

Continuity of everyday life

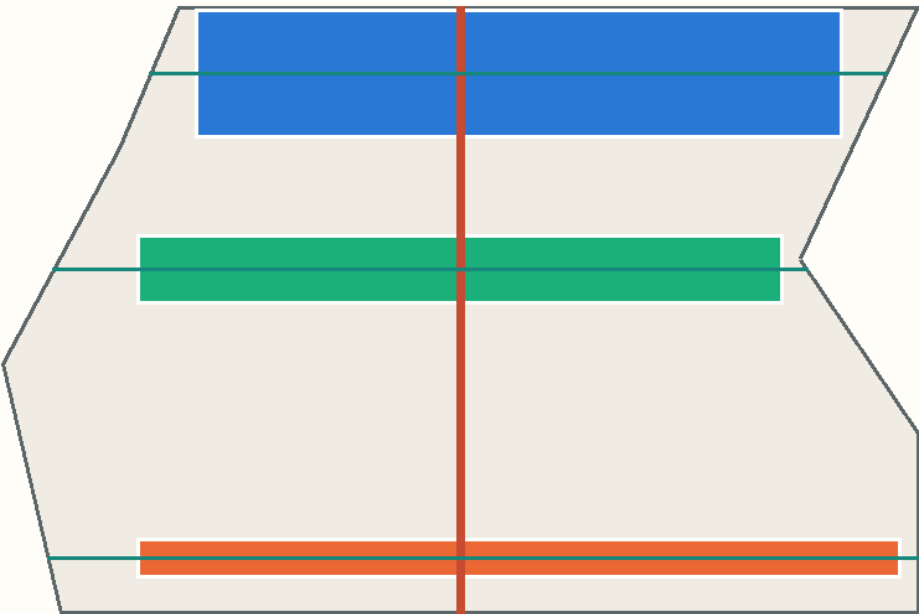

Design ordinary service, human responsibility and removable tools as a civic infrastructure.

01

Concept and evidence boundary

Everyday services remain equivalent across app, low-bandwidth, phone, paper and staffed channels

JZ / CIVIC AI COMMONS

PROVISIONAL — not an official planning boundary or statutory area

- Everyday equivalence
- Maintenance debt
- Civic handoff
- Exit as service

Connection is not task completion

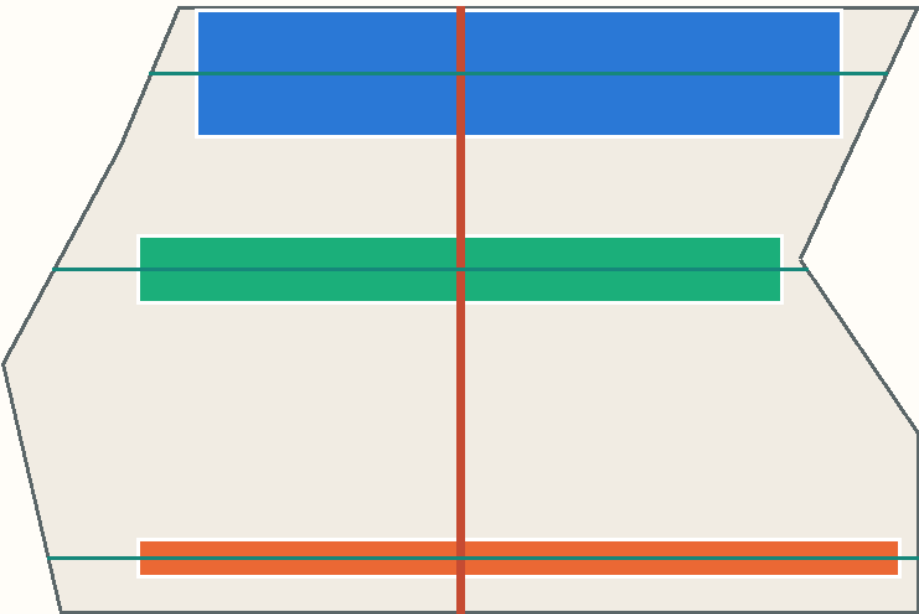

A route can exist while older adults, children, night workers or offline users still cannot complete a service.

01

Concept and evidence boundary

Everyday services remain equivalent across app, low-bandwidth, phone, paper and staffed channels

JZ / CIVIC AI COMMONS

PROVISIONAL — not an official planning boundary or statutory area

- Everyday equivalence
- Maintenance debt
- Civic handoff
- Exit as service

Everyday equivalence

App, low-bandwidth, phone, paper and staffed channels should complete the same basic task.

02

JZ / CIVIC AI COMMONS

Land-use structure and three responsibility layers

Conceptual partitions cover the provisional area; AI enters only after ordinary service and maintenance responsibility are clear

Everyday layer

mobility / care / learning / commerce / culture

Civic AI layer

explain / assist / handoff / exit

Maintenance layer

shift / work order / review / retirement

Three responsibility layers

Everyday, civic-AI and maintenance layers coexist; AI is never the only entry point.

02

JZ / CIVIC AI COMMONS

Land-use structure and three responsibility layers

Conceptual partitions cover the provisional area; AI enters only after ordinary service and maintenance responsibility are clear

Everyday layer

mobility / care / learning / commerce / culture

Civic AI layer

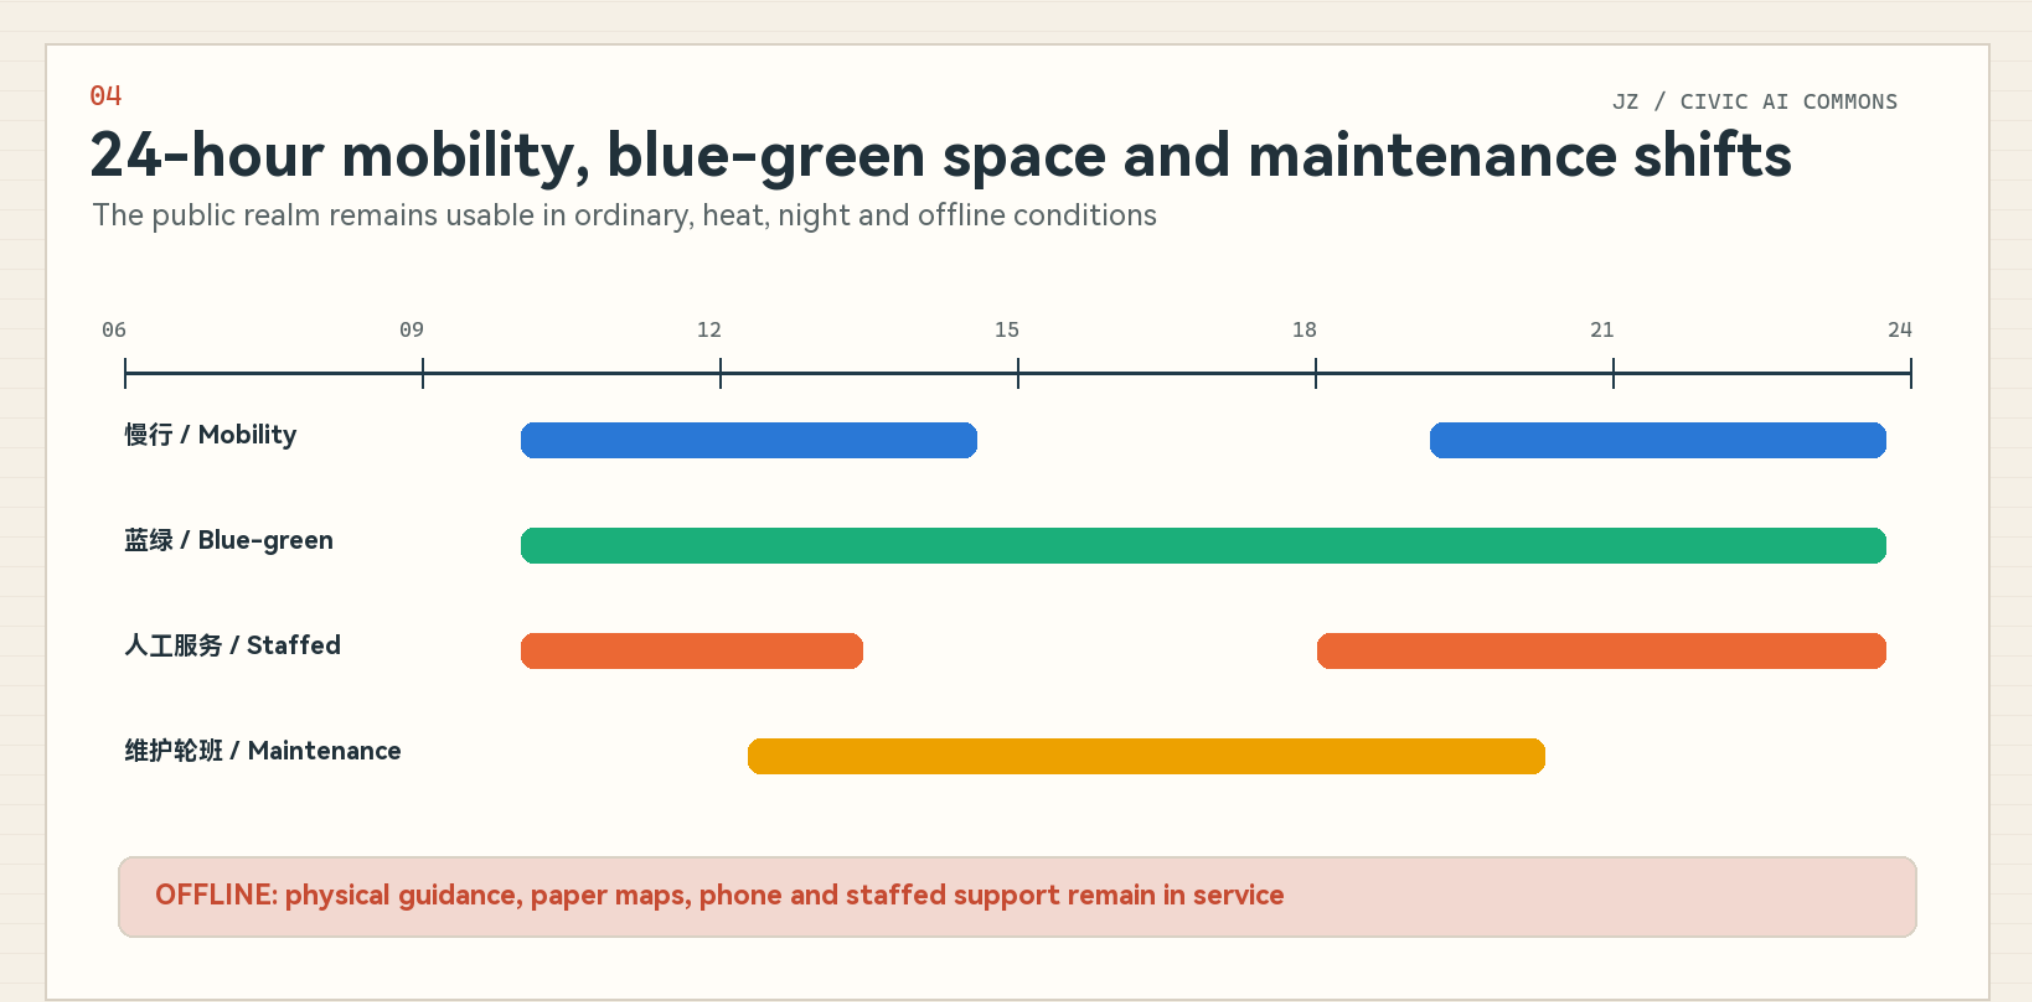

explain / assist / handoff / exit

Maintenance layer

shift / work order / review / retirement

An ordinary day

Mobility, care, learning, commerce, culture and maintenance connect through a 24-hour shift pattern.

Maintenance debt

Deferred follow-up, repair, archiving and training need an owner, time and public review.

Metric status and evidence chain

Separate reproducible design quantities, official-data gaps and operational baselines

可复算 / KNOWN

- site_area_sqm
- green_ratio
- public_space_ratio
- 12 scenarios

待官方资料 / UNKNOWN

- FAR
- building height
- ownership / DRR
- road redline

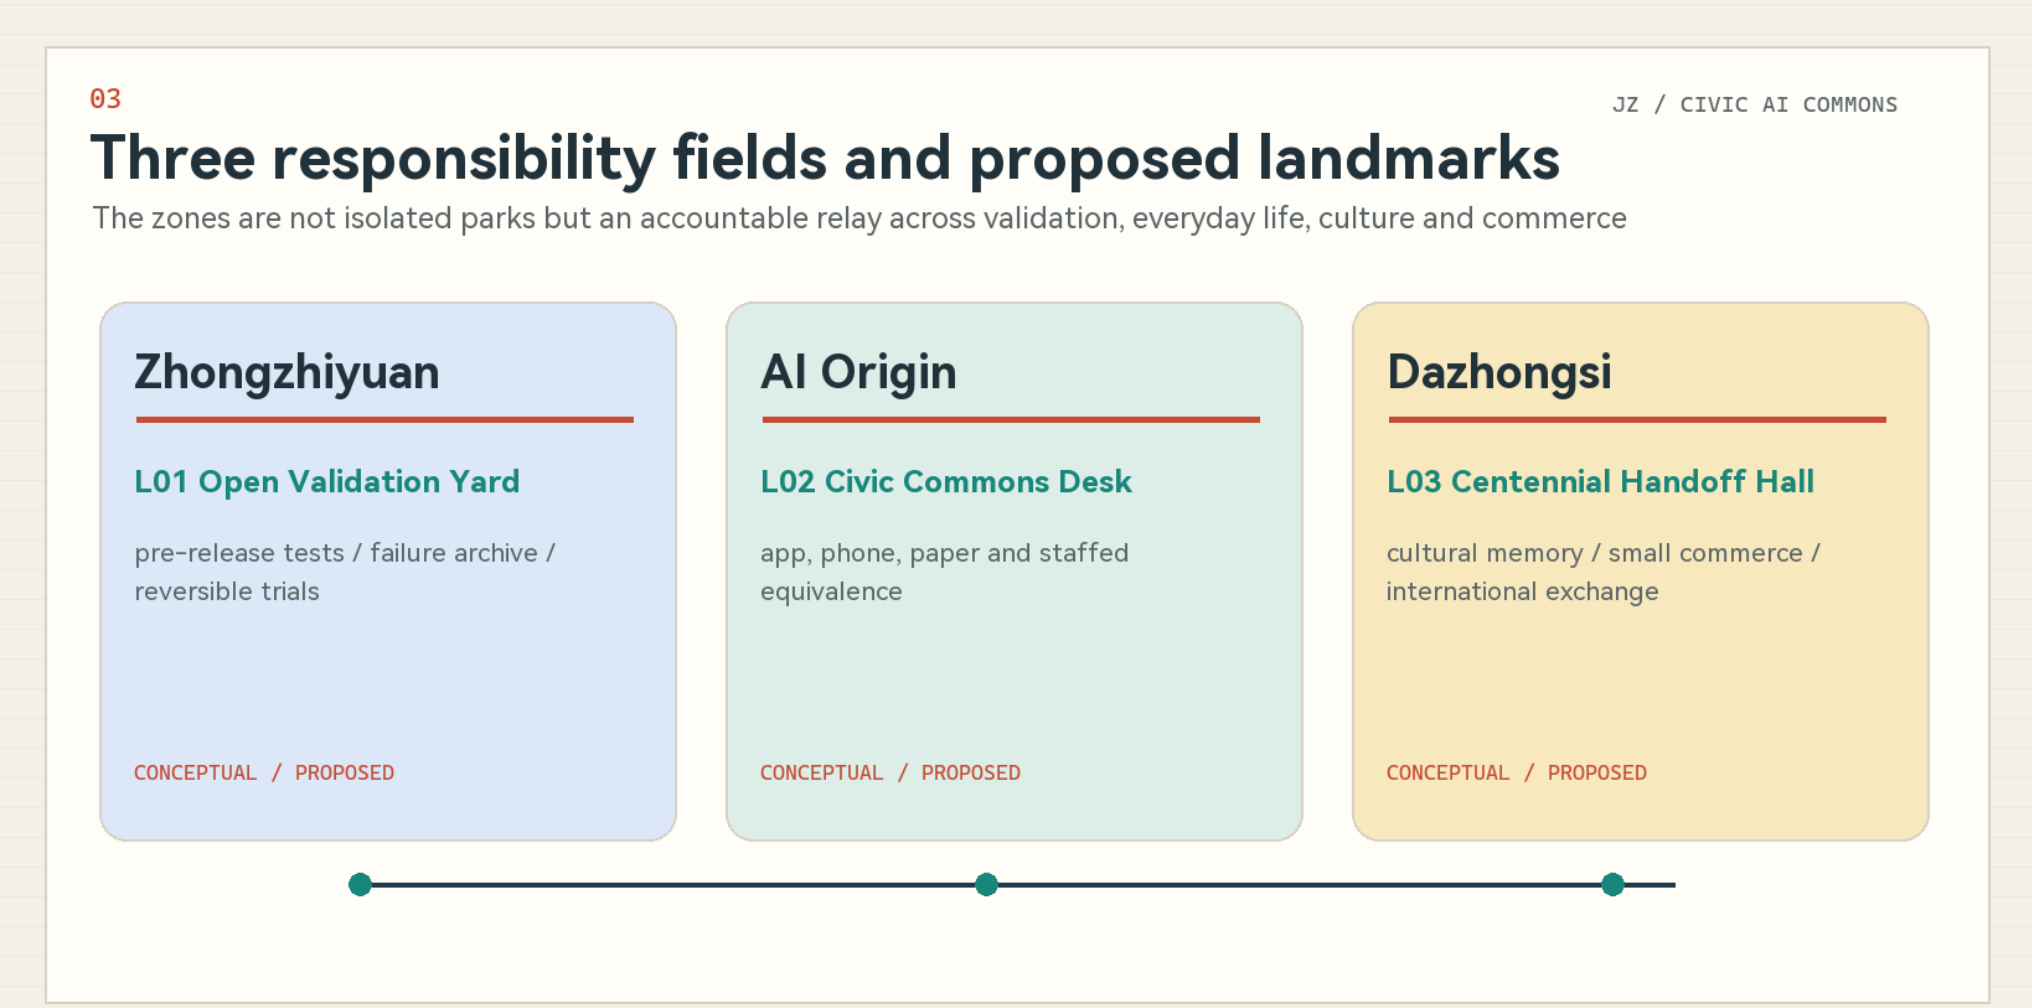

待基线 / TO MEASURE

- non-digital equivalence
- offline completion
- human handoff time
- maintenance closure

site=11412825 m² | green=0.1588 | public=0.0142

Civic handoff

AI organises evidence, staff confirm it, the next shift accepts unfinished work and responsibility remains visible.

Exit as service

When a tool stops, a supplier changes or a person leaves, paper, staff, records and responsibility continue.

Metric status and evidence chain

Separate reproducible design quantities, official-data gaps and operational baselines

可复算 / KNOWN

- site_area_sqm
- green_ratio
- public_space_ratio
- 12 scenarios

待官方资料 / UNKNOWN

- FAR
- building height
- ownership / DRR
- road redline

待基线 / TO MEASURE

- non-digital equivalence
- offline completion
- human handoff time
- maintenance closure

site=11412825 m² | green=0.1588 | public=0.0142

Three responsibility fields

Zhongzhiyuan validates; AI Origin supports everyday collaboration; Dazhongsi connects culture and AI-native business.

03

JZ / CIVIC AI COMMONS

Three responsibility fields and proposed landmarks

The zones are not isolated parks but an accountable relay across validation, everyday life, culture and commerce

Zhongzhiyuan

L01 Open Validation Yard

pre-release tests / failure archive / reversible trials

CONCEPTUAL / PROPOSED

AI Origin

L02 Civic Commons Desk

app, phone, paper and staffed equivalence

CONCEPTUAL / PROPOSED

Dazhongsi

L03 Centennial Handoff Hall

cultural memory / small commerce / international exchange

CONCEPTUAL / PROPOSED

PROVISIONAL GEOMETRY · CONCEPTUAL RECOMMENDATION · OFFLINE FIRST

JZ CIVIC AI COMMONS · 09

Local first, replaceable cloud

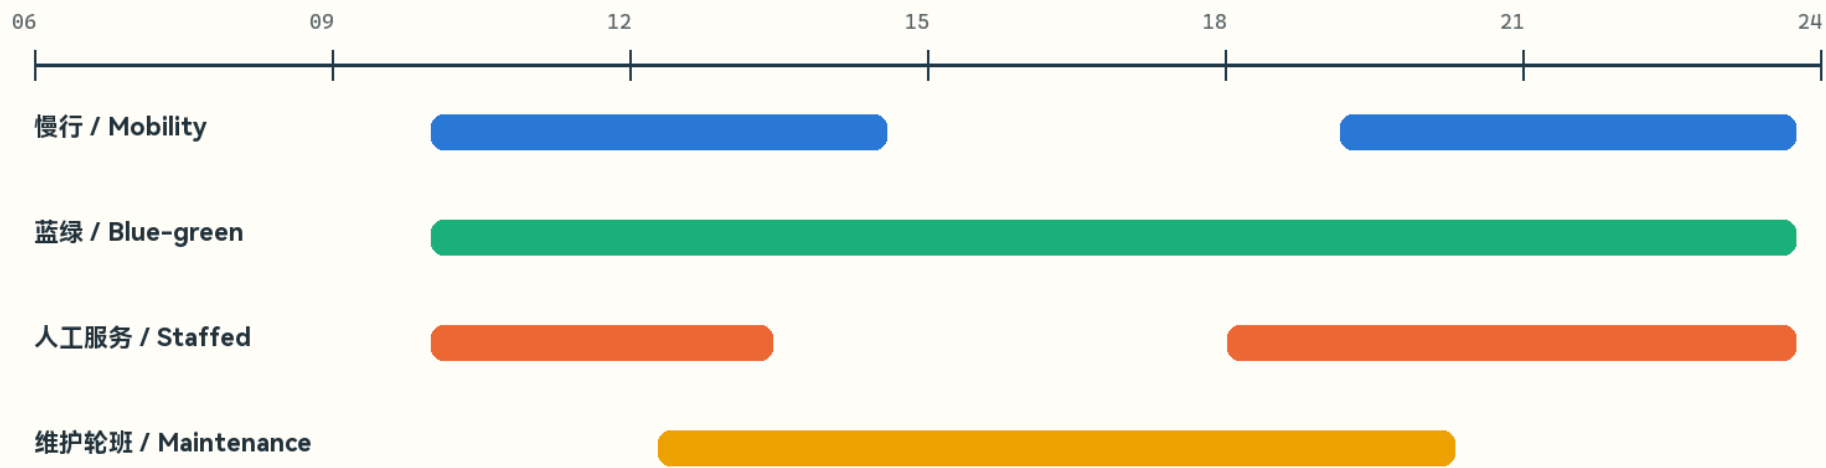

Services work offline; cloud services hold versions, public sources and auditable aggregation only.

04

JZ / CIVIC AI COMMONS

24-hour mobility, blue-green space and maintenance shifts

The public realm remains usable in ordinary, heat, night and offline conditions

OFFLINE: physical guidance, paper maps, phone and staffed support remain in service

Metrics and evidence

Separate reproducible design quantities, official-data gaps and operational baselines; known is not official.

Metric status and evidence chain

Separate reproducible design quantities, official-data gaps and operational baselines

From connection to commons

Daily handoff, monthly maintenance review, quarterly scenario replay and an annual public assembly.
