

THE LAST SERVICE LINE

A WAY HOME FOR THE LAST PEOPLE LEAVING

CITY AS A SHIFT HANDOVER

LAST SERVICE MASTERPLAN

One continuous night spine · three staffed halls · six visible gates · twelve reversible scenarios

01 NIGHT TEST YARD

Controlled testing · physical stop · human supervision

02 SHIFT EXCHANGE COMMONS

Open-source handover · paper map · failure review

03 LAST-MILE TRANSFER HALL

Fixed meeting point · split flows · accessible fallback

PROVISIONAL BOUNDARY

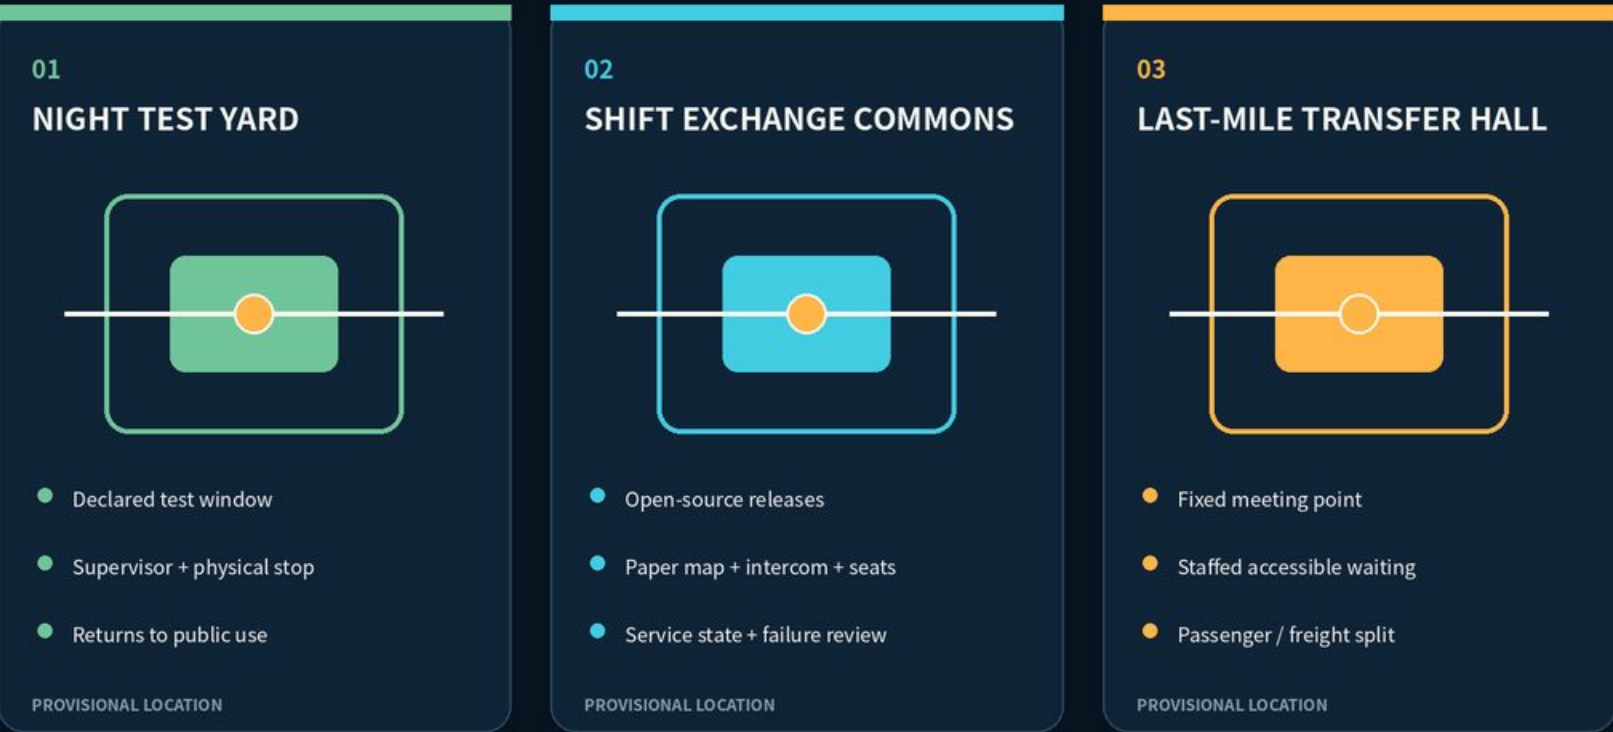

The outline is not an official redline. Geometry, areas, and envelopes require complete recalculation when official data arrive.

THREE HALLS / THREE DIFFERENT JOBS

TEST · HANDOVER · TRANSFER

Not three interchangeable tech plazas: controlled validation, knowledge handover, and the final transport leg.

LAST SERVICE CONTRACT

服务到几点 / HOURS

没网怎么办 / OFFLINE

谁来接管 / HUMAN

如何退出 / EXIT

何处投诉 / APPEAL

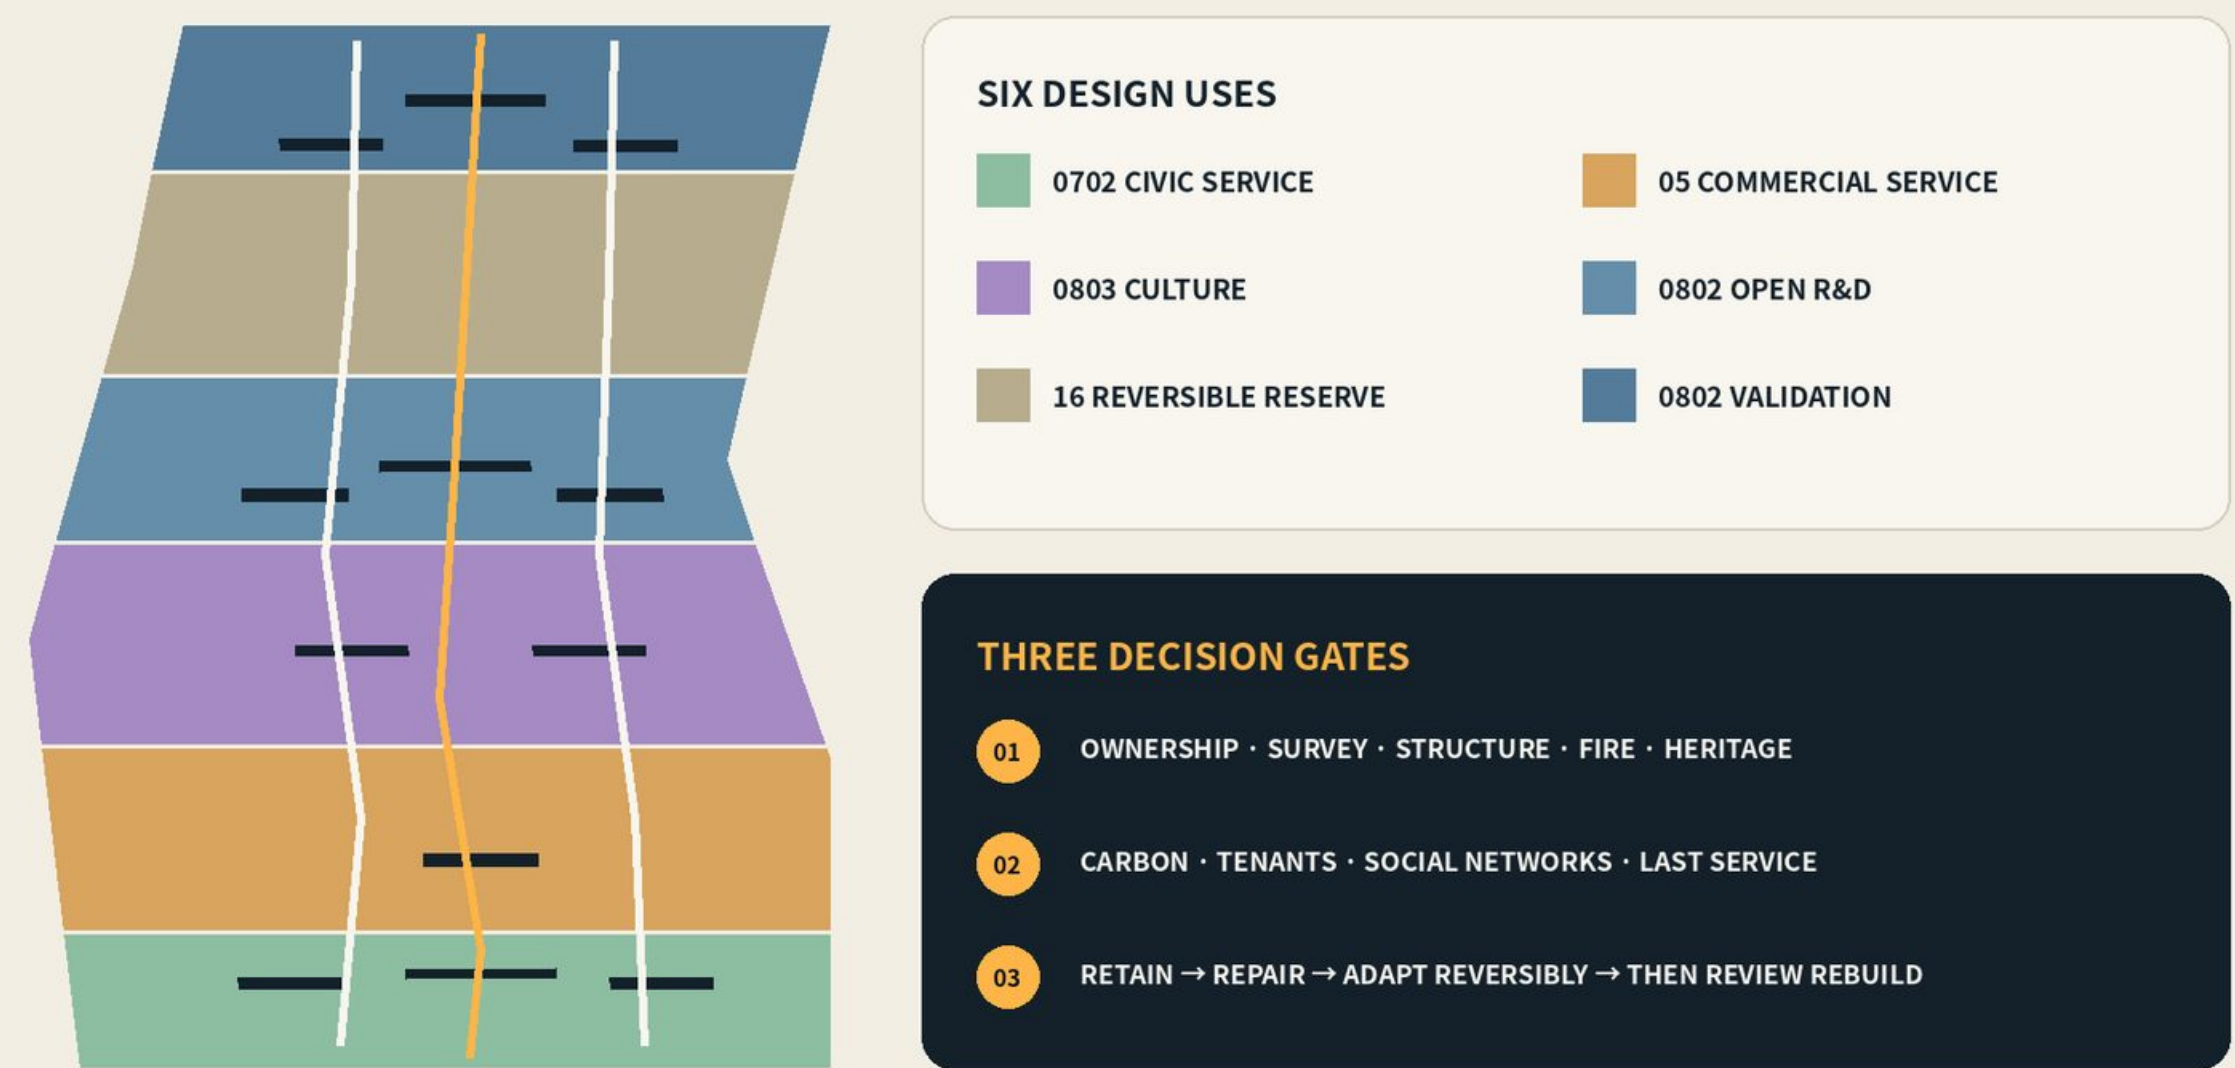

THE LAST SERVICE LINE

A WAY HOME FOR THE LAST PEOPLE LEAVING

DESIGN PARTITION / NOT STATUTORY

LAND USE & CREW COURTS

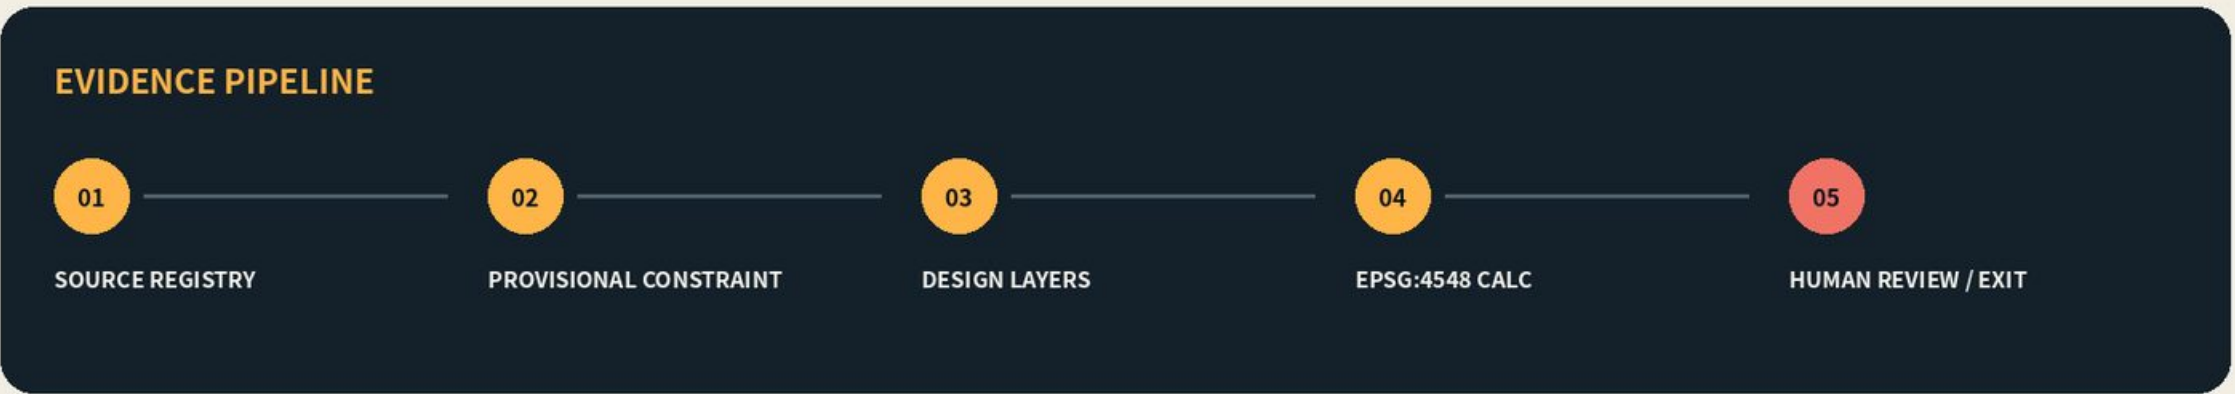

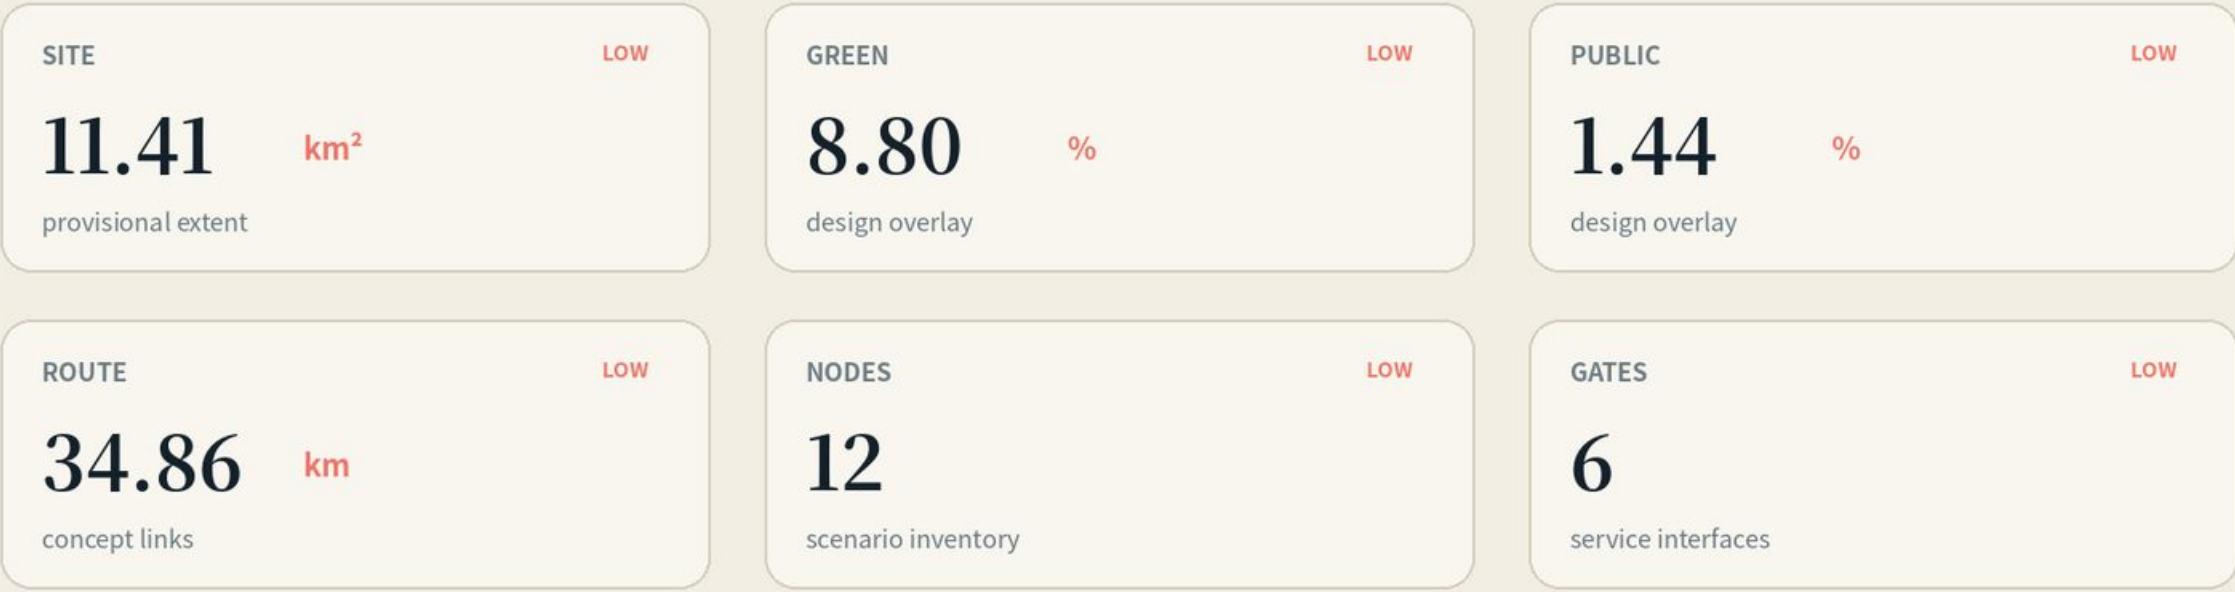

A complete coded partition. Concept envelopes test permeable ground floors, service cores, and courts—not development rights.

KNOWN ≠ OFFICIAL

METRICS & EVIDENCE

Known values are reproducible from submitted layers but inherit low confidence; statutory controls, engineering, and cost remain unknown.

THE JOURNEY AFTER THE APP STOPS

NIGHT JOURNEY + BLUE-GREEN + HUMAN FALLBACK

Feet, wheelchairs, and bicycles first; fixed meeting points, timed freight, and light that reveals the route without tracking identity.

SERVICE BEFORE CONSTRUCTION

- 01 Six gates, paper map, human handover, temporary staffed cores
- 02 Three halls, one spine, access, shielded light, blue-green retrofit
- 03 Expand only after review and official-data confirmation

The boundary is provisional. FAR, height, road redlines, ownership, utilities, and cost remain pending.
