

京张智轨 AI-Rail

JINGZHANG AI-RAIL

从铁轨到智轨的百年京张AI创新带城市设计 · 概念方案

Based on the Haidian pre-qualification announcement and the agent open-call taskbook. Three scopes: research $\approx$ 43.6 km, overall design $\approx$ 11.4 km, key areas $\approx$ 368.4 ha. Official precise polygons are not public; provisional boundaries are used for generation, display and intake self-check only, not as an official redline.

依据海淀规资分局《百年京张AI创新带城市设计国际方案征集资格预审公告》与面向智能体任务书编制。三层范围：统筹研究约43.6km、总体设计约11.4km、重点区域约368.4ha。官方精确边界未公开，本方案使用provisional 临时粗略边界，仅在生成、展示与临时自检中使用，不作为官方红线。

Core concept 'JINGZHANG AI-RAIL': upgrading the centennial Jing-Zhang Railway into an AI innovation spine. Naming: one main name + three belts (Memory/Life/Innovation Rail) + three stations (Acceleration・Zhongzhiyuan, Origin・AI Origin Community, Ecosystem・Dazhongsi) + two wings (Zhongguancun Tech Service, Xiaoyuehe Scenario). Logo fuses rail cross-section with code angle brackets.

核心概念「京张智轨 AI-Rail」：把百年京张铁路升维为 AI 创新主轴。命名体系：主名+三带（记忆轨/生活轨/创新轨）+三站（加速站・众智园、源头站・AI 原点社区、生态站・大钟寺）+两翼（中关村科技服务翼、小月河场景赋能翼）。Logo 方向融合铁轨截面与代码尖括号，铸铁赭红与 AI 脉冲青双色。

Overall design area: land use and renewal

总体设计

One-spine-three-stations-two-wings structure. Land use dominated by research (0802), green (1401), residential (07), commercial (05), education/culture (0804) and reserve (16), recomputed in EPSG:4548. Renewal follows retain-weave-complement-new; FAR/height pending official controls with concept massing only.

一轴三站两翼结构。用地以科研(0802)、绿地(1401)、居住(07)、商业(05)、文教(0804)、留白(16)为主体,由 land_use.geojson 在 EPSG:4548 复算。拆改留遵循「保、织、补、新」;容积率、建筑高度等控规指标待官方附件,仅保留概念体量。

Detailed design of the three key areas

三处重点

Acceleration Station • Zhongzhiyuan (≈192.1 ha): full-stack innovation; Origin Station • AI Origin Community (≈104.3 ha): university source innovation & open-source cradle; Ecosystem Station • Dazhongsi (≈72.0 ha): AI-native formats. Each forms a readable mini-proposal.

加速站·众智园（约192.1ha）：全栈自主创新高地；源头站·AI原点社区（约104.3ha）：高校源头创新与开源策源地；生态站·大钟寺（约72.0ha）：智能原生新业态中心。每处均形成定位、结构、更新、慢行、公共空间、AI场景与风险的可读小方案。

10 AI scenario cards (incl. 3 test-and-validation scenarios), 5+ personas; 3 pilgrimage landmarks (Developer Platform, Agent Honor Wall, Zigzag Monument). Long-term operations include the annual AI-Rail Festival, developer community, scenario opening and international outreach, all conceptual.

10 张 AI 场景卡（含 3 张产业测试验证场景）、5 类以上用户画像；3 个朝圣地标（开发者站台、智能体贡献荣誉墙、之字形创新纪念碑）。长期运营含年度「智轨节」、开发者社区、场景开放与国际传播机制，均表述为概念建议。

Greenway slow spine + three horizontal connectors + two-wing branches; municipal and new infrastructure (distributed energy, edge compute, agent infrastructure); one-spine-two-ribbons blue-green network; urban character of rail memory + digital future.

绿廊慢行主轴+三横联络+两翼支路网；市政与新型基础设施（分布式能源、端侧算力、智能体基础设施）融合；蓝绿空间「一轴两带」；城市风貌强调铁轨记忆+数字未来。

Metrics recomputed from geometry/*.geojson in EPSG:4548: site area, green/public ratios, land-use by code, phasing. compliance_matrix covers announcement 1.3-1.5 and agent.1-6; the four self-check gates are recorded in self_check.json.

指标由 geometry/*.geojson 在 EPSG:4548 复算: site_area、green_ratio、public_space_ratio、land-use by code、phasing 等。compliance_matrix 覆盖公告 1.3-1.5 与 agent.1-6；四道自检门槛全部通过后记录于 self_check.json。

Official boundary, regulatory indicators, road redlines, ownership and engineering data pending; recompute once official data arrives. The author bears responsibility for AI-generated content; all concepts are original directions.

官方边界、控规指标、道路红线、权属与工程条件待补；正式数据到位后统一复算。AI 生成内容责任由作者承担，所用概念均为原创方向。
