

Jing-Zhang Authenticity Commons

Verify Before Trust

A civic verification infrastructure: one spine, three belts, three anchors, six staffed stations and two reciprocal wings.

The cover is an AI-generated concept image and is not spatial evidence.

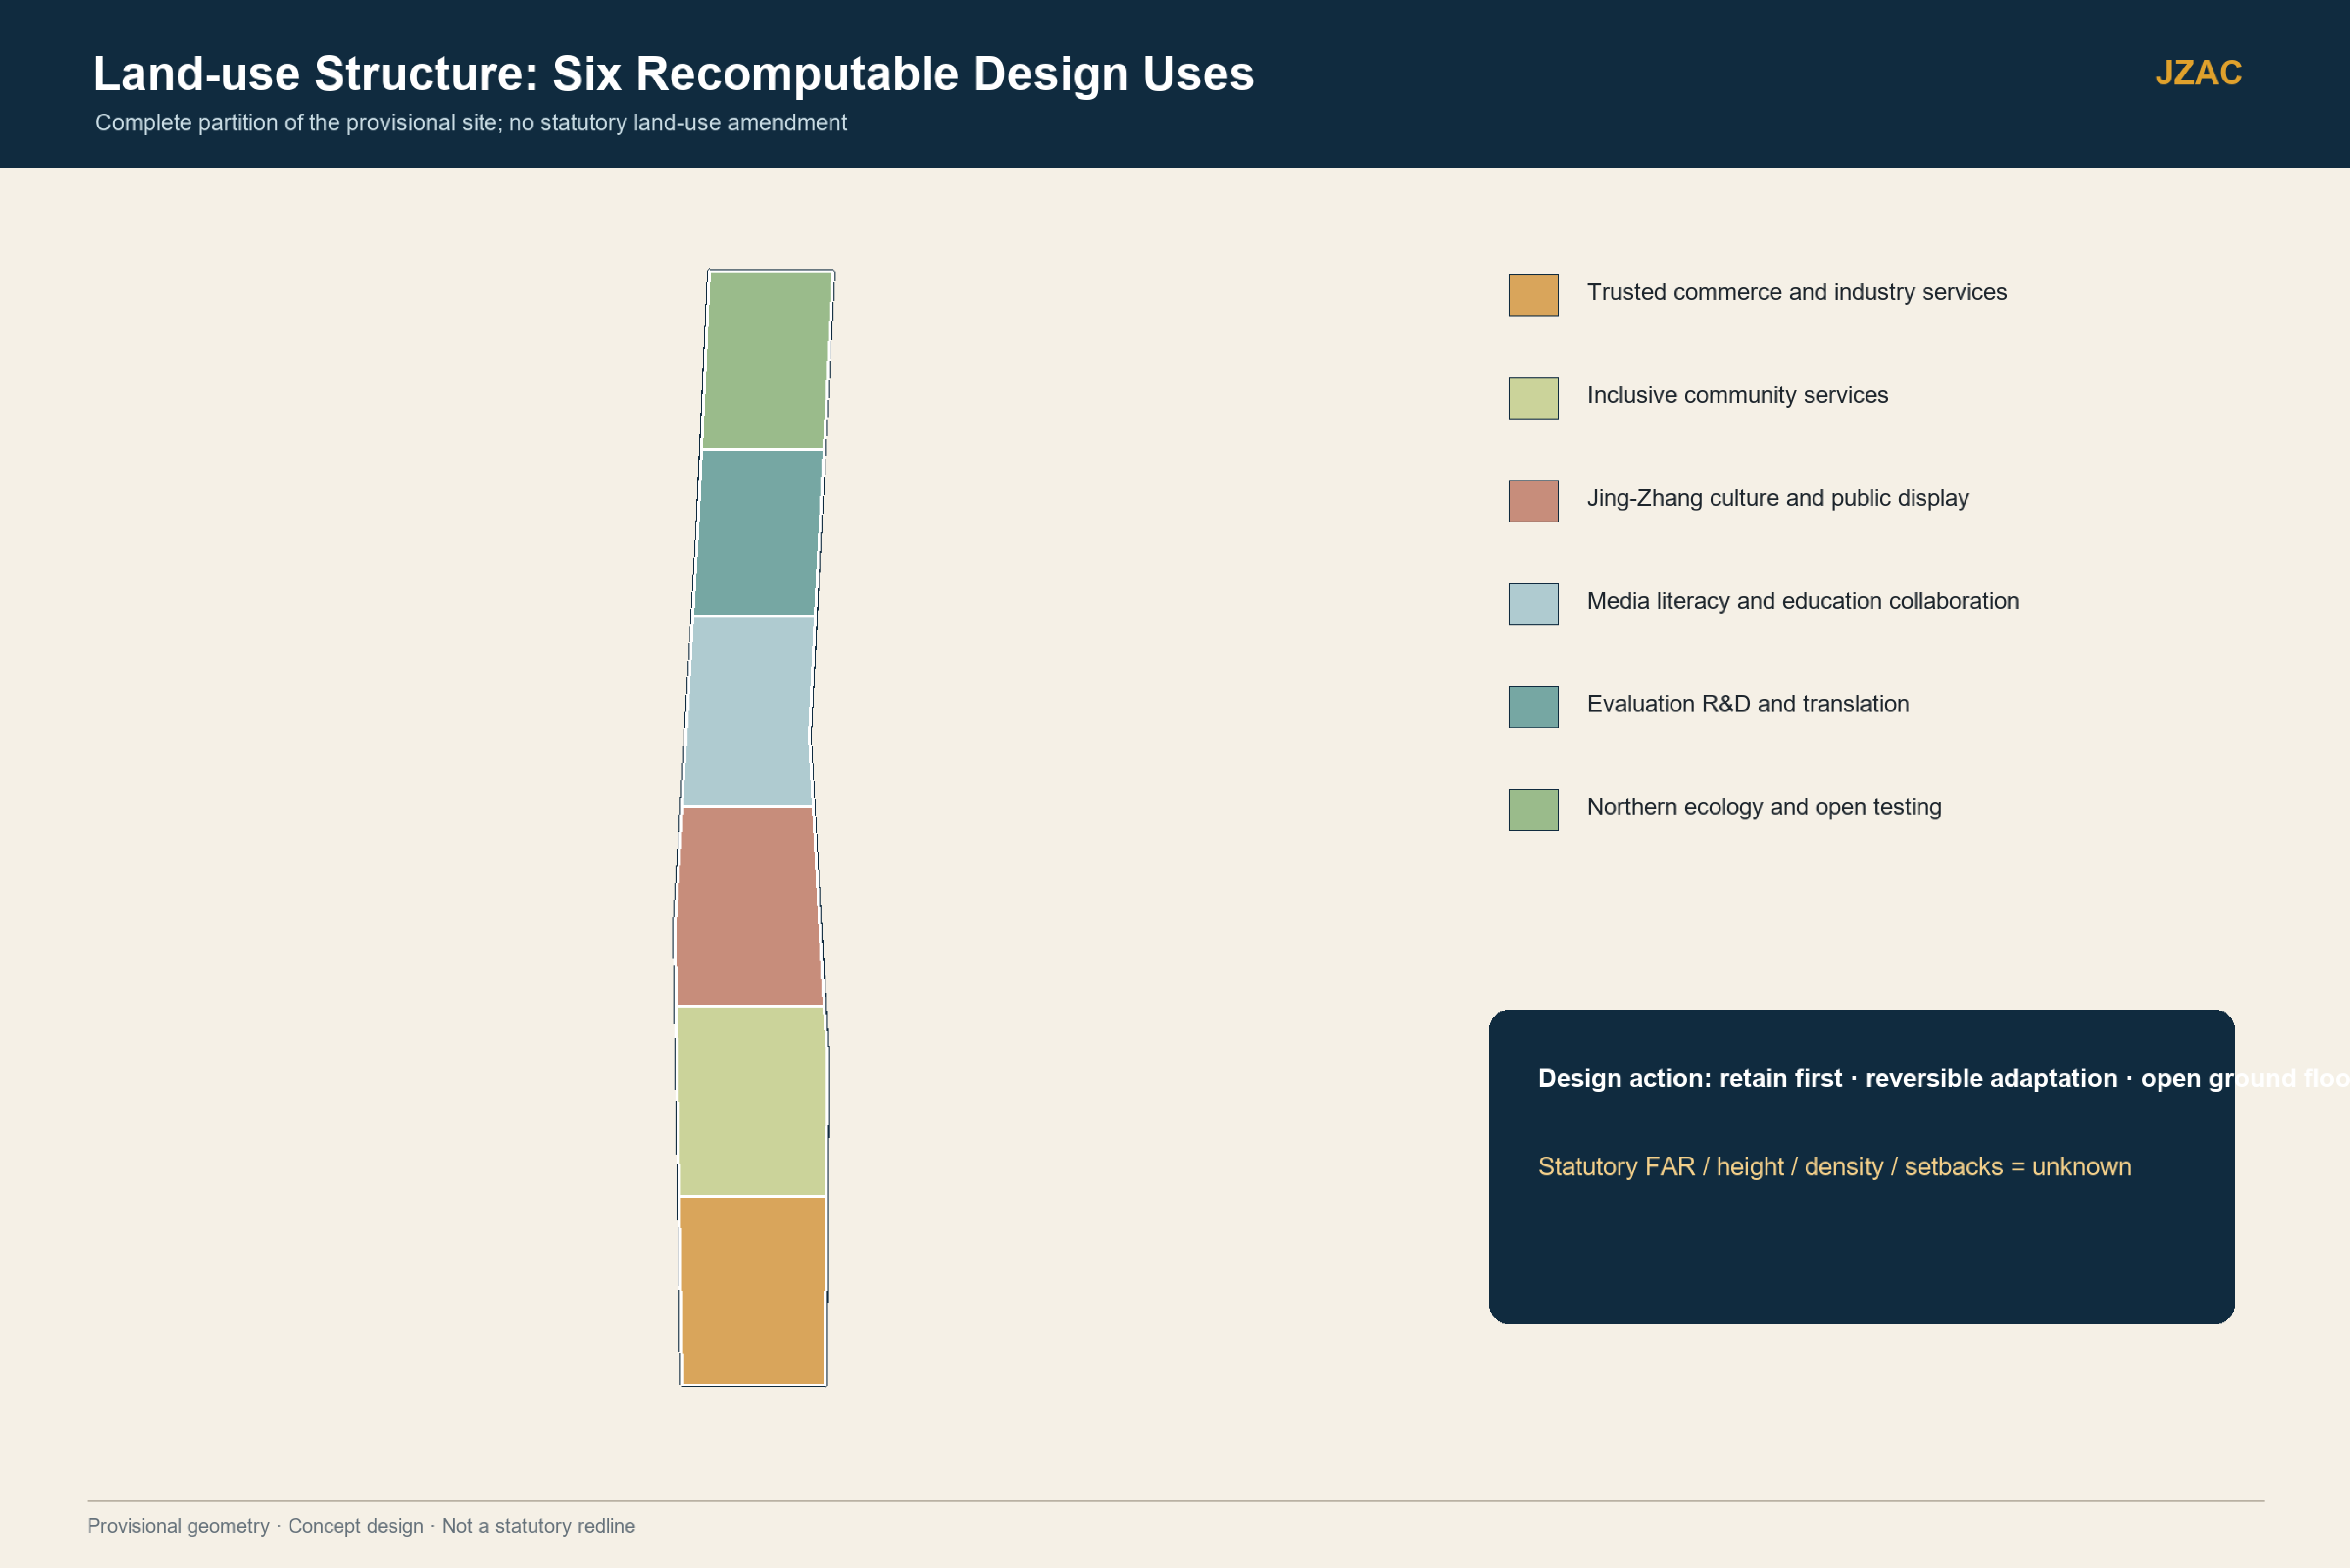

Evidence before conclusion

C2PA-style provenance, media forensics and external evidence feed qualified human review. Results expire, can be revoked and remain appealable. Provenance never proves factual truth.

Three belts and a topology-safe design partition

Six concept land uses completely partition the provisional site. They are not statutory changes. Twelve building units retain or adapt; no demolition is committed.

Three key areas

Zhongzhiyuan evaluates; the Origin Community translates and corrects; Dazhongsi enables trusted procurement and screenless access. Announced areas remain distinct from provisional geometry.

Three Key Areas: Evaluate · Translate · Procure

Announced areas are facts; submitted polygons are provisional

01 Zhongzhiyuan · 192.1 ha

evaluation / standards / release gate

one station + industry test family + public service family + appeal

02 Beijing AI Origin · 104.3 ha

open-source / literacy / recovery

one station + industry test family + public service family + appeal

03 Dazhongsi · 72.0 ha

procurement / content history / screenless

one station + industry test family + public service family + appeal

Provisional geometry · Concept design · Not a statutory redline

Provisional geometry · Concept design · Not a statutory redline

Mobility, blue-green and six stations

A transit-to-slow-spine-to-cross-stitch hierarchy connects six staffed interfaces. No account, smartphone, face scan or payment is required for the core journey.

Mobility, Blue-green and Six Stations: No Smartphone Required

transit → slow spine → cross-stitch → accessible final 50 metres

Metrics, dossier and gates

15 scenarios, five industry-validation cases, 12 complete journeys and six stations are structured evidence. FAR, height, density, statutory green ratio and setbacks remain unknown.

Fifteen bounded scenarios

ID	Scenario	Type	Place	Review
S01	Multimodal Provenance Intake	industry_validation	Zhongzhiyuan Evaluation Workshop	required
S02	Image and Video Deepfake Benchmark	industry_validation	Zhongzhiyuan Open Evaluation Yard	required
S03	Pre-release Information Integrity Gate	industry_validation	Beijing AI Origin Community Release Hall	release_committee
S04	Trusted Procurement for SMEs	industry_validation	Dazhongsi Trusted Procurement Desk	required
S05	AI Insurance and Reproducibility Desk	industry_validation	Risk Clinic in the Zhongguancun Technology Services Wing	risk_engineer
S06	Health Message Verification and Pre-visit Clarification	ai_health	embedded verification window at community health services	clinician
S07	Education Material and Credential Verification	ai_education	Media Literacy Classroom in the Origin Community	teacher_or_issuer
S08	Contract, Invoice and Promotion Verification	ai_business	Dazhongsi Screenless Service Counter	required_for_adverse
S09	Community Rumour Triage	civic_service	community node in the Xiaoyue River Scenario Enablement Wing	incident_team
S10	Screenless Anti-scam Verification for Older Adults	inclusive_service	staffed counter available across all six stations	mandatory
S11	Accessible Audio-visual Explanation Verification	inclusive_service	accessible verification desks throughout the corridor	accessible_service_staff
S12	Creator Rights and Content History Registration	creative_industry	Creative Archive on the Jing-Zhang Cultural Belt	rights_adviser
S13	Transit and Public Notice Version Check	urban_service	Dazhongsi Station and slow-mobility connections	station_staff
S14	Victim Correction and Reputation Recovery	recovery_appeal	Commons Correction and Recovery Station	independent_panel
S15	Jing-Zhang Industrial Heritage Archive Verification	heritage	heritage nodes on the Century-old Jing-Zhang Cultural Belt	heritage_expert

Twelve complete journeys

P01 · Retired resident without a smartphone

verify a health-screening notice received through a chat group
Arrival → staffed intake → evidence review → receipt → appeal/correction

P02 · Wheelchair user with low vision

read and challenge a result on equal terms
Arrival → staffed intake → evidence review → receipt → appeal/correction

P03 · Community clinician

triage harmful health misinformation quickly
Arrival → staffed intake → evidence review → receipt → appeal/correction

P04 · Secondary-school teacher

turn authenticity questions into media-literacy learning
Arrival → staffed intake → evidence review → receipt → appeal/correction

P05 · Parent of a student

verify admissions documents and fee notices
Arrival → staffed intake → evidence review → receipt → appeal/correction

P06 · Dazhongsi small merchant

verify an AI supplier and contract at low cost
Arrival → staffed intake → evidence review → receipt → appeal/correction

P07 · Early-stage AI founder

use reproducible evidence for incubation, procurement and insurance
Arrival → staffed intake → evidence review → receipt → appeal/correction

P08 · Independent visual creator

document content history and respond to impersonation
Arrival → staffed intake → evidence review → receipt → appeal/correction

P09 · Community journalist

verify breaking-event media quickly but cautiously
Arrival → staffed intake → evidence review → receipt → appeal/correction

P10 · Evaluation researcher

use licensed benchmarks and publish method limits
Arrival → staffed intake → evidence review → receipt → appeal/correction

P11 · International visiting procurement manager

understand evidence quality across languages
Arrival → staffed intake → evidence review → receipt → appeal/correction

P12 · Public-service counter worker

handle forged notices without expanding authority
Arrival → staffed intake → evidence review → receipt → appeal/correction

Implementation and safeguards

0-18 months: screenless pilots, licensed benchmark and correction ledger. 18-36 months: adapt six stations after official spatial and engineering data. 36-60 months: independent governance only after impact evaluation.

Prohibited: sale of case data; facial databases; opaque reputation scores; automated service denial; claims of government certification.

Statutory controls remain unknown. Every spatial layer is recomputed when cleared official polygons become available.
