

Site overview: a public verification institution

Every AI pilot leaves better public ground, auditable evidence, human fallback, and a stop condition

PROVISIONAL GEOMETRY /
NON-STATUTORY / EPSG:4548
PACKAGE CHECK

ONE SPINE / THREE GARDENS /
TWO WINGS / TWELVE TEST
BEDS

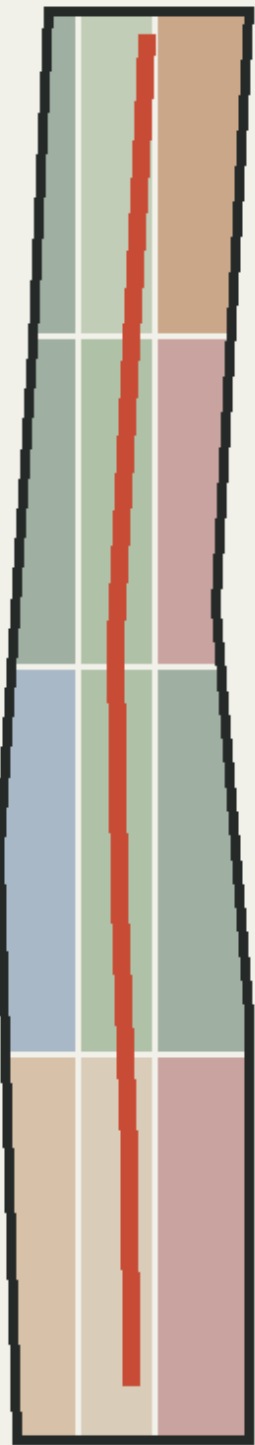

- ☐ PUBLIC GROUND
- ☐ AUDITABLE EVIDENCE
- ☐ HUMAN FALLBACK
- ☐ STOP CONDITION

Boundary supports package topology and visual
discussion only.

Land use: complete topology + public spine

Use classes are conceptual allocations, not existing parcels or statutory designations.

PROVISIONAL GEOMETRY /
NON-STATUTORY / EPSG:4548
PACKAGE CHECK

- Residential
- Community service
- Research
- Education
- Commercial
- Park green
- Protective green
- Square

DESIGN CONSEQUENCE

12 closed partitions; every land-use area
is recomputed from the same geometry
state.

Every AI pilot leaves better public ground, auditable evidence, human fallback, and a stop
condition

THREE GARDENS CONTAIN THREE TYPES OF RISK

PROVISIONAL GEOMETRY / NON-STATUTORY / EPSG:4548 PACKAGE CHECK

Three proof gardens: three risks, three spaces

Temporary key areas host functional test fits only; the Dazhongsi polygon is not station-anchored.

PROVISIONAL GEOMETRY /
NON-STATUTORY / EPSG:4548
PACKAGE CHECK

1

FULL-STACK BENCH GARDEN

Isolated testing / public observation / failure archive

2

OPEN-SOURCE COMMONS GARDEN

Open-source tables / policy clinic / light making

3

ADOPTION AND REPAIR GARDEN

Repair-lending / data exit / staffed referral

Mobility + blue-green: continuity first

Lines are concepts for verification, not road redlines, station entrances, or engineering alignments.

PROVISIONAL GEOMETRY /
NON-STATUTORY / EPSG:4548
PACKAGE CHECK

SHADE AND RAIN

PUBLIC TEST GROUND

EXPERIMENT SPINE

CROSS-LINK TO VERIFY

Facial recognition is not a default capability. Raw pilot data expires, and every automated suggestion permits human takeover.

TEST-A Full-stack model and edge-compute validation

Unauthorised data use or failed human takeover

TEST-B Low-speed embodied-AI coexistence test

Human risk, blocked accessible route, or exit from the enclosure

TEST-C Agent-service adoption and repair test

Untraceable source, unavailable exit, or unanswered appeal

Jing-Zhang Proof Gardens | 2/3

Core metrics + evidence: known and unknown

Spatial metrics come from one GeoJSON state; statutory controls remain unknown.

PROVISIONAL GEOMETRY /
NON-STATUTORY / EPSG:4548
PACKAGE CHECK

NINE EVIDENCE-GATED PROJECTS

- PG-01 Temporary marking and accessibility audit for the public experiment spine

PG-02 Lightweight Zhongzhiyuan Bench Garden demonstrator

PG-03 Origin Open-source Canopy and policy clinic

PG-04 Dazhongsì Repair Beacon and lending library

PG-05 East-west safe crossings and rain-garden set

PG-06 Bilingual three-garden wayfinding and contribution ledger

PG-07 Low-carbon edge compute and human takeover nodes

PG-08 Proof Season and resident jury protocol

PG-09 Official-data replacement and package-wide recomputation

FAR, height, density, setbacks, road redlines, demolition area, and total floor area remain UNKNOWN.
