

A public acceptance line connecting R&D to civic responsibility

Three positions · five functions · three areas and two wings · three courts and twelve stations

Centennial Jingzhang cultural belt

Rail memory · contribution record · verifiable sources

Urban AI life experience belt

Physical safety first · no-app service · human override

AI convergence innovation belt

Test—translate—adopt—learn from failure

Five functions become reviewable interfaces

01 Full-stack innovation

02 Global innovation ecosystem

03 AI+ scenario enablement

04 Intelligent vibrant city

05 AI governance: public purpose, human review, deletion, stop and review

Regional interfaces | Beiwei community: adoption · Future/Huairou science cities: joint research · E-Town: manufacturing validation · Jing-Jin-Ji: shared failure records

Land use is a public-interface responsibility, not a color fill

Place names are verification anchors; provisional geometry expresses relationships only

R&D interface Publish purpose, version, fields and stop condition.	Service interface Refusing automation never lowers service quality.	Landscape interface Sensor purpose, steward and off switch stay visible.	Building interface Retain/renew decisions pass ownership, safety, heritage and public-interest gates.
Statutory land-use codes, FAR, height, density and setbacks remain unknown			THE CURIOSITY LINE

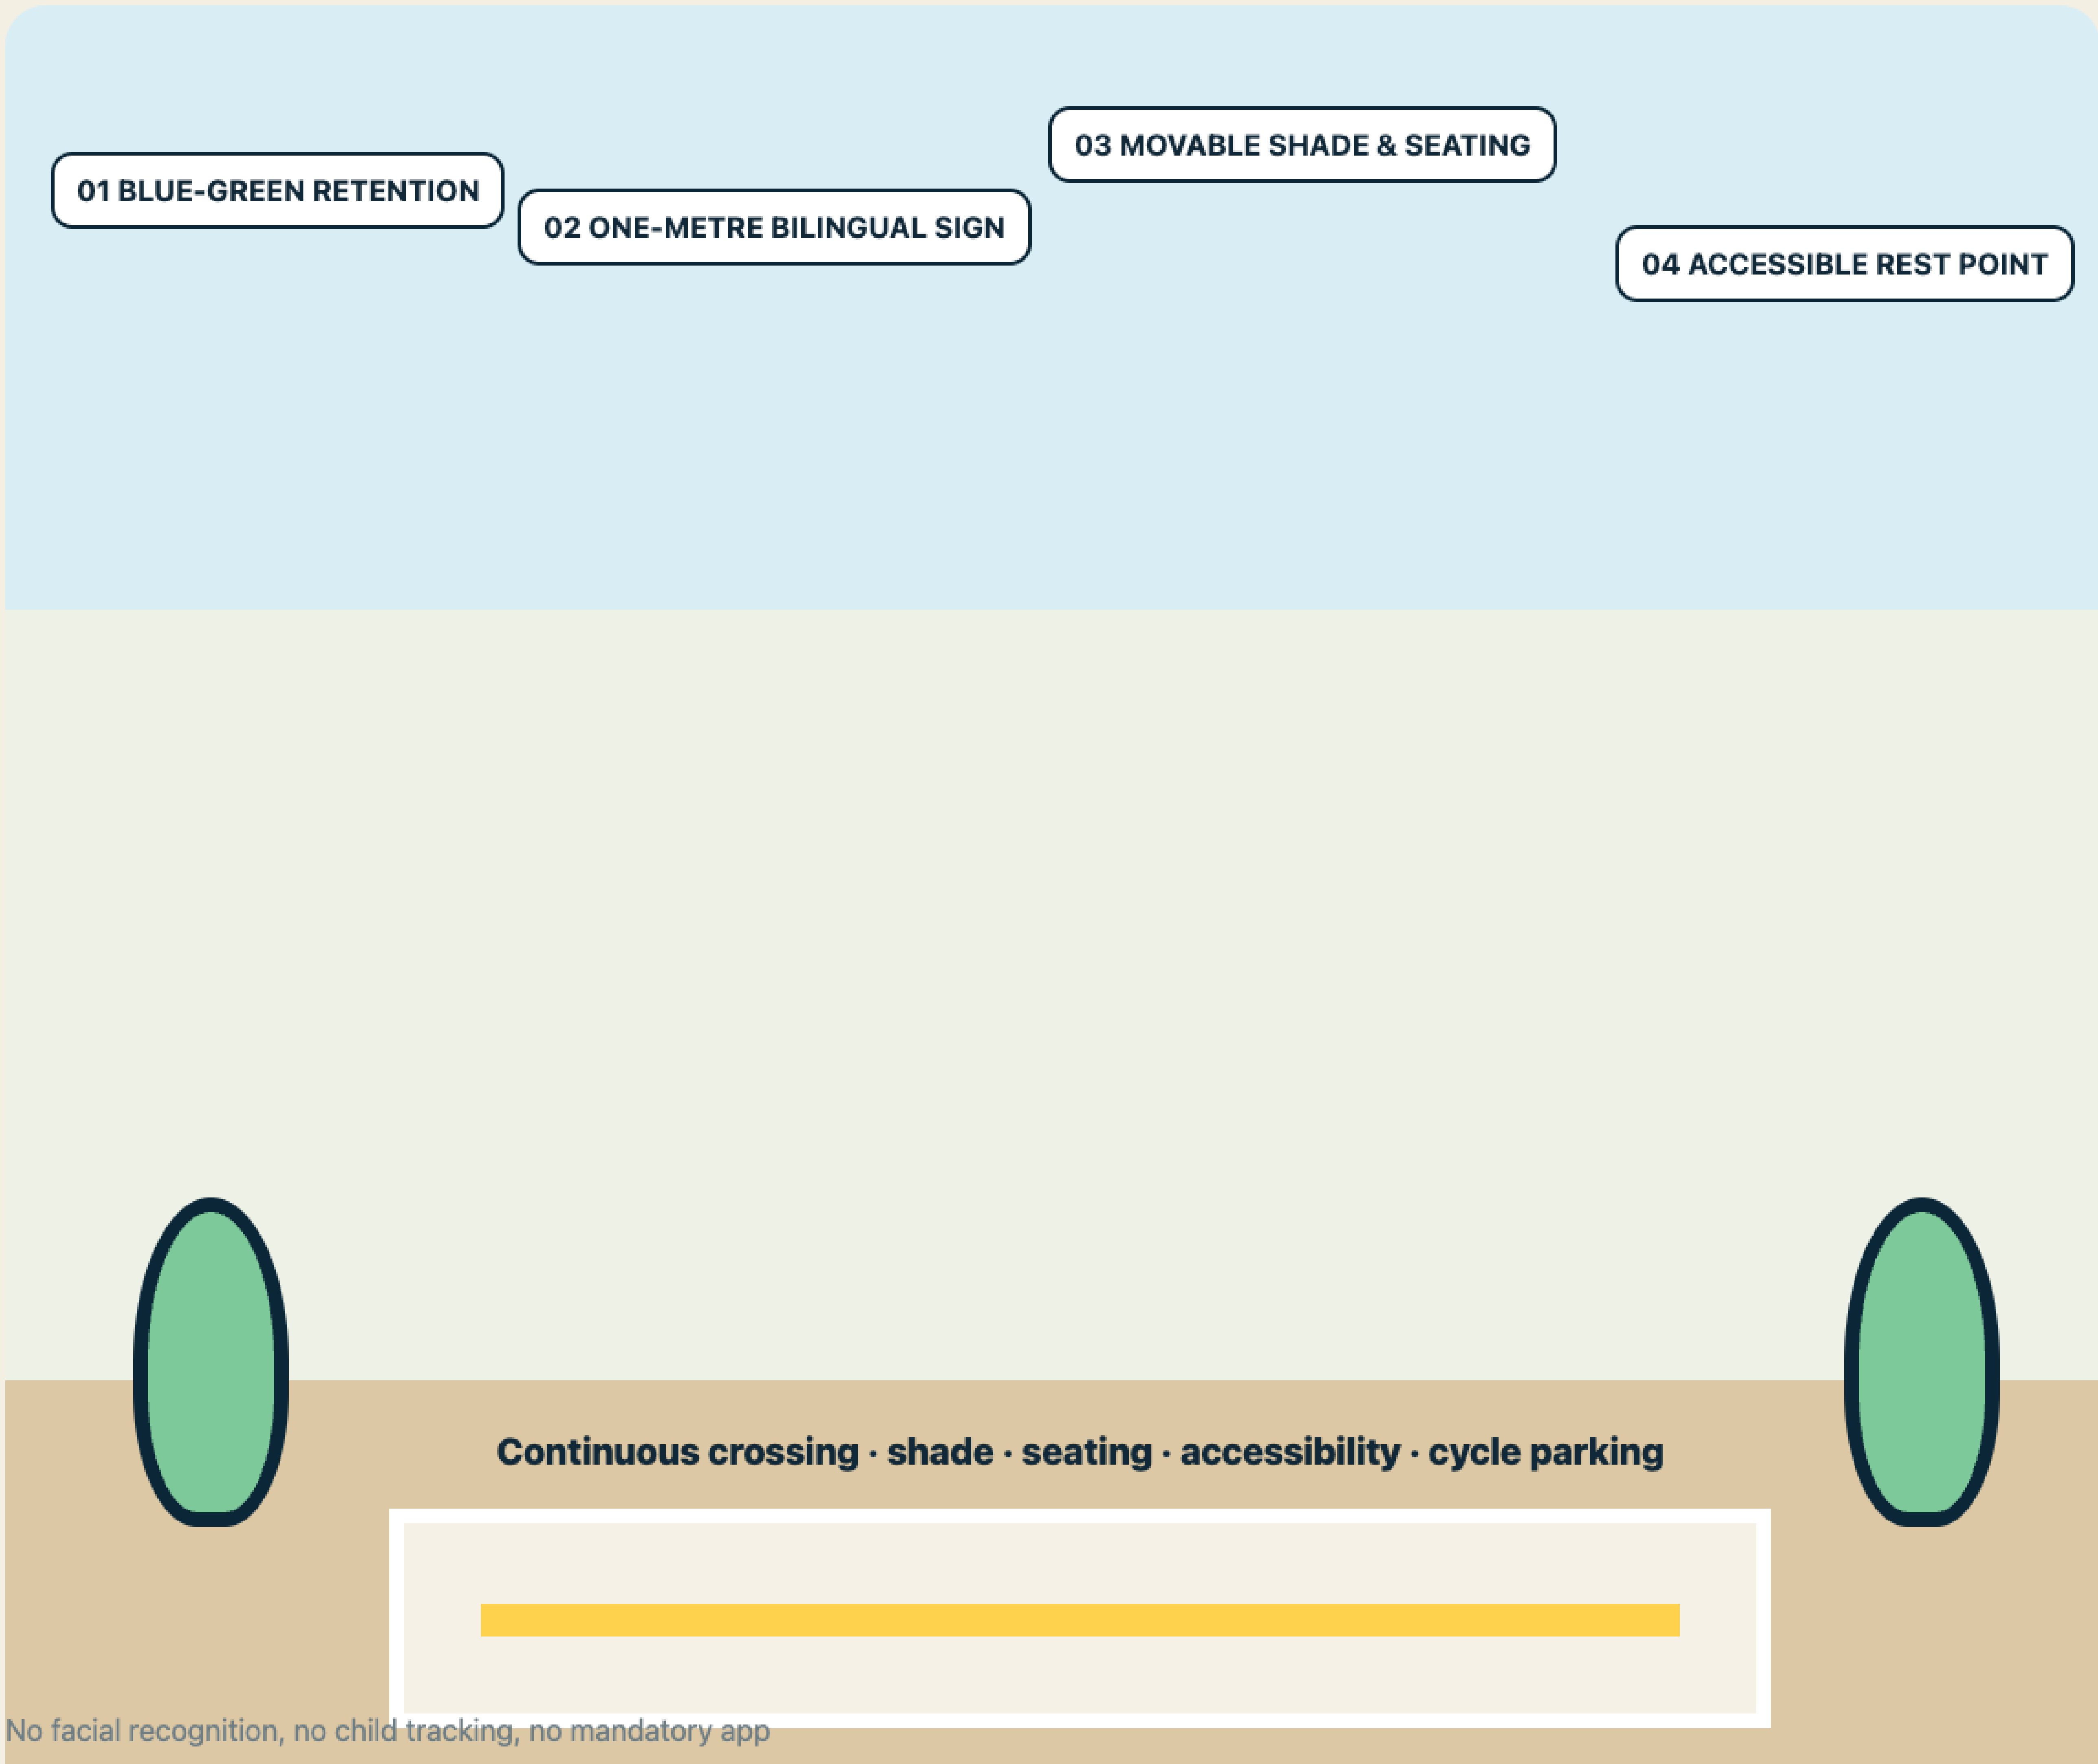

Three key areas share six questions but provide distinct answers

Function · building · mobility · public space · operation · dependency

COLLECTIVE INTELLIGENCE PARK Full-stack innovation visible failure		AI ORIGIN COMMUNITY Open collaboration learning and living		DAZHONGSI Public adoption station-city ground floor	
FUNCTION Full-stack validation and shared pilot	BUILDING Reversible experimental ground floor	FUNCTION Talent life and open-source transfer	BUILDING Mixed use of existing ground floors	FUNCTION Intelligent economy and exchange	BUILDING Station-city ground-floor renewal
MOBILITY Qinghe interface and walking connection	PUBLIC SPACE Failure-visible courtyard	MOBILITY Campus—park—community stitching	PUBLIC SPACE Collective learning table	MOBILITY Four-quadrant walking/cycling links	PUBLIC SPACE Civic question market and override clock
OPERATION Sandbox entry and version disclosure	DEPENDENCY Ownership, fire safety, compute, safety	OPERATION Courses, translation, talent services	DEPENDENCY Resident dialogue, accessibility, campus boundary	OPERATION Adoption test and professional referral	DEPENDENCY Station works, ownership, crowd safety
ENTRY GATE verify ownership/fire safety and run a reversible small sample		ENTRY GATE target-group review passes; equal service without an app		ENTRY GATE verify station and crowd safety; concept art is not engineering proof	
All three polygons are provisional constraints; parcel plans await official data				THE CURIOSITY LINE	

Repair physical safety before adding digital assistance

One-metre component kit: service still works offline, without an app, and with human help

RIGHT TO KNOW

Purpose, fields, steward and update time stay visible.

RIGHT TO HUMAN OVERRIDE

Physical buttons and staffed windows work independently.

RIGHT TO EXIT & DELETE

No service penalty for opting out; deletion is auditable.

RIGHT TO STOP A TEST

Serious incident, failed override or repeated miss pauses the test.

FOUR-PART CULTURAL WAYFINDING

Rail memory · innovation version · failure log · public rights

THE CURIOSITY LINE

Every number is labelled: recalculable, unknown, or pilot-generated

Ten work packages advance through ownership, KPI, human review, stop and next-stage gates
