

Spatial Structure: One Meridian, Dual Axes, Three Cores, Nine Nodes

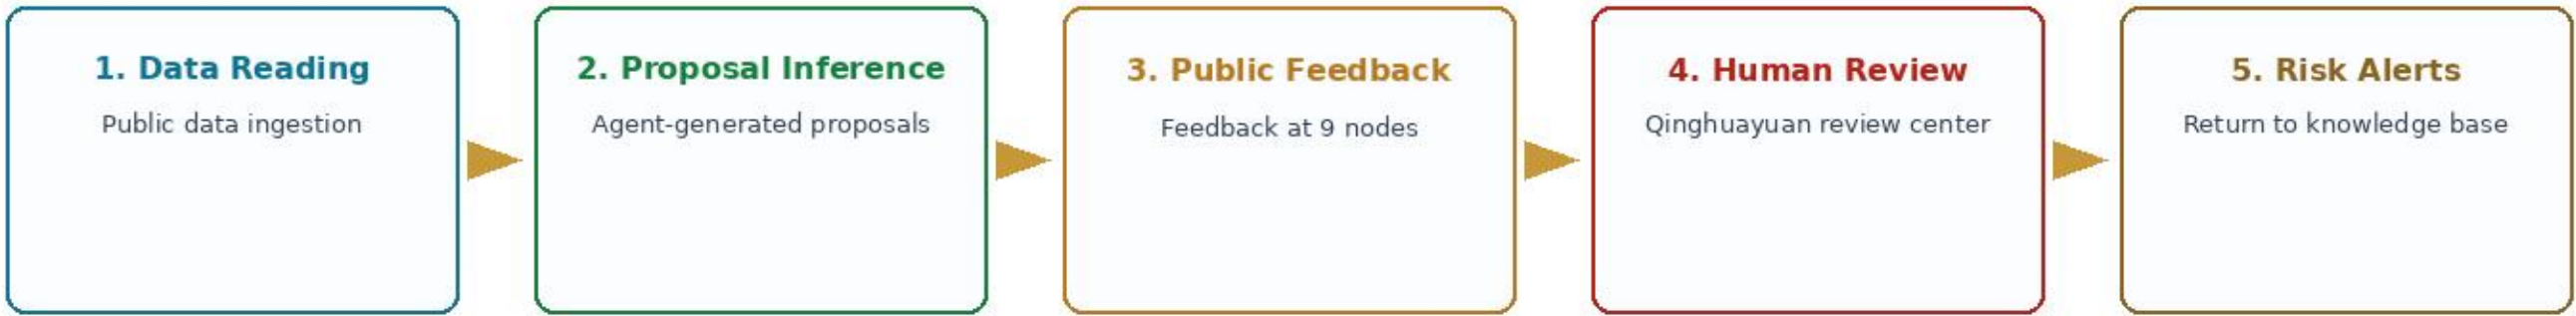

Three Key Areas - Differentiated Positioning

Zhongzhiyuan AI Acceleration 192.1 ha FAR 3.0-4.0 R&D Engine National AI platform, full-stack innovation, standards, governance. Retain existing R&D, renovate low-efficiency parks, new landmark towers.	Beijing AI Origin Community 104.3 ha FAR 1.5-2.5 Life Prototype Near-campus innovation, incubation, talent zone, open-source. Retain residential core, renovate ground floors, limited new apartments.	Dazhongsi AI Industry Cluster 72.0 ha FAR 2.0-3.0 Industry Ecosystem Leading enterprises, agents, smart terminals, data factors. Renovate commercial, integrate quadrants, landmark towers.

Core Metrics Dashboard

site_area_sqm 11.4 km2 Overall Design Area	coordinated_research_area_sqm 43.6 km2 Coordinated Research	key_detailed_design_area_sqm 3.684 km2 Key Area (3 cores)	green_ratio 30% G 15% + E 15%
walkability_network_density 9.0 km/km2 target 8-10	transit_coverage_800m >=80% Rail 800m coverage	cultural_axis_length_m 9 km Cultural spine	scenario_count 8 AI scenarios
node_count 9 Nine nodes	governance_loop_coverage 100% 5-step loop	party_leadership_coverage 100% Party guidance	public_participation_channels >=9 Participation
floor_area_ratio unknown FAR pending 1.5-4.0	building_height_m unknown Height pending 18-50m	building_footprint_area_sqm 111954 m2 footprint	phasing_period_count 4 Phasing periods

Governance: Civic-Agent Meridian 5-Step Loop

Urban Governance Knowledge Base (Organ)

Exterior/interior alternation: data -> inference -> feedback -> review -> risk -> loop

Three Principles:

Party-building Guidance 7 functions, 100% coverage, no non-intervention	Government Implementation Statutory decision-making + supervision	Public Participation Feedback + supervision + co-construction, >=9 channels
---	---	---

Phasing Implementation
