

Jingzhang Intelligent Mobility Loop: A Walk-First Robotic Mobility Belt

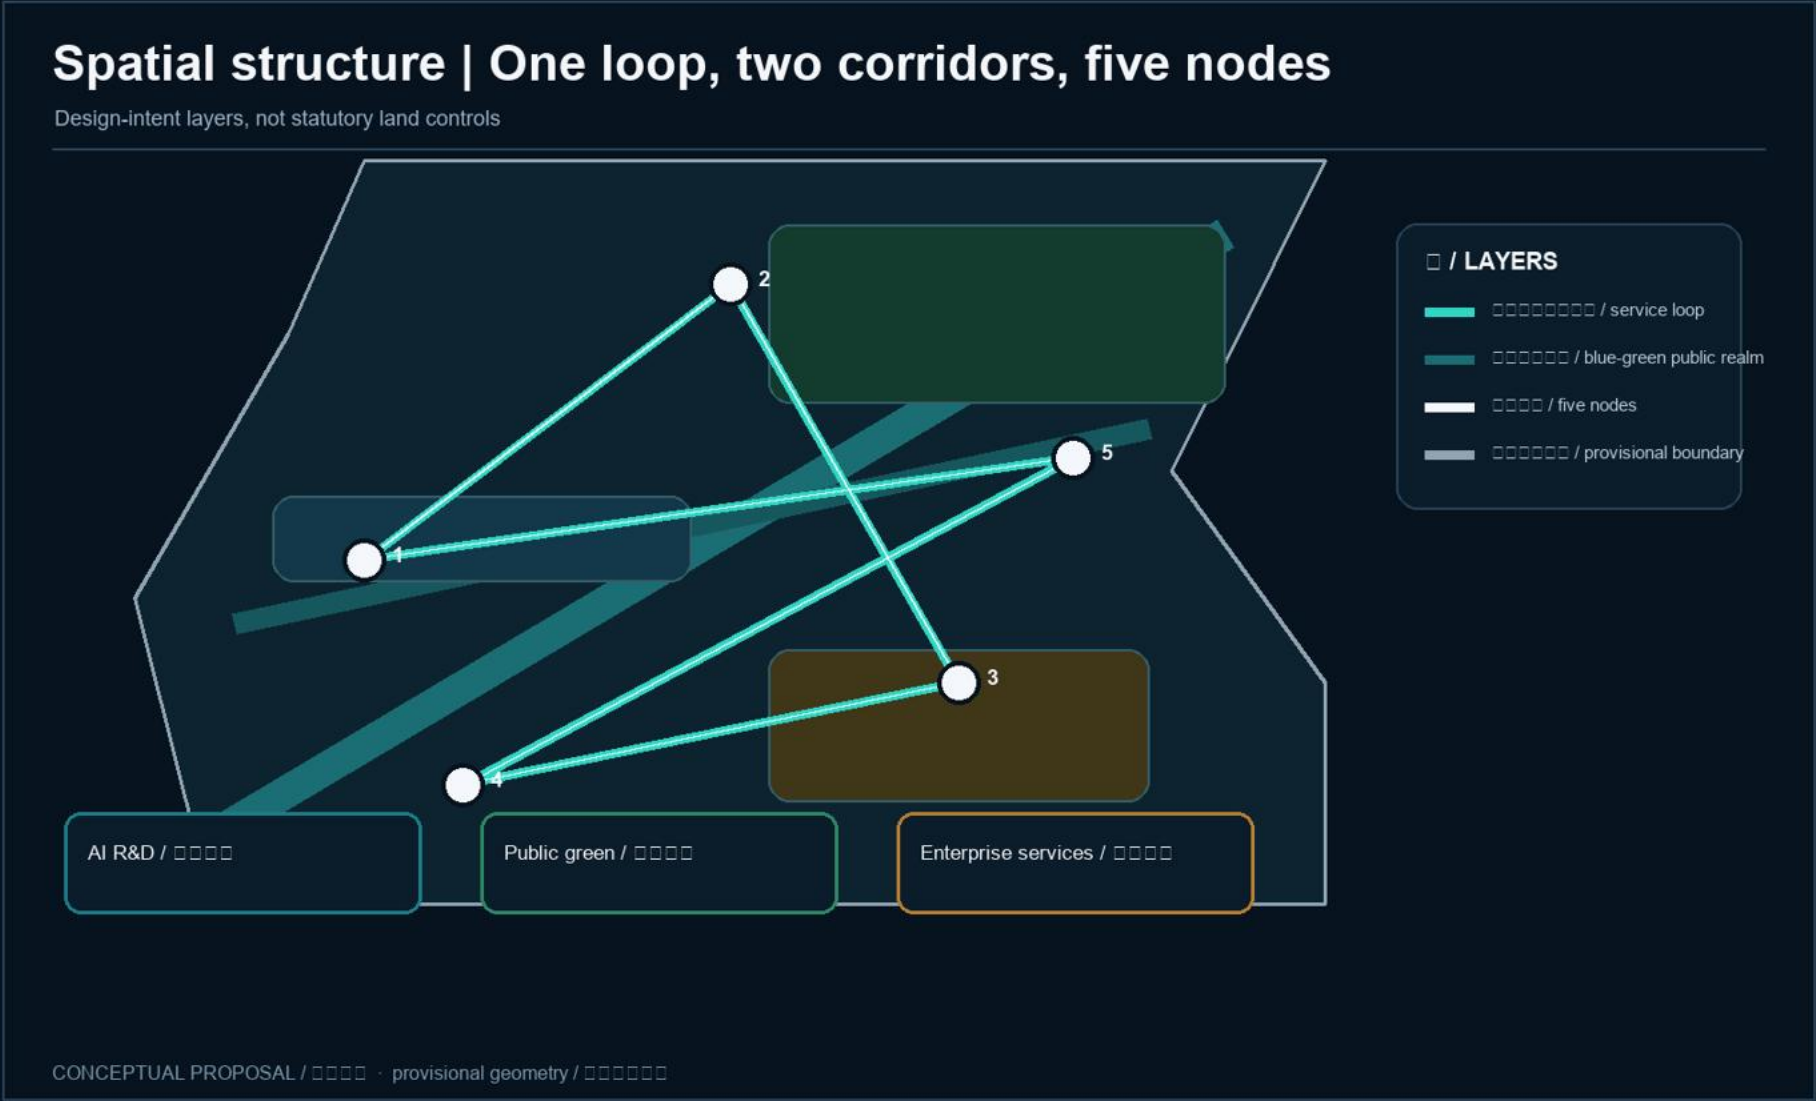

01 / Brief and evidence chain

Walk first. Robots are bounded, low-speed and human-supervised. All spatial lines are conceptual and provisional.

Jingzhang Intelligent Mobility Loop: A Walk-First Robotic Mobility Belt

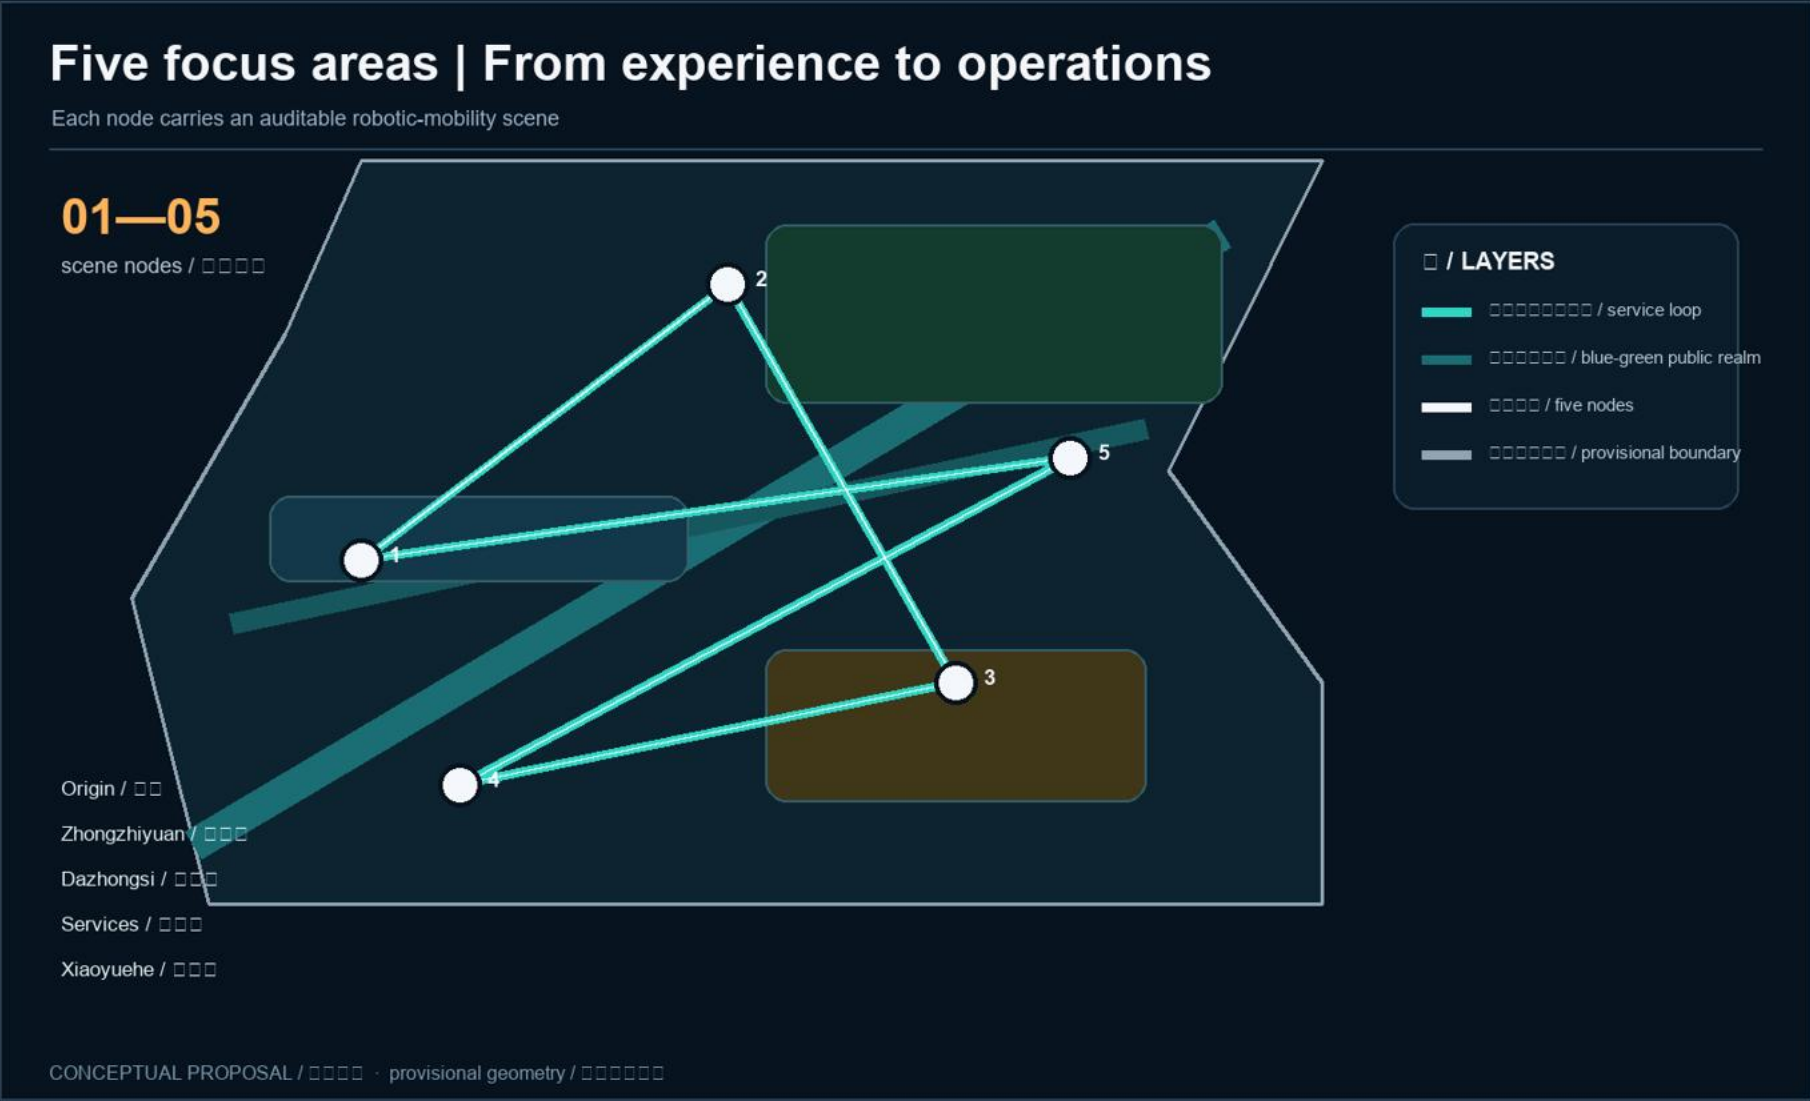

02 / Three-level spatial framework

Evidence is linked from GeoJSON to metrics, figures, matrices and self-check; no hand-entered area claim overrides the data.

Jingzhang Intelligent Mobility Loop: A Walk-First Robotic Mobility Belt

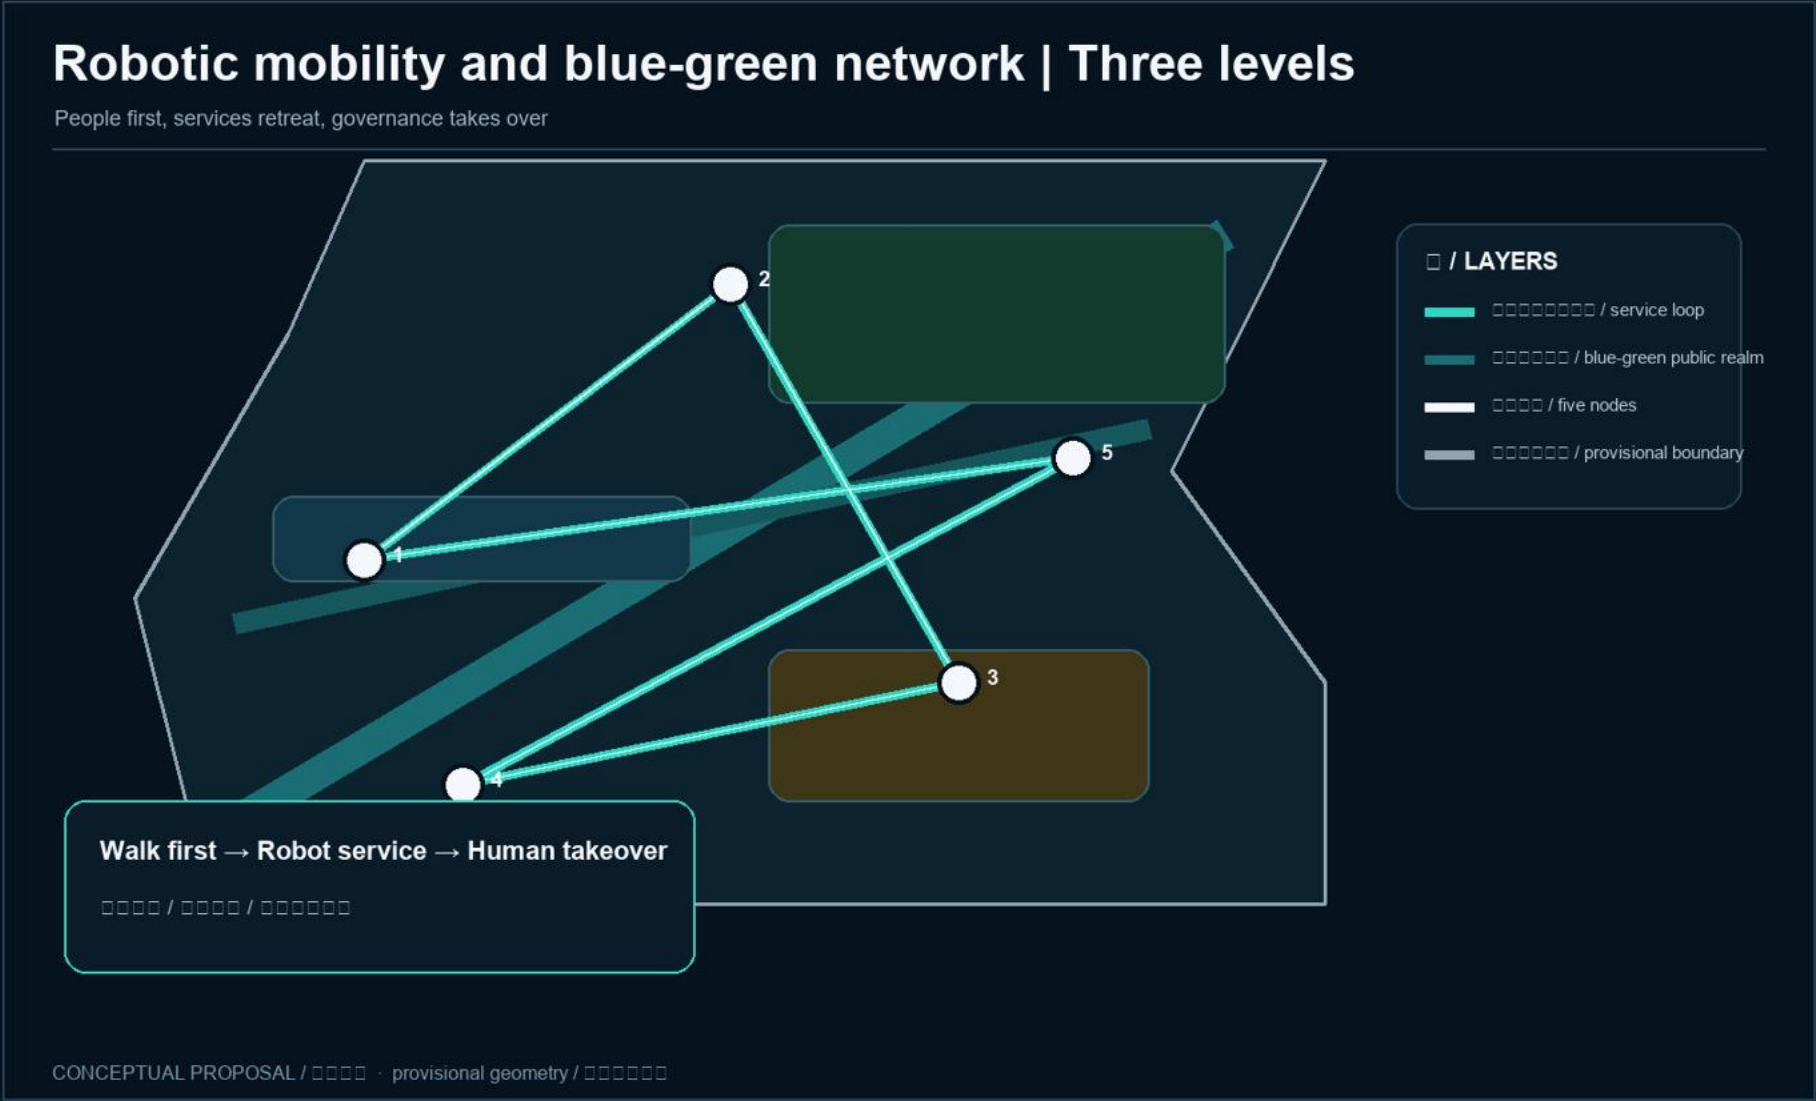

03 / Five focus areas

Walk first. Robots are bounded, low-speed and human-supervised. All spatial lines are conceptual and provisional.

Jingzhang Intelligent Mobility Loop: A Walk-First Robotic Mobility Belt

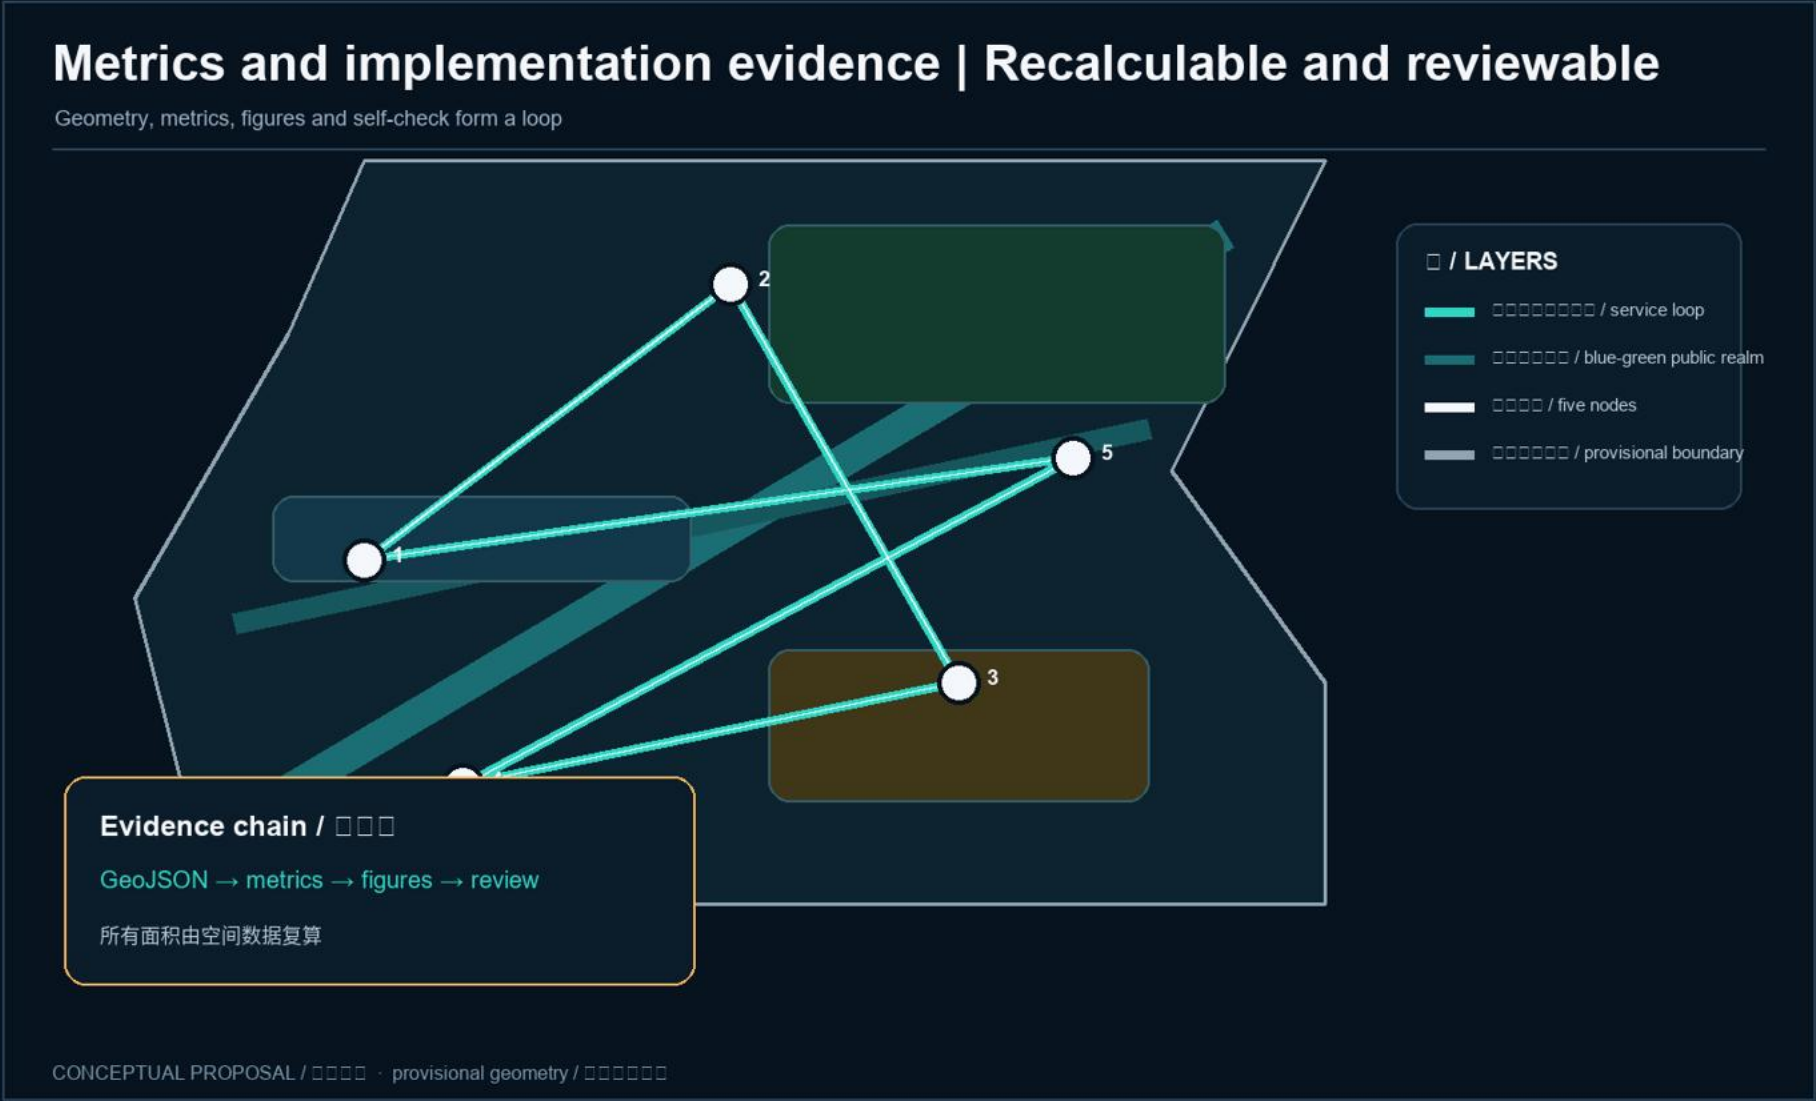

04 / Robotic operation and governance

Evidence is linked from GeoJSON to metrics, figures, matrices and self-check; no hand-entered area claim overrides the data.

Jingzhang Intelligent Mobility Loop: A Walk-First Robotic Mobility Belt

05 / Phasing, metrics and risks

Walk first. Robots are bounded, low-speed and human-supervised. All spatial lines are conceptual and provisional.
