京张维修权

THE RIGHT TO REPAIR JING-ZHANG

让每一项公共AI服务都可报修、可接管、可退出、可复测

02

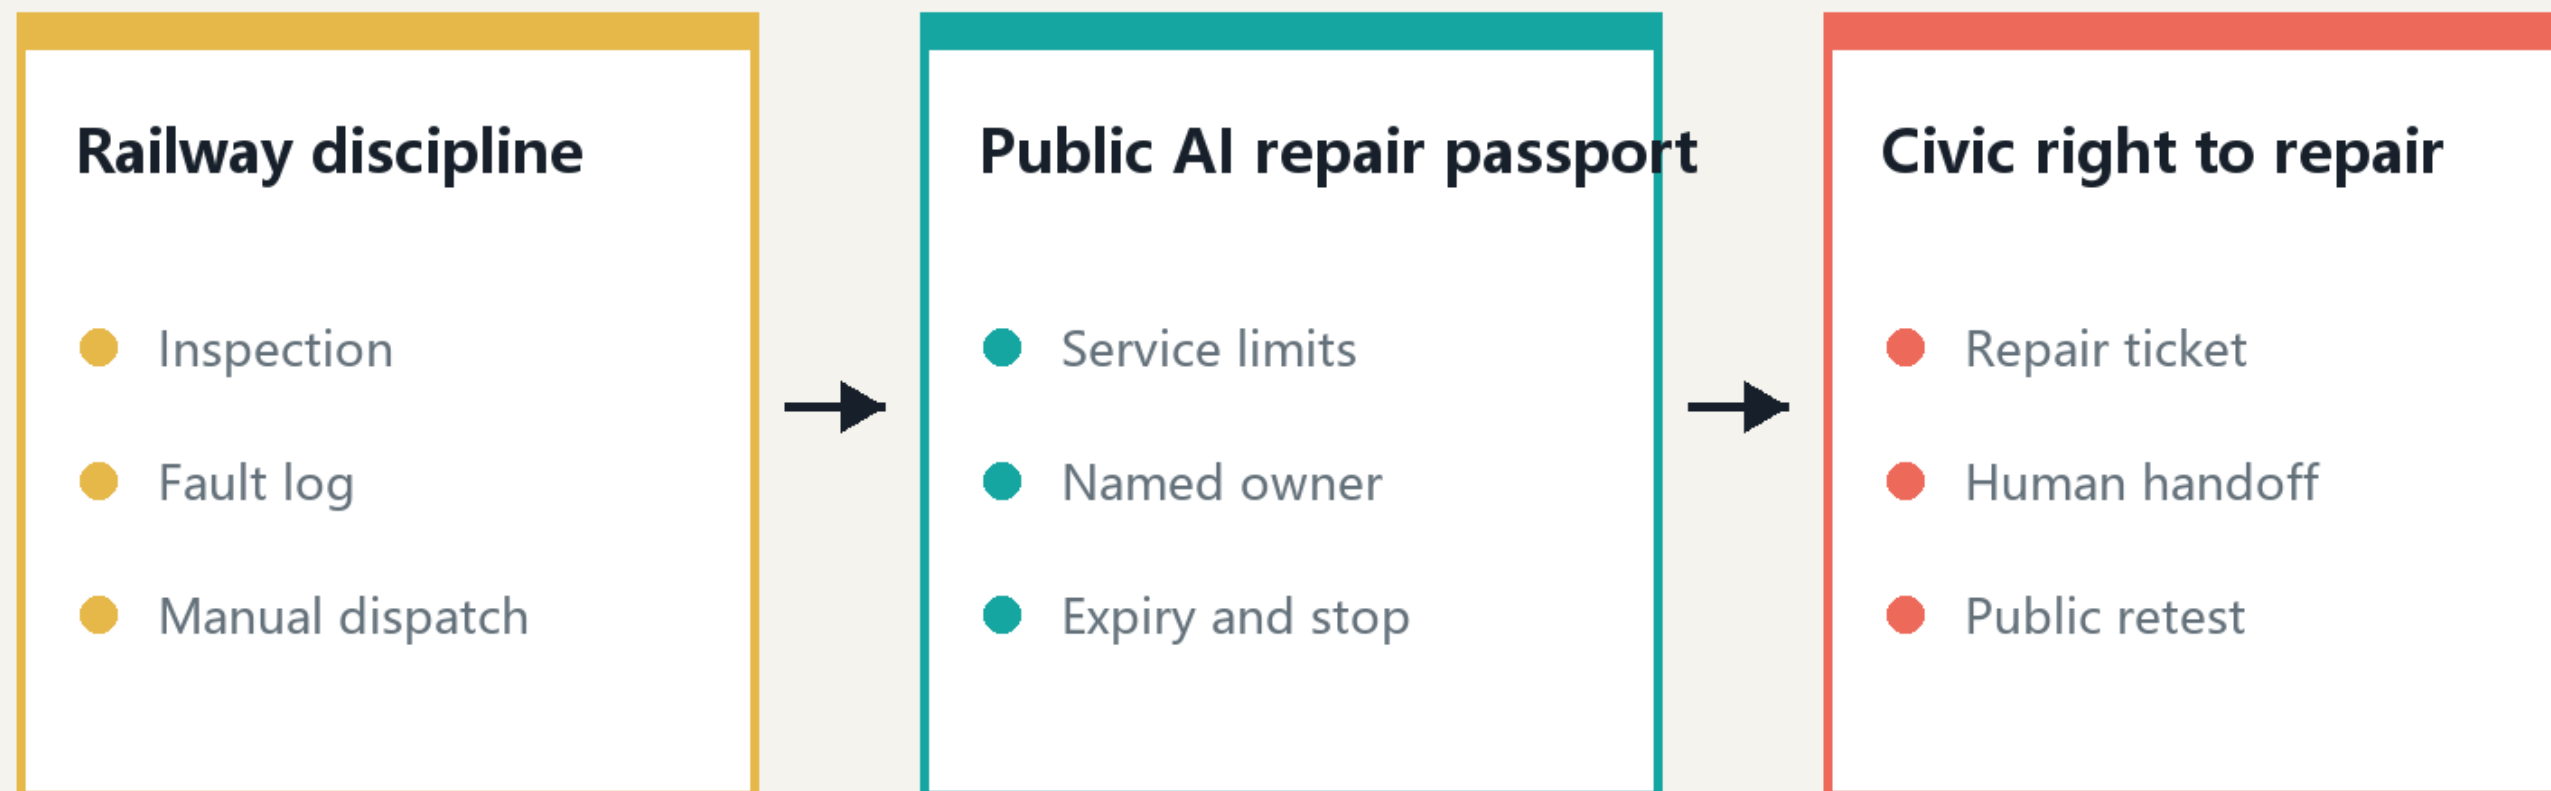

1 MAINTENANCE WALK • 3 REPAIR STATIONS • 12 REPAIR PORTS

Concept proposal based on provisional geometry

From Railway Maintenance to the Civic Right to Repair AI

Visible faults, named owners, human handoff, exit rights, and retesting

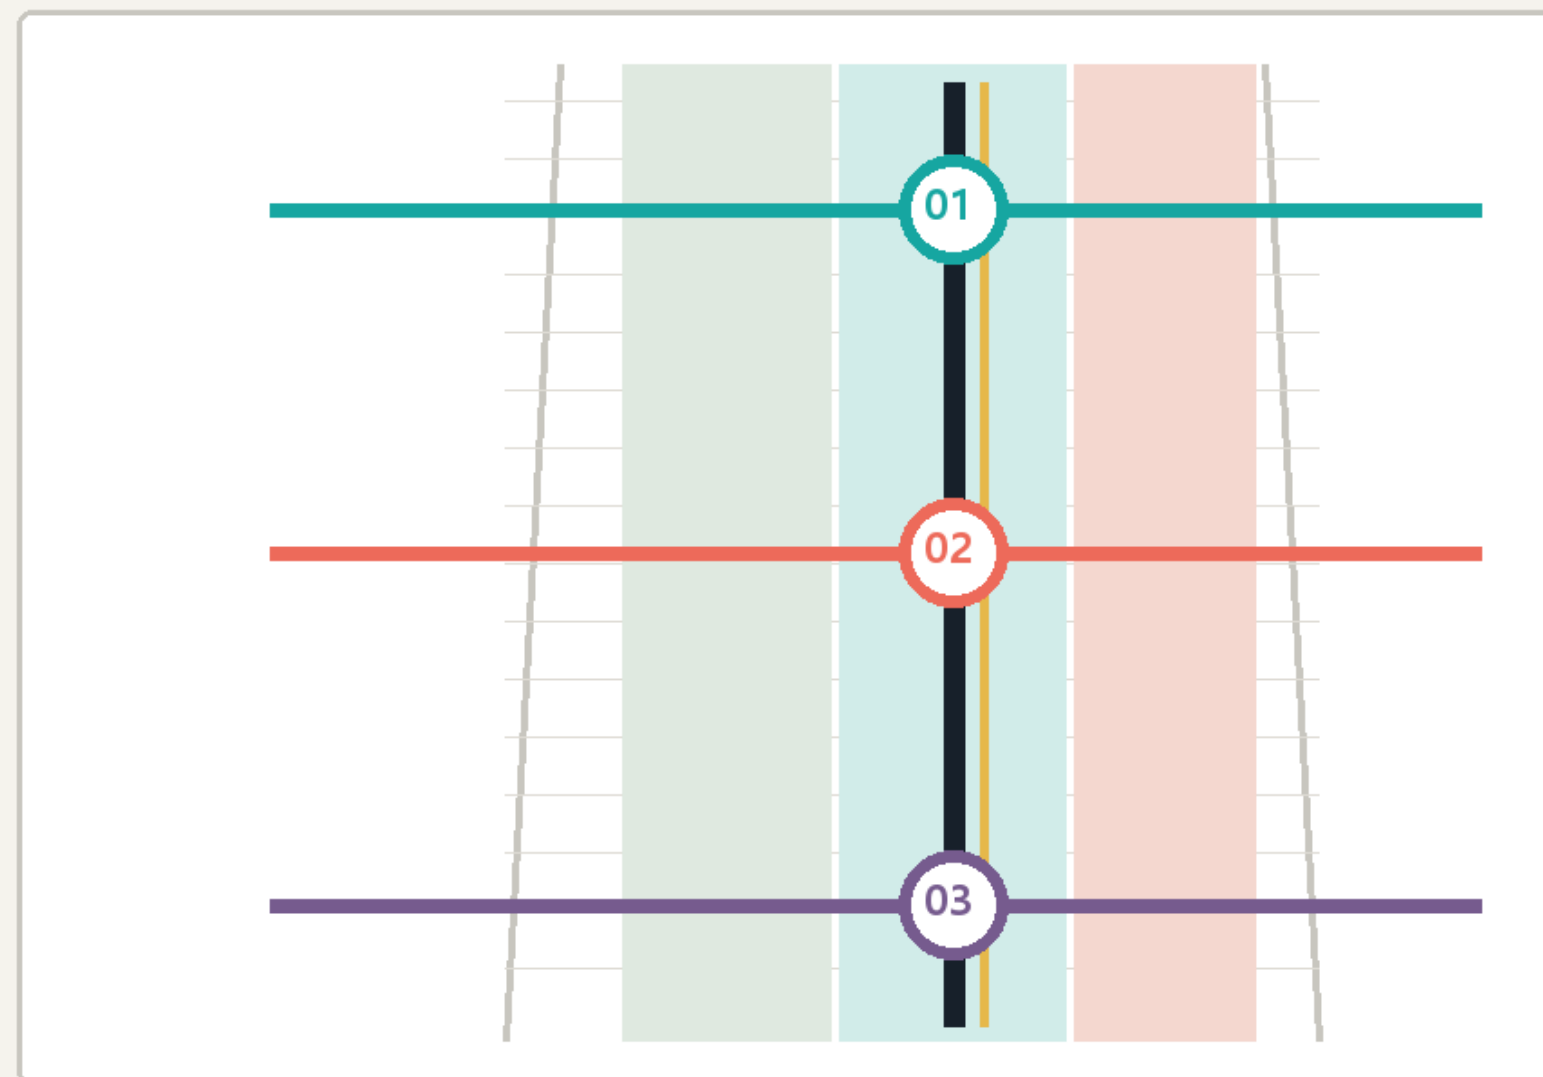

Provisional geometry supports concept review only and is not a statutory boundary.

02 / SPATIAL STRUCTURE

One Line, Three Stations: Spatial Framework for Repair Rights

The provisional outline recedes; the design foregrounds the heritage spine, cross-links, and civic service nodes

FOUR SPATIAL ROLES

- Research + repair
- Heritage green spine
- Enterprise transition
- Civic + human fallback

3 stations / 12 repair ports

Grey outline is a provisional working frame; recalculate the complete package after official polygons arrive.

Three Public AI Repair Stations

Industrial retesting, civic repair, and enterprise-service handoff create a complete maintenance loop

Reachable, Visible, and Backed by People

Walking, blue-green space, low-speed trials, and staffed services share one spatial framework

All alignments are conceptual and require transport, rail-safety, accessibility, fire, and ownership review.
