

Jing-Zhang Commons Loop: three cores, two wings, one public loop

Move innovation from screens into walking, service, learning, and return

ONE LOOP

walking + human service + scenario review

- blue-green continuum
- commons spine
- three key areas
- public nodes

● AI原点 / Origin

● 大钟寺 / DZS

PROVISIONAL CONSTRAINT · explanatory figure only; not an official redline, control, or field survey

Complete land-use partition: five co-creation bands

Each band keeps public service, the green spine, and pending controls visible

PROVISIONAL CONSTRAINT · explanatory figure only; not an official redline, control, or field survey

Three key areas: different problems, different public interfaces

research validation / near-campus translation / urban adoption

THREE CORES ARE NOT THREE ISLANDS

众智园 / ZZY

garden validation: make safety, standards, and ecology visible

AI原点 / Origin

near-campus translation: bring results into care, learning, and daily li

大钟寺 / DZS

urban adoption window: connect enterprise service, transit, and publ

PROVISIONAL CONSTRAINT · explanatory figure only; not an official redline, control, or field survey

Evidence metrics: recompute from geometry, speak in gates

Known values are package recomputations; unknowns are official controls and field outcomes

site_area_sqm

11.41 km²

临时边界复算 / provisional

green_ratio

22.0%

蓝绿连续体 / blue-green

public_space_ratio

3.2%

公共节点 / public nodes

scenario_card_count

12

概念场景 / concept cards

industry_validation_scenario_count

4

产业测试 / industry tests

phase_count

3

回路阶段 / loop phases

未知 / UNKNOWN: FAR • building height • building density • official redline • rights • field performance

PROVISIONAL CONSTRAINT · explanatory figure only; not an official redline, control, or field survey
