

Scope Declaration

provisional anchors, not a site plan

SCOPE DECLARATION AND CARRIER ANCHORS

Retains provisional scope and named anchors; does not infer real roads, buildings, entries or layouts

11.41 km²

provisional overall scope

3

carrier anchors

0.20%

Load Card anchor footprint

EVIDENCE BOUNDARY

This page does not represent road alignment, parcel edges, building location, entries, dimensions or statutory control.

01

ZHONGZHIYUAN

□□ / Crossing Span

crossing, pause and a maintenance interface

02

AI ORIGIN COMMUNITY

□□ / Threshold Span

readable entry, step-free bypass and human help

03

DAZHONGSI

□□ / Canopy Span

shade, waiting, notices and staffed referral

MAY STATE

named anchors and civic actions

metrics and evidence boundary

human equivalent, care and exit

MUST NOT INFER

real site plan or traffic organisation

precise building or public-space location

Public Service Structure

auditable rules, not spatial linework

JING-ZHANG COMMON SPAN / 2026.08 / REVISION 04

PUBLIC SERVICE STRUCTURE, NOT A SITE PLAN

Uses auditable service relationships instead of unsupported road and building linework

	PUBLIC GROUND	CARRIER	SERVICE LAYER
PASSAGE FIRST	No device or event may consume the public route.	Crossing, threshold and canopy first carry non-digital civic action.	Digital service appears only when it does not consume the public baseline.
HUMAN EQUIVALENT	Continuous walking, pause, shade and legible information.	Keep signage, human inquiry, paper notices and step-free bypass.	AI failure must not reduce access, inquiry or referral.
REVERSIBLE	After stopping, restore passage, pause and legibility.	Care roles, exit actions and approvals are written into every Load Card.	Do not treat pilots, content or operations as permanent construction.

DIAGRAM USE

This is a structure for service, care and exit rules; it does not replace a real road, land-use, building or traffic plan.

Three Load Cards

verify field conditions before components

JING-ZHANG COMMON SPAN / 2026.08 / REVISION 04

THREE LOAD CARDS: VERIFY SITE CONDITIONS BEFORE COMPONENTS

Scenes describe use relations only; they do not reproduce real place, scale or existing buildings

01 **CROSSING SPAN**

ZHONGZHIYUAN

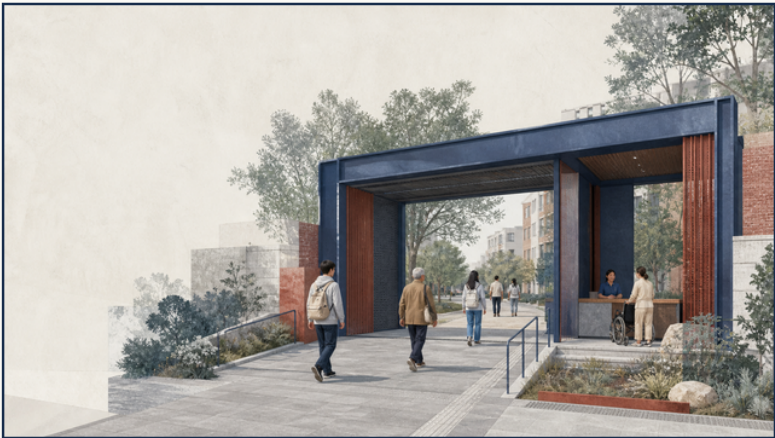

CIVIC ACTION
crossing, pause, maintenance interface

SITE TO VERIFY
clear width, object crossed, access rights, care route

EXIT restore passage, pause and legibility

02 **THRESHOLD SPAN**

AI ORIGIN COMMUNITY

CIVIC ACTION
entry, step-free bypass, human help

SITE TO VERIFY
entry ownership, accessibility, fire safety and flow

EXIT restore passage, pause and legibility

03 **CANOPY SPAN**

DAZHONGSI

CIVIC ACTION
shade, notice, staffed referral

SITE TO VERIFY
waiting relation, trees, utilities and operating edge

EXIT restore passage, pause and legibility

Operating States

public capacity across three states

THREE OPERATING STATES, NOT SPATIAL ROUTES

Tests whether one public baseline remains usable in ordinary, peak and disrupted conditions

	ORDINARY	PEAK	DISRUPTION
PUBLIC PASSAGE	Keep walking and pausing continuous.	Events retreat to the edge; clear passage stays first.	Digital service exits; the public route is unchanged.
SHADE AND PAUSE	Provide usable shade, seats and paper guidance.	Short-term diversion must not consume step-free bypass.	Notices and waiting information remain human-updatable.
HUMAN SERVICE	Low-risk explanation or care information may be read.	Human inquiry, signs and static notices remain usable.	Staff take over inquiry and referral.

DIAGRAM BOUNDARY This page does not use abstract lines as roads or green corridors. It states public capacity that must remain available across operating states.

Evidence Board

can state, cannot state and pending inputs

EVIDENCE BOARD: CAN STATE, CANNOT STATE, PENDING INPUTS

Numbers record only recalculable content; unknowns stay unknown and enter the next field and professional review

11.41 km²
provisional overall scope

3
carrier anchors

0.20%
anchor footprint

PENDING INPUTS
Formal boundaries, roads and utilities, heritage, ownership, survey and professional approvals.

	CAN STATE	MUST NOT STATE	NEXT EVIDENCE
Scope and anchors	provisional scope and three named anchors	formal redline, actual roads or parcels	verify boundaries and coordinate reference
Carriers and service	civic action, human equivalent, care and exit	real buildings, dimensions, construction or existing state	field walk, operating and specialist review
Metrics	recalculable package values and source boundary	performance promises, statutory quota or investment conclusion	add methodology, raw data and approval materials

Review Boundary

recheck against future formal evidence

SCOPE DECLARATION AND CARRIER ANCHORS

Retains provisional scope and named anchors; does not infer real roads, buildings, entries or layouts
