

A TASK IS USABLE ONLY WHEN IT GETS DONE

Read the route. Find a person. Leave with a paper result. AI may help; it may not remove the way out.

THREE WORKS, THREE REAL JOBS

Lab to Street controls release. Problem to Change controls maintenance, suspension, and retirement. Technology must be able to return when it fails.

PROTOTYPE WORKS: CONTAIN FAILURE FIRST

An observation foyer, accessible test lane, isolated test pocket, physical stop, and failure review make a controlled section. A robot that fails here never reaches the public street.

LEARNING WORKS: MAKE THE NEXT STEP CLEAR

Public arrival, Ask First, a shared table, paper material, and human sign-off form a service-and-learning section. A visitor without a smartphone still knows whom to ask.

EVERYDAY WORKS: SURVIVE AN ORDINARY EVENING

A shaded entry, quiet rest, human takeover, and public change record form an everyday section. Dazhongsi siting remains unverified, so every component stays movable.
