

SPATIAL FRAMEWORK + CIVIC REPAIR RIGHTS

02 / SPATIAL STRUCTURE

One Line, Three Stations: Spatial Framework for Repair Rights

The provisional outline recedes; the design foregrounds the heritage spine, cross-links, and civic service nodes

FOUR SPATIAL ROLES

- Research + repair
- Heritage green spine
- Enterprise transition
- Civic + human fallback

3 stations / 12 repair ports

Grey outline is a provisional working frame; recalculate the complete package after official polygons arrive.

03 / KEY AREAS

Three Public AI Repair Stations

Industrial retesting, civic repair, and enterprise-service handoff create a complete maintenance loop

All key-area polygons are provisional; Dazhongsi also carries the community warning in Issue #1029.

01 / DESIGN THESIS

From Railway Maintenance to the Civic Right to Repair AI

Visible faults, named owners, human handoff, exit rights, and retesting

Provisional geometry supports concept review only and is not a statutory boundary.

SCENARIOS, INFRASTRUCTURE + EVIDENCE

Public AI Repair Passport: purpose · owner · minimum data · human handoff · expiry · stop · retest

Geometry is provisional; recalculate the complete package after official polygons arrive.

FAR, height, total floor area, and investment remain unknown pending official evidence.
