

JINGZHANG GROWTH MESH

An AI talent and
enterprise community
from park to city to
network

AI-generated concept view · provisional constraint · dingle2001

问题与依据

Core proposition

Universities and leading firms are anchors; the district is an incubator; community is infrastructure.

JUDGMENT

Define the actual conversion gap

EVIDENCE

Separate public facts and design advice

TRANSFER

Translate mechanisms, never copy promises

provisional constraint · concept for professional deepening · dingle2001

Reading guide

Diagnosis | overall design | three key areas |
scenarios and personas | delivery and metrics

JUDGMENT

Define the actual conversion
gap

EVIDENCE

Separate public facts and
design advice

TRANSFER

Translate mechanisms, never
copy promises

Why a deeper scheme

A single concept diagram cannot explain site, spatial products, accountable operation or sequence. Each judgment now maps to layers, nodes, projects and metrics.

JUDGMENT

Define the actual conversion gap

EVIDENCE

Separate public facts and design advice

TRANSFER

Translate mechanisms, never copy promises

Haidian's missing interface

The gap is not innovation supply but district interfaces that turn relations into projects and projects into firms.

JUDGMENT

Define the actual conversion gap

EVIDENCE

Separate public facts and design advice

TRANSFER

Translate mechanisms, never copy promises

Alibaba mechanism benchmark

Use only the relationship among anchor, transit and talent life, incubation, creator community and growth; no site shift, logo or resource-opening claim.

JUDGMENT

Define the actual conversion gap

EVIDENCE

Separate public facts and design advice

TRANSFER

Translate mechanisms, never copy promises

Theory from round one

Park-city-network | five-stage loop | compute + open scenarios + talent community | intergenerational integration | operational health checks

JUDGMENT

Define the actual conversion gap

EVIDENCE

Separate public facts and design advice

TRANSFER

Translate mechanisms, never copy promises

Seven international cases

Compare shared facilities, mixed use, public realm, venture services and long-term operations rather than copying scale or form.

JUDGMENT

Define the actual conversion gap

EVIDENCE

Separate public facts and design advice

TRANSFER

Translate mechanisms, never copy promises

总体系统

Overall position

A heritage rail axis, three differentiated innovation cores and two service/scenario wings form a durable growth network.

SPACE

One axis, three differentiated cores

LINK

Two wings connect services and public tests

RULE

Every scenario binds access and exit

provisional constraint · concept for professional deepening · dingle2001

One axis, three cores, two wings

Validation north, incubation central, commercialization south; professional services and public testing provide lateral links.

SPACE

One axis, three differentiated cores

LINK

Two wings connect services and public tests

RULE

Every scenario binds access and exit

Five-stage growth loop

Space release—scenario insertion—community aggregation—project generation—entity reproduction.

SPACE

One axis, three differentiated cores

LINK

Two wings connect services and public

RULE

Every scenario binds access and exit

Institution, space, industry, finance

Rules, place, collaboration and first-order capital move together so space and events do not become empty products.

SPACE

One axis, three differentiated cores

LINK

Two wings connect services and public

RULE

Every scenario binds access and exit

Overall public realm

The heritage park is the ecosystem's public living room, not a backdrop.

SPACE

One axis, three differentiated cores

LINK

Two wings connect services and public tests

RULE

Every scenario binds access and exit

重点区设计

Zhongzhiyuan position

Shared validation city: laboratory spine, test loop, standards courtyard and public science edge.

PRODUCT

Turn rooms and streets into service products

OPERATOR

Name an accountable operator before opening

VERIFY

Rights, fire, structure and utilities first

人物与场景

Seven personas

From researchers to residents and operators, personas set spatial thresholds, service entries, data boundaries and human fallback.

USER

Start from seven distinct user groups

RULE

Consent, minimal collection and human fallback

OUTPUT

Measure projects and relationships, not footfall

Twelve scenario cards

Three industrial tests, three community-incubation, three human services and three commercialization/governance scenarios.

USER

Start from seven distinct user groups

RULE

Consent, minimal collection and human fallback

OUTPUT

Measure projects and relationships, not footfall

Three pilgrimage landmarks

Open-Source Milestone | Origin Co-creation Hall and Global Node Wall | Enterprise Growth Rings.

USER

Start from seven distinct user groups

RULE

Consent, minimal collection and human fallback

OUTPUT

Measure projects and relationships, not footfall

实施与体检

Fifteen implementation

Five per core, with spatial products and operating responsibility defined together.

ACTION

Pilot rules before heavy construction

OWNER

Separate public duties and operating accounts

MONITOR

Use NIS/EHS trends without fake scores

Three-stage delivery

0-1 years rules and pilots; 1-3 years reversible works and service streets; 3-5 years replication and long-term operations.

ACTION

Pilot rules before heavy construction

OWNER

Separate public duties and operating accounts

MONITOR

Use NIS/EHS trends without fake scores

Unit operating account

Account for space, equipment and professional services separately; isolate public/inclusive costs; invent no total investment or payback.

ACTION

Pilot rules before heavy construction

OWNER

Separate public duties and operating accounts

MONITOR

Use NIS/EHS trends without fake scores

DIA-05 OPERATIONS & GOVERNANCE: RACI MATRIX

Government/owners · operator · universities & firms · professional services · residents

CONCEPT

	Gov/owners	Operator	Universities/firms	Prof. services	Residents/public
Rules & catalogues	A	R	C	C	I
Space & equipment ops	C	A/R	C	I	I
Scenario test release	C	A	R	C	I
Compliance sign-off	I	C	C	A/R	I
Data & privacy	A	R	C	C	C
Public programs	I	A/R	C	I	C
Complaints & appeals	A	R	I	C	C
Health checks & evaluation	C	A/R	C	C	I

A = Accountable R = Responsible A/R = both C = Consulted I = Informed

PRINCIPLES

- AI assists; licensed professionals sign off
- Tiered permissions, audit logs, appeal & human takeover
- Reference mechanism; not an assigned government duty

JINGZHANG GROWTH MESH | An AI talent-and-enterprise symbiotic community: from park to city to network

FIG: Governance RACI matrix

NO: DIA-05-2026-08-10-EN

SCALE: NTS

DATA: CONCEPT

dingle2001 · Completed using Agent

Least-privilege governance

D0-D3 data classes, human release, audit records, appeal and takeover define the urban-agent boundary.

ACTION

Pilot rules before heavy construction

OWNER

Separate public duties and operating accounts

MONITOR

Use NIS/EHS trends without fake scores

NIS/EHS evidence chain

Metrics move from source, owner and human review to public aggregation before continue-adjust-exit decisions; no baseline, no score.

Limits and responsibility

All spaces, projects, funding and events are conceptual; official polygons, controls, rights, engineering and investment require verification.

ACTION

Pilot rules before heavy construction

OWNER

Separate public duties and operating accounts

MONITOR

Use NIS/EHS trends without fake scores

An aerial, high-angle view of a city street scene. The image is dark and moody, with a blue-grey color palette. In the center, a wide pedestrian walkway is flanked by modern, multi-story buildings with large glass windows. A tram is visible on a track running parallel to the walkway. The background shows a dense urban environment with various building types and trees. The overall atmosphere is one of a vibrant, modern city.

Conclusion

The first half of urban renewal makes space new; the second helps entities grow.
