

THE JING-ZHANG SWITCHBACK

UP THE GRADE — THE CITY UPGRADES ITSELF

Innovation Gradient Protocol: supply space by grade, shift gears at switchback nodes, govern by grade signals

THE JING-ZHANG SWITCHBACK

The Innovation Gradient Protocol: translating a century of ramp wisdom into an urban design mechanism

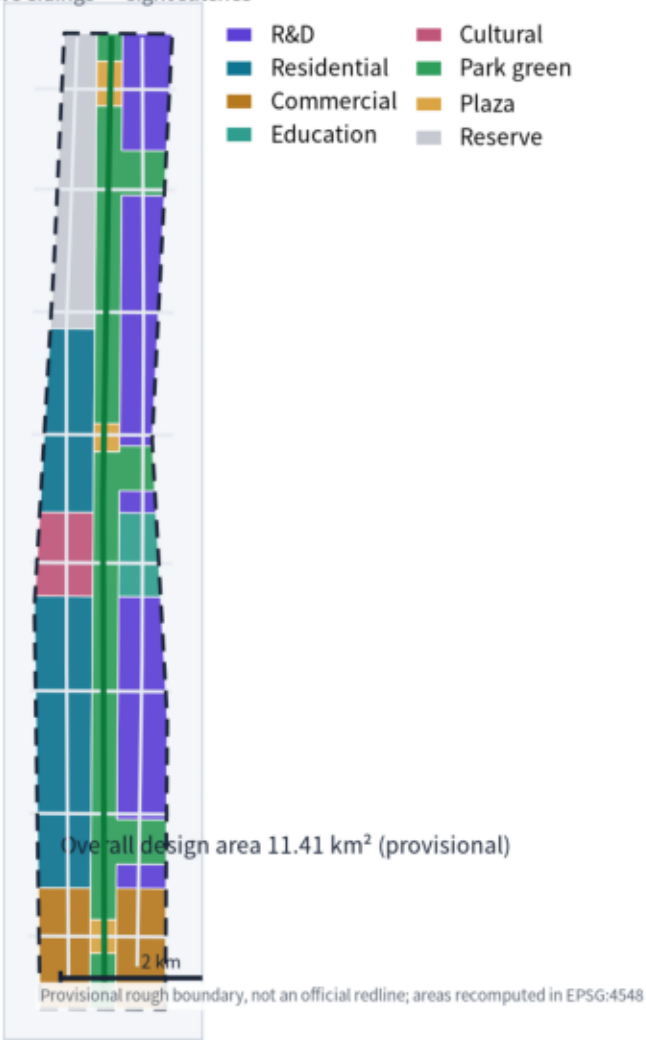

- G** Innovation has a gradient
Supply space, services and governance by grade; every climb gets a matching ramp
- S** Change stages, don't crash
Stage changes shift gears at transfer nodes: legal, finance, testing, exhibition, talent
- S** The steeper, the denser the guardrail
Higher grade, denser guardrails; speeding auto-downgrades; safety sidings pause, roll back, hand over

Land-use Structure & Spatial Framework

One main line • three grade bands • three nodes • two sidings • eight stitches

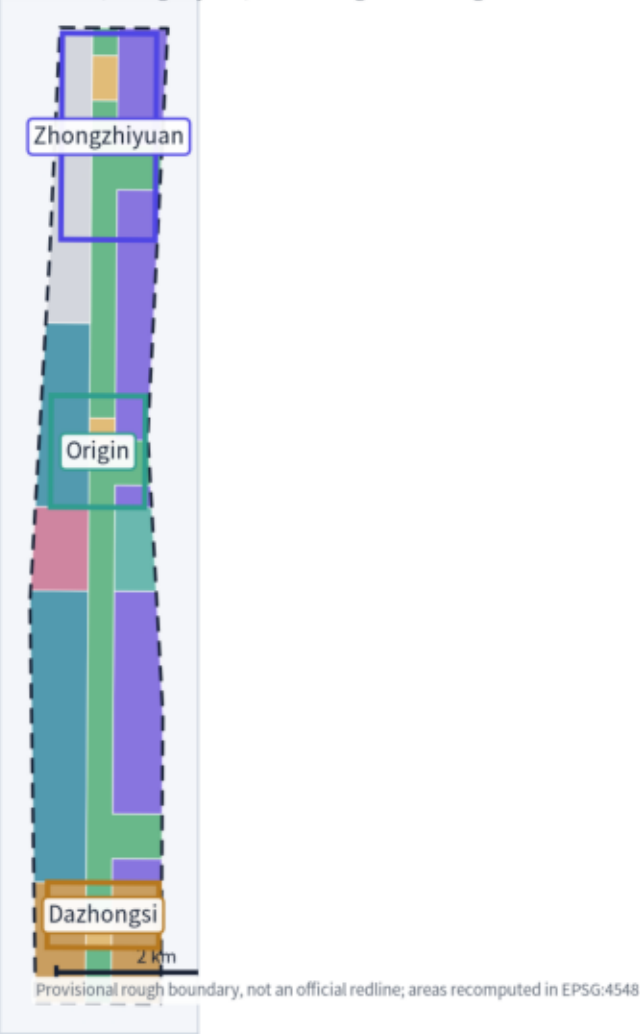

Spatial framework

Source: submissions/xiaopi668/jingzhang-grade-line geometry + metrics

Key Detailed-Design Areas

Applied (Dazhongsi) • Research (Origin) • Acceleration (Zhongzhiyuan) — climbing north along the main line

Dazhongsi AI Industry Cluster

Applied Grade-0 | 72.0 ha (announced)

Scenario-native • scenario supermarket • stele

Beijing AI Origin Community

Research Grade-1 | 104.3 ha (announced)

Open source • paper-to-product • residency

Zhongzhiyuan AI Acceleration Area

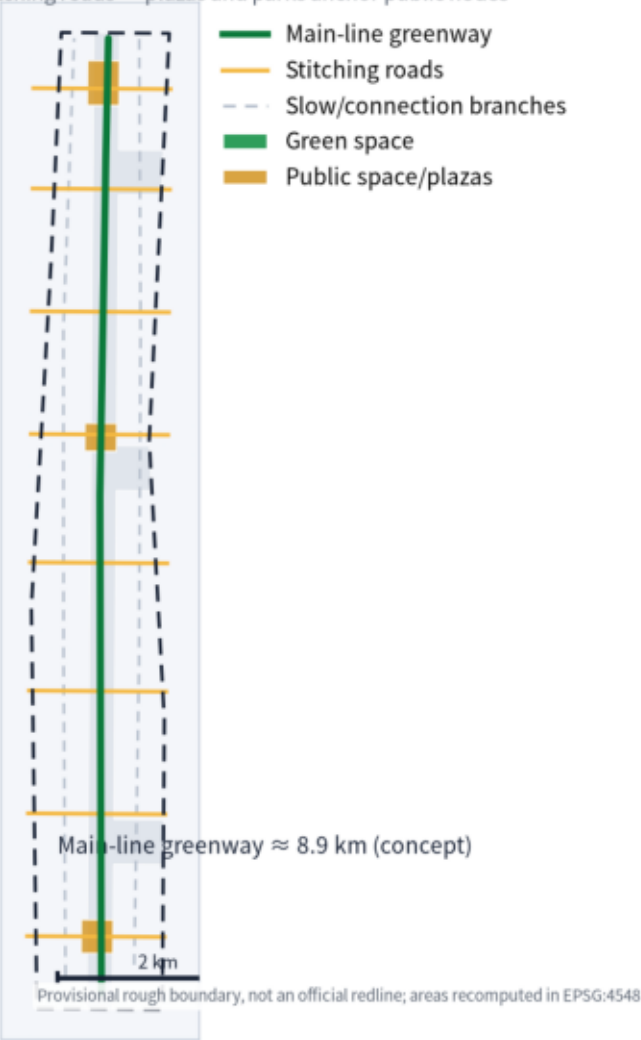

Acceleration Grade-2 | 192.1 ha (announced)

Full-stack • governance sandbox • verification

Source: submissions/xiaopi668/jingzhang-grade-line geometry + metrics

Mobility & Blue-Green Public Space System

Main-line greenway links grade bands • 8 east-west stitching roads • plazas and parks anchor public nodes

8

Stitching roads

8.9 km

Main-line greenway (concept)

3

Switchback plazas

3

Switchback parks

2

Station connections

Core Metrics & Evidence Chain

All area metrics recomputed from submitted GeoJSON in EPSG:4548; unknown metrics carry recompute triggers

Source: submissions/xiaopi668/jingzhang-grade-line geometry + metrics

边界声明 / Boundary Statement

Concept proposal for open co-creation; not a statutory plan and not a government conclusion. All space is based on provisional boundaries; areas recomputed in EPSG:4548 and recalculated after official data release. Sources and rights in sources.json & report/copyright_statement.md.
