

ONE SEAT JING-ZHANG

SIT · ASK · OPT OUT · REACH A HUMAN

02 / ONE SPINE · THREE ROOMS · TWELVE SEATS

A centennial public spine returns innovation to everyday Haidian

A seat is a place to pause and a position in technology decisions

- 1 PUBLIC SPINE**
Heritage · mobility · shade · cultural narrative
- 3 CIVIC ROOMS**
Validate · translate · evaluate in public
- 12 ONE SEAT NODES**
14 scenarios · 7 co-testers · 5 admission tests

TWO NETWORKS
Blue-green mobility × trustworthy services

03 / THREE CIVIC ROOMS

Three key areas form one validation chain, not three islands

Zhongzhiyuan validates, AI Origin translates, Dazhongsi tests adoption and public value

01 ZHONGZHIYUAN
TEST SEAT YARD

- Edge accessibility vision
- Universal robot route
- District energy twin

Controlled hours · physical stop · public bypass

02 BEIJING AI ORIGIN
COMMON TABLE HALL

- Open-source table
- Neighbourhood problem clinic
- Translation and IP support

Co-test student work before corridor trials

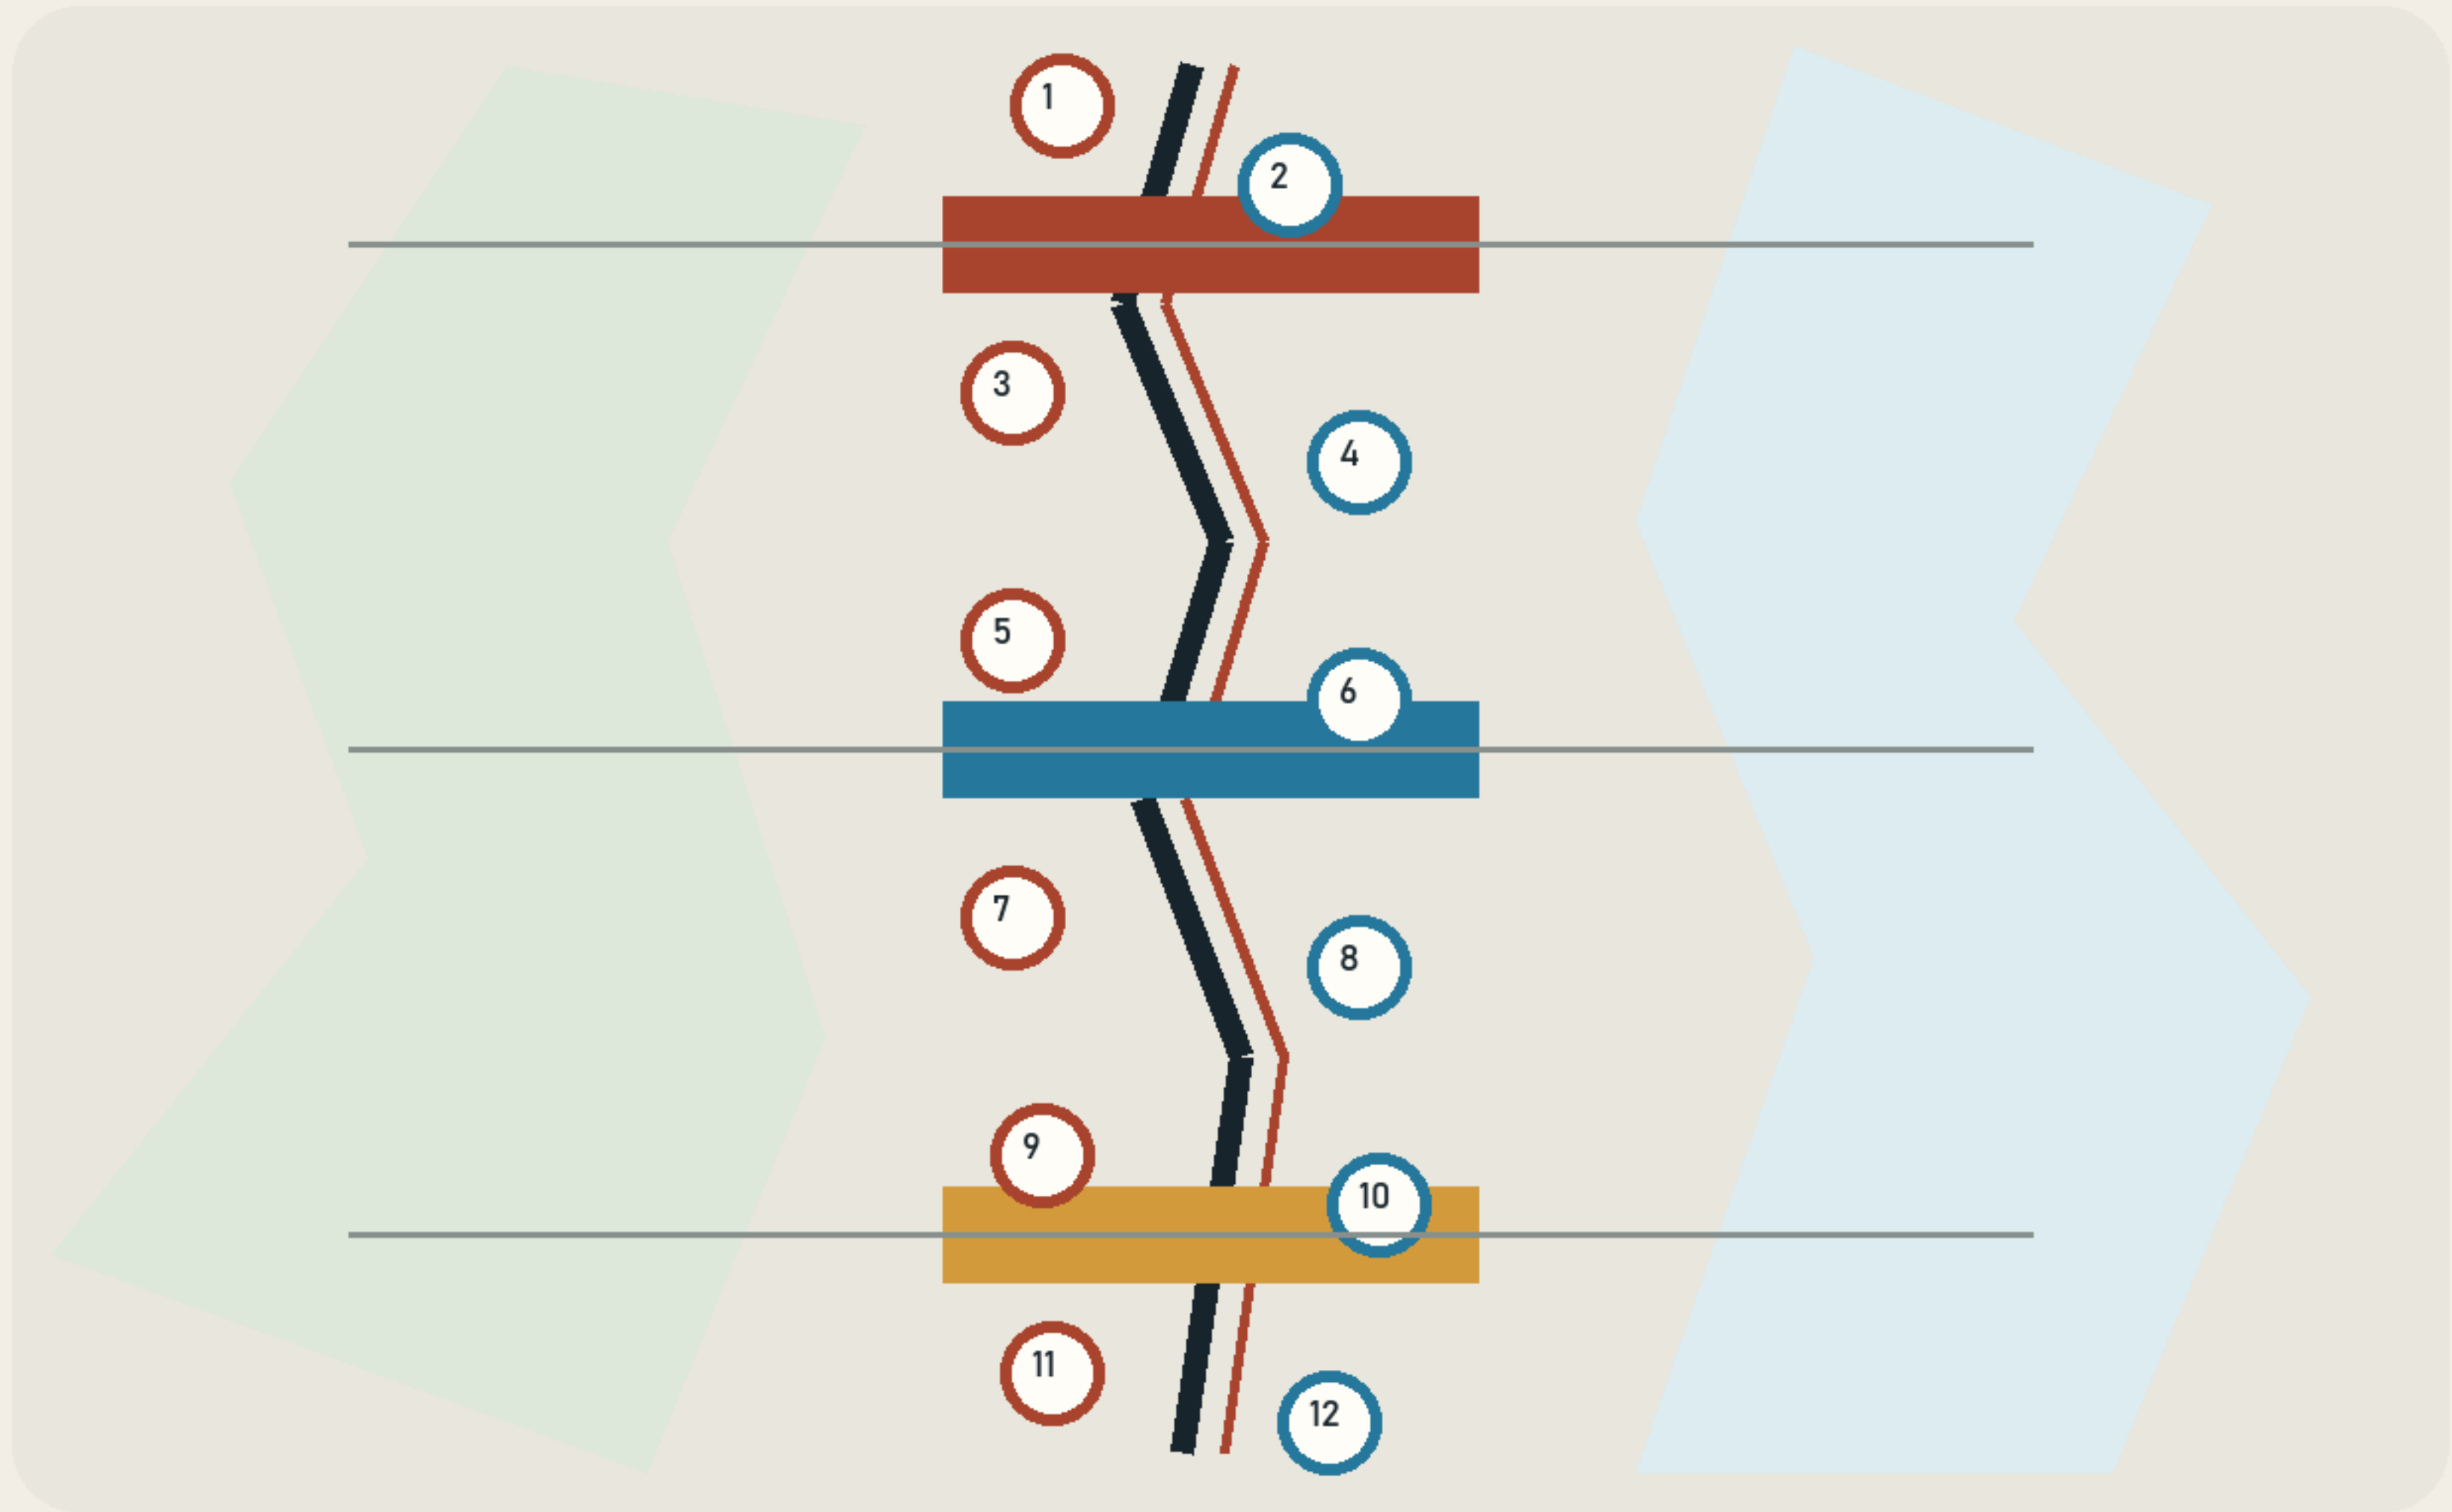

03 DAZHONGSI
SEAT EXCHANGE

- Four-quadrant station stitch
- Merchant digital services
- International exchange and public review

Human handoff · merchant opt-out · rights traceable

Twelve seats: AI arrives only with access, shade, and human service

Walk when offline · complete service without a phone · remove every expired pilot

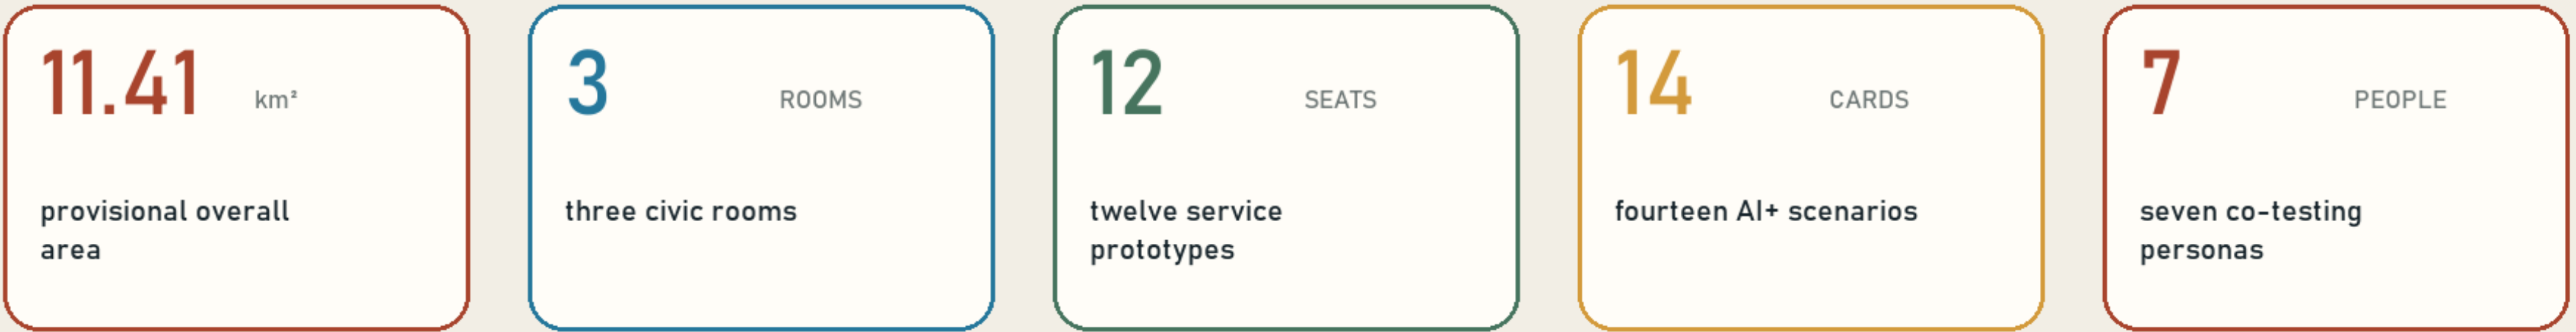

- 01 SIT / PAUSE**
Shade, backrest, wheelchair turn
- 02 NO PHONE NEEDED**
Paper, touch, physical signs
- 03 HUMAN HANDOFF**
Steward, phone, service hours
- 04 MINIMUM DATA**
Purpose, retention, device register
- 05 EXIT AT EXPIRY**
Remove, delete, continuity plan

ACCESS BEFORE INTELLIGENCE

Technology does not prove value; public value decides continuation

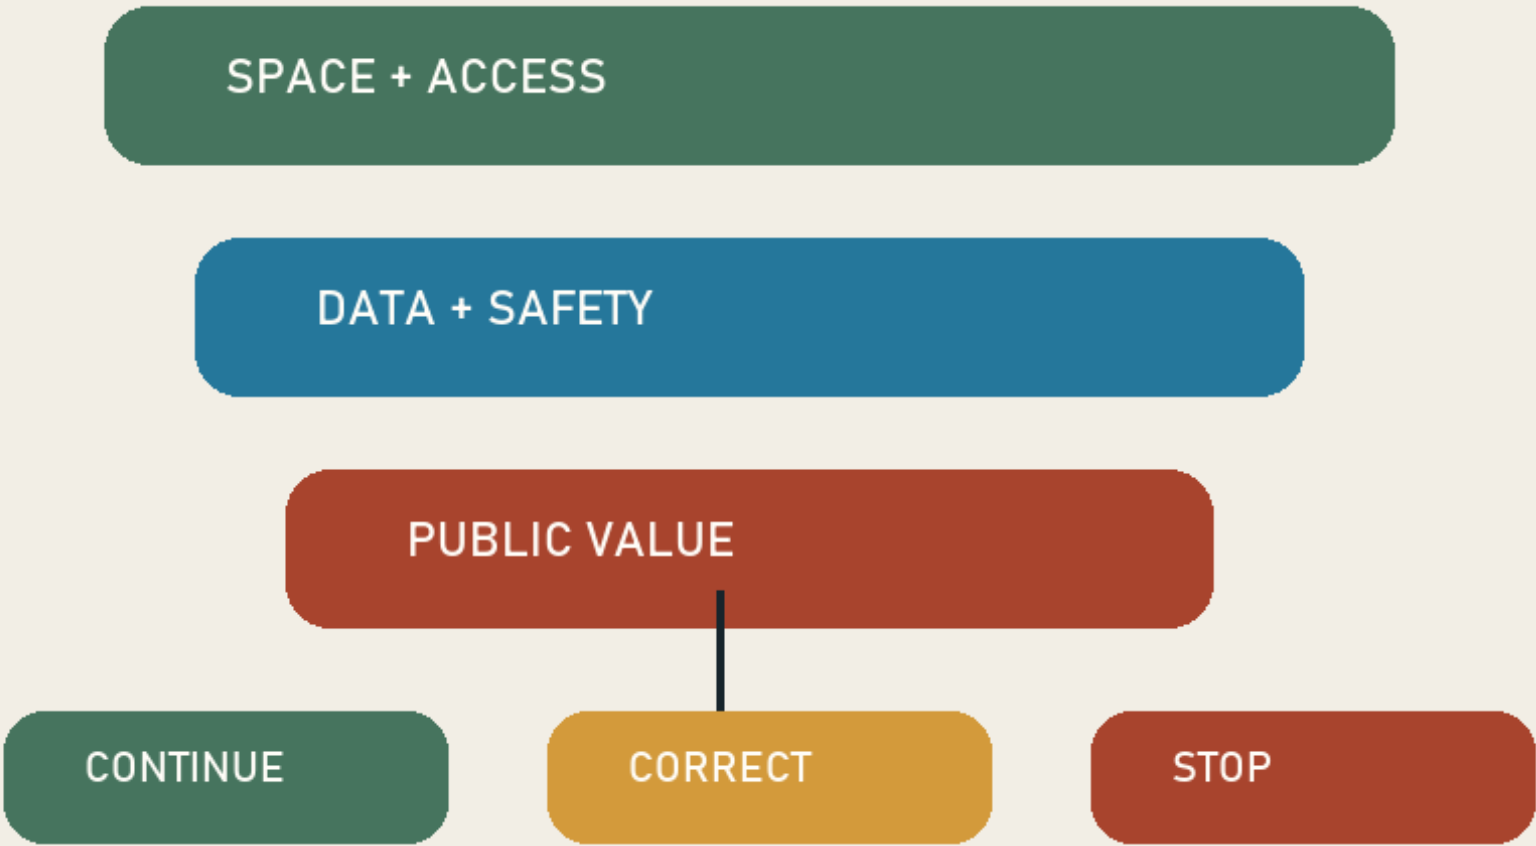

Geometry is recalculable, outputs countable, outcomes measured only after operation

THE FIVE ONE-SEAT QUESTIONS

- 1 Can a person really sit or pause here?
- 2 Can the service work without a phone?
- 3 Is data use minimal and clear?
- 4 Can a responsible human be reached?
- 5 Can it fully exit at expiry?

100-DAY REVIEW

THE ONE-SEAT RULE

Before an AI pilot receives city space, it returns visible public benefit.
Three gates: space, data, public value.
Result: continue, correct, or fully exit.
