

Jingzhang Intelligent Mobility Loop: A Walk-First Robotic Mobility Belt

01 / Brief and evidence chain

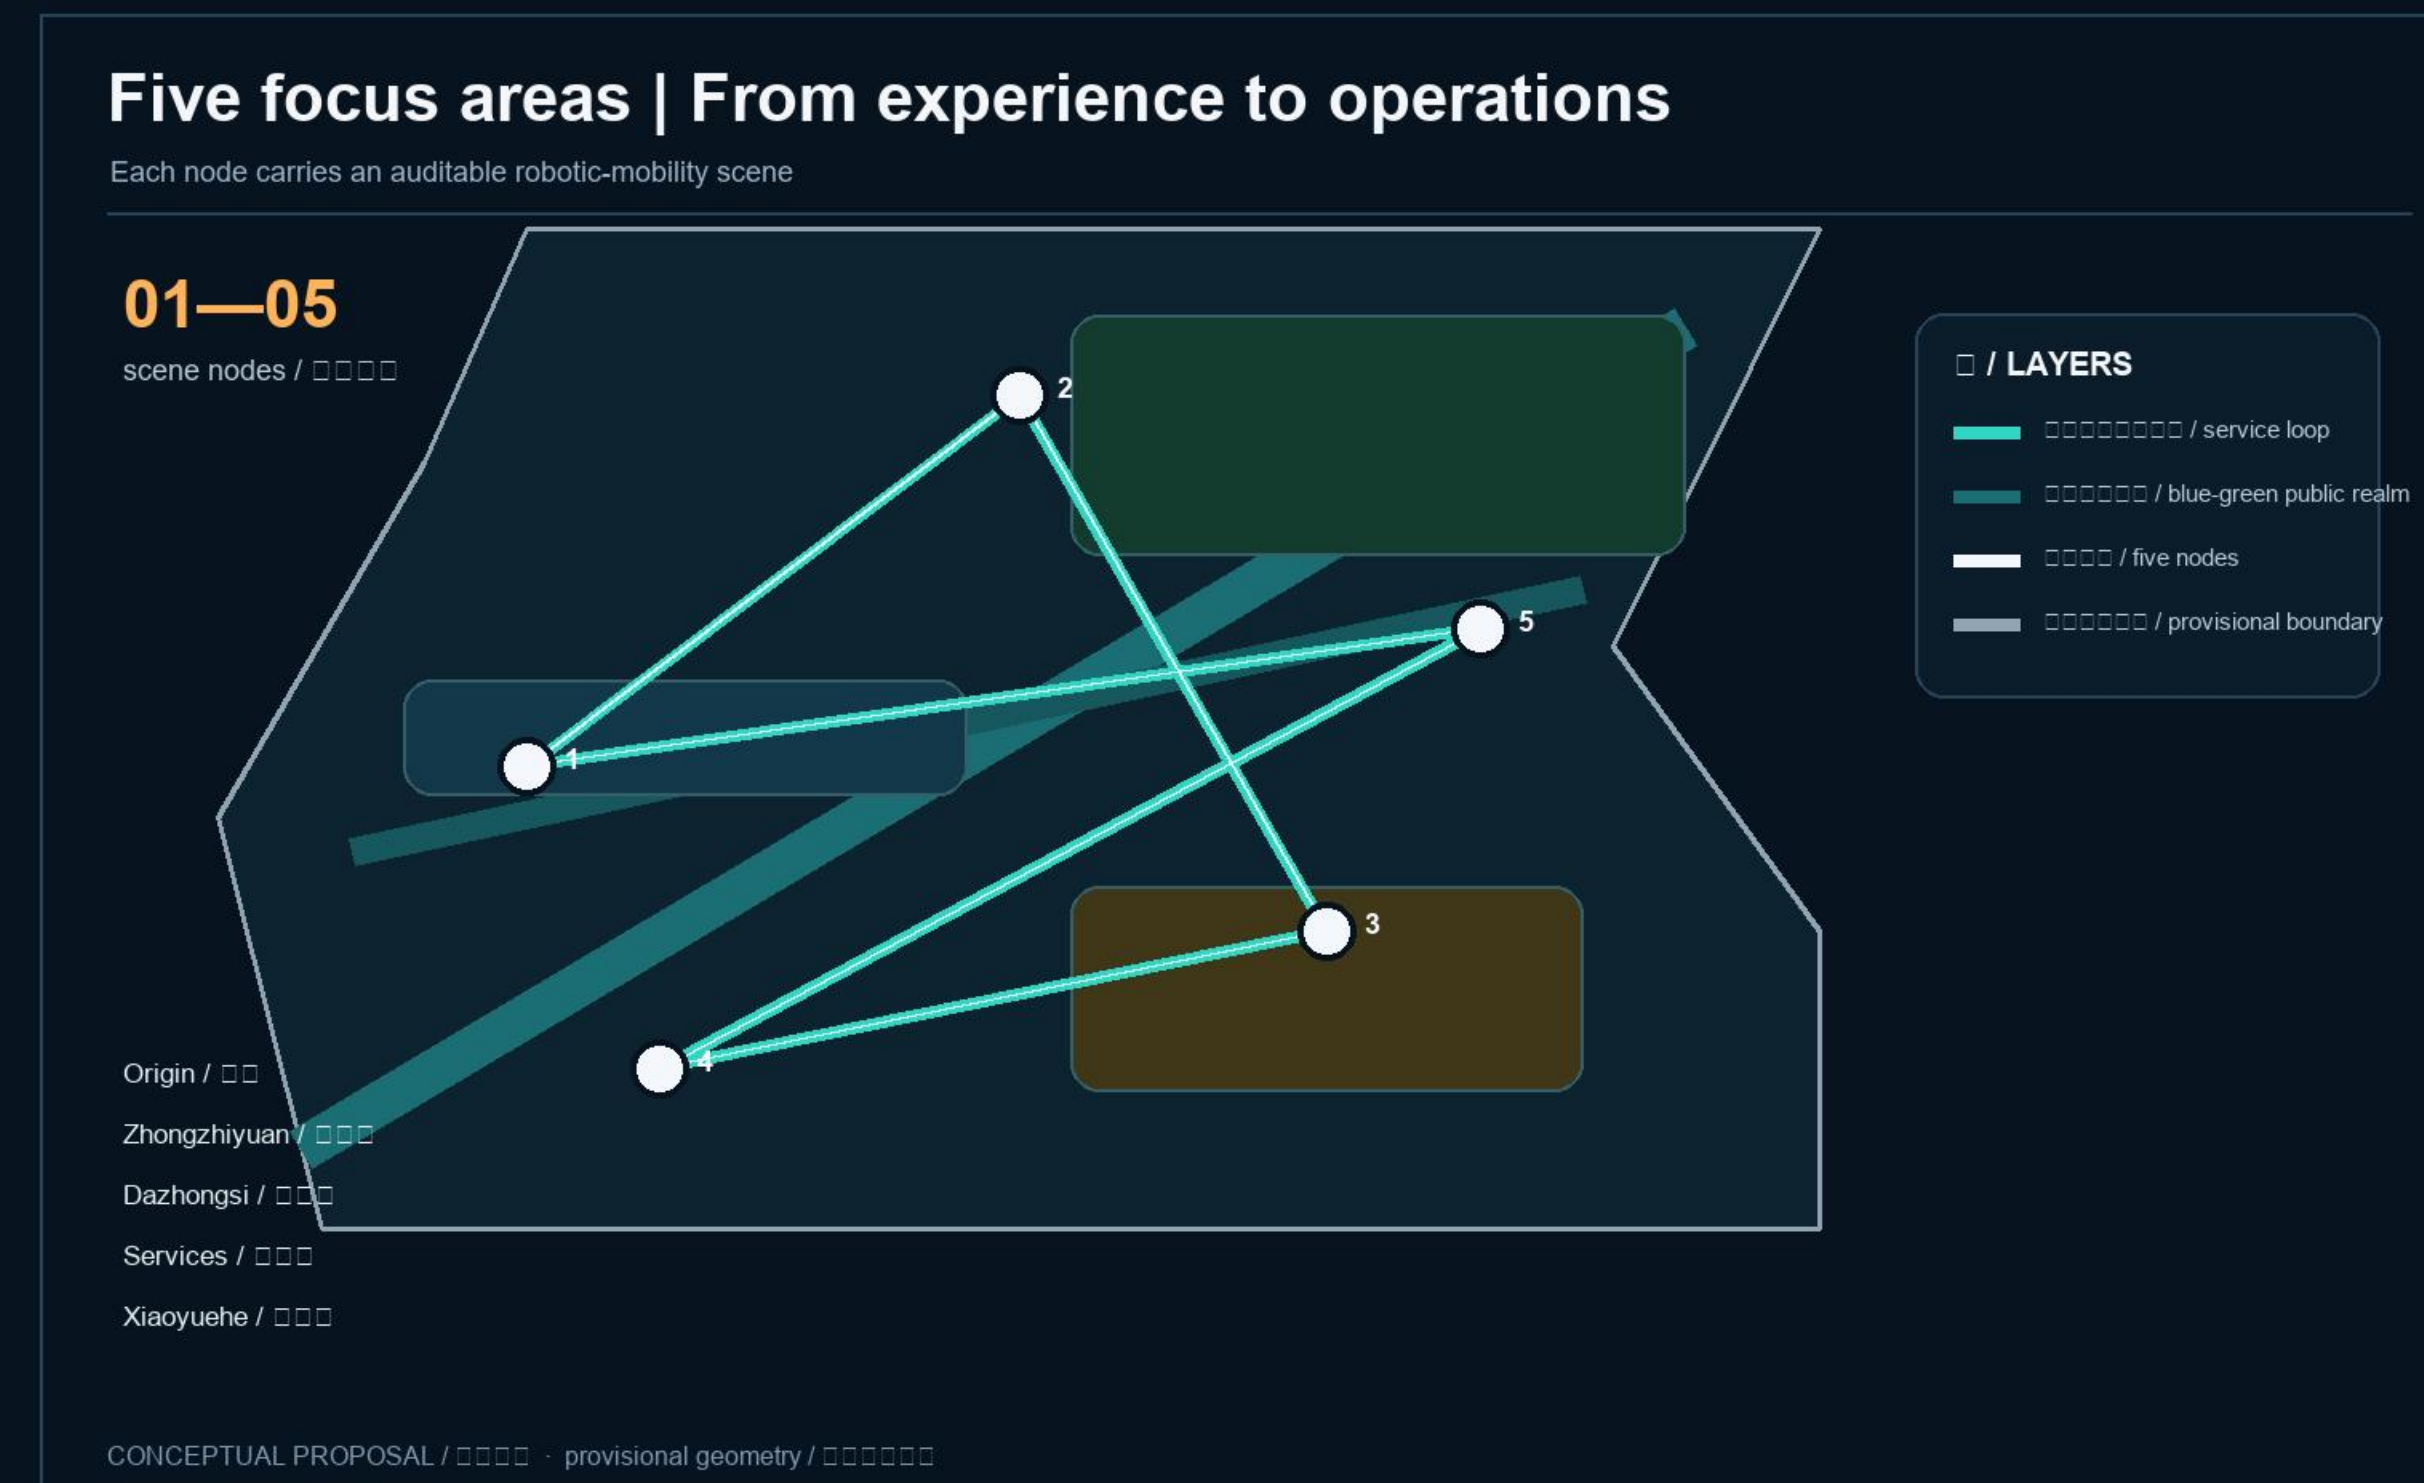

Walk first. Robots are bounded, low-speed and human-supervised. All spatial lines are conceptual and provisional.

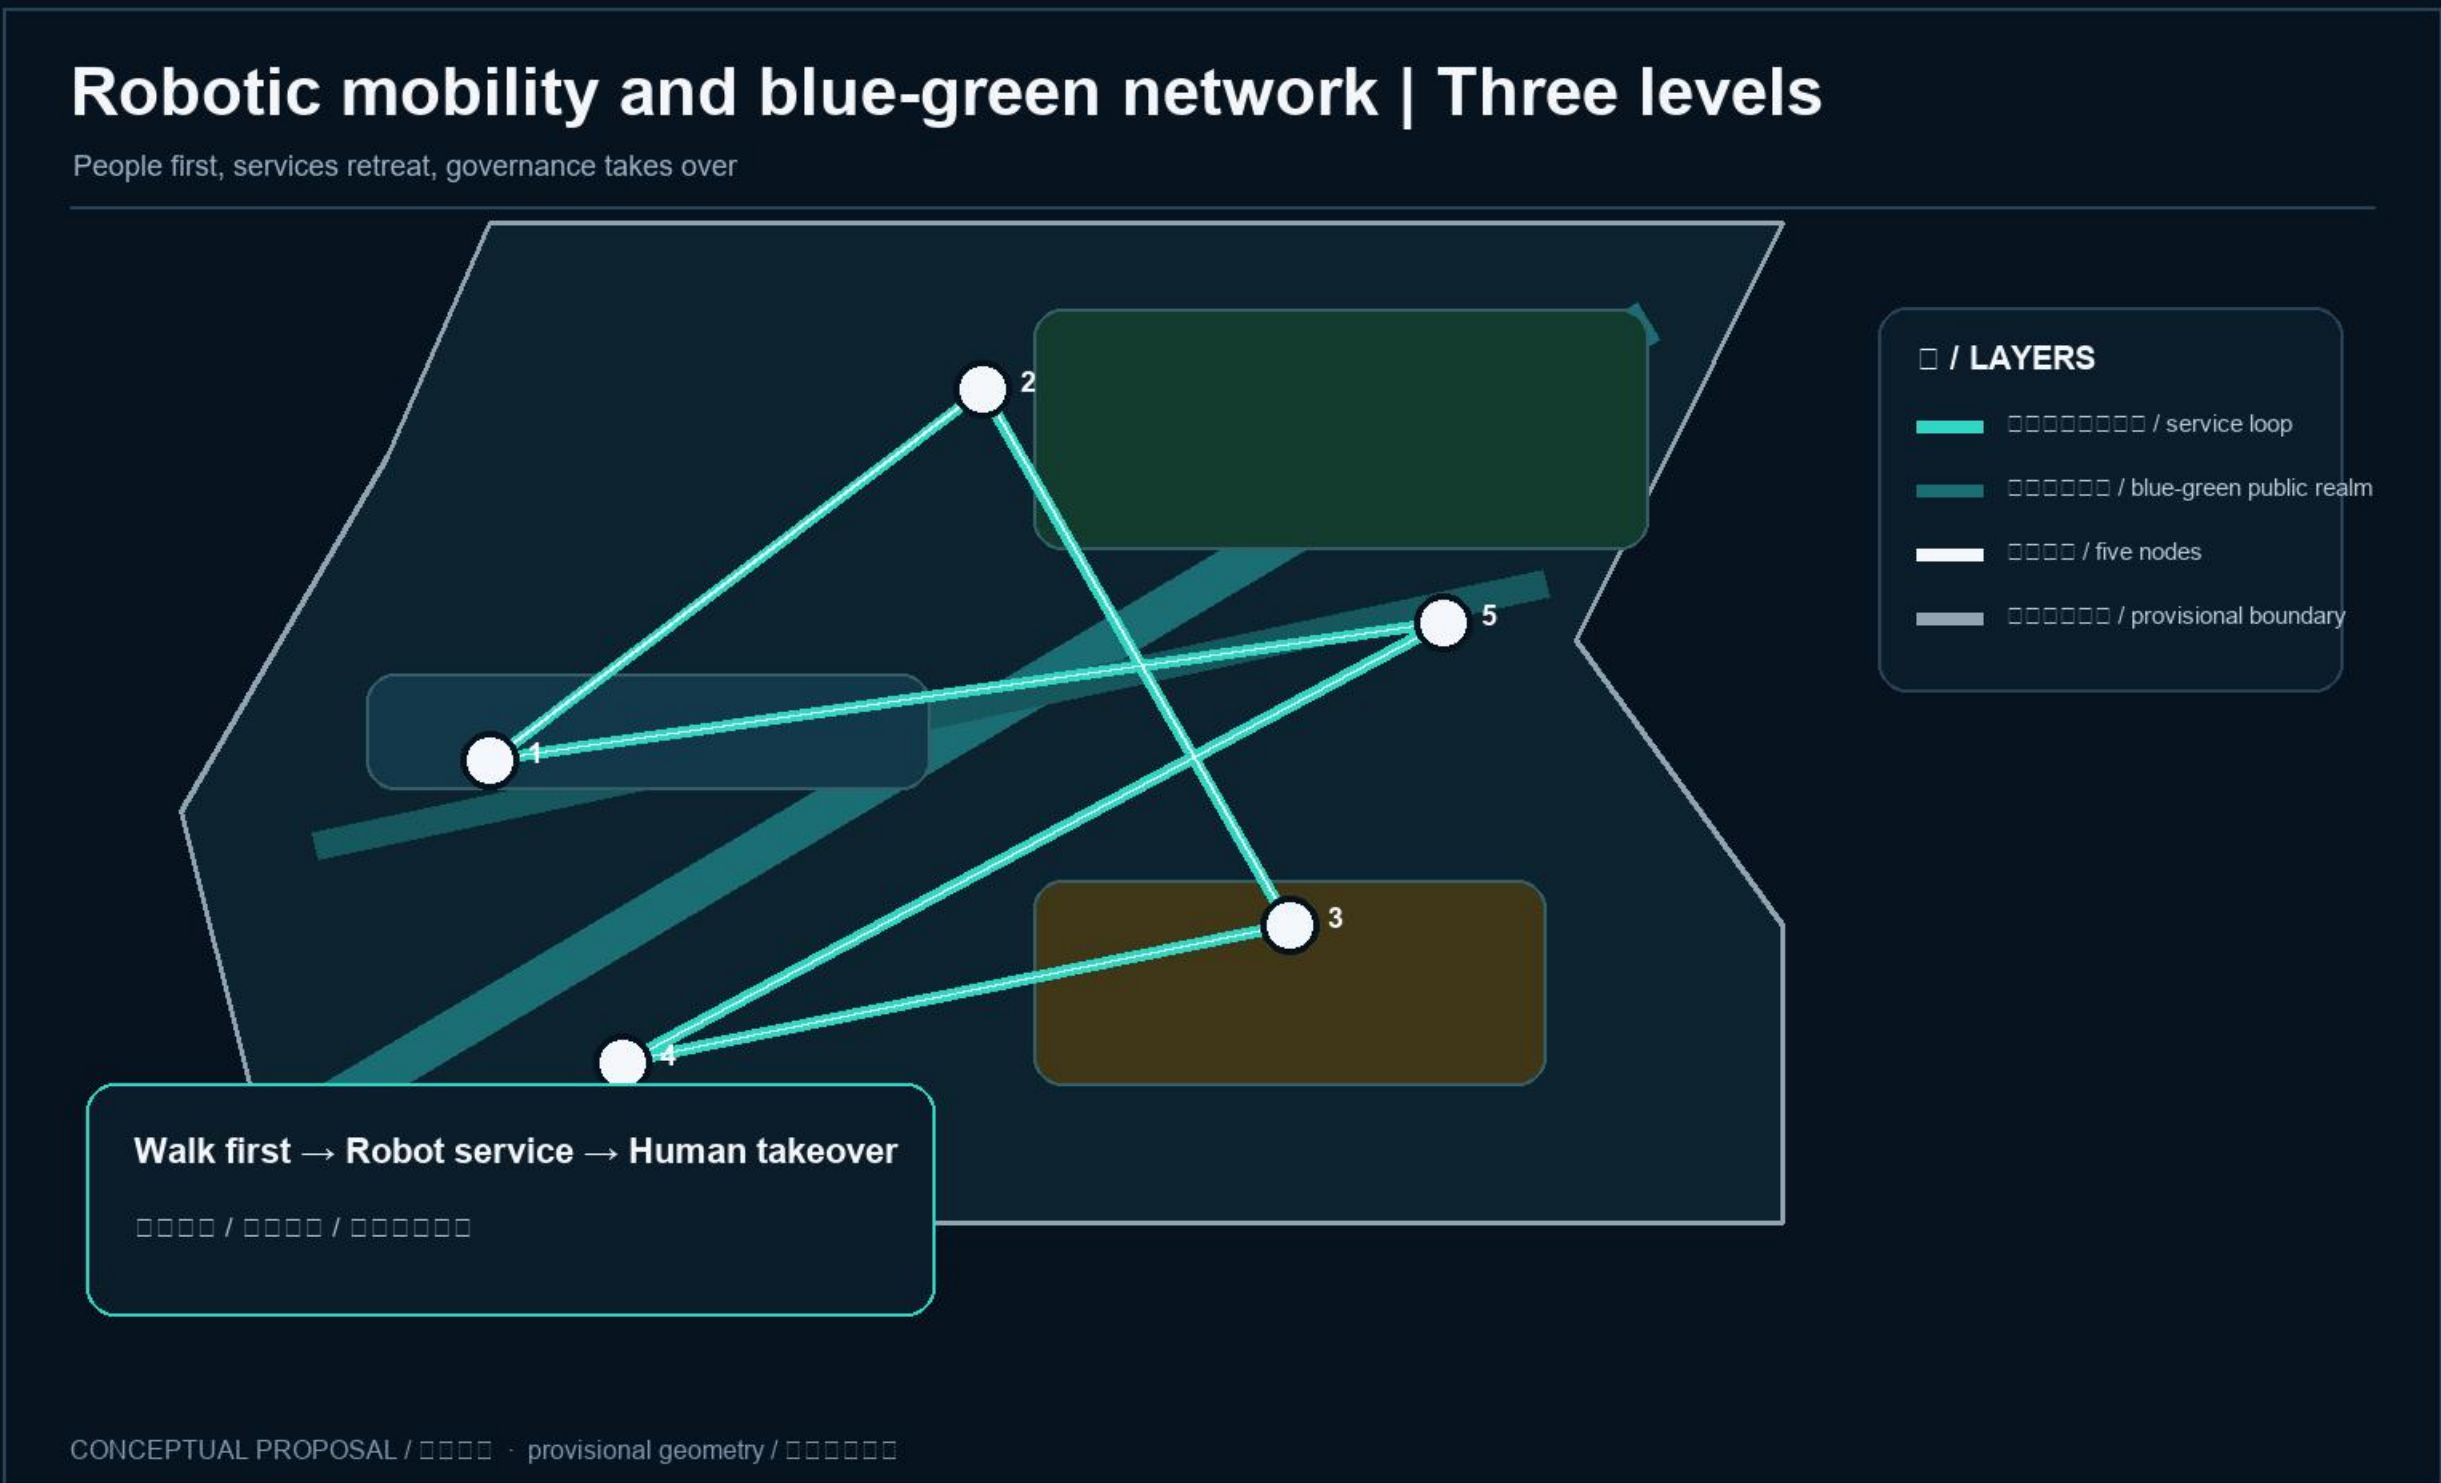

Jingzhang Intelligent Mobility Loop: A Walk-First Robotic Mobility Belt

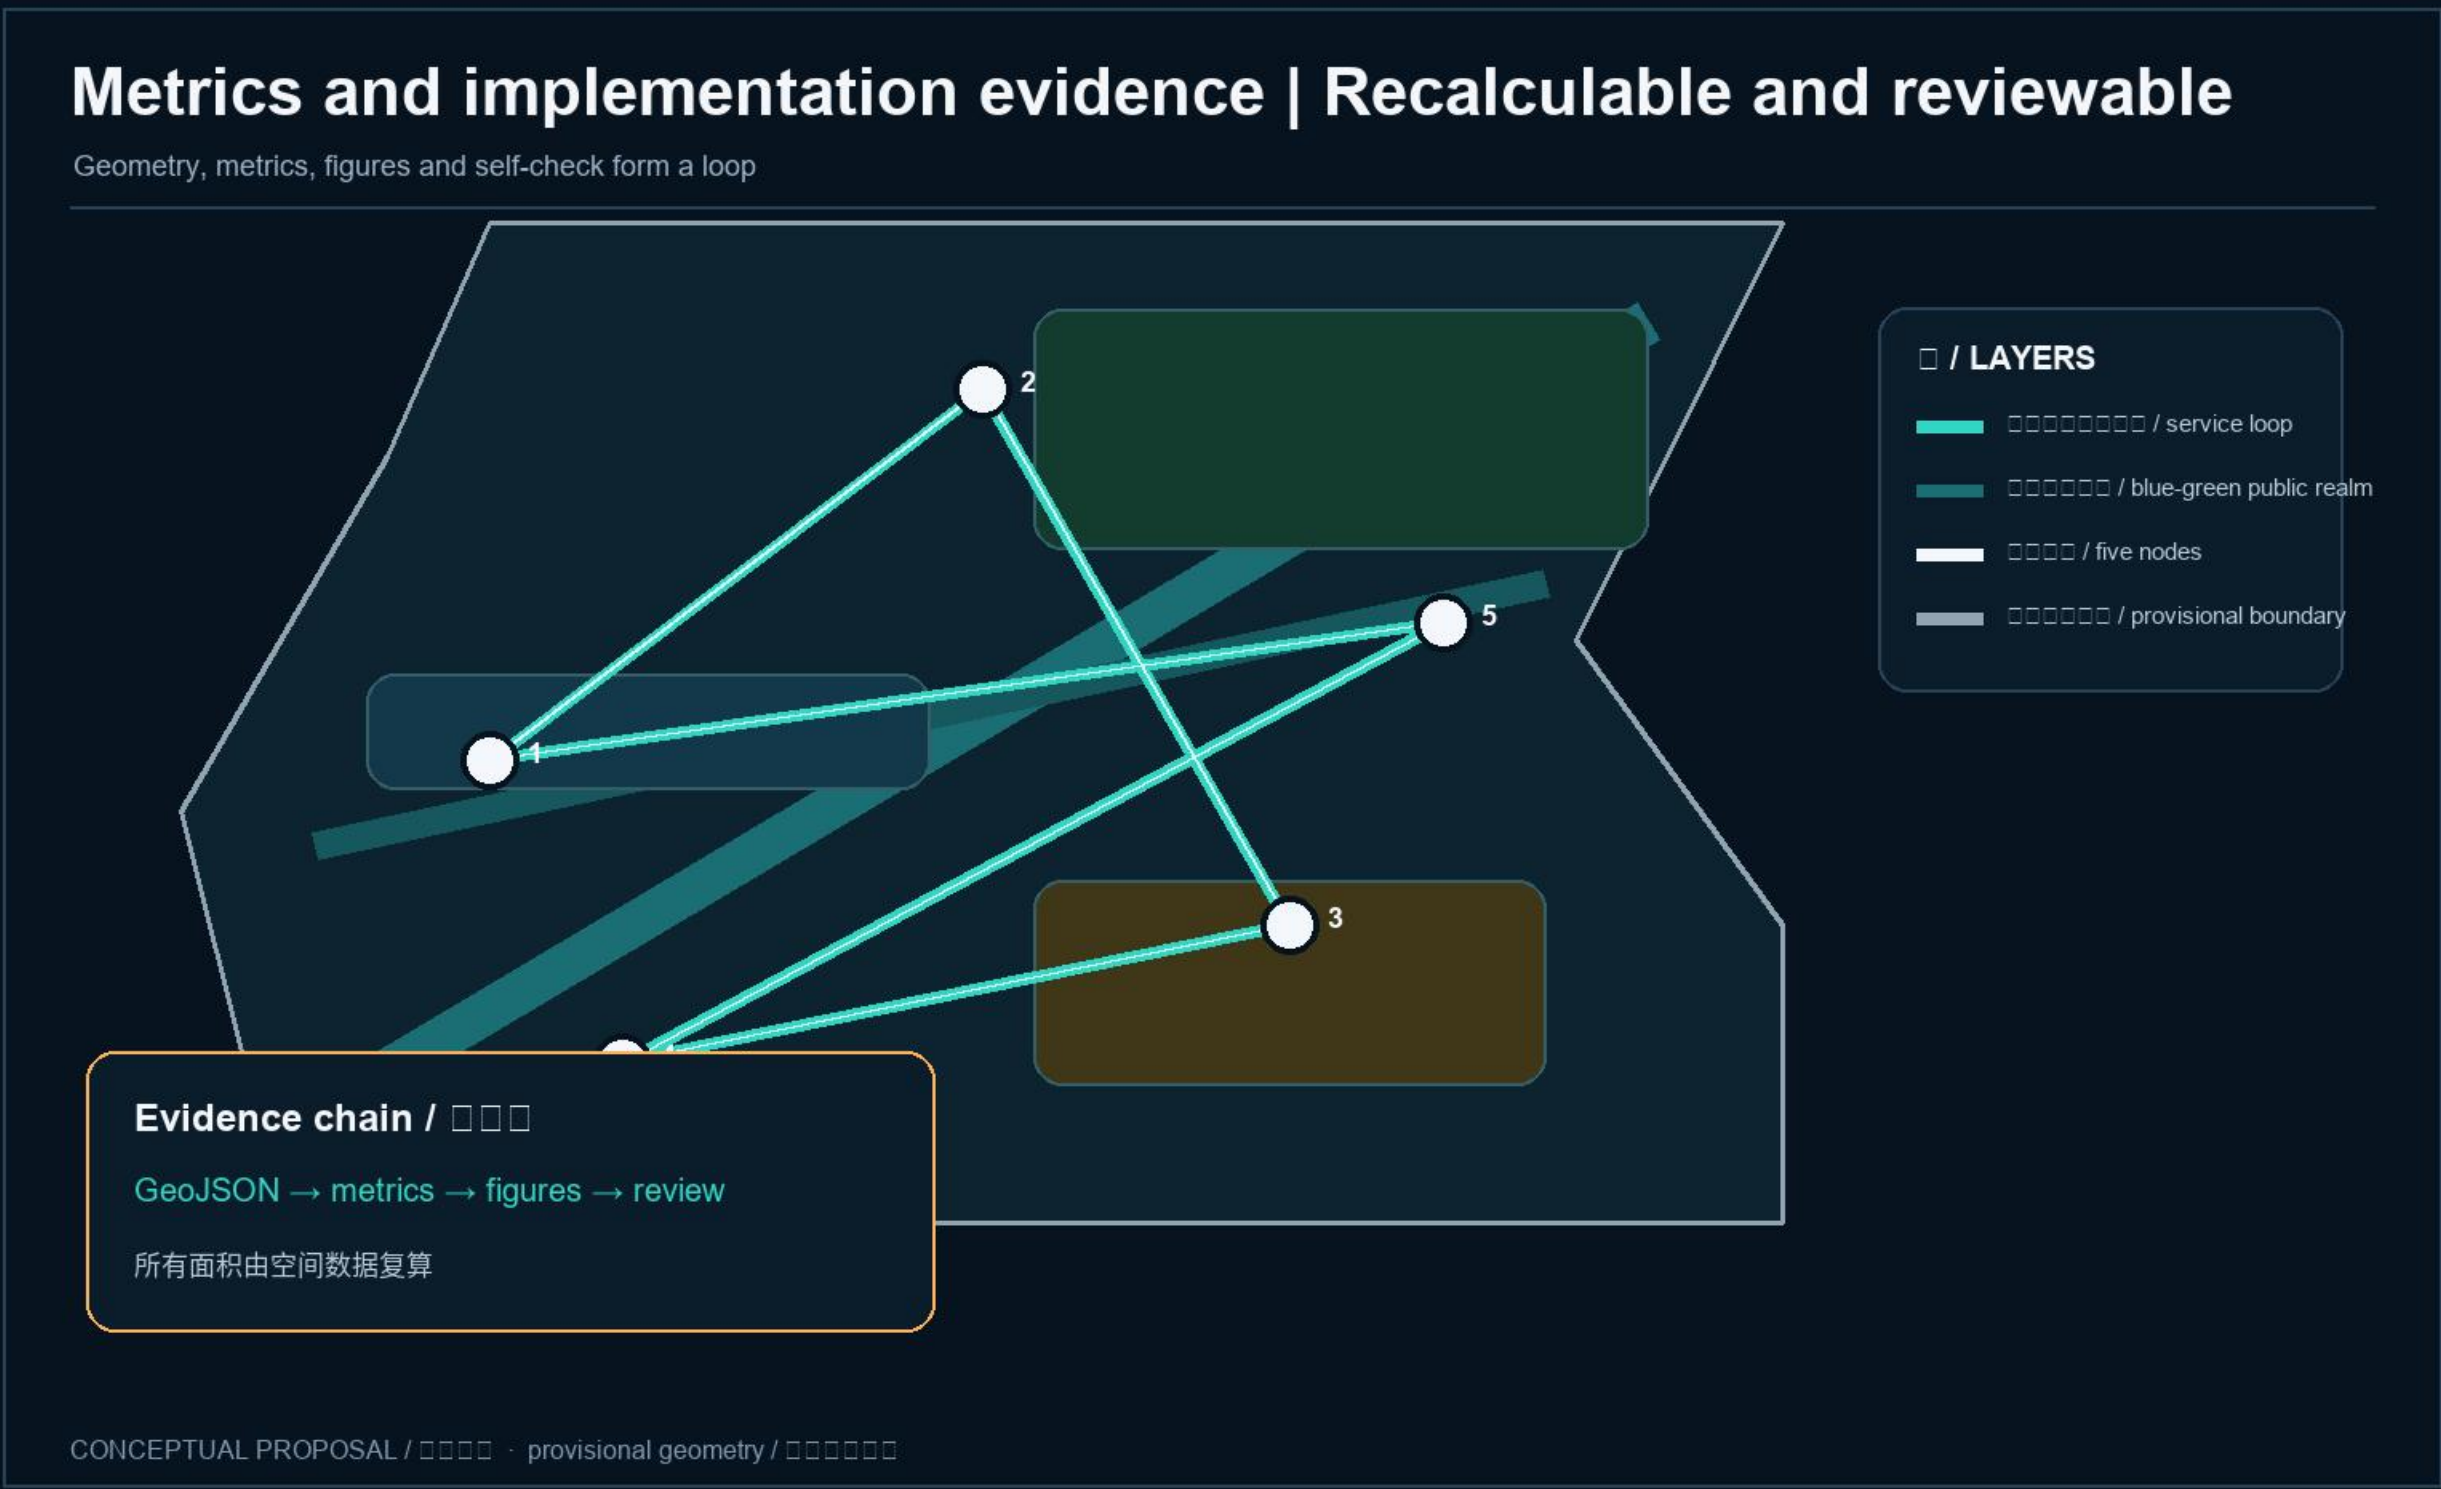

03 / Five focus areas

Walk first. Robots are bounded, low-speed and human-supervised. All spatial lines are conceptual and provisional.

Evidence is linked from GeoJSON to metrics, figures, matrices and self-check; no hand-entered area claim overrides the data.

Walk first. Robots are bounded, low-speed and human-supervised. All spatial lines are conceptual and provisional.
