

# Jing-Zhang Commons Loop: three cores, two wings, one public loop

Move innovation from screens into walking, service, learning, and return

## ONE LOOP

walking + human service + scenario review

PROVISIONAL CONSTRAINT · explanatory figure only; not an official redline, control, or field survey

## Complete land-use partition: five co-creation bands

Each band keeps public service, the green spine, and pending controls visible

PROVISIONAL CONSTRAINT · explanatory figure only; not an official redline, control, or field survey

## Three key areas: different problems, different public interfaces

research validation / near-campus translation / urban adoption

THREE CORES ARE NOT THREE ISLANDS

众智园 / ZZY

garden validation: make safety, standards, and ecology visible

AI原点 / Origin

near-campus translation: bring results into care, learning, and daily li

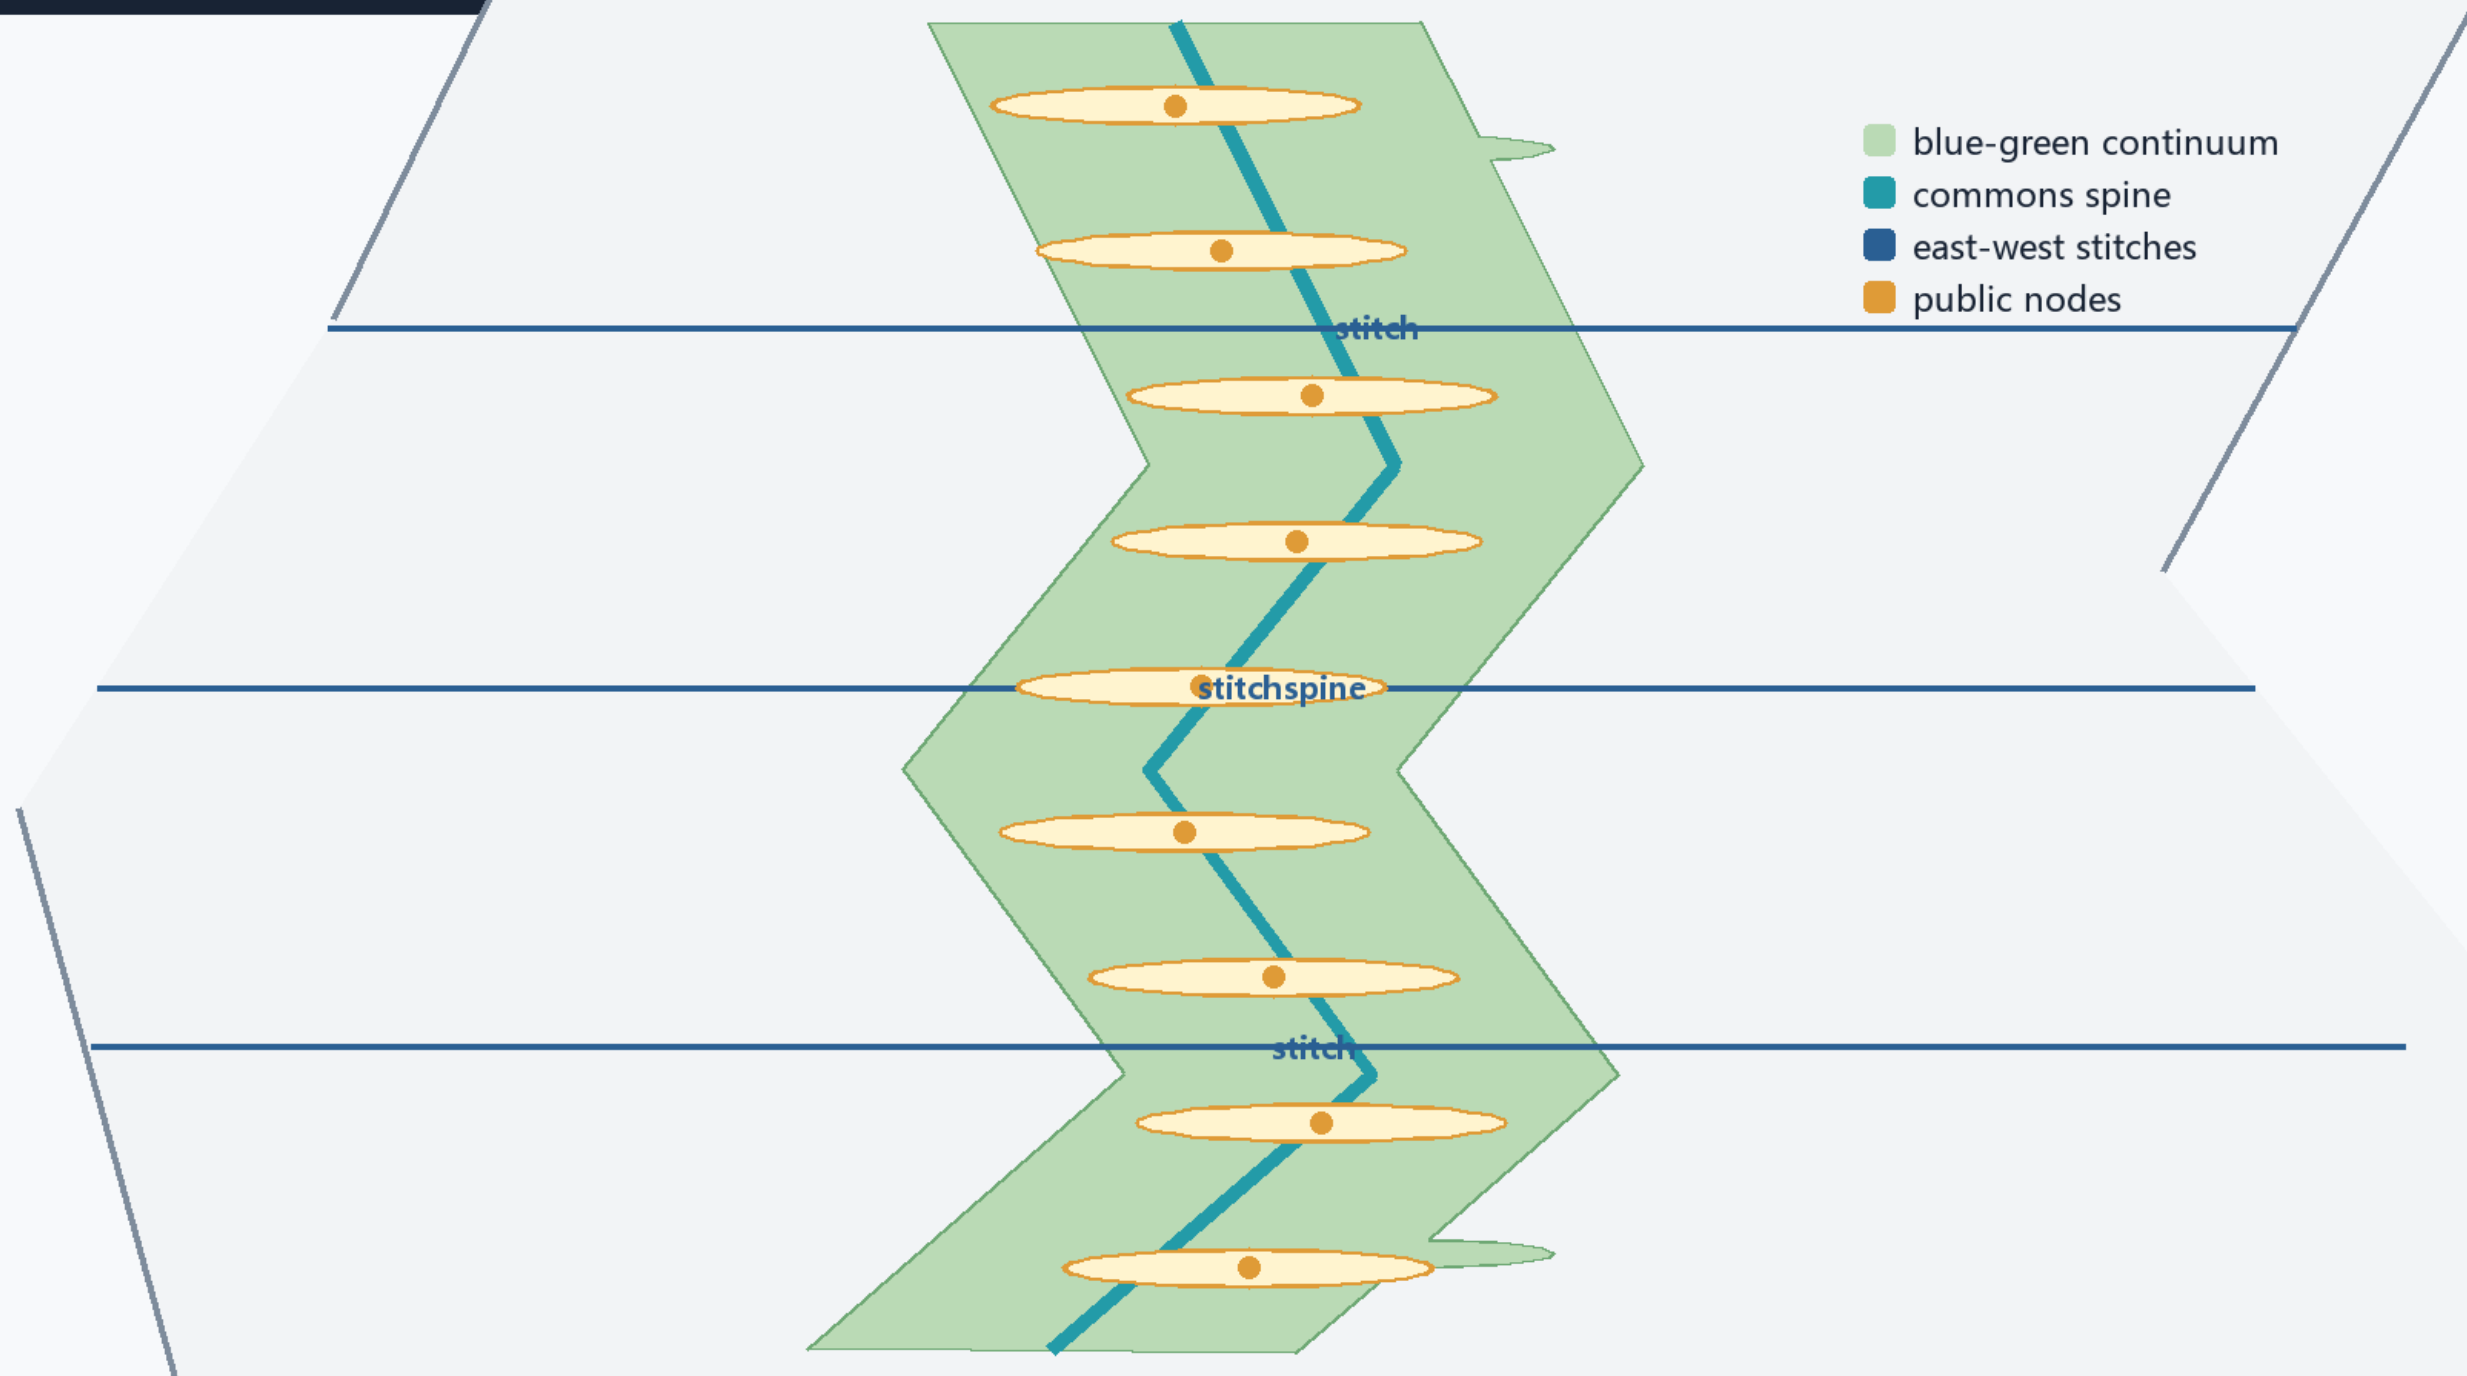

大钟寺 / DZS

urban adoption window: connect enterprise service, transit, and publ

PROVISIONAL CONSTRAINT · explanatory figure only; not an official redline, control, or field survey

## Mobility + blue-green: put public service on the walking loop

No engineering redline; only continuity and pending gaps

PROVISIONAL CONSTRAINT · explanatory figure only; not an official redline, control, or field survey

## Evidence metrics: recompute from geometry, speak in gates

Known values are package recomputations; unknowns are official controls and field outcomes

site\_area\_sqm

**11.41 km<sup>2</sup>**

临时边界复算 / provisional

green\_ratio

**22.0%**

蓝绿连续体 / blue-green

public\_space\_ratio

**3.2%**

公共节点 / public nodes

scenario\_card\_count

**12**

概念场景 / concept cards

industry\_validation\_scenario\_count

**4**

产业测试 / industry tests

phase\_count

**3**

回路阶段 / loop phases

**未知 / UNKNOWN: FAR • building height • building density • official redline • rights • field performance**

PROVISIONAL CONSTRAINT · explanatory figure only; not an official redline, control, or field survey
