

Jingzhang Friendly Interfaces | Spatial Structure

Conceptual open co-creation proposal | Provisional rough boundary for review only

JZ / FRIENDLY INTERFACES

PROVISIONAL / 临时边界

A public interface, not a smart-city skyline

- Understandable: explain what the system does
- Interruptible: staff can pause or take over
- Choiceful: non-digital service remains available
- Traceable: log decisions without tracking people

3 areas + 2 wings

connected by everyday interfaces

One sentence

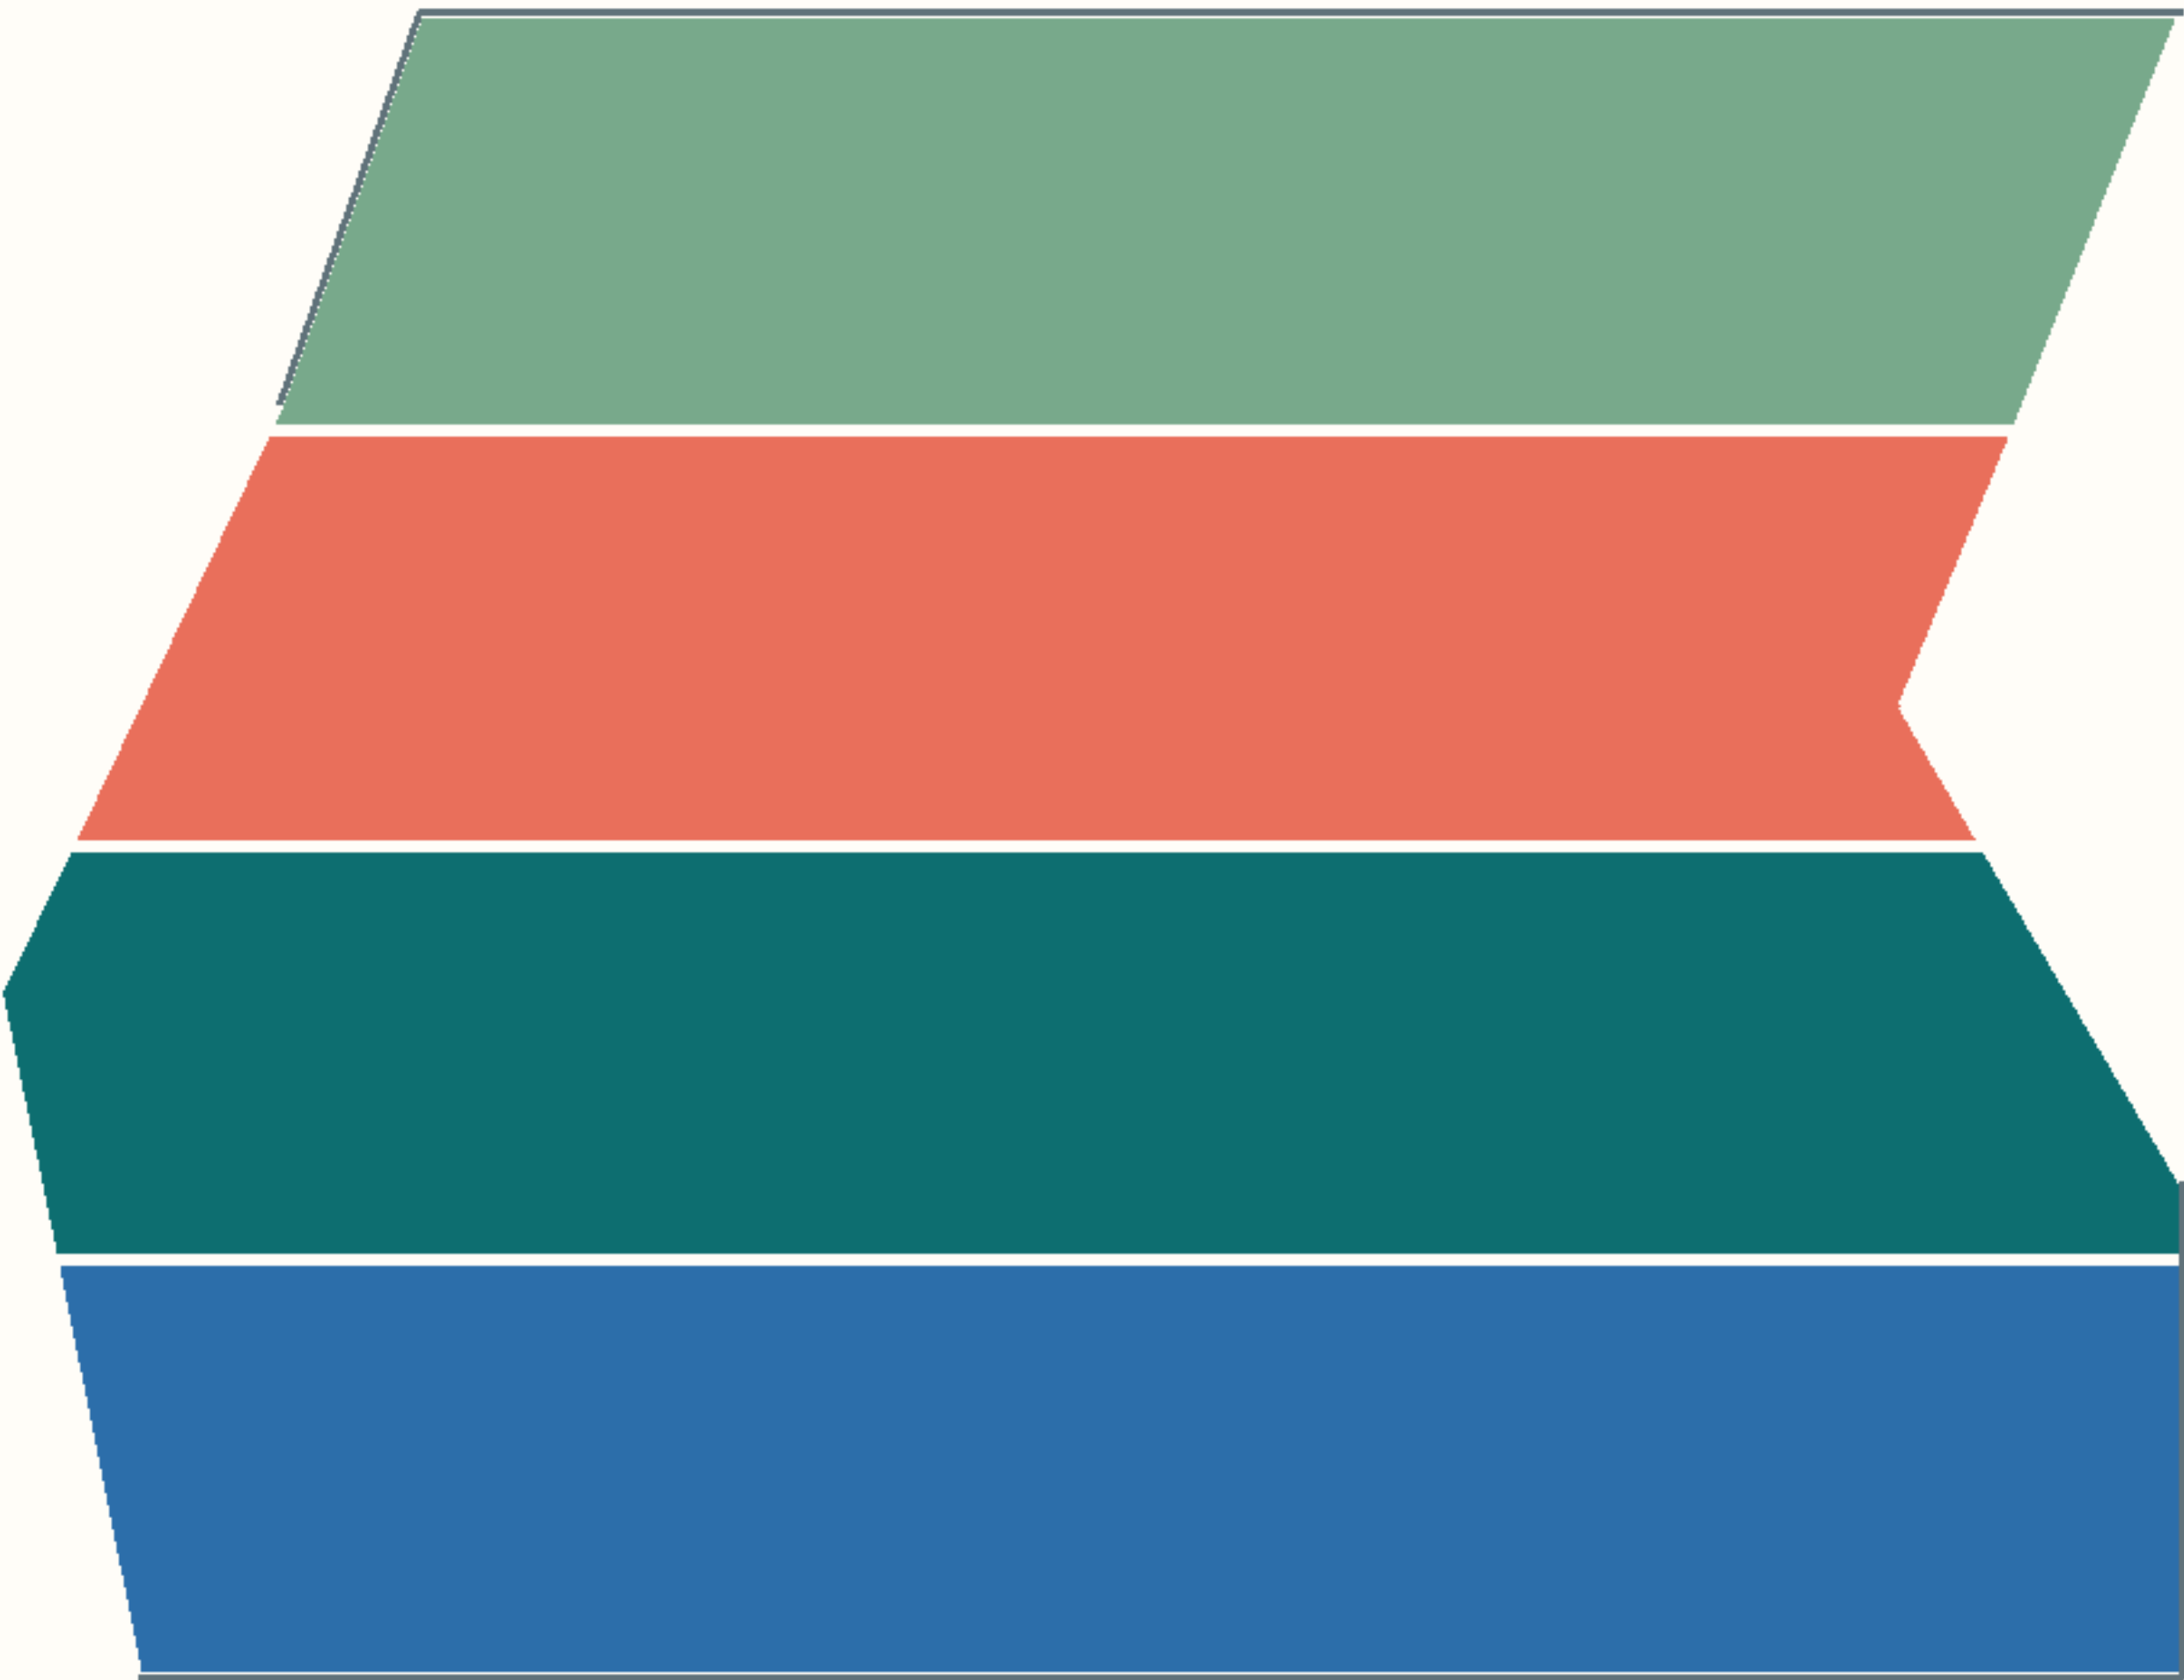

AI services should behave like a good public interface: explainable, interruptible, optional, and accountable.

Four Interface Types | Land Use and Public Network

JZ / FRIENDLY INTERFACES

Conceptual open co-creation proposal | Provisional rough boundary for review only

PROVISIONAL / 临时边界

A public interface, not a smart-city skyline

- Understandable: explain what the system does
- Interruptible: staff can pause or take over
- Choiceful: non-digital service remains available
- Traceable: log decisions without tracking people

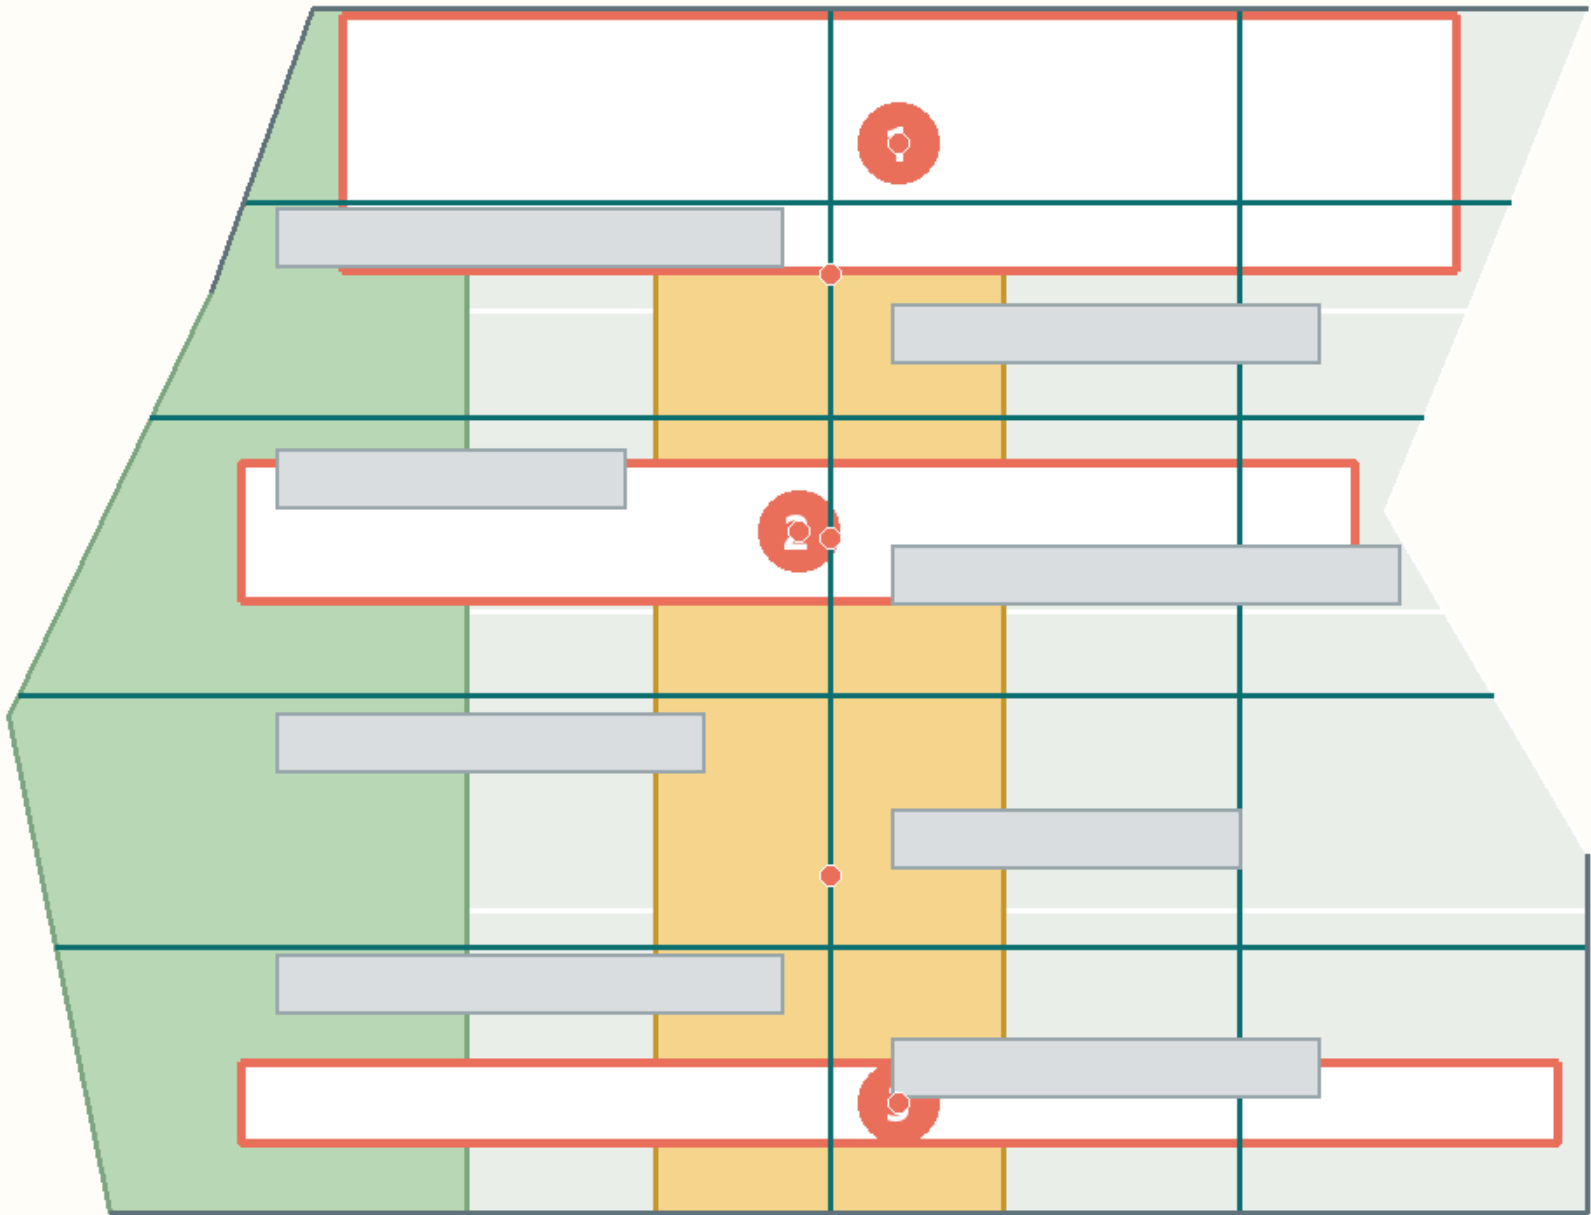

3 areas + 2 wings
connected by everyday interfaces

Three Key Areas | From R&D to Adoption

Conceptual open co-creation proposal | Provisional rough boundary for review only

JZ / FRIENDLY INTERFACES

PROVISIONAL / 临时边界

Three interfaces

- 01 **Validation garden**
R&D / safety / standards
- 02 **Campus-edge living room**
transfer / open source / living
- 03 **Adoption district**
product / commerce / exchange

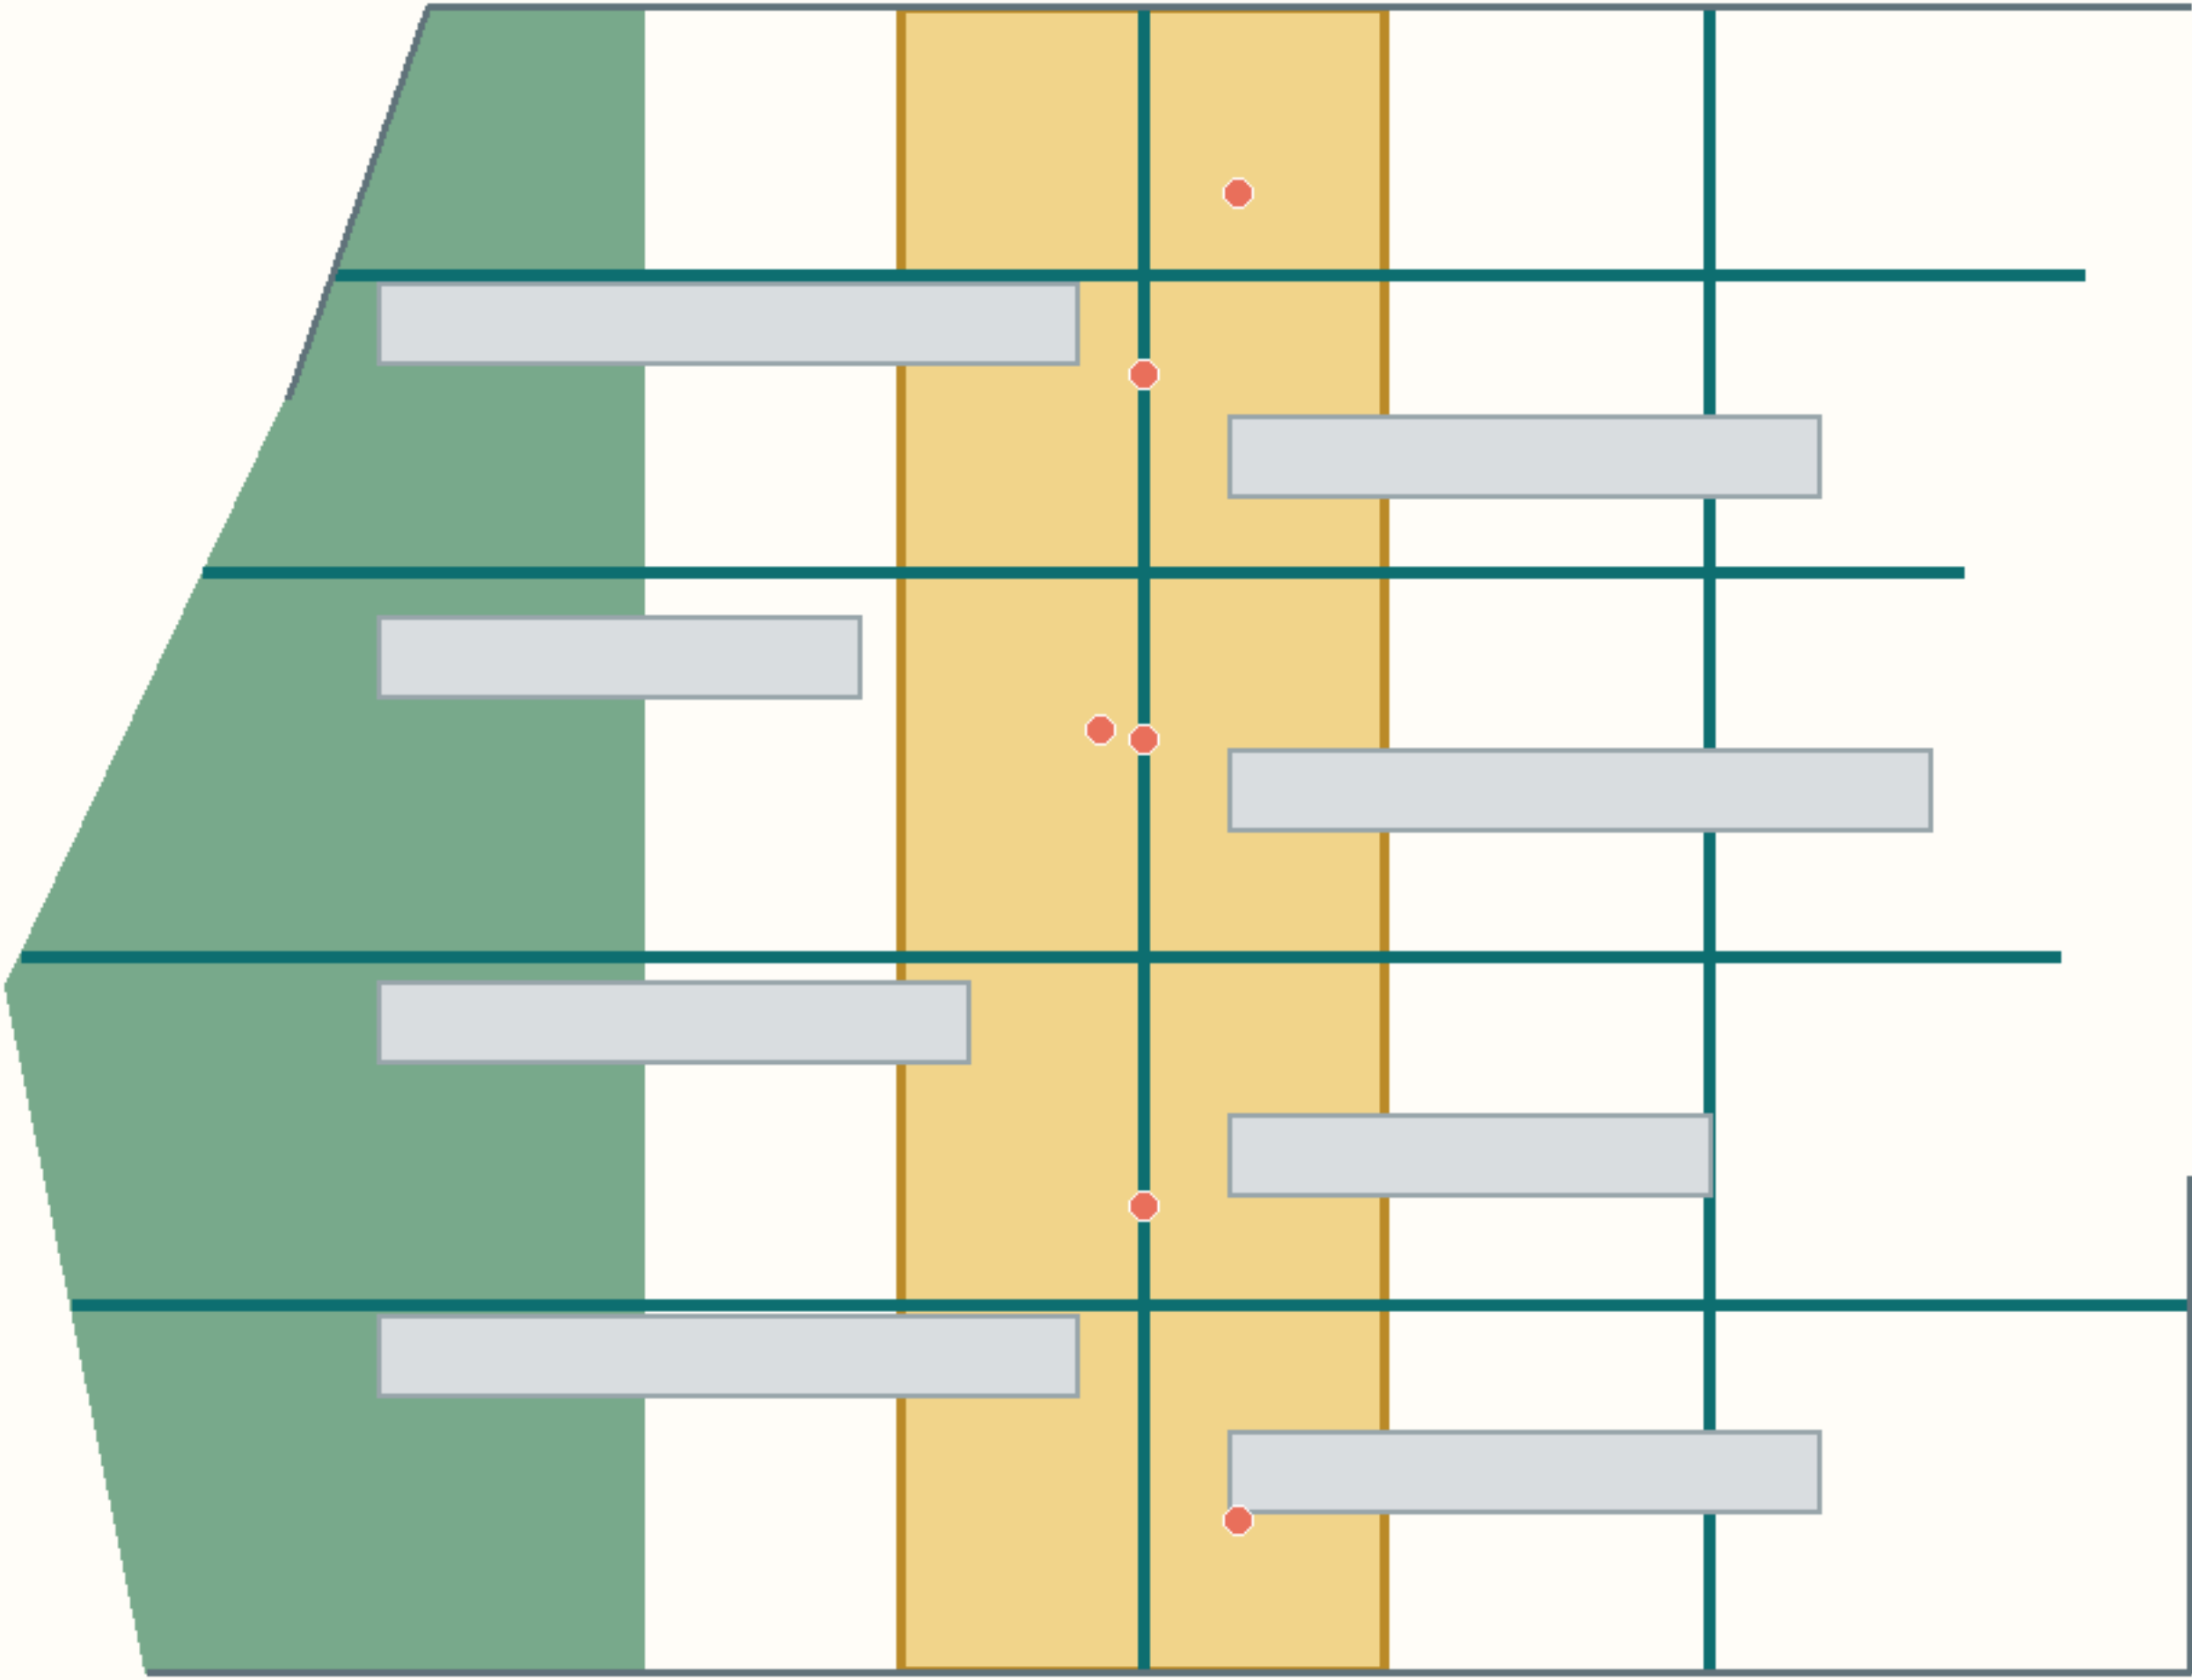

One rule: every AI service has a human fallback.

A Walkable Choice | Blue-Green and Public Space

JZ / FRIENDLY INTERFACES

Conceptual open co-creation proposal | Provisional rough boundary for review only

PROVISIONAL / 临时边界

A public interface, not a smart-city skin

- Understandable: explain what the system does
- Interruptible: staff can pause or take over
- Choiceful: non-digital service remains available
- Traceable: log decisions without tracking people

3 areas + 2 wings
connected by everyday interfaces

Auditable Metrics | Design Proposals and Data Gaps

JZ / FRIENDLY INTERFACES

Conceptual open co-creation proposal | Provisional rough boundary for review only

PROVISIONAL / 临时边界

Evidence layer

Site area

11.41M m²

Green ratio

24.6%

Public space ratio

25.0%

Slow network

24.1 km

Scenario nodes

6

Unknown controls stay unknown; official data triggers recording

Phasing and accountability

01

Pilot interfaces

Small public-space and service prototypes; evaluate before scaling.

02

Network formation

Connect the three areas and two wings through daily routes and shared protocols.

03

Long-term operation

Publish an annual operating report and keep pause/exit mechanisms visible.
