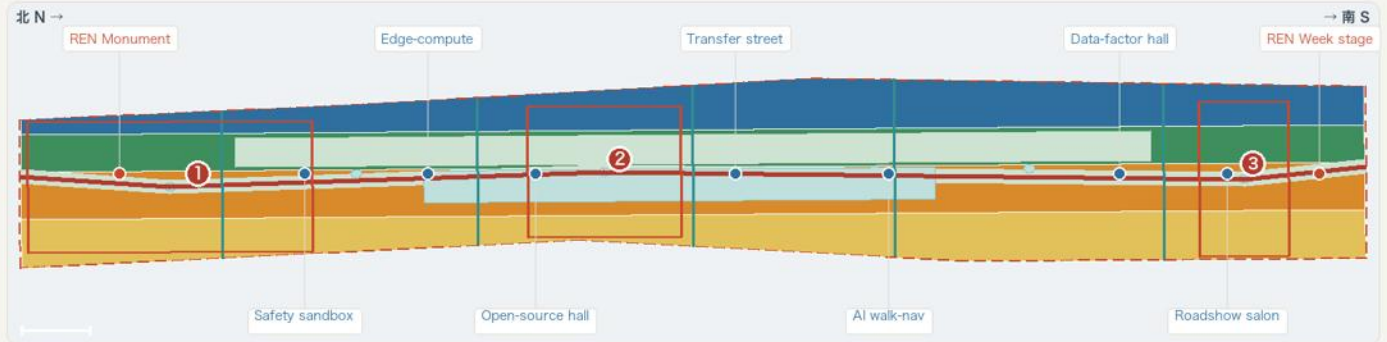

South · station-city economy

GeoJSON recomputed EPSG:4548 · provisional boundary · concept, not an approved conclusion

Land-Use Structure & Three-Level Scope

Overall design area ~11.4 km² · seamless coverage

控规深度

Land-use legend

 AI R&D / research  Park & open space  Industry & commercial  Community services  Provisional boundary

Coordinated research

43.6 km²

AI ecosystem · strategy · chain

Overall design

11.4 km²

renewal · industry · transport · character

Key areas

368.4 ha

three cores, detailed design

Classification: national land-use control (project subset); areas in EPSG:4548 · concept

Key Areas

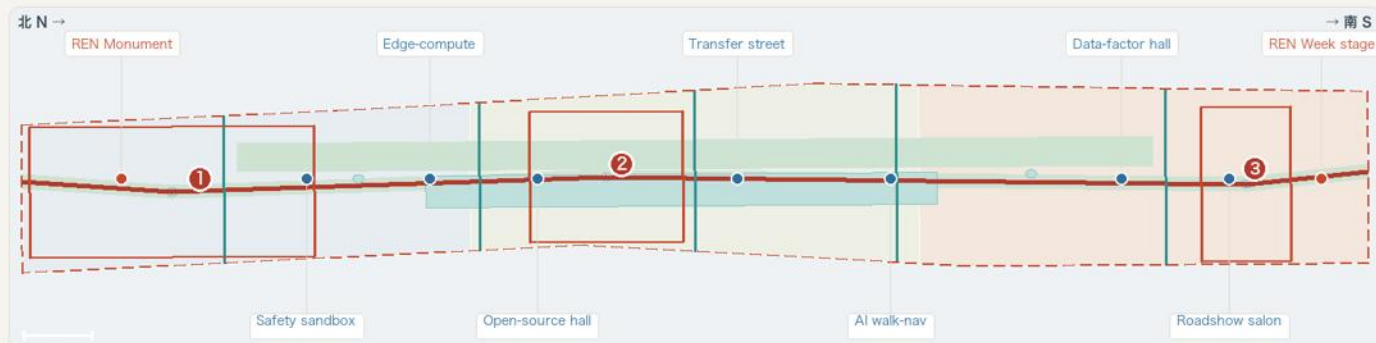

Source-Stack · Origin · Bell-Hub

Detailed Design of Three Key Areas

Source-Stack · Origin · Bell-Hub · 368.4 ha (provisional)

重点设计

1 Source-Stack (192.1 ha)

Garden-type full-stack district

platforms · governance · safety testing · Qinghe edge

2 Origin (104.3 ha)

Near-campus transfer & talent

open-source hall · transfer street · talent zone

3 Bell-Hub (72.0 ha)

Urban smart economy & exchange

station-city · four-quadrant walk · data factors

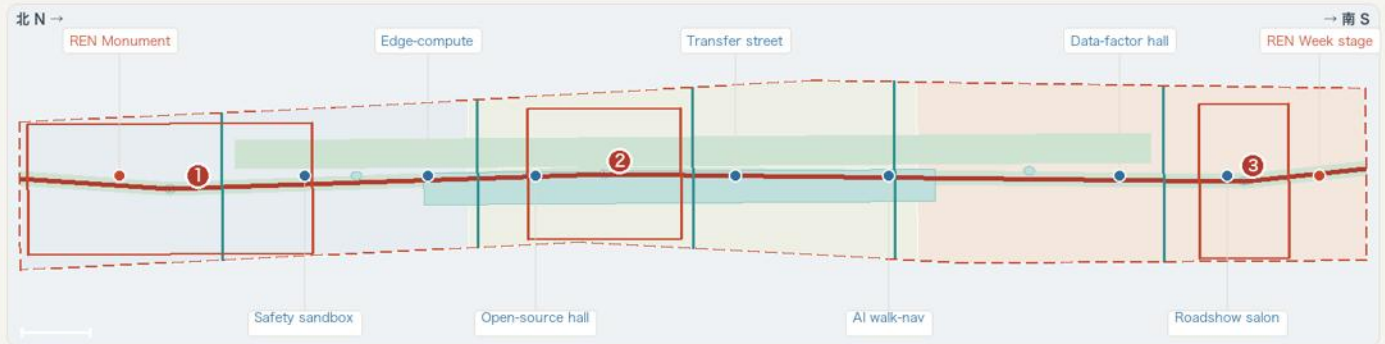

Note: key areas are provisional constraints — not official redlines/scoring/approval; recompute on official polygons.

Detailed design of three key areas · concept for professional deepening

Slow-Mobility & Blue-Green Public Space

One axis links three cores · N - S through, E - W stitched

复合系统

Legend

E-W stitch branch public node green corridor main spine

Green ratio

21.1%

green_space / site

Public ratio

7.5%

public_space / site

Strategy

stitch & connect

park gaps · ring crossings · four-quadrant links

Ratios from GeoJSON; alignments pending official conditions · concept

Core Metrics & Evidence Chain

GeoJSON → metric → drawing → HTML, recomputable
