

BOARD 1 · OVERALL DESIGN STRUCTURE

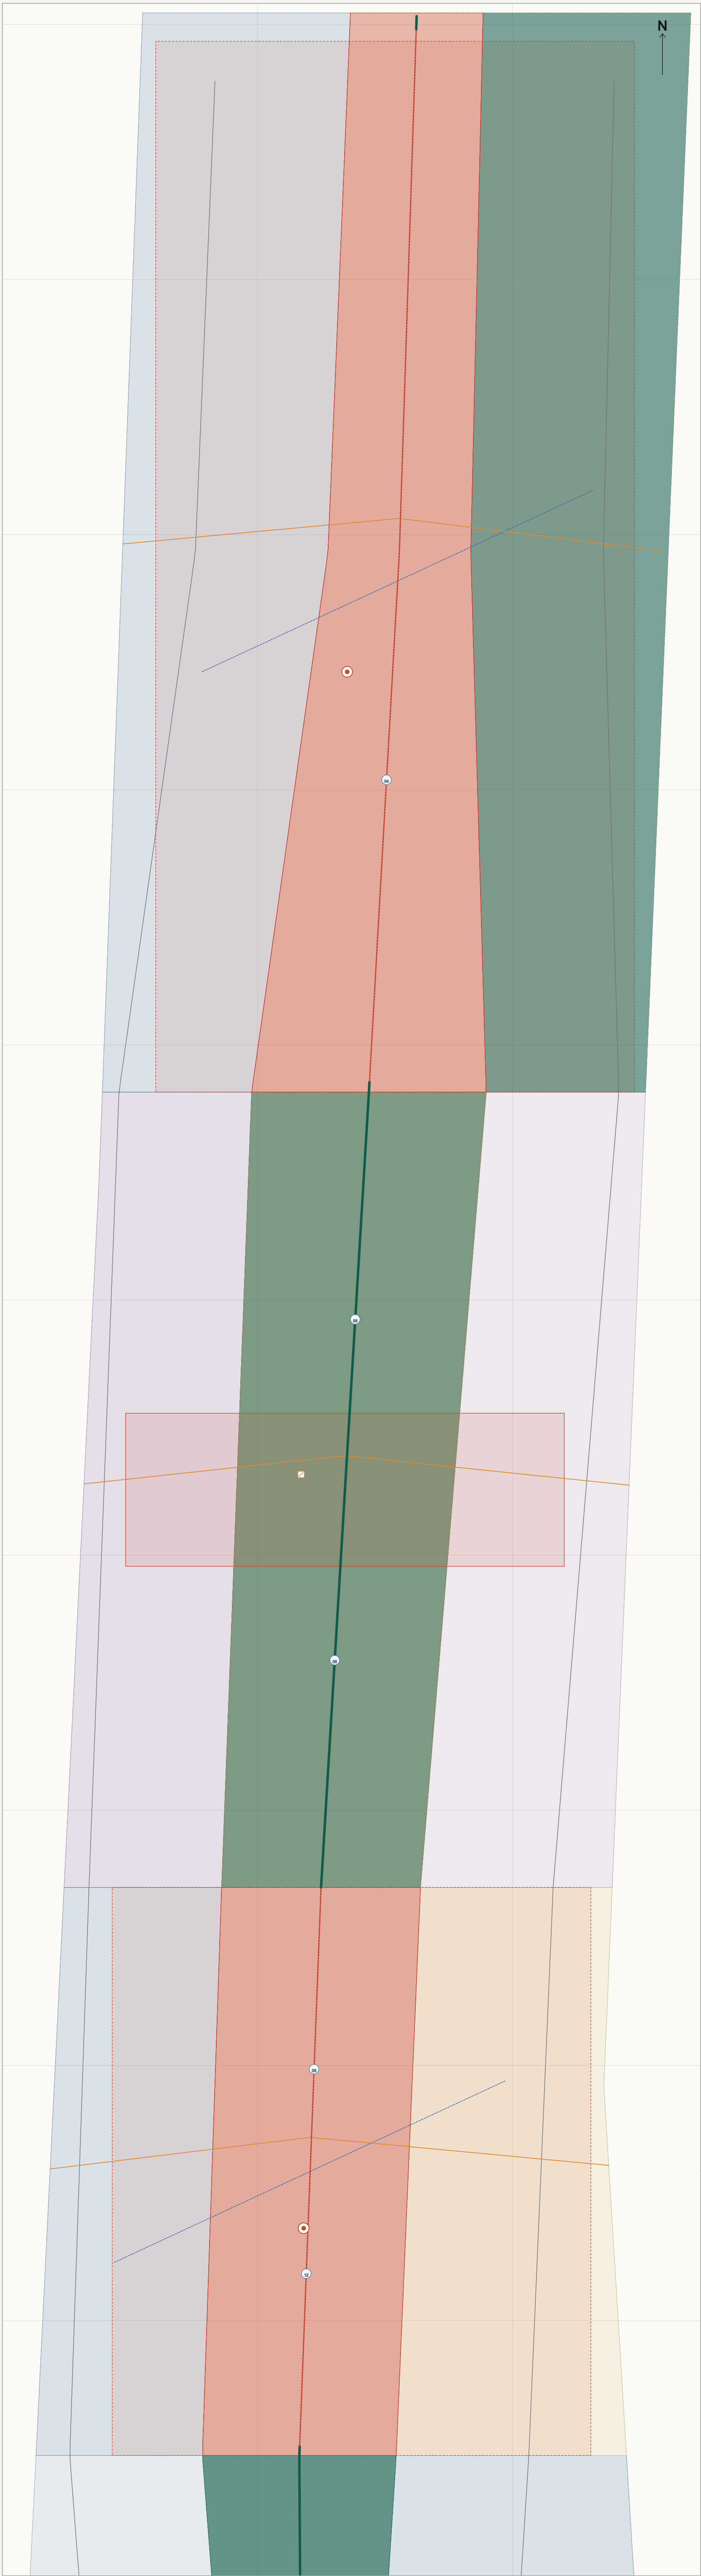

Design structure

总体设计结构

Token block system today: a continuously run urban AI open test main line, bookable by token segment, breaking into stations at the three key areas, with two switches feeding both sides in.

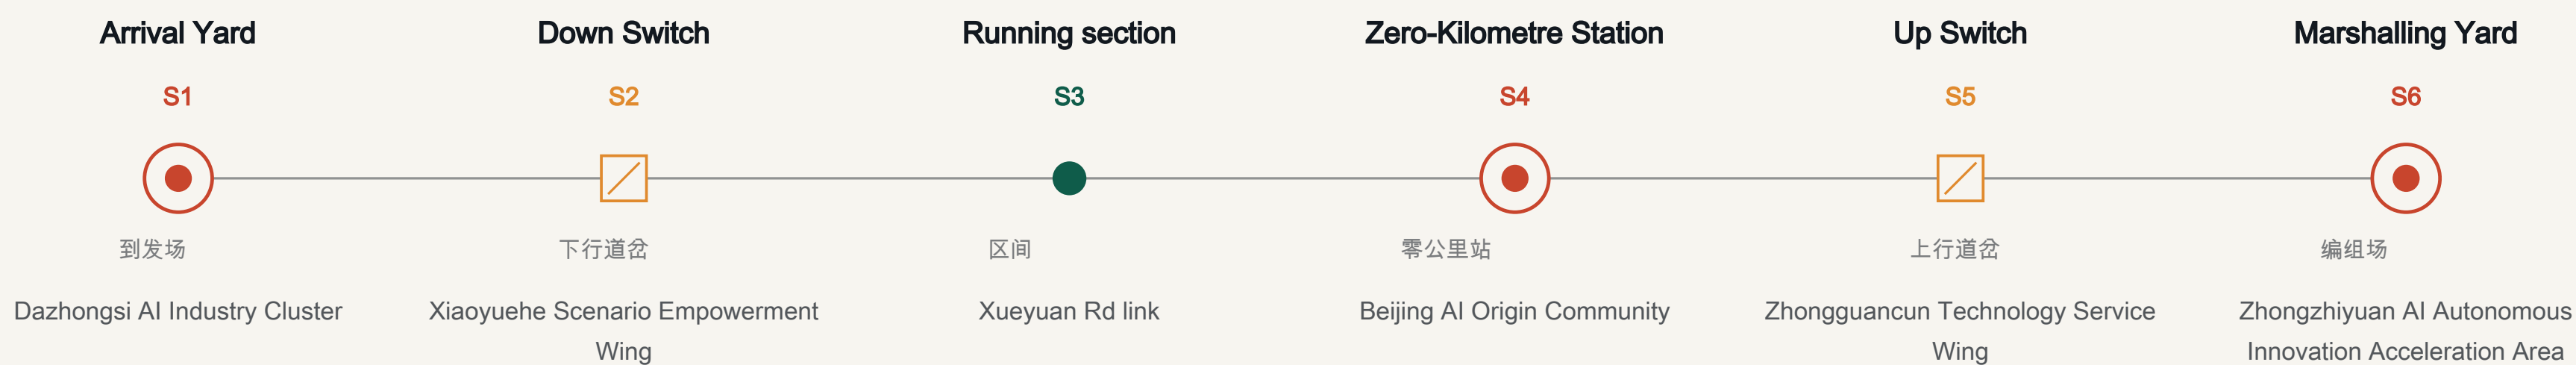

South S1-S3

North S4-S6

c. 1:6,000
0 200 m

3 stations · 2 switches · S→N 三站两岔，自南向北

Reading it

The main line runs south-north along the heritage park: slow-mobility spine and carrier of the open test track. It breaks at the three key areas — the line handed to the city: platform plazas carry arrival, release and display; two switches carry east-west stitch and scenario access.

S1 Arrival Yard 到发场 Dazhongsi AI Industry Cluster Announced 72.0 ha recomputed 72.0 ha
S2 Down Switch 下行道岔 Xiaoyuehe Scenario Empowerment Wing

- Main line (cont.)

— Open segments at stations

■ Platform plaza / key area

■ Switch plazas & stitches

■ Jing-Zhang heritage park green

● Scenario node SCEN-01...12

— Branch loop

— Provisional rough boundary

Five functions & how it runs

- Origination, open work: Zero-Kilometre Station carries release and code display; plaza opens to the city.
- Engineering & standards: Marshalling Yard opens full-stack innovation, safety evaluation and standards work.
- Industry and global exchange: Arrival Yard serves smart devices, content, data assets and roadshows.
- Scenario empowerment, living services: two switches feed communities, campuses and parks into the line.
- Public experience and outreach: the bookable segments carry the open test and event route.

Notes for further study

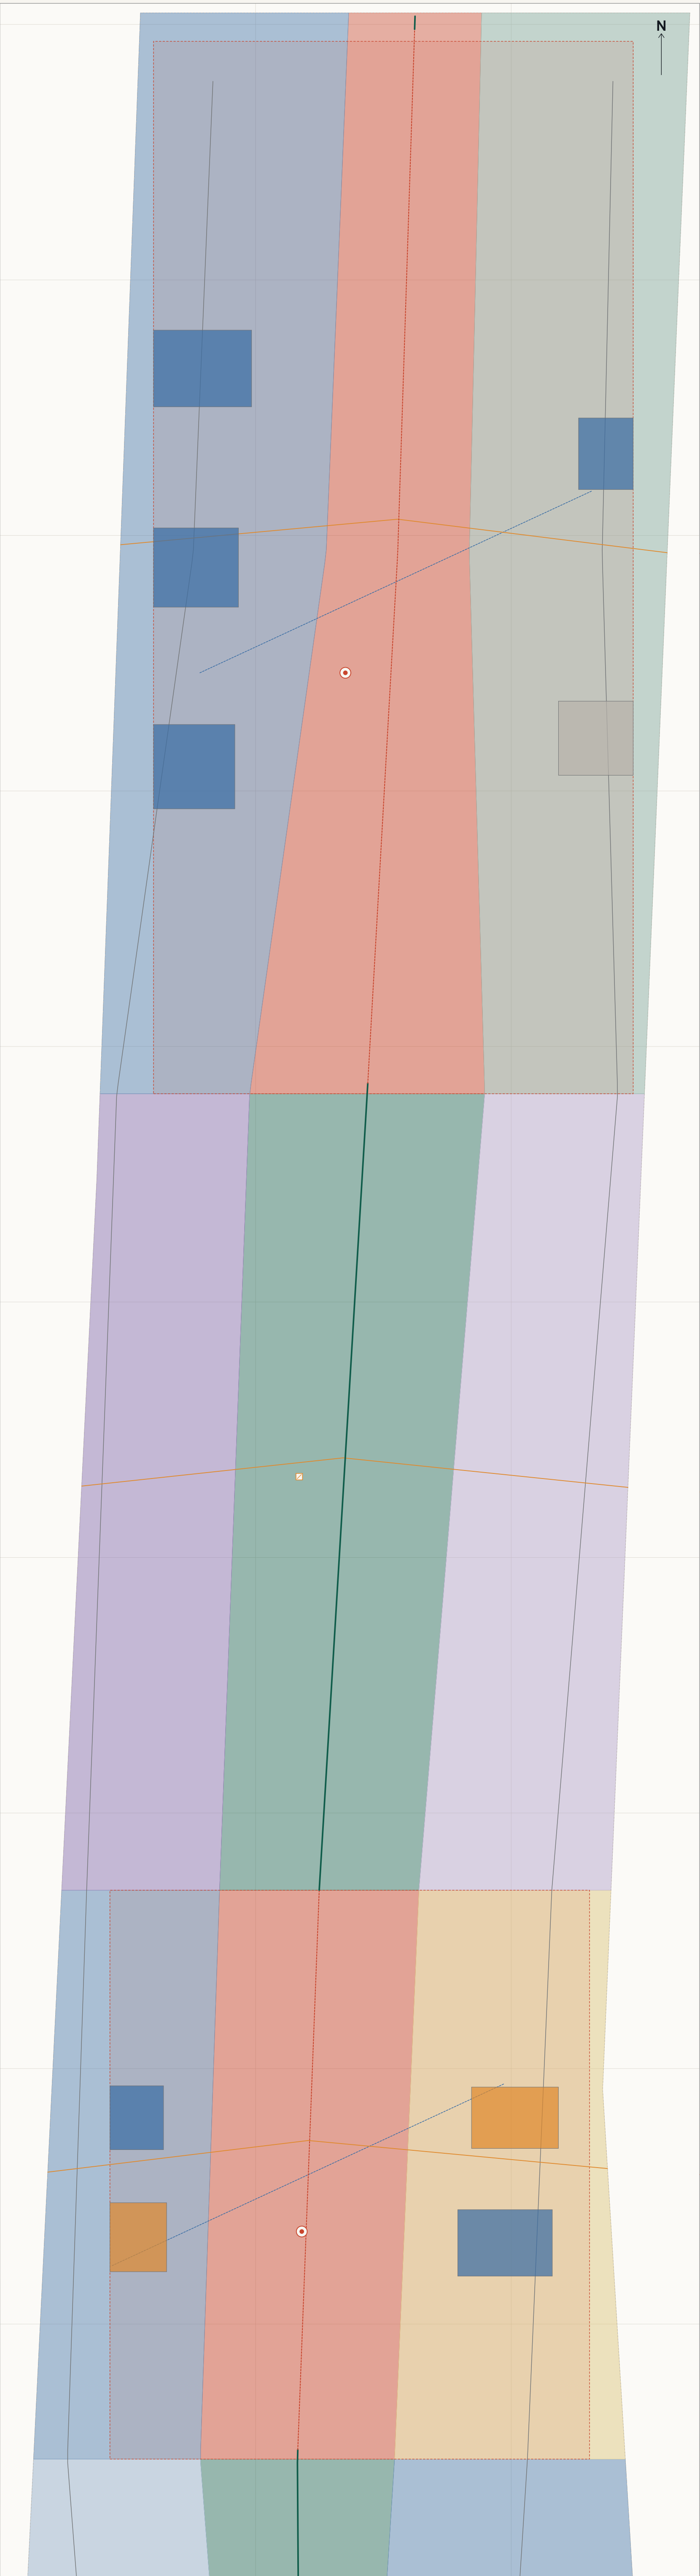

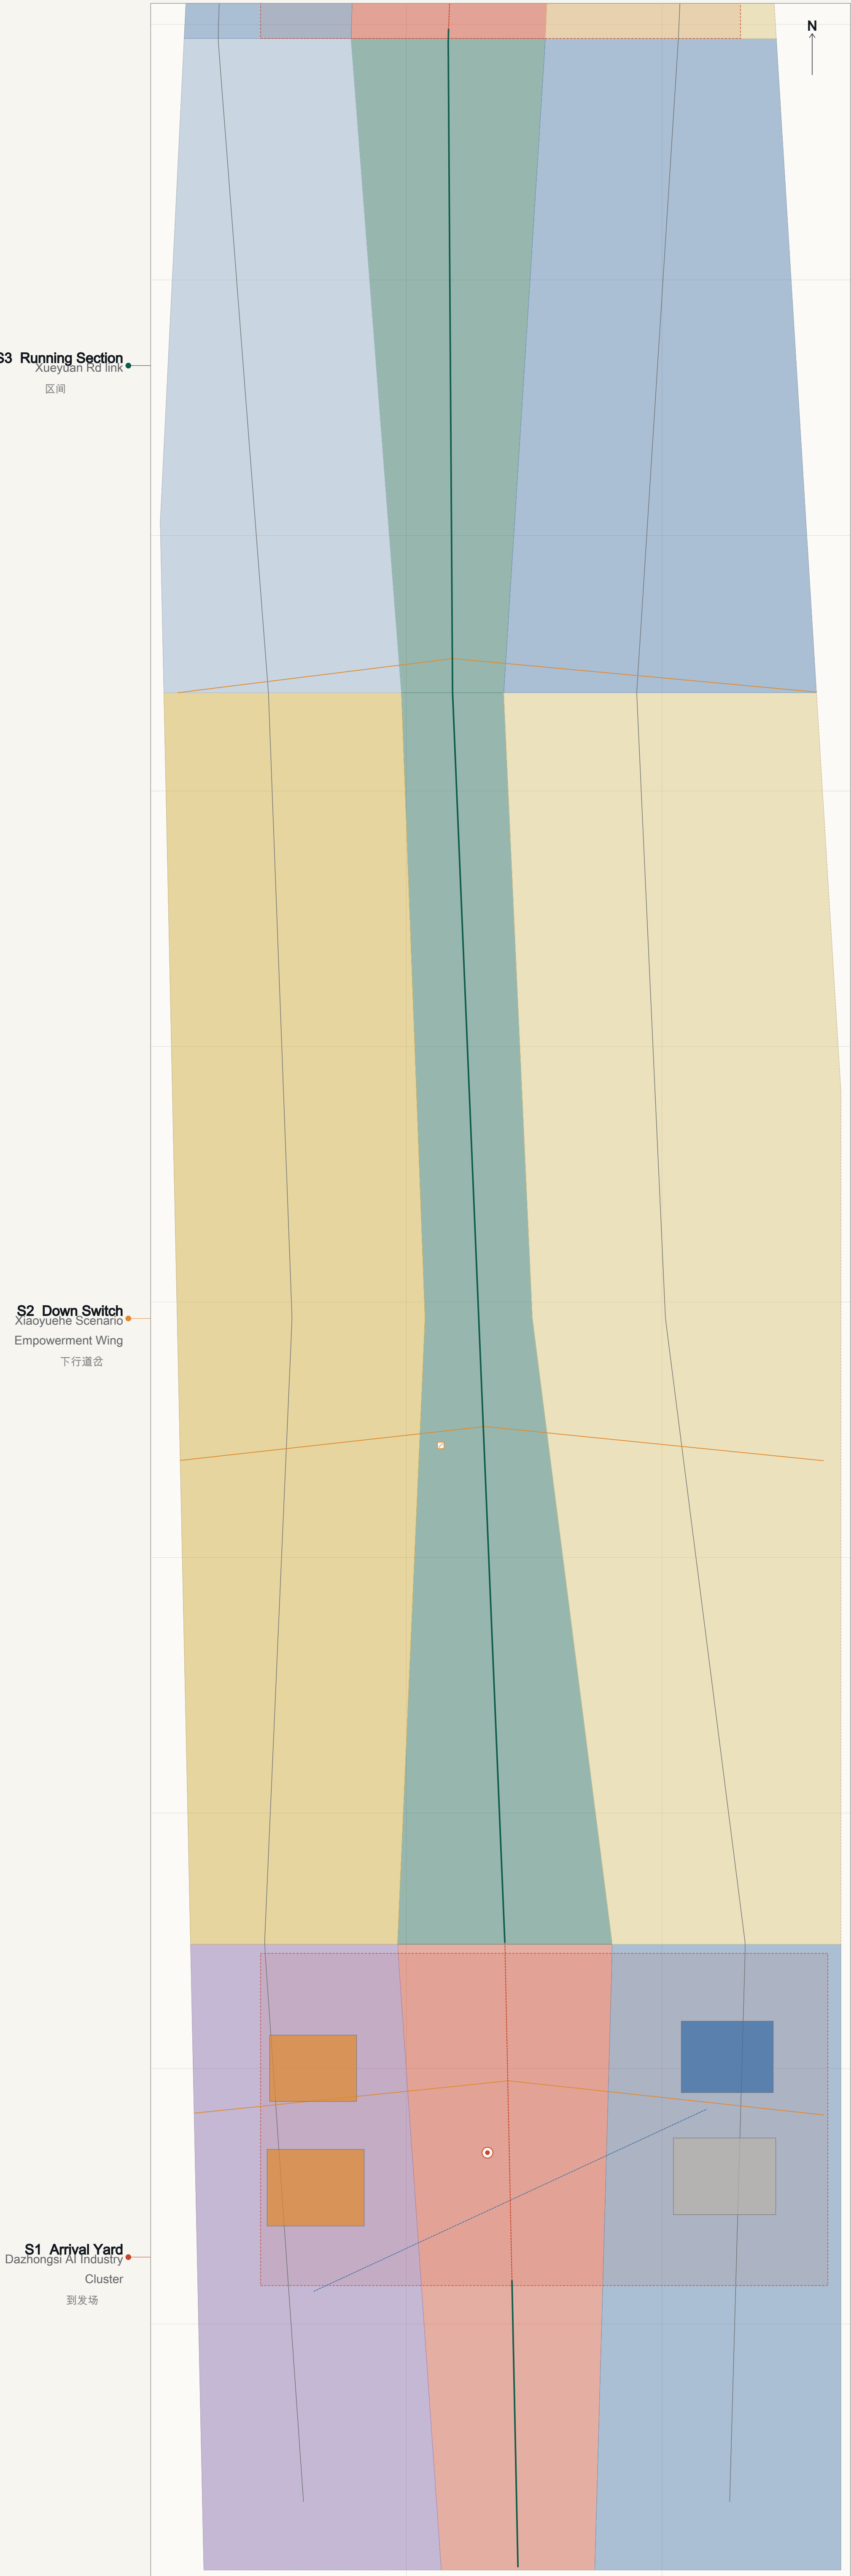

- The “break” at stations is design and operating language, not a railway plan; it changes no legal status.
- Crossing, clearance, step-free access and fire egress on line, switches, stitches need transport/utility review.
- The two plans are the south and north halves of one corridor at the same scale; the split is layout, not zoning.
- Once the official SITE_BOUNDARY and three KEY_AREA polygons are released, this structure must be re-sited and all metrics recomputed.

BOARD 2 · LAND USE & URBAN RENEWAL

Land use & urban renewal

用地布局与城市更新

Land use uses a public subset of territorial use-control classes and covers the whole submitted boundary; footprints indicate renewal handles. FAR, height and density pending approved regulatory conditions.

Land use & areas (recomputed)

0802	Research land	239.5 ha
		21.0%

Retain / renovate / demolish method

- Retain: existing buildings with historic or industrial memory and usable structure — assess before acting.
- Renovate: where function no longer fits but structure is usable, open the ground floor first.
- New build: proposed only where a functional gap is clear and no public space or green is taken.

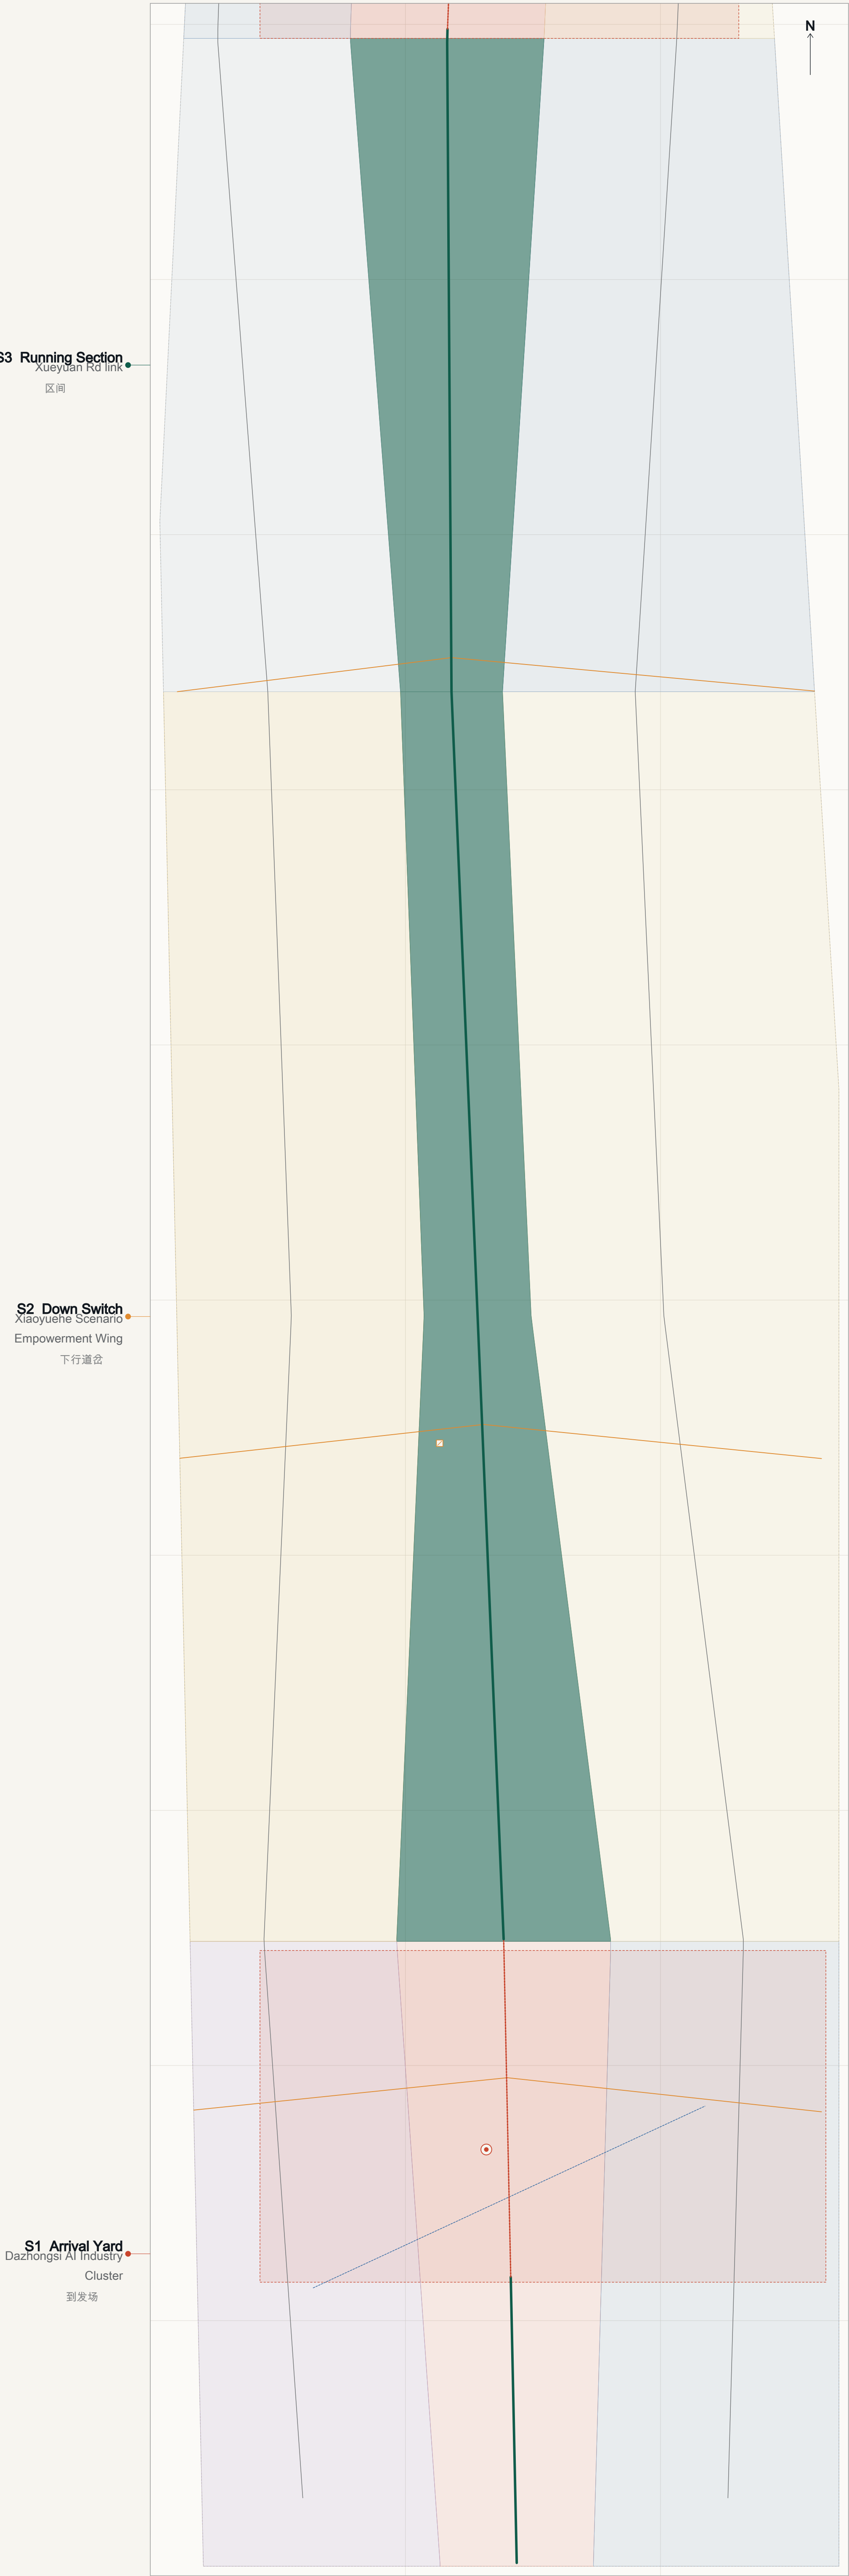

Any demolition conclusion needs title, building and date data; this scheme makes no demolition call.

BOARD 3 · MOBILITY, RAIL, SLOW TRAFFIC & MUNICIPAL

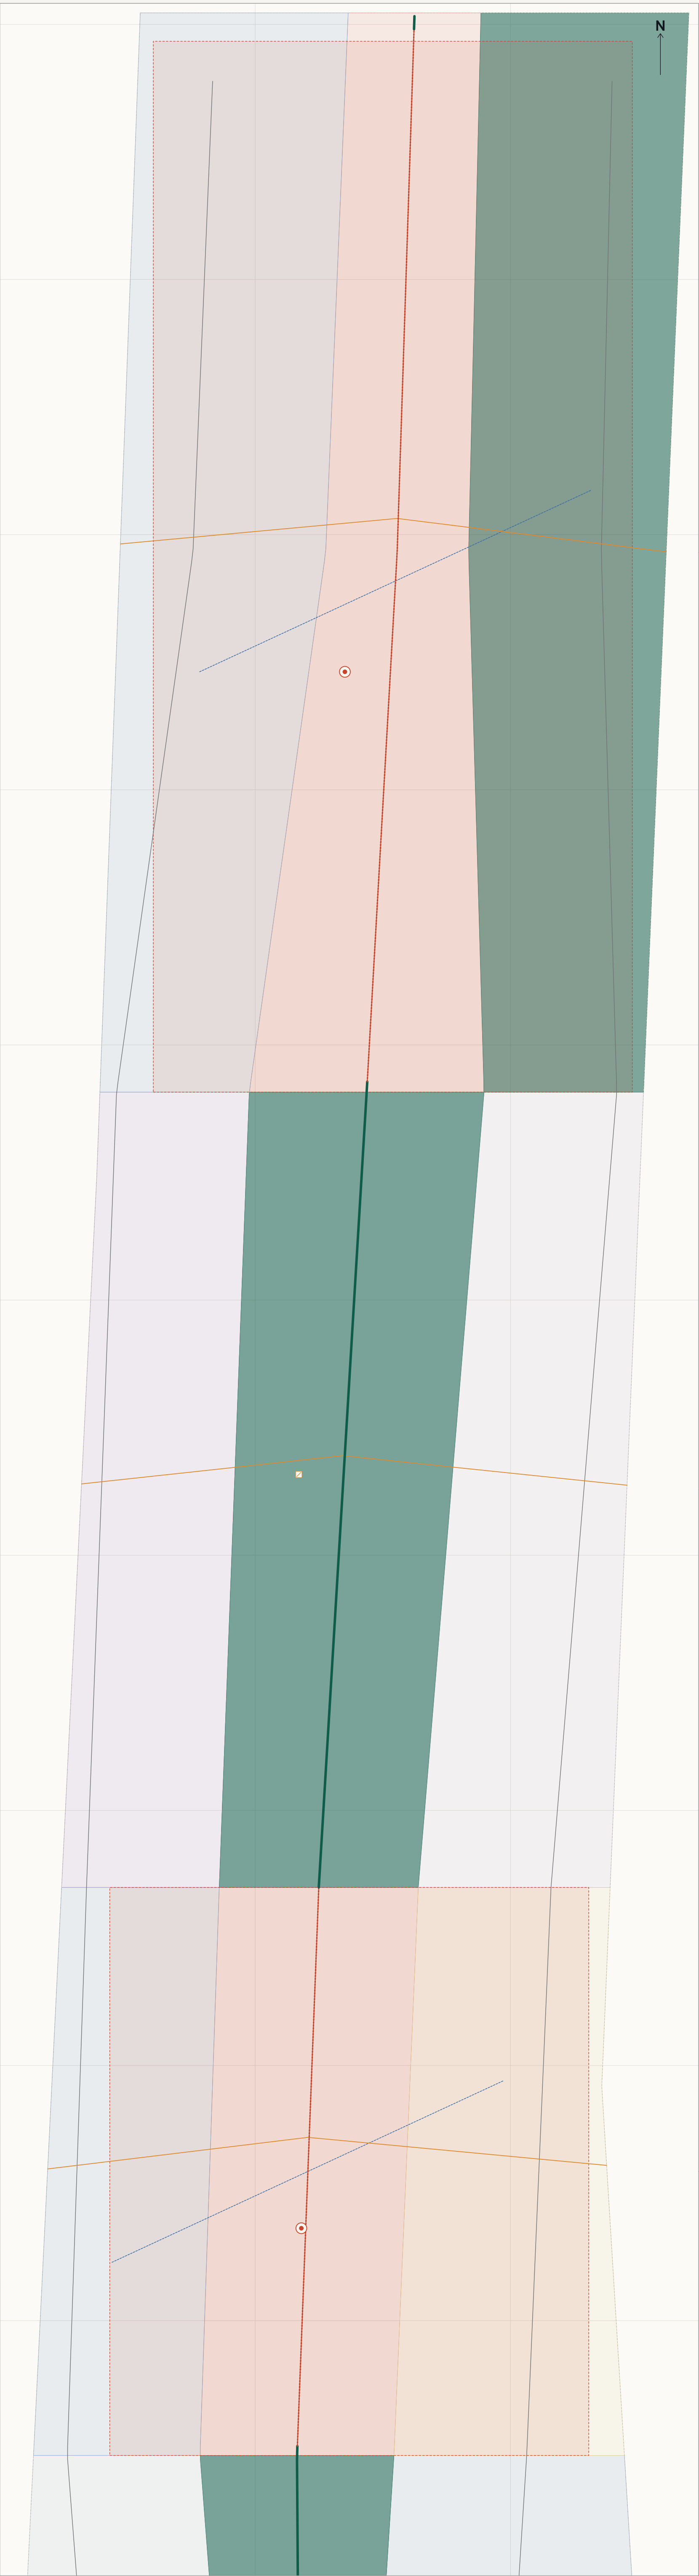

Roads, rail, slow mobility, utilities

交通、轨道、慢行与市政支撑

Access on both corridor sides comes from a continuous slow-mobility main line, six east-west stitches and three suggested transit connectors; road redline width, cross-section and area are not public, so no road figure is given.

South S1-S3

North S4-S6

c. 1:6,000
0 200 m

- Token main line slow mobility (cont.)

- Open segments at stations

Branch loop
- East-west stitch

Provisional rough boundary

Alignment list (suggested lines)

ROAD-001	Main-line slow path	greenway	ROAD-002	West service-lane loop	branch	ROAD-003	East service-lane loop	branch
CROSS-A	Dazhongsi four-quadrant walk links	pedestrian	CROSS-B	Down Switch east-west stitch	pedestrian	CROSS-C	Xueyuan Rd link crossing	cycleway
CROSS-D	Zero-Km Station east-west stitch	pedestrian	CROSS-E	Up Switch east-west stitch	pedestrian	CROSS-F	Marshalling Yard north crossing	cycleway
TRANSIT-1	Dazhongsi station feeder	transit_connection	TRANSIT-2	Zero-Km Station feeder	transit_connection	TRANSIT-3	Marshalling Yard station feeder	transit_connection

Recomputed basis

Road centreline length	road_network_length_m	38,211 m
Slow mobility length	slow_mobility_length_m	16,730 m
East-west stitch	east_west_stitch_count	6
Transit connector	transit_connector_count	3

Road area	road_area_sqm	Pending approved regulatory conditions
Road area ratio	road_area_ratio	Pending approved regulatory conditions
Redline width & cross-section		Pending approved regulatory conditions
Car and cycle parking standards		Pending approved regulatory conditions

Organisation

- Station-yard-city: transit stations join the line by connectors, platform plazas carry arrival, four-quadrant links close junction breaks.
- East-west stitches close walking and cycling breaks; crossing type, clearance and step-free conditions pending review.
- Branch loops on both sides take vehicle access, keeping cars off the heritage park and main line.
- The slow-mobility main line is continuous and doubles as the open test track; no dedicated facility.

Utilities & new infra

- Edge compute stops and distributed energy sit with public facilities — new infrastructure prototypes to develop.
- Utility, energy, drainage, flood, fire, civil-defence data missing; conclusions are method and precondition list.
- Compute and data services need separate consent; no named vendor or device is required.

Parking & cycle parking

- Car parking groups on the two branch loops; no new surface parking along the heritage park or main line.
- Cycle parking is tiered along platform plazas, switch plazas and stitch ends; size awaits official provision standards.
- This board gives no parking count, ratio or land area; the standards are missing from public sources.

Public & innovation services

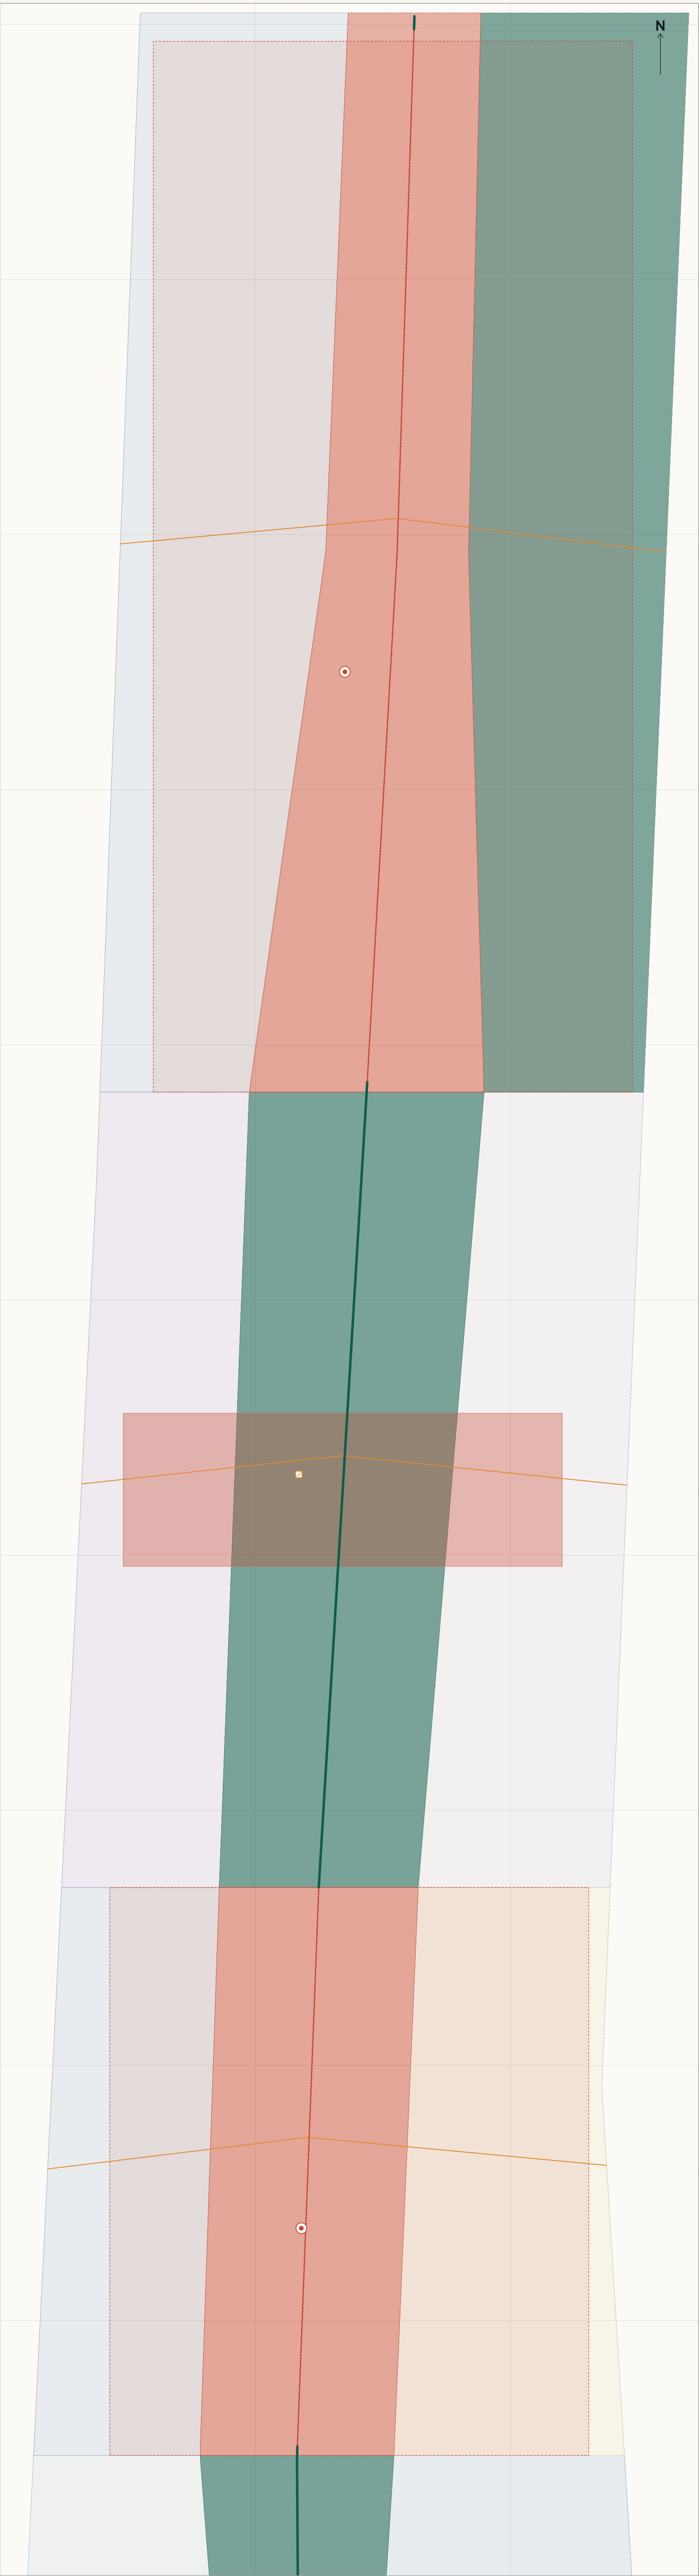

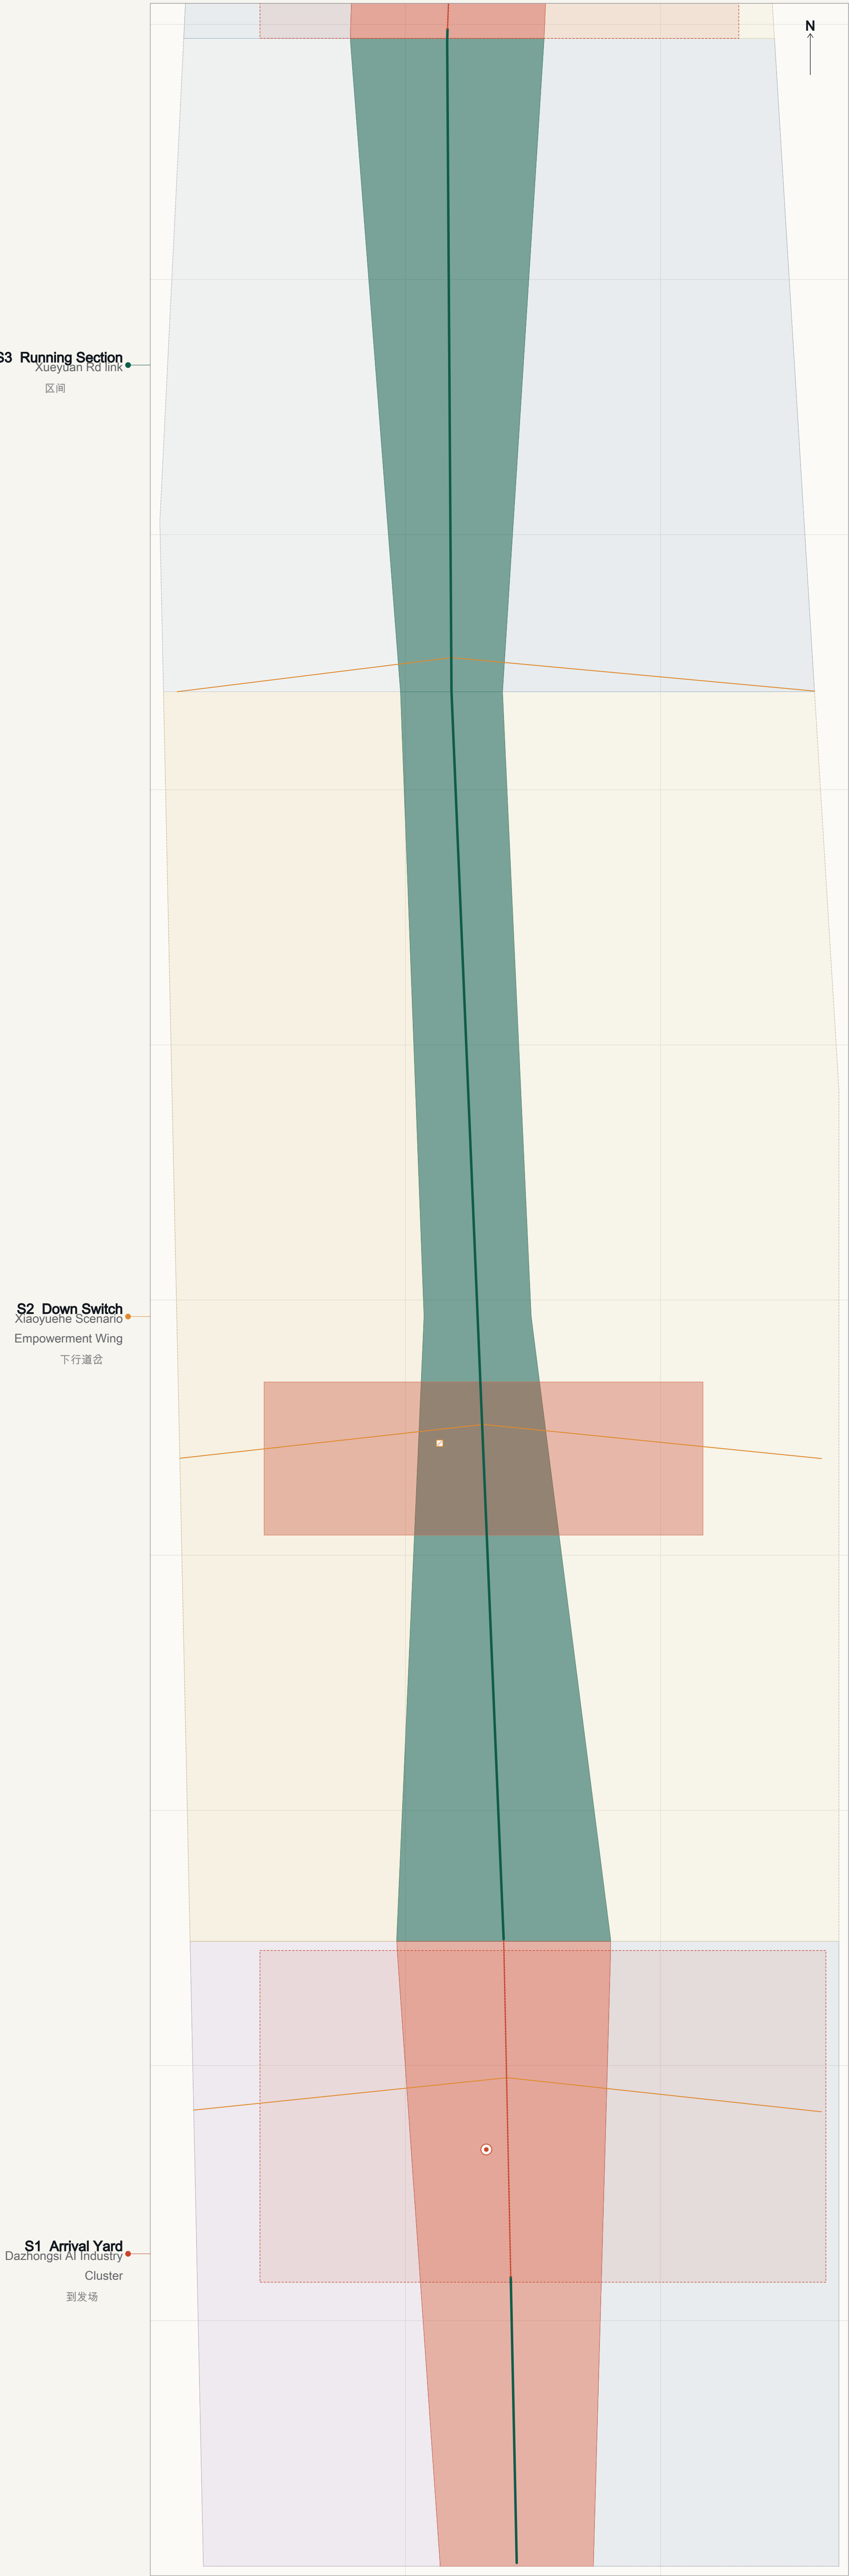

- Innovation platforms, talent services and industry services cluster at the three stations, near transit connectors.
- Community facilities sit at the two switches; service radius and standards await regulatory and special plans.
- Facility size, title and operator undecided; this board is not a siting or build promise.

BOARD 4 · HERITAGE PARK BELT & BLUE-GREEN PUBLIC SPACE

Jing-Zhang heritage park & blue-green public space

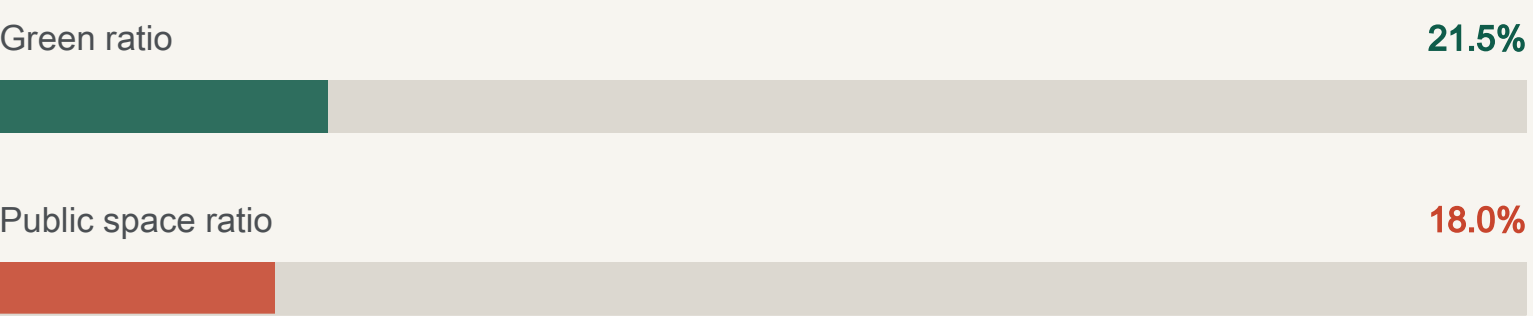

京张遗址公园活力带与蓝绿公共空间

The park green is ecological base and carrier of open testing and public events; platform and switch plazas make the north-south arrival front and east-west public room.

Blue-green & public space (recomputed)

Green area green_space_area_sqm	245.7 ha
Green ratio green_ratio	21.5%
Public space area public_space_area_sqm	206.0 ha
Public space ratio public_space_ratio	18.0%
Park green 1401	166.8 ha
Protective green 1402	78.9 ha
Square land 1403	154.4 ha

Park segments

S2	Heritage-park green, Down Switch · Xiaoyuehe Scenario Wing band
	Continuous heritage-park green, and the green base of the open test track
S3	Heritage-park green, Running Section · Xueyuan Rd link band
	Continuous heritage-park green, and the green base of the open test track
S5	Heritage-park green, Up Switch · Zhongguancun Service Wing band
	Continuous heritage-park green, and the green base of the open test track
S6	Marshalling Yard north protective green belt
	North ecological buffer; edge conditions await official water & road data

Shared-use strategy

- Continuous green carries slow mobility, sport, innovation exchange, tech testing and display.
- North green belt: ecological buffer and Marshalling Yard display forecourt.
- Blue lines, flood and ecology data not obtained; Qinghe and Xiaoyuehe frontage strategy is method only.
- Green and public space areas shift with the provisional boundary; recompute on release.

Platform/switch plazas

Arrival Yard platform plaza	S1	Zero-Km Station platform plaza	S4	Marshalling Yard platform plaza	S6
Dazhongsi station four-quadrant walk links and arrival display face		Zero-km stone, open-source release hall and honours venue		Open display of independent innovation and a public face for standards governance	
Down Switch plaza	S2	Up Switch plaza	S5		
East-west public parlour and scenario open-day venue of the Xiaoyuehe wing		East-west public parlour and international face of the Zhongguancun wing			

Base boundary is a provisional rough outline — not an official redline, not a basis for exact areas.
All spatial proposals are conceptual suggestions / reference schemes for professional teams to develop further; they are not statutory planning, government approval, confirmed implementation or an investment commitment.

BOARD 5 · THREE KEY AREAS IN DETAIL

Detailed design, 3 key areas

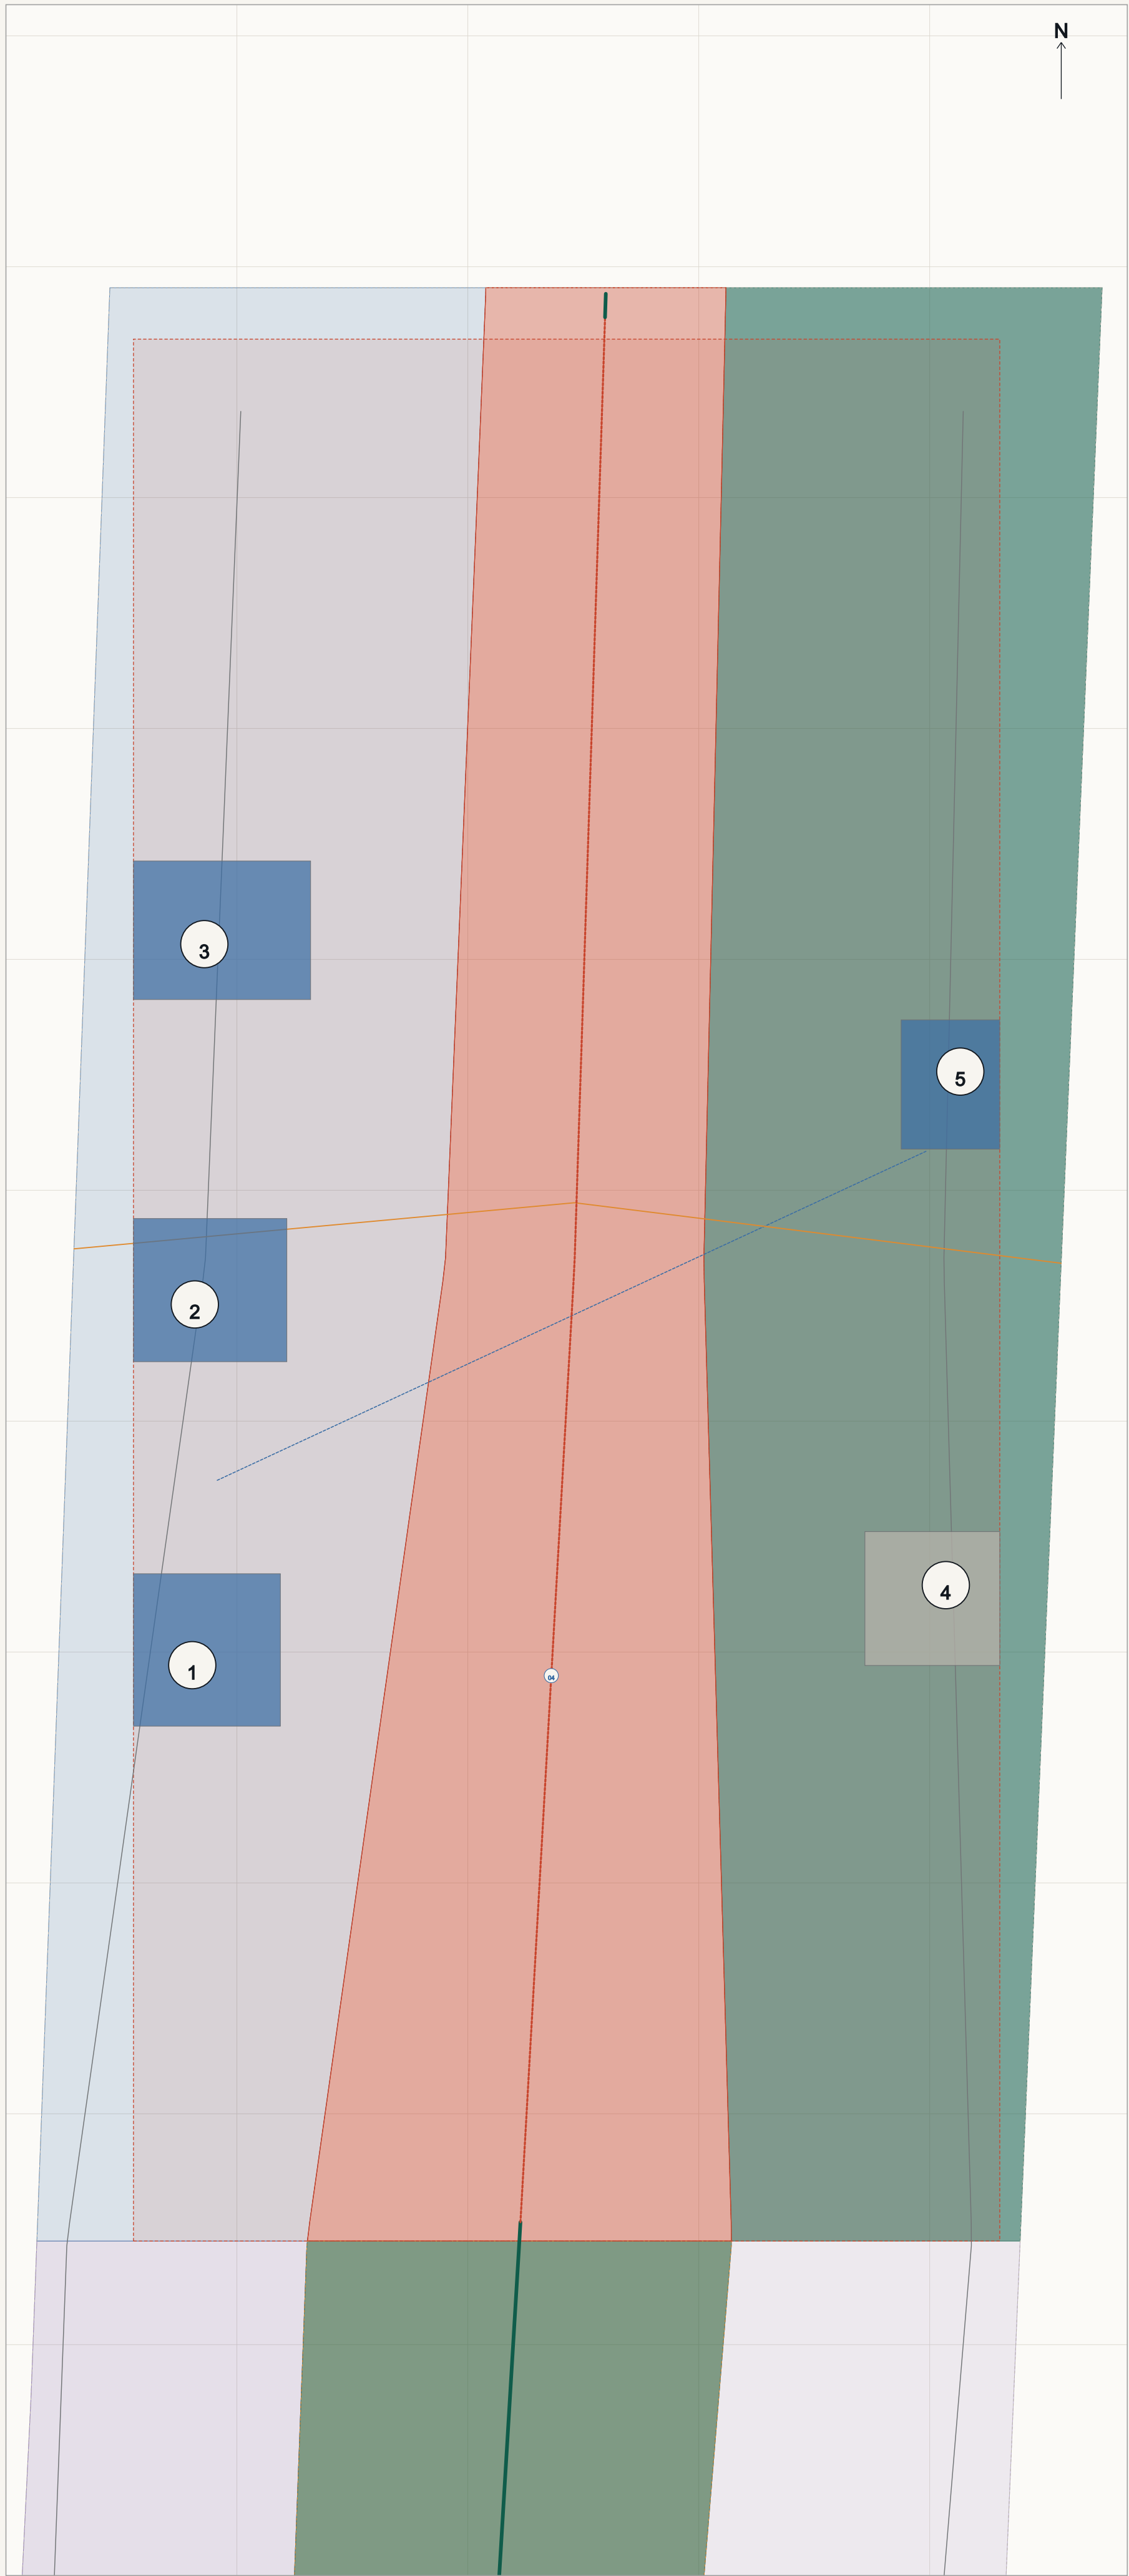

三大重点片区详细设计

North to south: Marshalling Yard (Zhongzhiyuan), Zero-Kilometre Station (Beijing AI Origin Community), Arrival Yard (Dazhongsì). All conceptual; FAR, height and density pending approved regulatory conditions.

Marshalling Yard Zhongzhiyuan AI Acceleration Area

Garden full-stack innovation blocks

Marshalling Yard

c. 1:5,000
0 200 m

Announced area	192.1 ha
Submitted geometry recomputed	192.9 ha
Renewal handles	5

Renewal handle list

- 1

Full-stack independent R&D cluster

- 2

Safety governance & evaluation lab

new_build
- 3

Standards & governance building

new_build
- 4

Retained industrial building

retain
- 5

Innovation showcase

new_build

Spatial moves (conceptual)

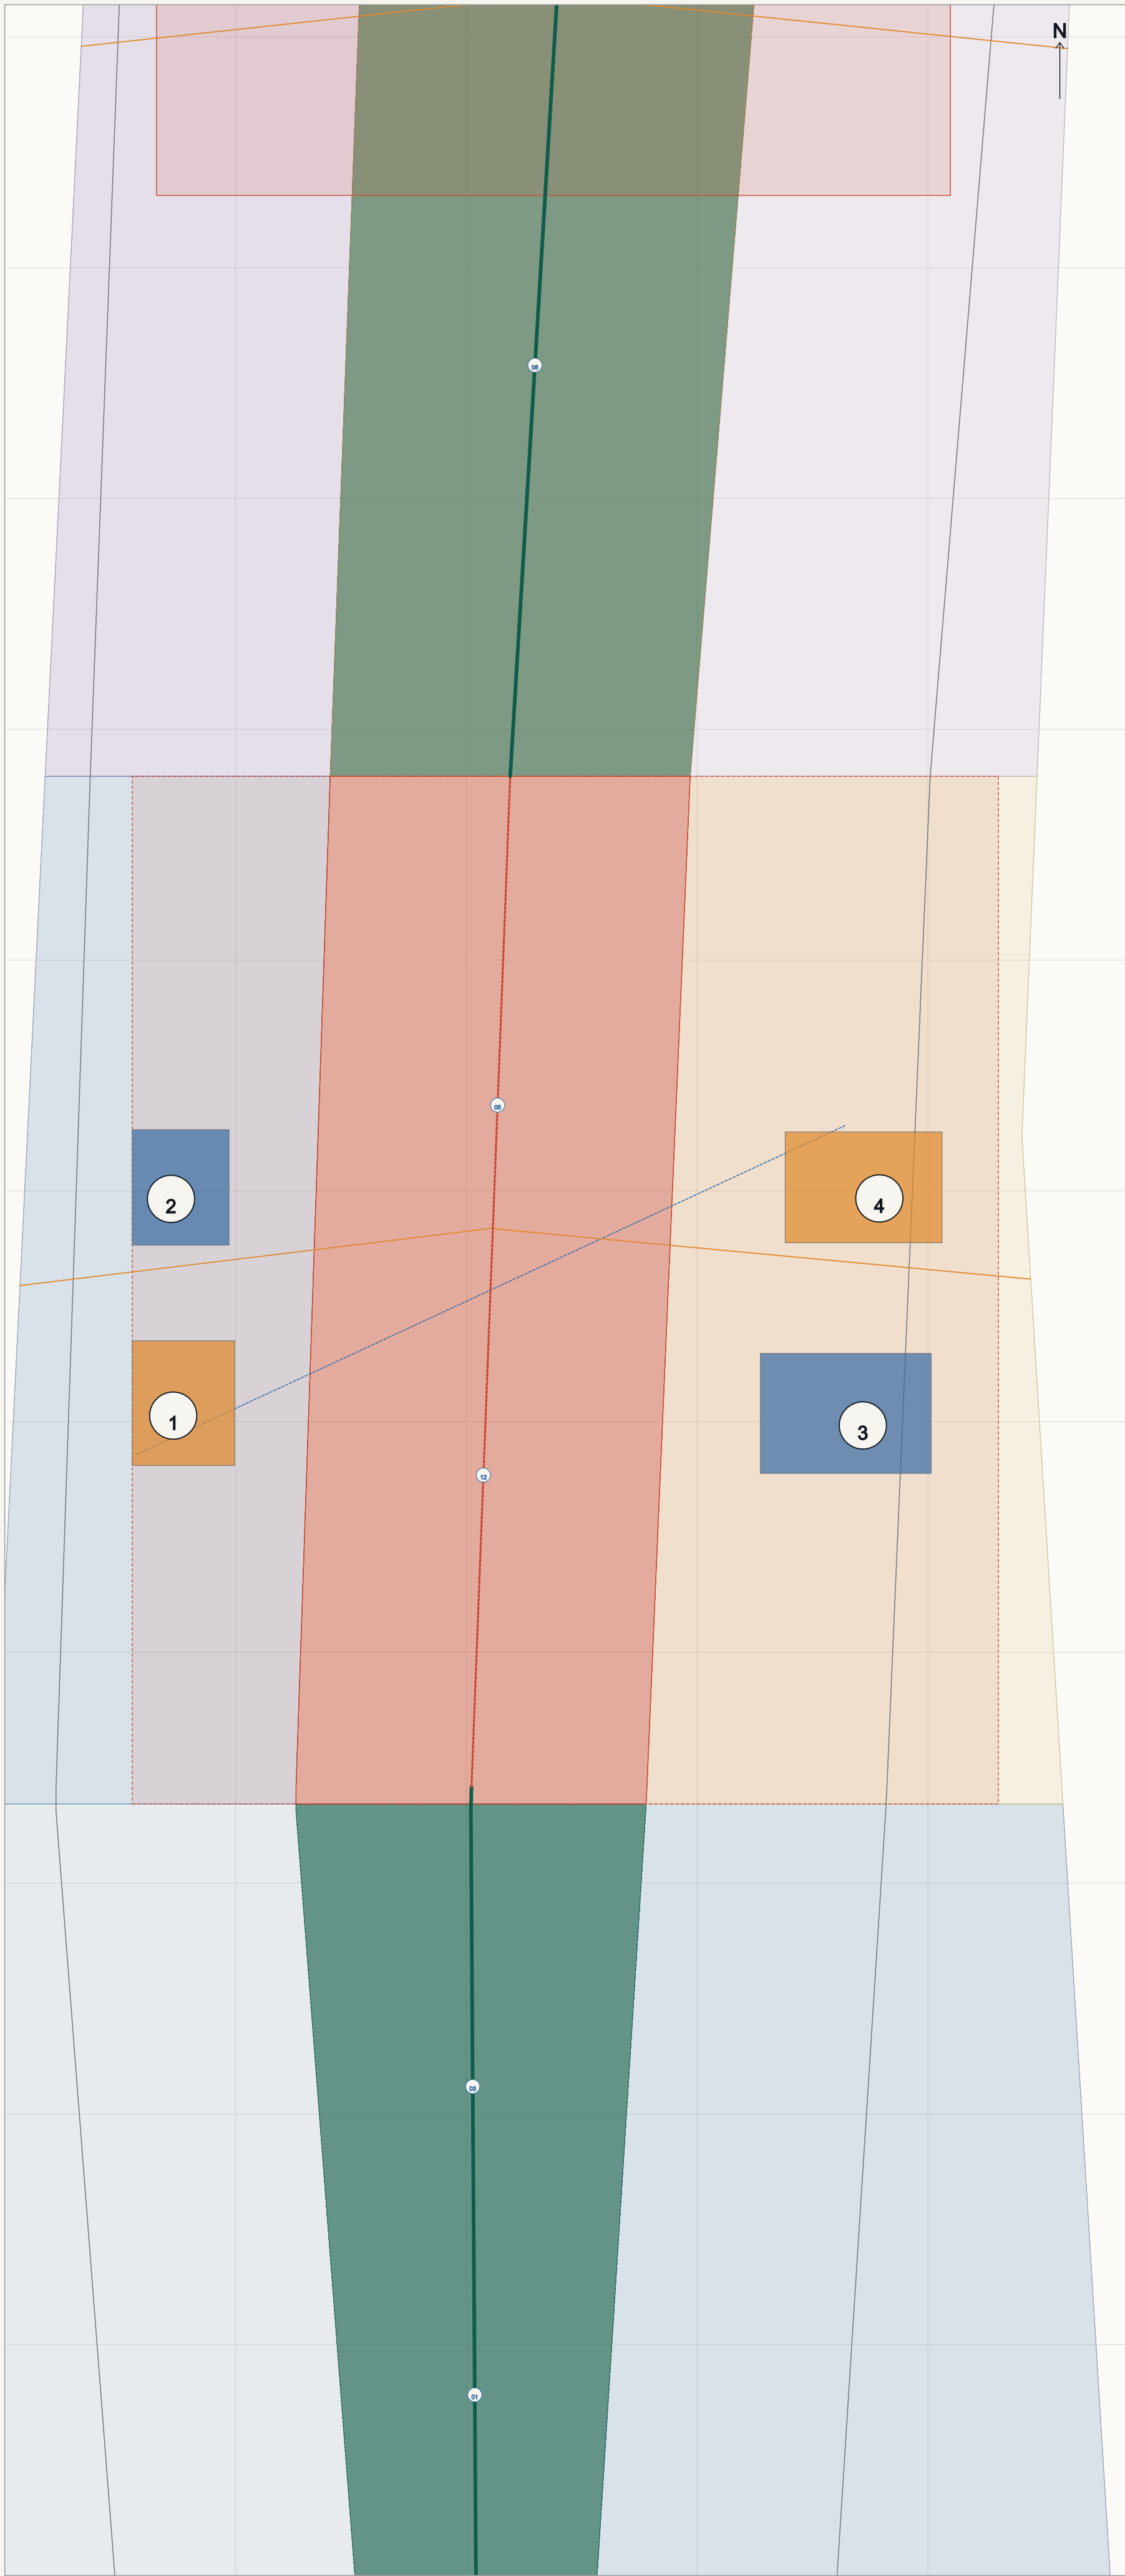

- Strengthen Qinghe frontage and north green belt; the buffer is green base for open testing and display.
- Standards-setting, safety evaluation and full-stack R&D form the industrial core, with a public innovation showcase.
- Platform plaza carries open innovation display and public standards face; a north crossing closes the North 5th Ring break.
- Access relies on suggested transit connectors and branch loops; station sites and redlines follow official data.

FAR	pending
Height	pending
Density	pending
Build scale	pending

Zero-Km Station Beijing AI Origin Community

Campus-side transfer, talent homes

Zero-Kilometre Station

c. 1:5,000

User types, spatial response

Open-source devs Boundary: no personal trajectories; event data aggregated only	Needs: releases, collaboration, testing, community standing
Start-ups Boundary: compute and data services need separate authorisation	Needs: low-cost space, compute access, product test ground
Lead firm visitors Boundary: brand marks and cases need clearance	Needs: display, business, international reception, hiring
Residents Boundary: no resident profiling for commercial recommendation	Needs: commuting, leisure, community services, low-impact renewal
Campus users Boundary: campus data and research need authorisation	Needs: research transfer, cross-campus work, daily slow mobility

Phasing & operation

Phasing & operation

Renewal project list (conceptual)

JZ-01	Jing-Zhang heritage park slow stitch Needs: road redline, under-bridge space, traffic review
JZ-02	Marshalling Yard Qinghe edge Needs: river blue line, ecology & flood-control conditions
JZ-03	Zero-Km campus transfer street Needs: campus boundary, ownership, ground-floor uses
JZ-04	Arrival Yard four-quadrant links Needs: rail stations, road junctions, utility lines
JZ-05	AI public service & edge compute nodes Needs: energy, compute, safety & an operating entity
JZ-06	Global AI Week public route Needs: public-space permits, event safety, copyright clearance

Red lines

- The urban agent never replaces planning approval, issues no personal profile.
- No named vendor, model or device is required.
- Scenario data aggregated only; resident and campus profiles not used for commerce.
- Operator, permits and insurance undecided; no delivery or investment commitment.

Long-term operation & events (conceptual)

- Scenario open days: windows open by bookable segment under public rules; at close the space returns to ordinary public use.
- Global AI Week: walkable route through heritage culture, open-source community, industry display, roadshows.
- Everyday developer community: daily use of the release hall and collaboration lab, without large events.
- Standards workshop: Marshalling Yard hosts public standards-setting and safety evaluation.
- Annual contributors inscribed: Zero-Kilometre marker and honours form a civic ritual.

Policy suggestions

- Near term starts with light facilities, events and platforms, without large works or land take.
- Mid term opens east-west stitches and switch plazas; transport, utility and title terms confirmed in step.
- Long term completes the line and north marshalling, subject to regulatory and utility terms.
- The call timetable is a submission requirement, not renewal phasing; the two must not be conflated.

Recomputation & compliance

指标复算与合规响应

All known metrics are recomputed from the submitted GeoJSON in EPSG:4548; FAR, building height, building density, road redline and road area are missing from public sources and are all registered as unknown.

Basis, red lines

- Class 1 recomputable spatial metrics are all recomputed into metrics.json; class 2 control metrics are registered unknown with reasons; class 3 performance metrics go to assumptions and later observation.
- The submitted boundary is the repository provisional rough boundary (official_boundary=false), not an official redline or a basis for exact areas; once official polygons are released everything must be recomputed.
- No claim of official approval, approved plan, final land title, final build scale or delivery.
