

An aerial photograph of a city at dusk. A railway track runs diagonally across the frame, with a bridge crossing it in the foreground. The city is densely packed with buildings and trees. The sky is dark with some clouds.

JINGZHANG NEW TRACK

AI OPEN CREATION CITY

A century-old railway becomes next-generation innovation infrastructure.

CONCEPTUAL URBAN DESIGN · 2026

01 POSITION

One spine, three districts, two wings

Heritage spine · three innovation anchors · two coordinating wings

Provisional design geography

Design logic

ONE SPINE

Rail heritage becomes a walking, exhibition, and civic innovation spine.

THREE AREAS

Full-stack R&D, near-campus transfer, and intelligent-native consumption.

TWO WINGS

Technology services to the west; urban scenario testing to the east.

OPEN NETWORK

Public-space scenarios connect parks, campuses, firms, and neighborhoods.

KEY POINT

The corridor is a public innovation system, not a branded industrial park.

02 OVERALL VISION

Concept perspective

KEY POINT

Concept image: not a statutory masterplan or accurate existing-condition view.

03 EVIDENCE

Provisional, recalculable, auditable

Keep vision, geometry, metrics, and statutory claims distinct

Evidence ledger

GEOMETRY	GeoJSON	Topology and recalculated area	PROVISIONAL
METRICS	metrics.json	Single numerical source	RECALCULABLE
DESIGN	Figures + narrative	Conceptual spatial proposition	REVIEWABLE
STATUTORY	Official data pending	No approval claim	PENDING

KEY POINT

GeoJSON and metrics remain the numerical authority.

04 ECOSYSTEM

Research to civic adoption

Research to validation to transfer to civic adoption

Open innovation cycle

Two coordinating wings

WEST · TECH SERVICES

- IP and legal
- Finance and incubation
- International cooperation

EAST · URBAN TESTING

- Embodied AI
- Civic services
- Urban operations

KEY POINT

Open innovation connects R&D, validation, transfer, services, and governance.

05 XUEBEIYUAN

Blue Test Commons

KEY POINT

Safe public testing beside the Qinghe landscape.

06 XUEBEIYUAN PROTOTYPE

Five moves and an operating section

Qinghe interface · safe testing · open research

Concept spatial prototype

Five spatial moves

- 1 Qinghe interface
- 2 Validation spine
- 3 Test courtyards
- 4 Civic canopy
- 5 Quiet R&D loop

Sectional operating logic

KEY POINT

Retired rail heritage forms the public test spine.

07 AI ORIGIN

Open-Source Agora

KEY POINT

Adaptive reuse combines open-source release, transfer, and daily services.

08 AI ORIGIN PROTOTYPE

A one-kilometer innovation loop

Adaptive reuse · one-kilometer loop · public transfer

Concept spatial prototype

Five spatial moves

- 1 Release hall
- 2 Transfer street
- 3 Talent commons
- 4 Shared arcade
- 5 Daily services

Sectional operating logic

KEY POINT

Event-day intensity is distinct from everyday operation.

09 DAZHONGSI

Rail Lantern Forum

KEY POINT

Transit, heritage, roadshows, and evening culture share one civic ground.

10 DAZHONGSI PROTOTYPE

Four-quadrant walking connection

Four-quadrant walking · roadshow · evening culture

Concept spatial prototype

Five spatial moves

- 1 Station loop
- 2 Rail lantern
- 3 Roadshow commons
- 4 Device street
- 5 Heritage night route

Sectional operating logic

KEY POINT

Crossings and accessibility require specialist engineering review.

11 SERVICE BLUEPRINTS

Twelve governed scenarios

Need · space · data · operation · evaluation

01

Open-source release

SPACE → DATA → OPS

Visible notice · opt-out · human review

R&D

02

Safety sandbox

SPACE → DATA → OPS

Visible notice · opt-out · human review

R&D

03

Edge station

SPACE → DATA → OPS

Visible notice · opt-out · human review

ALL

04

Walking guidance

SPACE → DATA → OPS

Visible notice · opt-out · human review

ALL

05

Low-carbon corridor

SPACE → DATA → OPS

Visible notice · opt-out · human review

ALL

06

Transfer street

SPACE → DATA → OPS

Visible notice · opt-out · human review

STARTUP

07

Global roadshow

SPACE → DATA → OPS

Visible notice · opt-out · human review

GLOBAL

08

Data compliance

SPACE → DATA → OPS

Visible notice · opt-out · human review

GOV

09

Daily services

SPACE → DATA → OPS

Visible notice · opt-out · human review

RESIDENT

10

Embodied testing

SPACE → DATA → OPS

Visible notice · opt-out · human review

R&D

11

Heritage stories

SPACE → DATA → OPS

Visible notice · opt-out · human review

VISITOR

12

Global AI week

SPACE → DATA → OPS

Visible notice · opt-out · human review

ALL

KEY POINT

Need, space, data, operation, and evaluation form one contract.

12 DELIVERY

Six pilots and explicit dependencies

Six pilots · three horizons · explicit dependencies

Pilot portfolio					
PILOT	0-2 Y	3-5 Y	6+ Y	DEPENDENCY	
01 Heritage walking gaps				Rail and ownership	
02 Xuebeiyuan Qinghe edge				Qinghe and campus	
03 Origin transfer street				Building survey	
04 Dazhongsi quadrant links				Transport engineering	
05 AI civic and edge nodes				Data governance	
06 Global AI week route				Operating alliance	

KEY POINT

Start with reversible tests; scale only with evidence and professional review.
