

Haidian Minds Converge · Jing-Zhang Stars Aglow: Tiangong Star Atlas AI Civic Living Room

v1.2 · Tiangong Civic Protocol · Conceptual recommendation · provisional geometry

HAIDIAN MINDS CONVERGE - JING-ZHANG

CONCEPT - PROVISIONAL GEOMETRY

TIANGONG STAR ATLAS - EXPLAINABLE, PARTICIPATORY, REVERSIBLE AI

43.6 sq km coordinated research area

01 public question

02 licensed data

03 capacity

04 human takeover

05 90-day review

06 renew / exit

Provisional geometry is subdued; the design focus is corridors, cores, protocol, and public value

The three-corridor, three-core, two-wing, one-loop structure remains; six gates make AI explainable, participatory, pausable, and reversible.

Land, space, industry, talent, compute, data, scenario, and public value form a staged-access loop; procurement and policy remain conceptual.

THREE KEY AREAS • PROTOCOLLED ACTION BRIEFS

CONCEPT • PROVISIONAL GEOMETRY

Role, users, lead, launch gate, measure, and fallback

天问实验星港

众智园

Users: 研究者 / 创业团队

Gate: 消防、授权数据、研究员签署

Measure: 评测完成、人工复核

Fallback: 暂停测试, 保留人工台

女娲织网客厅

AI 原点社区

Users: 居民 / 长者 / 学生

Gate: 无障碍、同意退出、未成年人保护

Measure: 群体覆盖、闭环时限

Fallback: 撤展并公开原因

应龙水脉界面

大钟寺

Users: 企业 / 通勤者 / 访客

Gate: 文保、排水、夜光、客流

Measure: 服务响应、步行连续

Fallback: 缩减或延期

90 days: baseline → pilot → review → expand / exit

Key-area polygons remain provisional; relocate tasks after official data, never alter official geometry

Each key area binds users, lead, launch gate, measure, and fallback; provisional polygons are not formal parcels.

East-west stitching, north-south continuity, and three landmarks use six replaceable components; access never depends on identification, scoring, or profiling.

EVIDENCE CHAIN • GATES • ANNUAL OPERATION

CONCEPT • PROVISIONAL GEOMETRY

Reproducible metrics separated from reviewable operating evidence

可复算证据 / REPRODUCIBLE

- 1 GeoJSON → geometry/*.geojson
- 2 Formula → metrics.json
- 3 Narrative → proposal.md
- 4 Views → PNG / PDF / HTML
- 5 Hash → manifest.json

核心指标 / KNOWN METRICS

11.41M m² 暂定总体范围
310.8K m² 建筑原型基底
12.34% 绿地比例
7.33% 公共空间比例
3 重点区域
FAR / height / ownership = pending official data

01 问题登记

02 数据许可

03 空间承载

04 人工接管

05 90日复盘

06 续期 / 退出

When official GIS/CAD arrives: verify → overlay conflicts → relocate → recalculate → synchronize → sign-off

GeoJSON, metrics, narrative, figures, PDFs, HTML, and manifest form a reproducible chain; official GIS/CAD triggers replacement and professional sign-off.
