THE DIGNITY SUPPLY LINE

AI 原生城市的经期尊严补给基础设施

匿名取用 · 批次可溯 · 真实状态 · 人工恢复

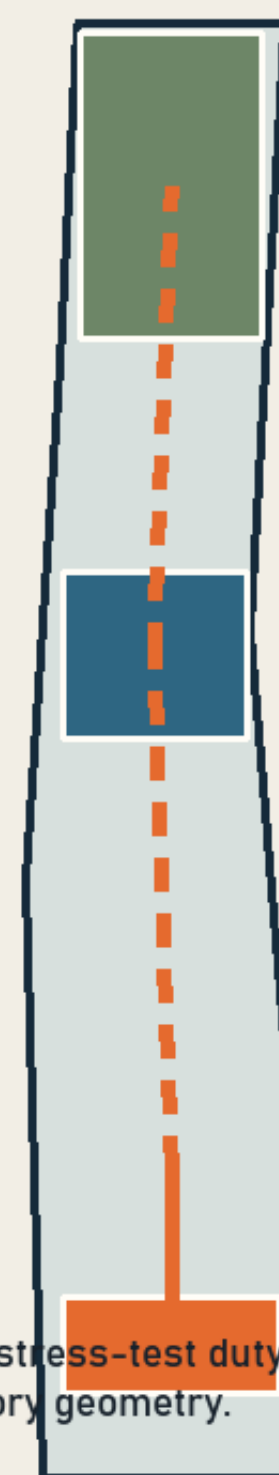

CONCEPTUAL / ROUGH PROVISIONAL EXTENT / REAL SITES UNKNOWN

ONE EMERGENCY UNIT REQUIRES A COMPLETE DUTY CHAIN

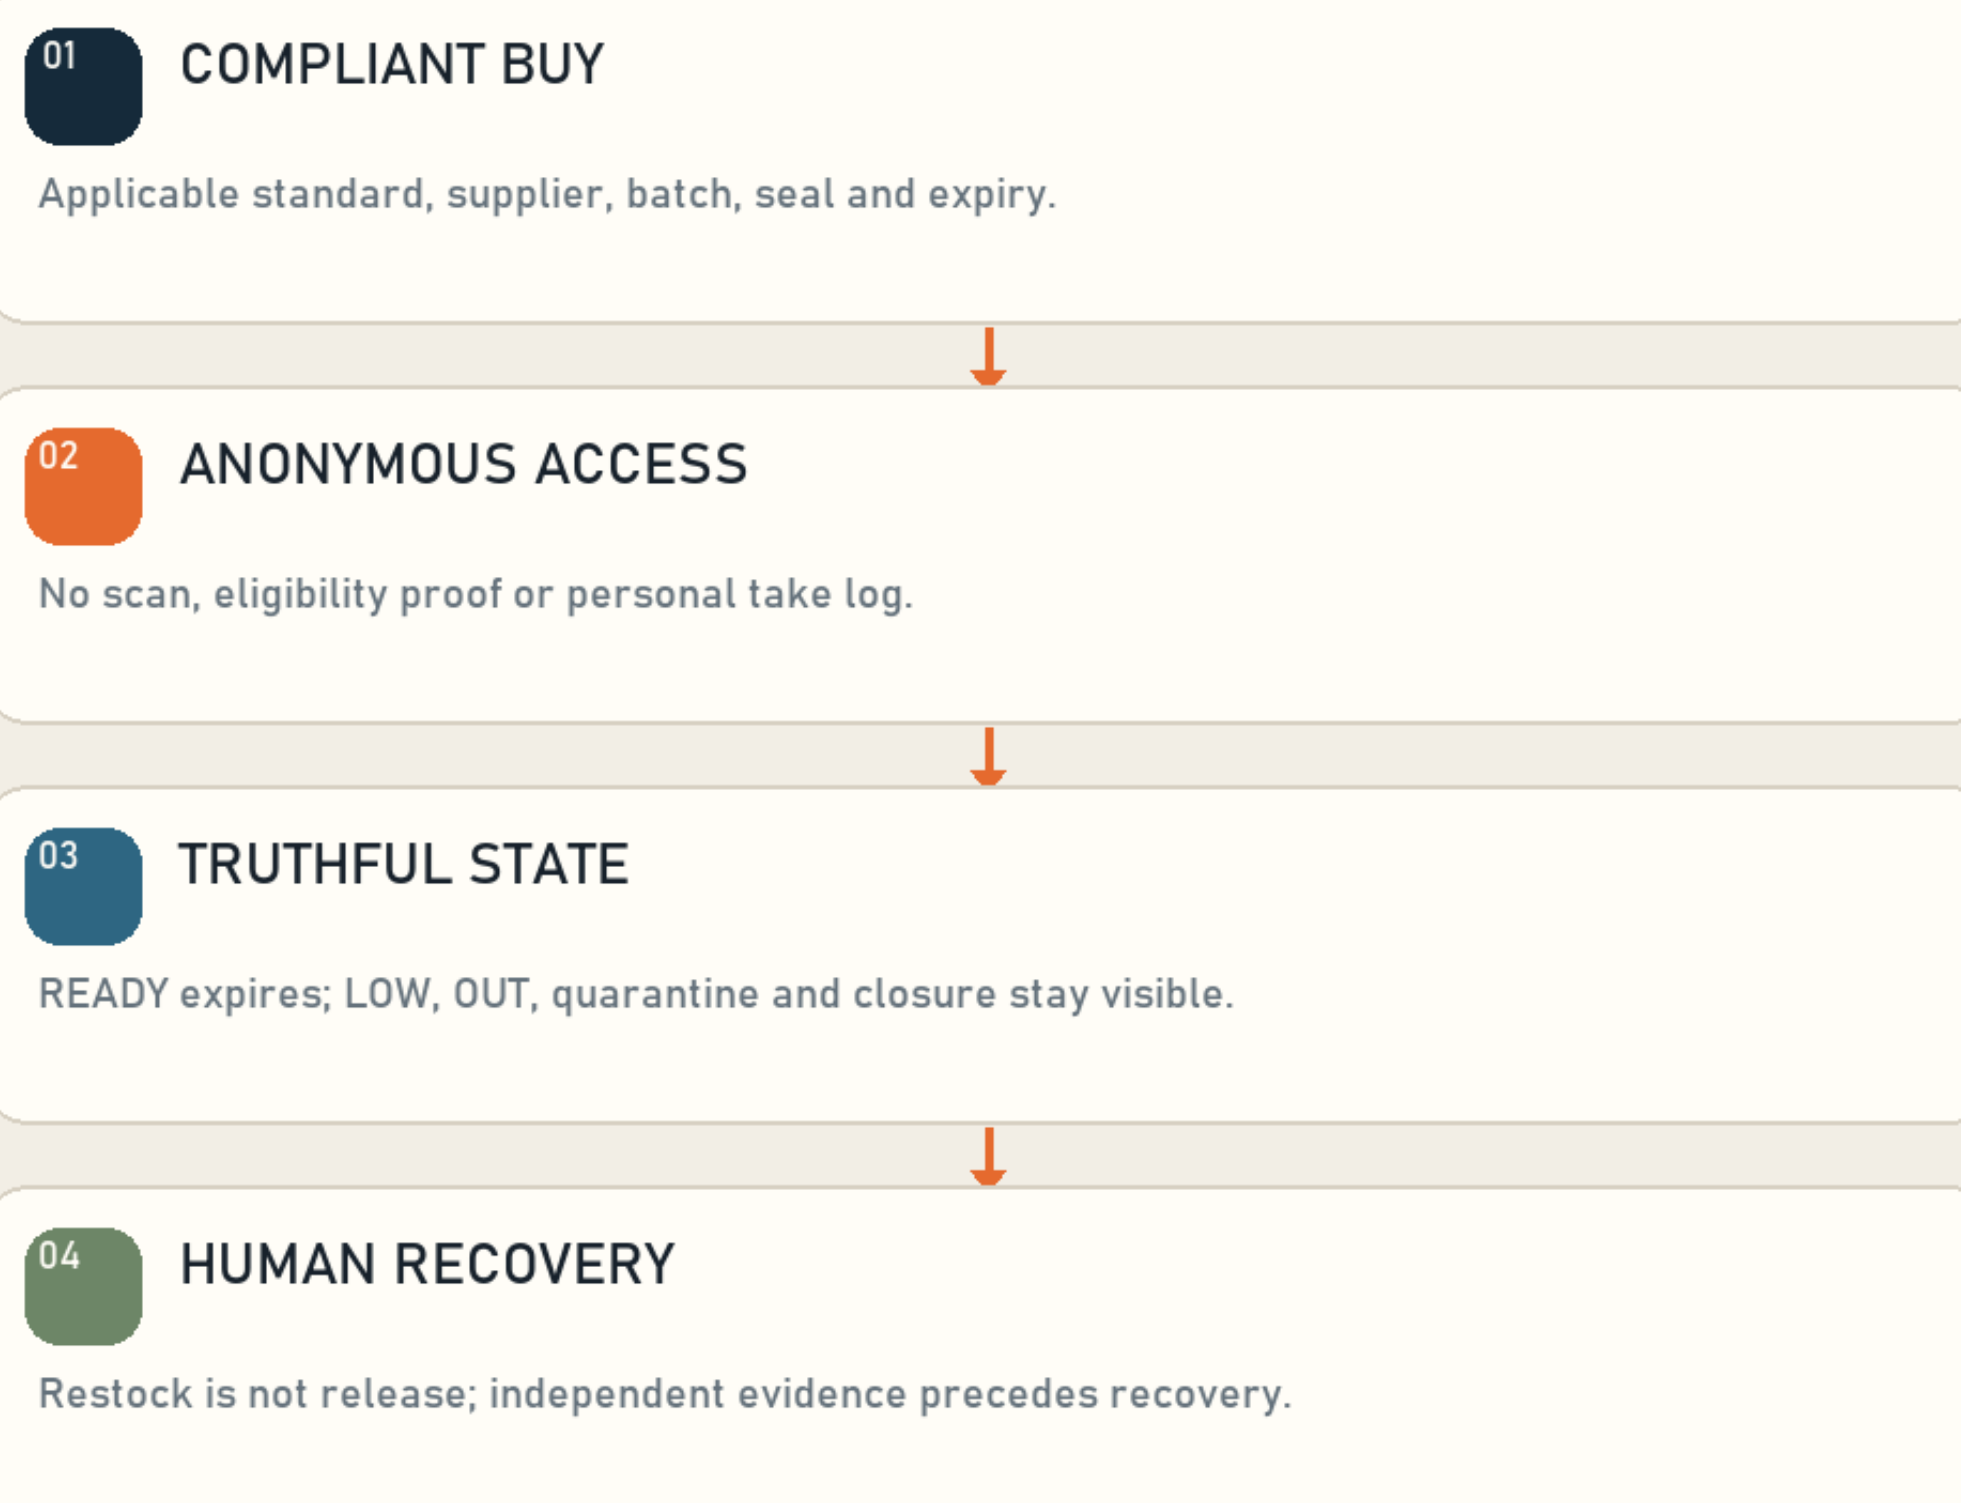

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

No identity · no phone · traceable batch · graceful failure · human recovery

ROUGH / PROVISIONAL

Shows the lab—operation—stress-test duty relationship only; not sites, routes, radii or statutory geometry.

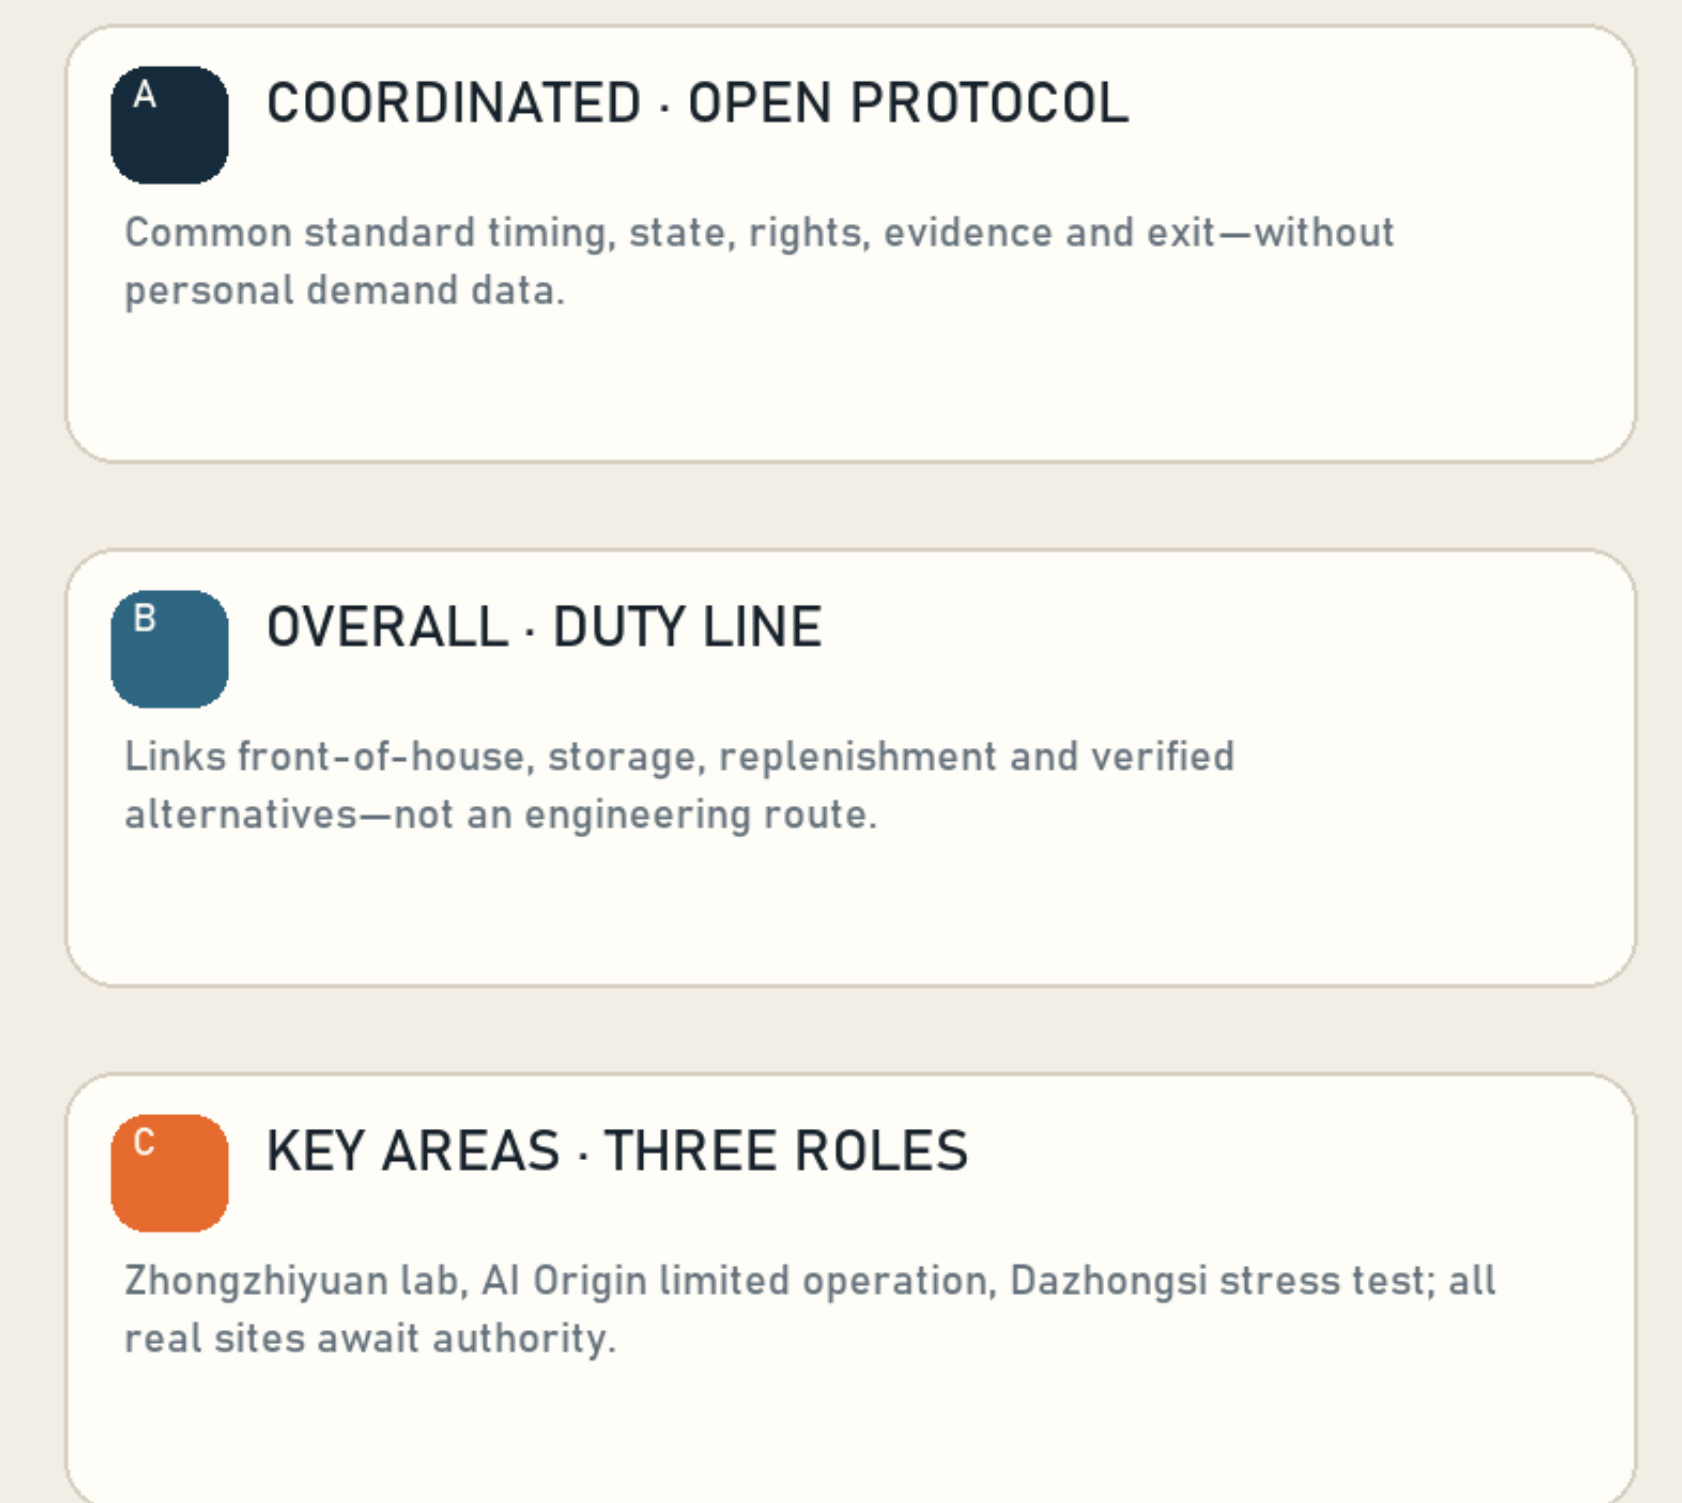

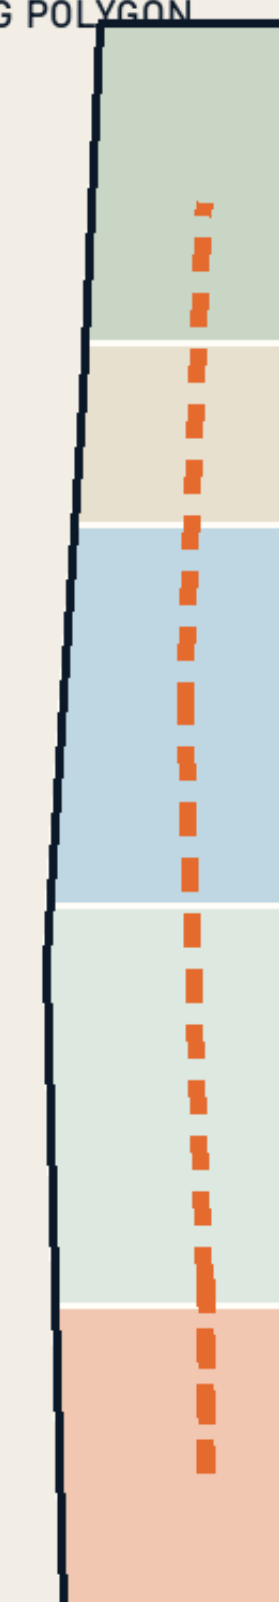

THREE SCALES: PROTOCOL, DUTY LINE, DIFFERENT PRODUCTION ROLES

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

Topology supports recalculation only; statutory use, title, intensity, sites and engineering remain UNKNOWN

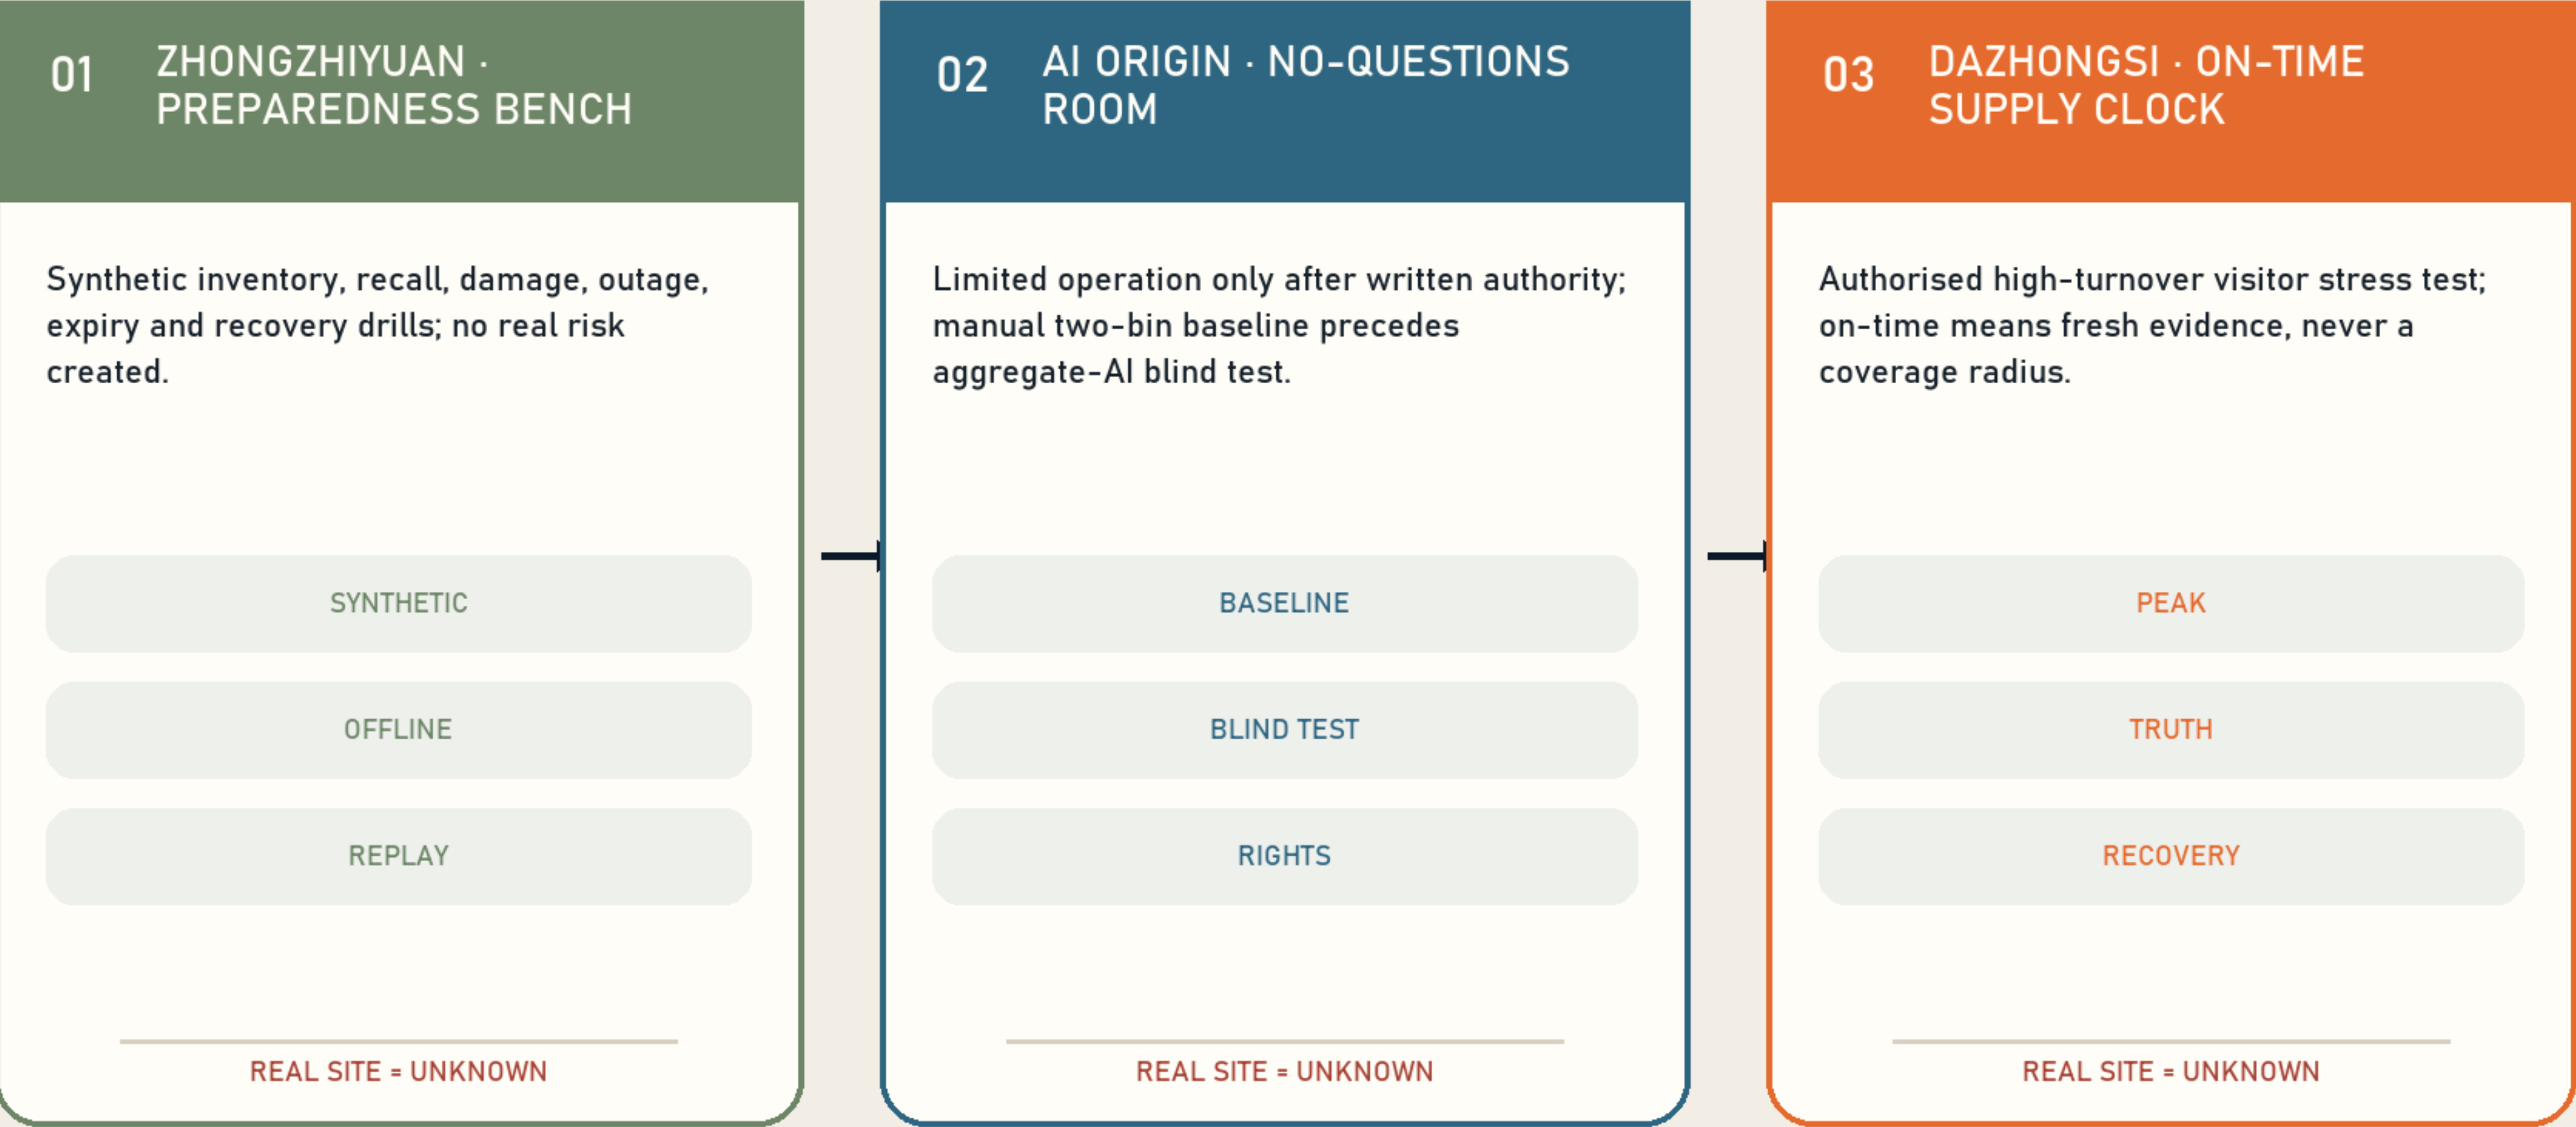

11.4 km² TEXT SCOPE / ROUGH WORKING POLYGON

NORTH LAB · CENTRAL OPERATION · SOUTH STRESS TEST

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

Do not replicate devices: produce evidence, validate service, expose failures

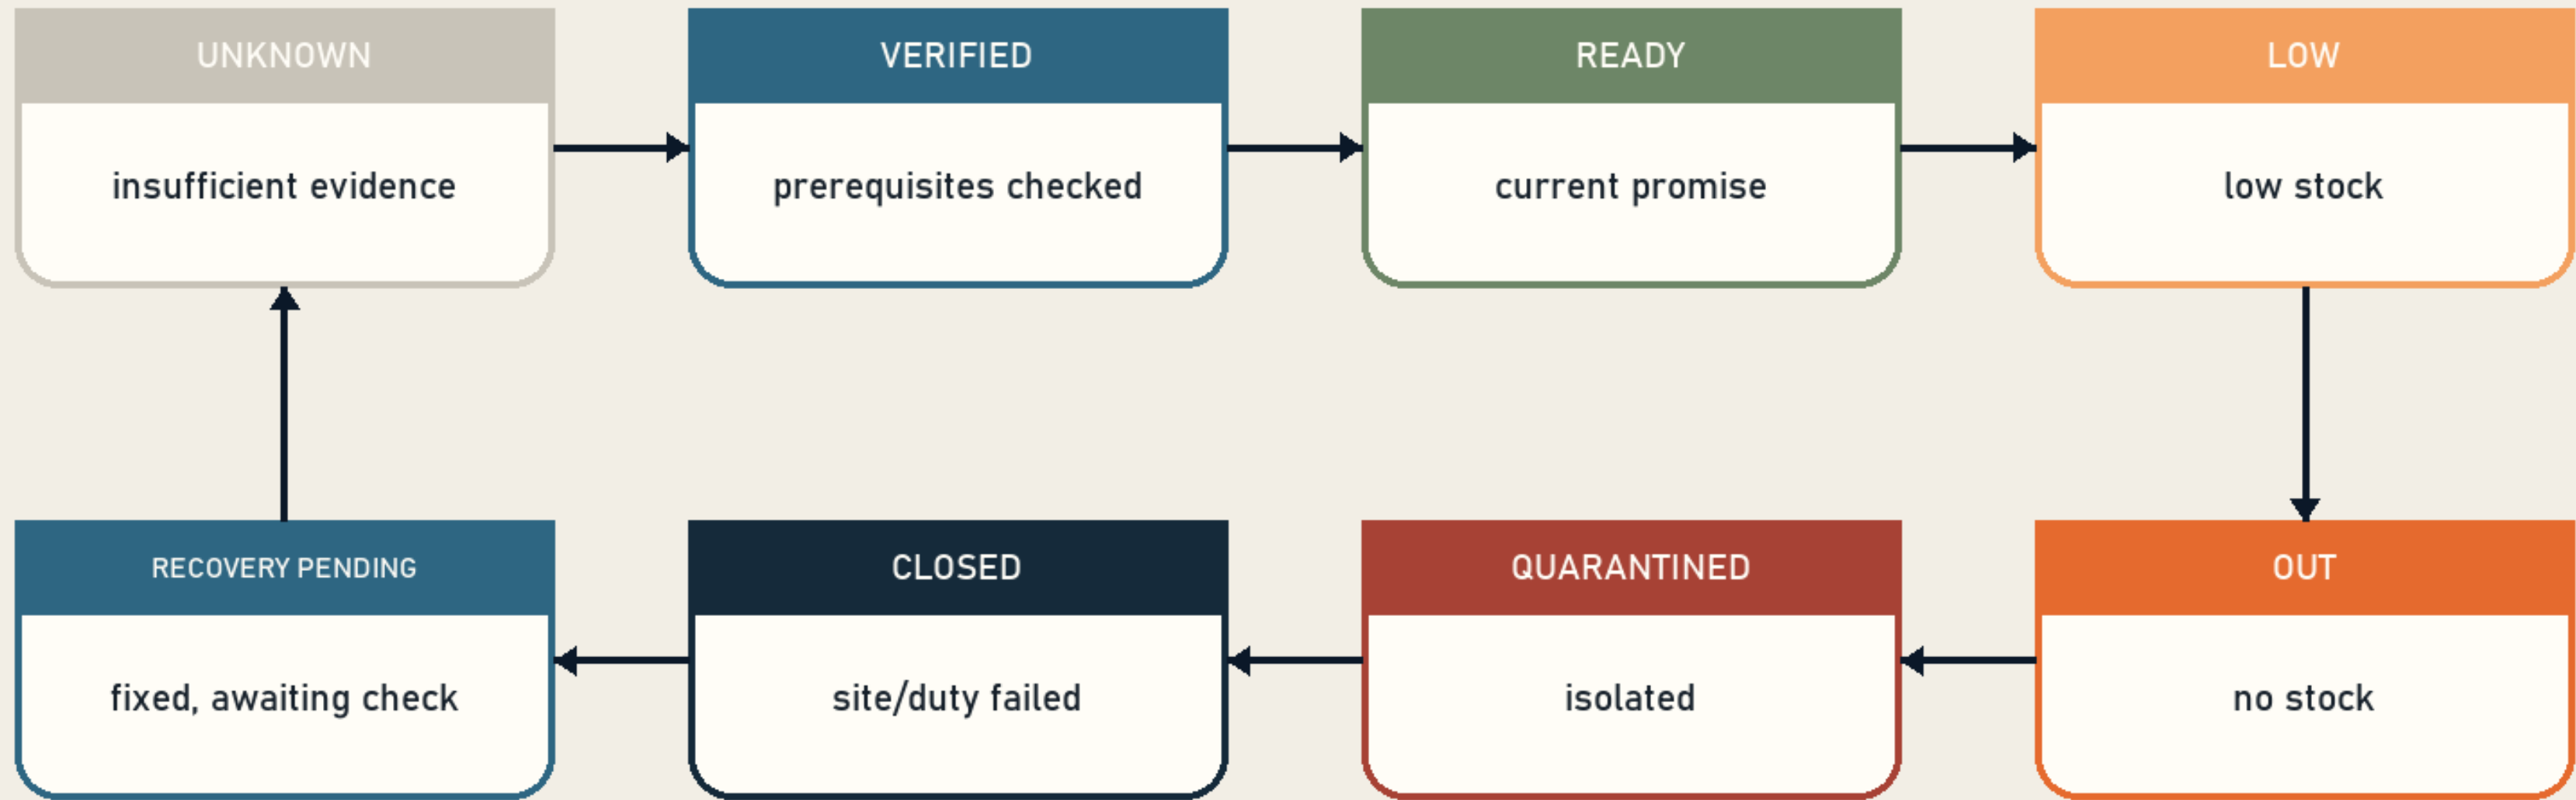

Repository geometry is rough/provisional; title, roads, buildings, utilities, fire, drainage, cleaning, privacy and operations require field confirmation.

NOT A MOBILITY MAP: A NEGATIVE-FEEDBACK SERVICE LOOP

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

AI may flag; authorised people purchase, quarantine, restock, close and recover

NO-AI / OFFLINE BASELINE

Two sealed bins + paper state + named manual count + fixed reorder point. It survives no phone, network, power or model; failed prerequisites produce truthful closure.

Restock enters RECOVERY_PENDING. Independent human evidence returns it to VERIFIED; only an authorised role may then declare READY.

NINETY DAYS: PROVE THE SERVICE BEFORE PROVING AI

CONCEPTUAL · ROUGH PROVISIONAL EXTENT

Real site count = UNKNOWN · AI net value = UNKNOWN · example events = SYNTHETIC

STOP / EXIT

Untraceable or recalled release; identity/health/trace collection; absent authority; failed water/privacy/cleaning/disposal; false READY; retaliation or eligibility screening.

Measure task completion, failure distribution, waste, staff minutes and safe release—not scans, model calls or screen count.
