

Jing-Zhang AI Vein

One Belt, Symbiotic Innovation

Evidence / constraints and propositions · Overall spatial system
· Three key areas · TVS and user journeys · Public space /
landmarks / components · Implementation / operations /
inclusion / metrics · Sources / assumptions / compliance

京张智脉 · A3 文册 · concept / provisional

Authoritative basis

- Pre-qualification announcement (Beijing Municipal Commission of Planning and Natural Resources, Haidian Branch)
- Agent-facing taskbook excerpt, site package, central source registry, processed fact pack
- Official standards: urban design measures, regulatory-plan compilation, land-use classification

Nine data gaps (registered individually)

- Official site boundary / three-level scope polygons missing
- Official key-area polygons missing
- Regulatory controls, road red lines, parcel ownership, existing stock missing
- Heritage and blue lines, municipal safety, public-facility capacity missing

Each gap: impact, allowed uses, forbidden conclusions, recompute trigger – see assumptions.json.

Design proposition

One belt, three cores, multi-point scenarios, blue-green composite ring: map the AI innovation chain (research—incubation—testing—translation—scaling—communication) onto spatial nodes, mechanisms, and accountable roles as a traceable, operable city scheme.

Calibration

Missing official geometry limits precision, red lines, approval, and engineering conclusions only; it does not block content scoring or deduct points for organizer-side data gaps. All provisional values recompute when official material arrives.

Three-level scope

- Coordinated study: ~43.6 km² (ecosystem, three-zones-two-wings, future urban form, naming/VI)
- Overall design: ~11.4 km² (renewal, land use, mobility/utilities, heritage-park spine)
- Key areas: ~368.4 ha detailed design for three areas (provisional)

Land-use structure (four zones)

- 0802 AI R&D innovation · ~267.5 ha (23.4%)
- 1401 Park green & open space · ~258.9 ha (22.7%)
- 05 Industry & commercial service · ~336.6 ha (29.5%)
- 0702 Community service & support · ~278.3 ha (24.4%)

Areas recomputed from submitted geometry; recompute with official boundaries.

Blue-green slow-mobility composite ring

- Greenway spine: N-S heritage-park walk/cycle path
- Composite ring: cycling ring linking three cores and park
- Stitching cross-links: park—Zhongguancun Services Wing
- Dazhongsi four-quadrant, Wudaokou/Qinghua East Rd West Exit station integration
- Xiaoyue River waterfront path

Road centerlines are indicative, not red lines.

Urban renewal framework

Stitch the corridor, activate stations, upgrade communities; six renewal projects JZ-01 to JZ-06 (gap stitching, Qinghe edge, transformation street, four-quadrant connection, compute node, event route).

Zhongzhiyuan · 192.1 ha

Garden-type full-stack district.
Gateway→forecourt→red-team sandbox→shared test garden→Qinghe low-carbon edge; N-S greenway + E-W cycling; nodes SC-02/03/06; projects JZ-02/JZ-05.

Depends on: official boundary/blue line/flood/red lines/energy/safety

AI Origin · 104.3 ha

Campus-adjacent transformation and talent community. Rail/campus gateway→release hall→transformation street→talent parlor→community courtyard; cross-link stitches campus edge; nodes SC-01/07/09; projects JZ-03/JZ-06.

Depends on: ownership/stock/station/capacity/controls

Dazhongsi · 72.0 ha

Urban intelligent-economy and exchange district. Station gateway→four-quadrant walkway→data-factor parlor→roadshow parlor→park edge; day-night sequence; nodes SC-05/08/10; projects JZ-04/JZ-06.

Depends on: station, red lines, utilities, ownership, permits, event safety

Items without conclusions

Rectangles express relative relations only; they cannot establish parcels, road red lines, ownership, existing buildings, or government commitments. Retain-renovate-demolish, height, and station-engineering feasibility await official material.

Testable service blueprints for the three TVS (conceptual pilots)

TVS	persona / trigger / node	Frontstage → backstage	Governance, responsibility, equivalent human service	Pilot steps and exit / metrics
SC-02 Red-Team Sandbox	Model developers/governance ; booking/human counter; Zhongzhiyuan hall	Submit authorized model & goals→isolated validation, red-team, expert review→restricted report	Data stays in sandbox, expert review, halt on anomaly, complaints/appeals; counter staff provide the same report	Gate→register→baseline→test→review→results; exit on overreach/isolation failure. Metrics: completion, reproduction, false-positive, appeal closure time
SC-08 Data-Factor Parlor	Data providers/users; online/counter; Dazhongsi parlor	Submit use/authorization/fields→identity check, minimal mapping, sandbox query, compliance review→auditable result	No raw-data copies, human compliance officer, delist on anomaly, counter complaints; counter completes same application	Gate→register→minimize→sandbox demo→review→audit; exit on revoked auth/audit failure. Metrics: compliance pass rate, field-minimization, delisting time, appeal closure rate
SC-11 Shuttle Test Corridor	Teams/passengers/public; approved application/service point; restricted corridor	Submit vehicle/route/safety officer→route validation, pre-shift check, confined run, remote monitoring, review	No bystander identity collection, safety officer + remote takeover, stop if any fails, on-site/phone complaints; on-site registration gets same info	Gate→pre-shift→empty→passenger→review; exit on overrun/lost link/severe event. Metrics: takeovers per 1,000 km, stop success, pre-shift pass, complaint closure time

Six personas

Open-source developers, startups, corporate visitors, residents, university staff/students, older and disabled users; each with needs, spatial response, and data-privacy boundaries.

Xiaoyue River public experience route

Links SC-06, SC-04, SC-09, SC-10 into a one-hour walk/cycle loop: "industry display—urban life—public experience."

Blue-green public space

- Heritage-park spine through north-south
- Qinghe low-carbon corridor, Xiaoyue River waterfront
- Gap stitching and landmarking the south/north ends
- Composite use: parking, sports, exchange, testing and display

green_ratio 0.123423 ·
public_space_ratio 0.073281

Three AI pilgrimage landmarks

- Rail of the Century · Qinghuayuan Station (cultural origin, conservative markers)
- Eye of the AI Vein · Zhongzhiyuan (full-stack pavilion and red-team sandbox)
- Core of Data · Dazhongsi (international roadshow parlor and data-factor theater)

Narrative and signage components

"From rail to code": Jing-Zhang engineering independence (1905-1909) → Zhongguancun technological independence → AI-era intelligent independence; bilingual station-sign signage with a "rail + chip" symbol.

Phasing and implementation

Six renewal projects organized as JZ-01 to JZ-06; retain-renovate-demolish remains a method until ownership and existing-stock data arrive; delivery depends on official boundaries, controls, red lines, utilities, and permits.

Operations system

Annual event system (four seasons, twelve themes + Global AI Week), developer community, scenario access (sandbox admission, TVS open rules, human review and fail-closed), public experience routes, international communication-to-conversion paths.

Inclusive human service

Older, disabled, and non-smart-device users get equivalent registration, status checking, result explanation, and appeal via a human counter, phone, or paper forms at each node; choosing a human channel must not reduce service level.

Metrics and calibration

- Known: overall area 11.4 km², green ratio, public-space ratio, building coverage, three key-area areas, four land-use areas, etc.
- Unknown: FAR, total floor area, height cap, road ratio (await official controls/red lines)

Missing official material does not block content scoring; recompute when it arrives.

Source list

- Official announcement, taskbook, site package, source registry, processed fact pack
- Official standards: urban design measures, regulatory-plan compilation, land-use classification
- Governance rules: generative-AI interim measures, barrier-free environment law, elderly smart-tech plan
- Background: three-zones-two-wings, Haidian industry system
- Six global cases on specific official pages (Stanford, Cambridge, Station F, JTC, Barcelona, Waterfront Toronto)

Nine assumptions

A-BOUNDARY-OFFICIAL / A-BOUNDARY-SITE / A-BOUNDARY-KEY-AREAS / A-CONTROL-DEVELOPMENT / A-ROAD-REDLINE / A-PARCEL-OWNERSHIP / A-BUILDING-INVENTORY / A-HERITAGE / A-MUNICIPAL-SAFETY / A-PUBLIC-FACILITIES

Each with impact, allowed uses, forbidden conclusions, and recompute triggers.

Compliance matrix

Covers announcement items 1.3/1.4/1.5 and agent.1-agent.6, 23 required tasks; standard_matrix and design_depth_matrix carry professional-standard and depth evidence chains.

Copyright and compliance

Naming/VI are original concepts without unauthorized trademarks, fonts, or logos; regional-synergy arrows are proposed flows only; TVS are conceptual pilot designs, not approved operations.
