

Jing-Zhang Civic Loop

An AI innovation belt for everyday public services

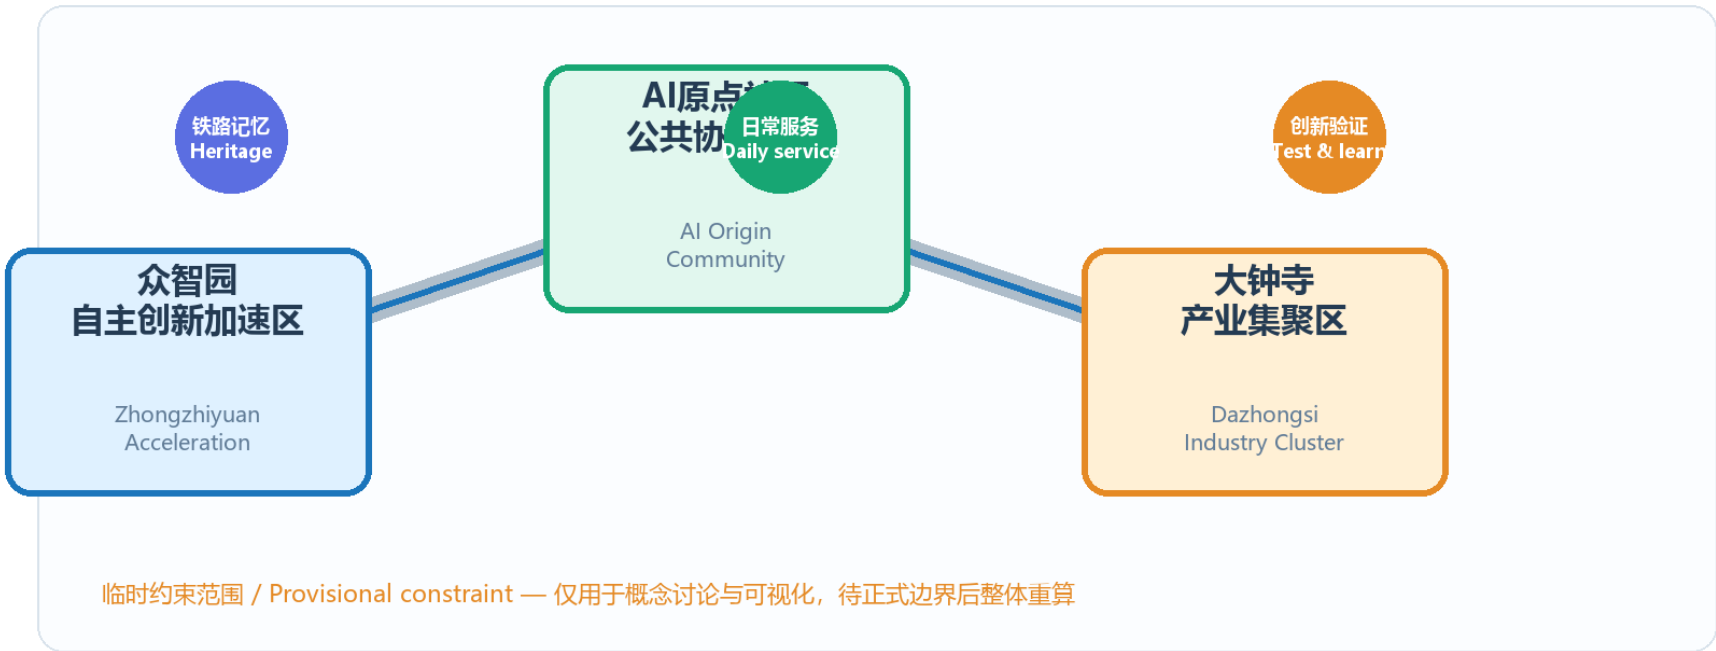

Concept proposal; provisional geometry; not statutory planning, heritage siting, construction or operating approval.

京张共生回路：三核一带

Jing-Zhang Civic Loop: three nodes, one belt

以公共服务回路把遗产、公园、创新与产业连接起来

A civic-service loop connects heritage, park life, innovation, and industry

ONE CIVIC SPINE

Existing heritage park as everyday public space

THREE NODES

test / collaborate / explain

TEN SCENARIOS

human and non-AI alternatives remain

SIX FIRST AUDITS

breaks / crossings / shade / tactile paving / rest / signs

Evidence that changes design

Facts, recommendations and missing statutory data remain separate

VERIFIED FACT	DESIGN RESPONSE	PENDING
Official park, service, planning, heritage, mobility and statistics sources.	Repair gaps, extend existing service, and use low-impact interpretation.	Official GIS, title, utilities, fire, accessibility and operator.
SOURCE	DESIGN CONSEQUENCE	
JZ-PARK-PHASE1	2.5 km / 16.8 ha; repair an existing spine	
AI-ORIGIN-TALENT-SERVICE-2026	17 services; extend, do not duplicate	
QINGHUAYUAN-HERITAGE-CONTROLS-2026	no fixed siting before official heritage GIS	
JZ-CONTROL-DRAFT-RESPONSE	consultation response is not an approved redline	
BEIJING-SLOW-MOBILITY-2024	continuous rights and accessibility before AI	
HD-STATS-2025	district context only; no site allocation	
No official heritage or control-plan polygon is fabricated. constraints.geojson stays empty and records the verified non-geometry evidence plus the request for official GIS.		

Five cases and a guarded delivery path

Method comparison only – no foreign controls or commitments imported

Punggol	test platform + university/industry/community
Barcelona 22@	innovation embedded in everyday mixed use
Amsterdam Nieuwe Meer	transit + living + work + service
Kendall / Volpe	open space and community benefit up front
Paris-Saclay	research + life + public realm + infrastructure

PHASING

P0

official data and authority

P1

paper signs and human service

P2

controlled tests with stop/appeal

P3

deepen only with evidence; otherwise retire
