

JINGZHANG AI GENOME

Centennial Jing-Zhang AI Innovation Belt · Formal A3 Booklet

Baseline diagnosis in 45 hospitals by August 1998

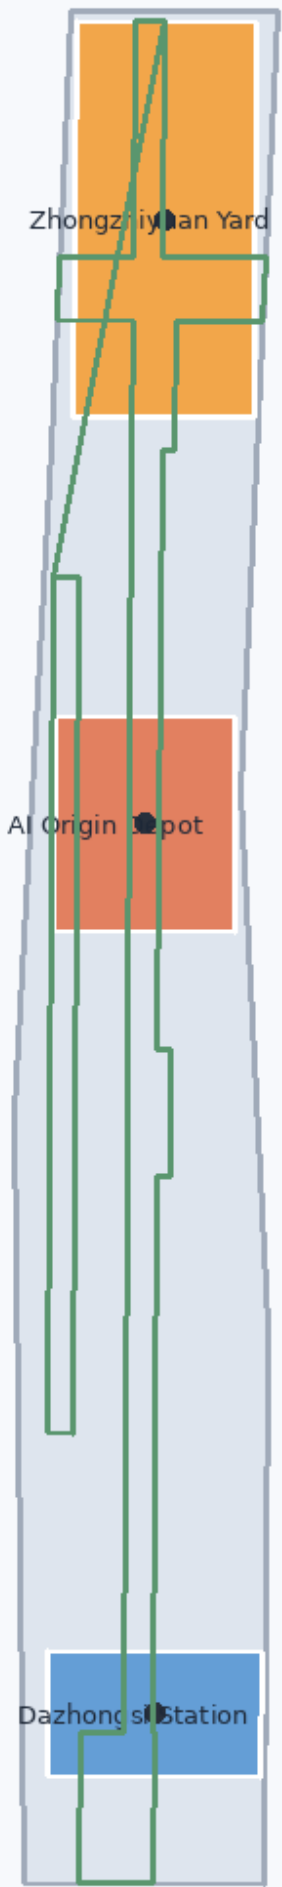

1. Overview & Three Zones

Overall structure

Spine + 2 corridors + 3 zones + 2 wings + AI nodes; open-standard protocol stack. Provisional boundaries.

JINGZHANG AI GENOME · Overview

Overall Structure & Three Zones

Zones / Wings

- Heritage Park Spine
- Qinghe / Xiaoyue Blue-Green
- Zhongzhiyuan Yard
- AI Origin Depot
- Dazhongsi Station
- Slow-traffic Greenways
- AI scenario nodes

Key metrics (provisional)

Site area	11.41 km²
Green ratio	23.0%
Public-space ratio	18.0%
Slow network	18.5 km
Key areas	3

Provisional constraint;
not official redline.

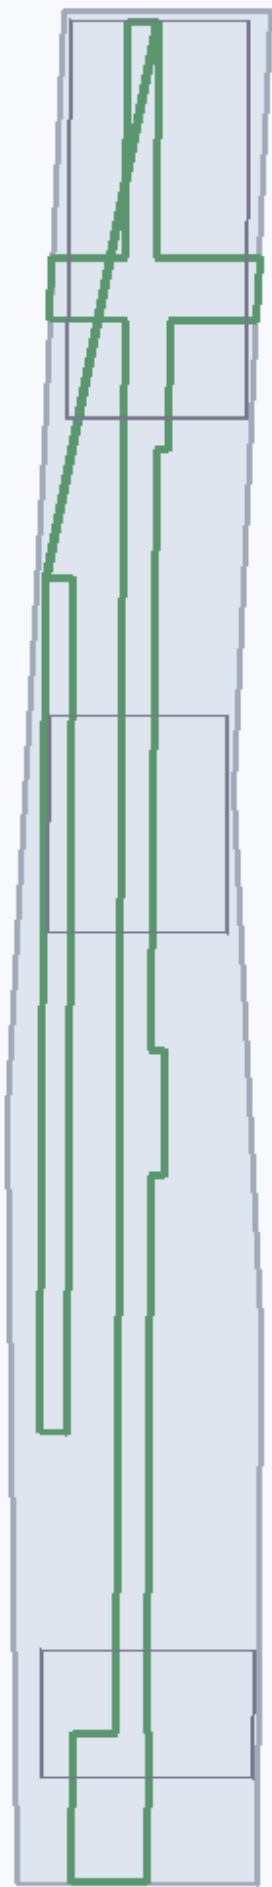

2. Land Use & Structure

Land use & spatial structure

0802 AI R&D / 1401 park / 05 industry-commerce / 0702 community; three-level scope cascade.

JINGZHANG AI GENOME · Land Use & Structure

Land Use (NDLUC codes) & Spatial Structure

Land Use

- 0802 AI R&D
- 1401 Park/Open
- 05 Industry/Commerce
- 0702 Community

Structure

- Spine: heritage park slow axis
- 2 Corridors: Qinghe/Xiaoyue
- 3 Zones + 2 Wings
- Gateway nodes (N/Mid/S)
- 3-level scope cascade

Concept zoning (provisional);
not statutory control.

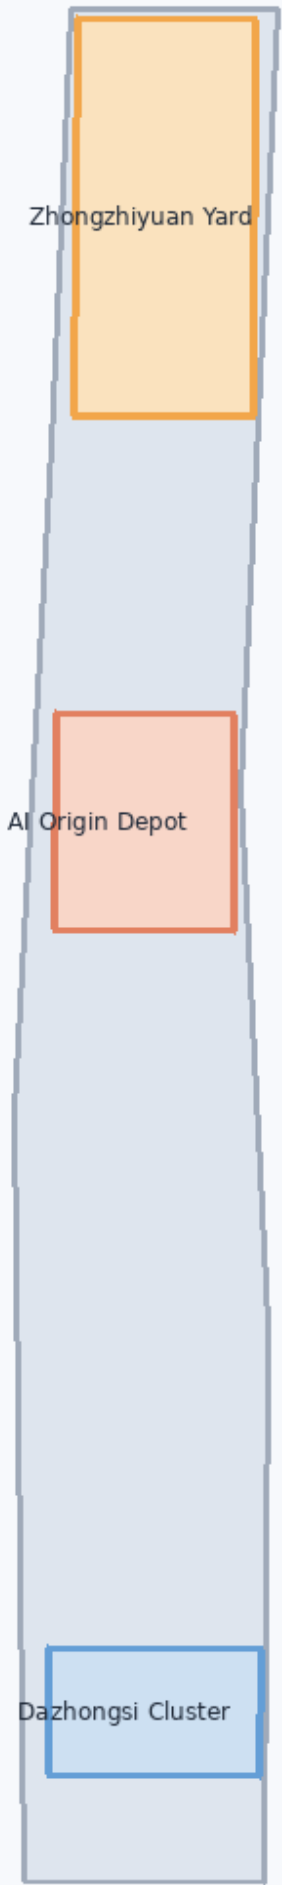

3. Three Key Areas

Detailed design index

Zhongzhiyuan yard / AI Origin depot / Dazhongsi cluster; TOD + public-space links + building renewal direction.

JINGZHANG AI GENOME · Three Key Areas

Detailed Design Index

Key Areas

Zhongzhiyuan Yard

Provisional boundary

AI Origin Depot

Provisional boundary

Dazhongsi Cluster

Provisional boundary

- Retain/renovate: for pro teams
- Public-space link across 3 zones
- TOD at rail stations
- ≥ 3 AI scenario nodes per zone

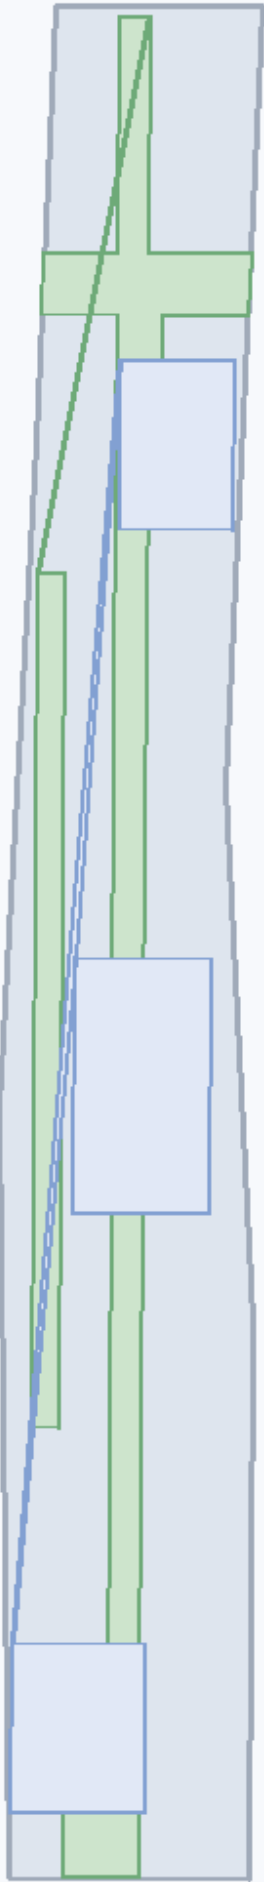

4. Mobility & Blue-Green Network

Slow traffic & blue-green

Spine + Qinghe cycle + Xiaoyue corridor; Wudaokou & Dazhongsi TOD; AI last-mile scenarios.

JINGZHANG AI GENOME · Mobility & Blue-Green

Slow traffic & blue-green network

Blue-Green

- Blue-green corridor
- Public-space nodes

Slow Traffic

- Main spine
- Qinghe cycle route
- Scenario route
- Local links

Rail

- Wudaokou TOD
- Dazhongsi 4-quadrant

AI Nodes

- Test field (Xiaoyue)
- Cycle/last-mile
- Delivery route

Metrics

Slow network	18.5 km
Green ratio	23.0%
Public ratio	18.0%

5. Metrics & Evidence Chain

Metrics recalc

EPSG:4548 recompute: green 23.0%, public 18.0%, network 18.5km; controls pending official data.

JINGZHANG AI GENOME · Metrics & Evidence

Recalculation & Evidence Chain

Basis: provisional PROV-SITE-001 (provisional_constraint; recompute on official boundary)

Site area site_area

11,412,825 m²

formula: polygon_area(site_boundary)
src: geometry/site_boundary.geojson

Green ratio green_ratio

23.0%

formula: green_area / site_area
src: geometry/green_space.geojson

Public-space ratio

18.0%

formula: public_area / site_area
src: geometry/public_space.geojson

Building footprint

522,440 m²

formula: union(buildings)
src: geometry/buildings.geojson

Slow network road_network

18.5 km

formula: Σ road length
src: geometry/roads.geojson

Key area count

3

formula: count(KEY_AREA)
src: geometry/key_areas.geojson

Phase 1 area

3.60 km²

formula: polygon_area(phase_1)
src: geometry/phasing.geojson

Phase 2 area

4.58 km²

formula: polygon_area(phase_2)
src: geometry/phasing.geojson

Pending official data (unknown)

floor_area_ratio — official control missing

building_height — awaiting approved heights

density / floor-area / setbacks — pending conditions

Recalc & self-check

- ✓ spatial_review OK (provisional minor only)
- ✓ METRIC_RECALC consistent
- ✓ land_use seamless, no overlap
- ✓ visual data matches metrics.json

Note: derived from geometry/metrics/self-check; authoritative data is GeoJSON/JSON.
