

JING-ZHANG TRANSFER COMMONS: A REVERSIBLE PUBLIC INNOVATION CHAIN

Mobility, technology transfer, social translation and responsibility share one spatial, operational and governance framework.

- 01 MOBILITY**
 Rail, park and street access without barriers
- 02 TECH TRANSFER**
 Research, open source, tests and services
- 03 SOCIAL TRANSLATION**
 Understandable, optional and reversible
- 04 RESPONSIBILITY**
 Named review, appeal and shutdown

TASKBOOK ALIGNMENT IN ONE LOOP

- 3 POSITIONS** Heritage / AI life experience / fusion innovation
- 5 FUNCTIONS** Full-stack tests / ecosystem / AI+ scenes / AI-native / governance
- 3 AREAS + 2 WINGS** Zhongzhiyuan—Origin—Dazhongsi × tech service—scenario enablement

ANNUAL OPERATION: EVENTS MUST PRODUCE EVIDENCE

Quarterly Open Day

Half-year Test Week

Annual Transfer Forum

Adopt / incubate / exit

global cases

BOUNDARY DISCIPLINE

Only provisional boundaries are available. The package keeps official_boundary=false and makes no invented redline, parcel precision, planning control or delivery promise. Once official polygons arrive, nine GeoJSON layers, metrics, ten bilingual figures and four PDFs are recomputed together.

THREE SCALES, ONE RESEARCH—TEST—ADOPT—FEEDBACK LOOP

The study scale connects innovation networks, the overall-design scale repairs daily public space, and three key areas host distinct transfer stages.

43.6 km² / 11.4 km² / 368.4 ha

JING-ZHANG TRANSFER COMMONS

01

Jing-Zhang Transfer Commons: One Public Validation Chain

Transport, technology transfer, public understanding, and responsibility handoff share reversible, auditable, human-owned gates.

PROVISIONAL WORKING MAP / 临时工作图

PROVISIONAL GEOMETRY | NOT A STATUTORY REDLINE | RECOMPUTE ON OFFICIAL DATA

- 01 **TRANSPORT**
Accessible end-to-end trips without requiring a phone
- 02 **TECH TRANSFER**
Research and prototypes enter compliant trials
- 03 **PUBLIC MEANING**
Plain-language capability, limits, and exit
- 04 **RESPONSIBILITY**
Named review, appeal, and shutdown

RESEARCH → TEST → ADOPT → FEEDBACK

JING-ZHANG TRANSFER COMMONS

02

Three Scales and Land-Use Structure

A public-validation green spine connects community service, outcome transfer, and R&D validation; all ratios remain draft variables.

43.6 km²
COORDINATED NETWORK

11.4 km²
OVERALL DESIGN

368.4 ha
THREE WORKSTREAMS

- Community services
- Outcome transfer
- AI R&D and validation
- Public validation green spine

PROVISIONAL GEOMETRY | NOT A STATUTORY REDLINE | RECOMPUTE ON OFFICIAL DATA

STUDY

Six global mechanisms and regional interfaces; no invented projects.

OVERALL DESIGN

A walkable public validation chain across heritage, parks, rail, campuses and communities.

KEY AREAS

Zhongzhiyuan tests, Origin transfers, Dazhongsi adopts; detailed after official polygons.

THREE AREAS, NOT THREE ISLANDS: ROLES BY TRANSFER STAGE

Public interfaces connect universities, communities, technology services, field trials and regional engineering capacity.

3 AREAS × 2 WINGS

JING-ZHANG TRANSFER COMMONS

03

Three Key Areas: Validate, Transfer, Adopt

The districts are not interchangeable campuses; each carries a different stage of responsibility.

A ZHONGZHIYUAN | VALIDATION

- 1 Safety evaluation workshop
- 2 Edge-device test courtyard
- 3 Public explanation interface

No default resident testing

B AI ORIGIN | OUTCOME TRANSFER

- 1 Open-source release hall
- 2 IP and compliance clinic
- 3 Campus-district walking link

Baseline and ownership first

C DAZHONGSI | URBAN ADOPTION

- 1 Accessible station-city checklist
- 2 Understandable product labels
- 3 Staffed support and appeal

Placeholder coordinates not relied upon

PROVISIONAL GEOMETRY | NOT A STATUTORY REDLINE | RECOMPUTE ON OFFICIAL DATA

ZHONGZHIYUAN | TEST

Safety evaluation, edge devices and low-carbon compute; the public is never a default test subject.

ORIGIN | TRANSFER

Open-source release, IP/compliance clinic, shared demos and talent services.

DAZHONGSI | ADOPT

Station-city interface, understandable product labels, staffed service and appeal.

REGIONAL | INTERFACE

Beiwai, Future/Huairou Science Cities, BDA and Jing-Jin-Ji connect only through confirmed partners and permissions.

ANNUAL OPERATION: EVENTS MUST PRODUCE EVIDENCE

Quarterly Open Day

Half-year Test Week

Annual Transfer Forum

Adopt / incubate / exit

TEST THREE PUBLIC SCENARIOS BEFORE ANY EXPANSION

All ten scenario cards retain a non-AI path; S01 walking, S05 safety sandbox and S10 event operations enter round one.

WALKING + BLUE-GREEN + PUBLIC INTERFACES

JING-ZHANG TRANSFER COMMONS

04

Mobility, Blue-Green Public Space, and AI Scenarios

Repair complete walking and interchange journeys first; add AI only as an optional, understandable, stoppable layer.

S01 Walking-gap diagnosis

S06 Edge-device test court

S02 Accessible trip rehearsal

S07 Public-space maintenance

S03 Open-source release

S08 Community AI clinic

S04 Enterprise-service copilot

S09 Understandable product label

S05 Safety-governance sandbox

S10 Event-safety review

BEFORE: DISCLOSE | DURING: HUMAN OWNER | AFTER: PUBLISH FAILURES AND EXIT

PROVISIONAL GEOMETRY | NOT A STATUTORY REDLINE | RECOMPUTE ON OFFICIAL DATA

01 S01 WALKING

Anonymous counts + field audit; reviewed by a transport professional.

02 S05 SAFETY

Synthetic or authorised data; safety owner approves and stops.

03 S10 EVENTS

Aggregate flow + facility status; on-site command decides and shuts down.

5 PERSONAS

researchers / start-ups / engineers & visitors / residents & elders / frontline staff

FIVE DEPLOYMENT GATES

Space

Public value

Minimum data

Human owner

Outcome review

FORMAL REVIEW PACKAGE: TRACEABLE METRICS, OWNED RISKS

Nine GeoJSON layers, five bilingual figure pairs, bilingual A3/A0 PDFs and offline HTML share one source, assumption, metric and version chain.

EVIDENCE, NOT DECORATION: FROM TASKBOOK TO ANNUAL ADOPTION

Every count is traceable; every pilot is reversible; every high-impact decision returns to a named human owner.

Adopt / exit

Safety / rights / public resources affected → no automated decision → human reason and shutdown record

BOUNDARY CONFIDENCE

The organiser has not supplied official polygons. Site and key-area geometries remain official_boundary=false; areas demonstrate recomputation only and are not statutory or approval evidence.
