

THE 1:1 PROPOSITION

The diagram consists of three horizontal rectangular boxes, each with a colored border and a light background. The first box on the left has a purple border and contains the text 'MAKE' at the top left and 'build' in the center, with 'N3' at the bottom right. The middle box has a green border and contains the text 'TRANSLATE' at the top left and 'translate' in the center, with 'N0/N1' at the bottom right. The third box on the right has an orange border and contains the text 'USE' at the top left and 'adopt' in the center, with 'N2->N0' at the bottom right.

each step records inputs, owner, failure mode and next destination

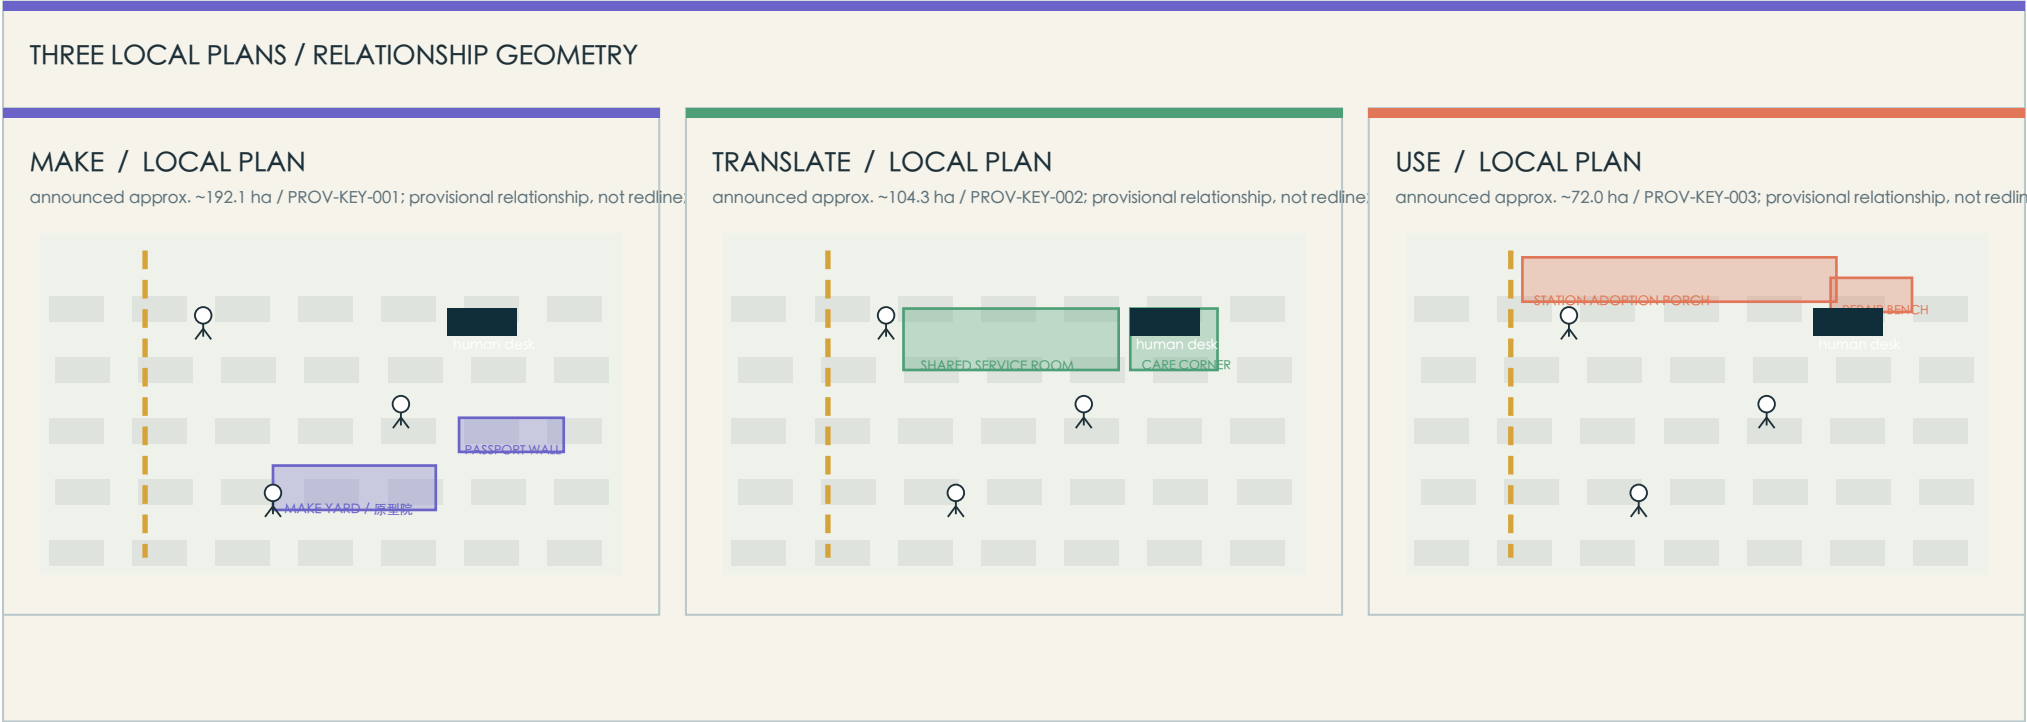

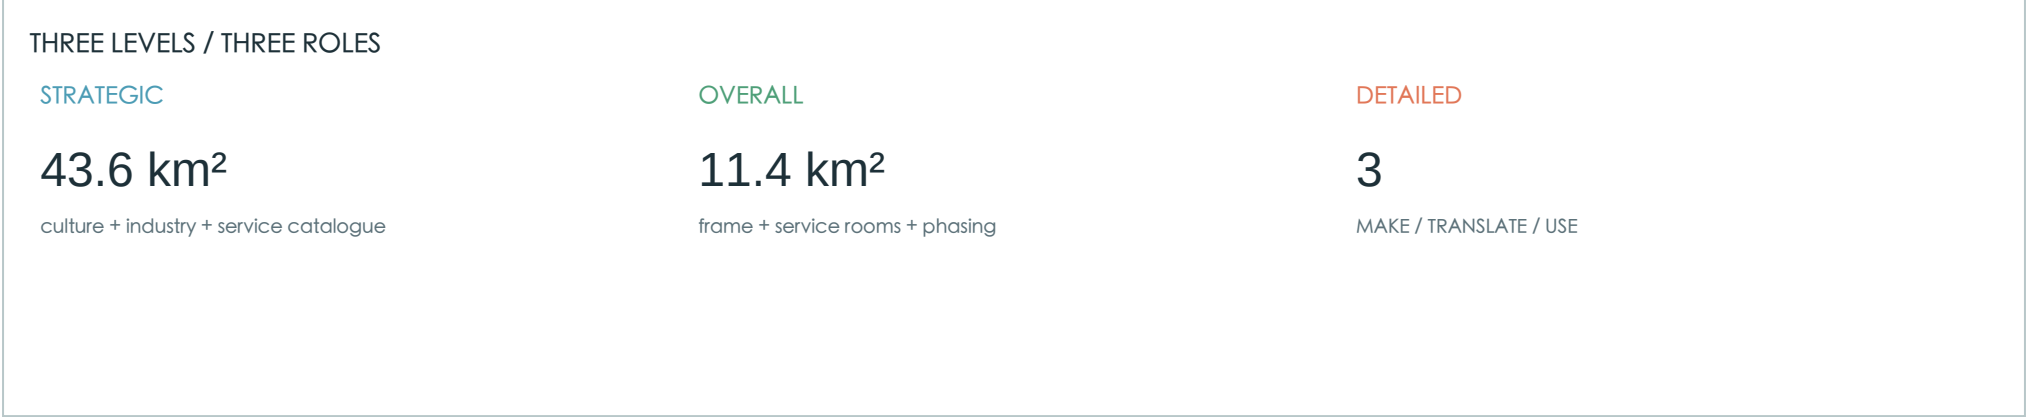

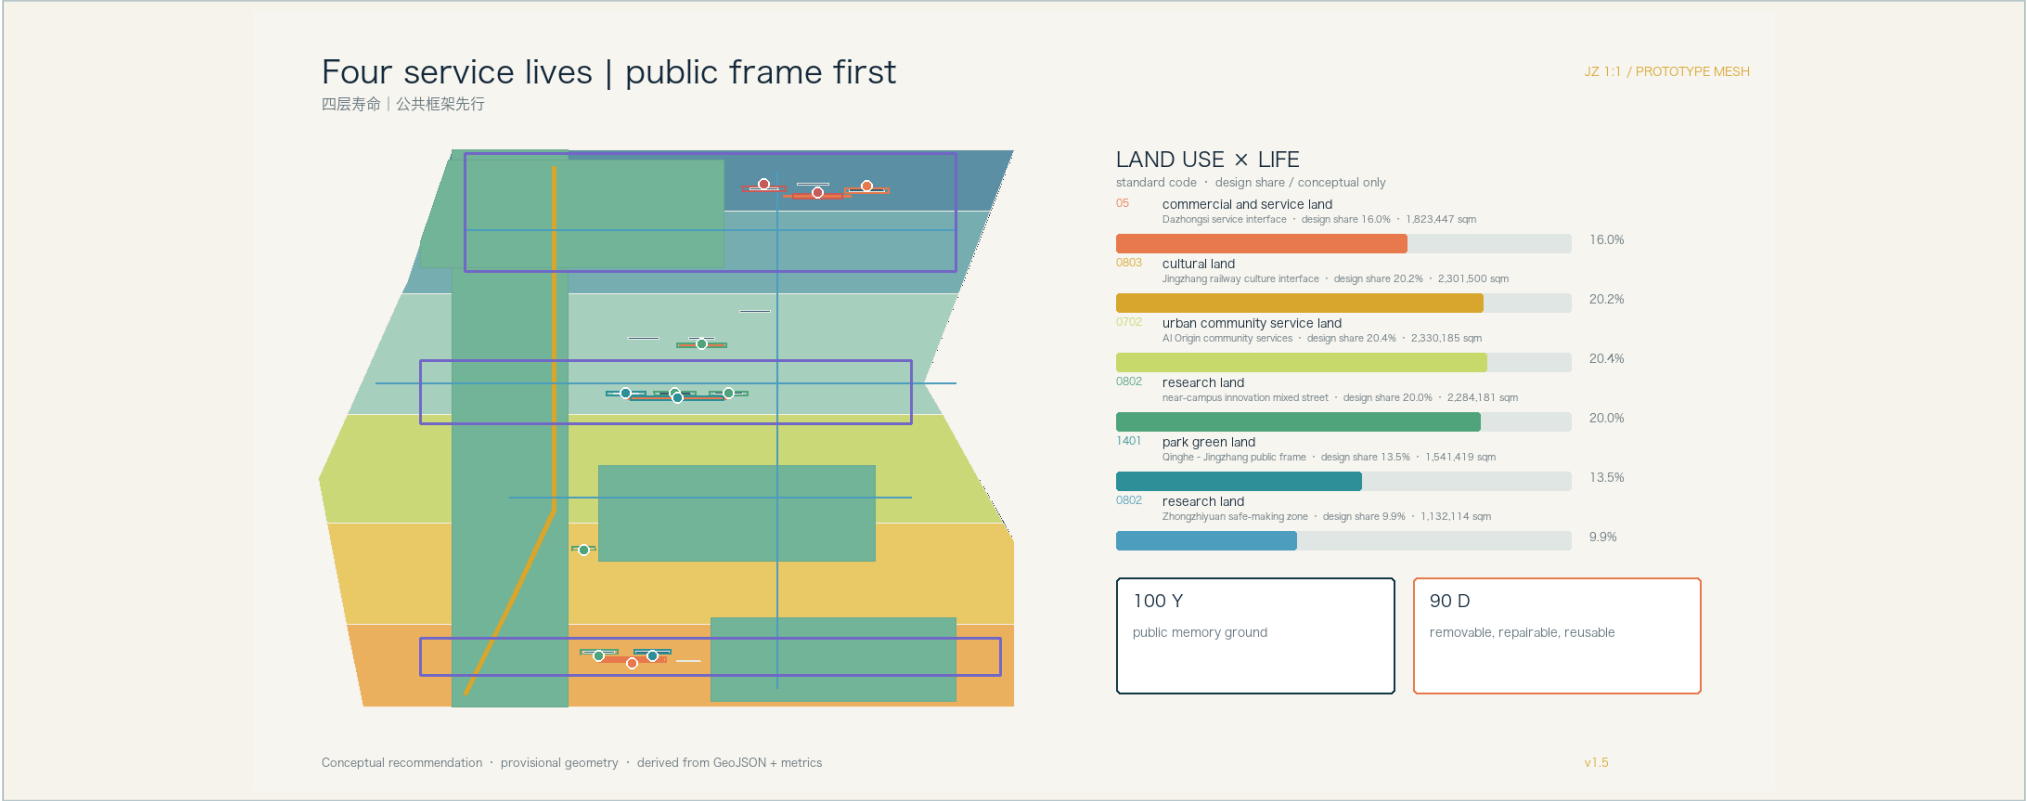

stopping is a visible ground-state change, not a backend toggle

drawings / public sources + conceptual geometry / version v1.5

THREE LEVELS, SIX NODE TYPES

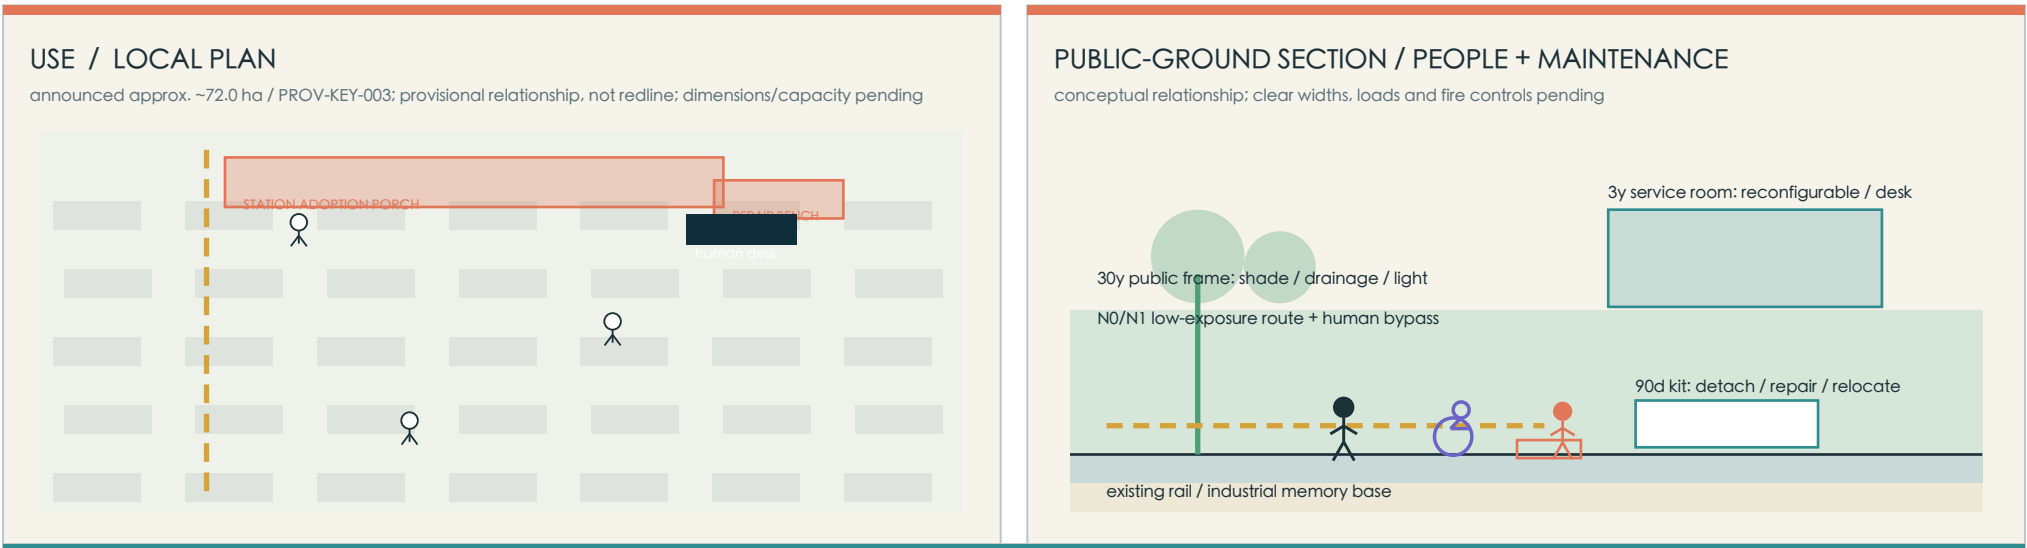

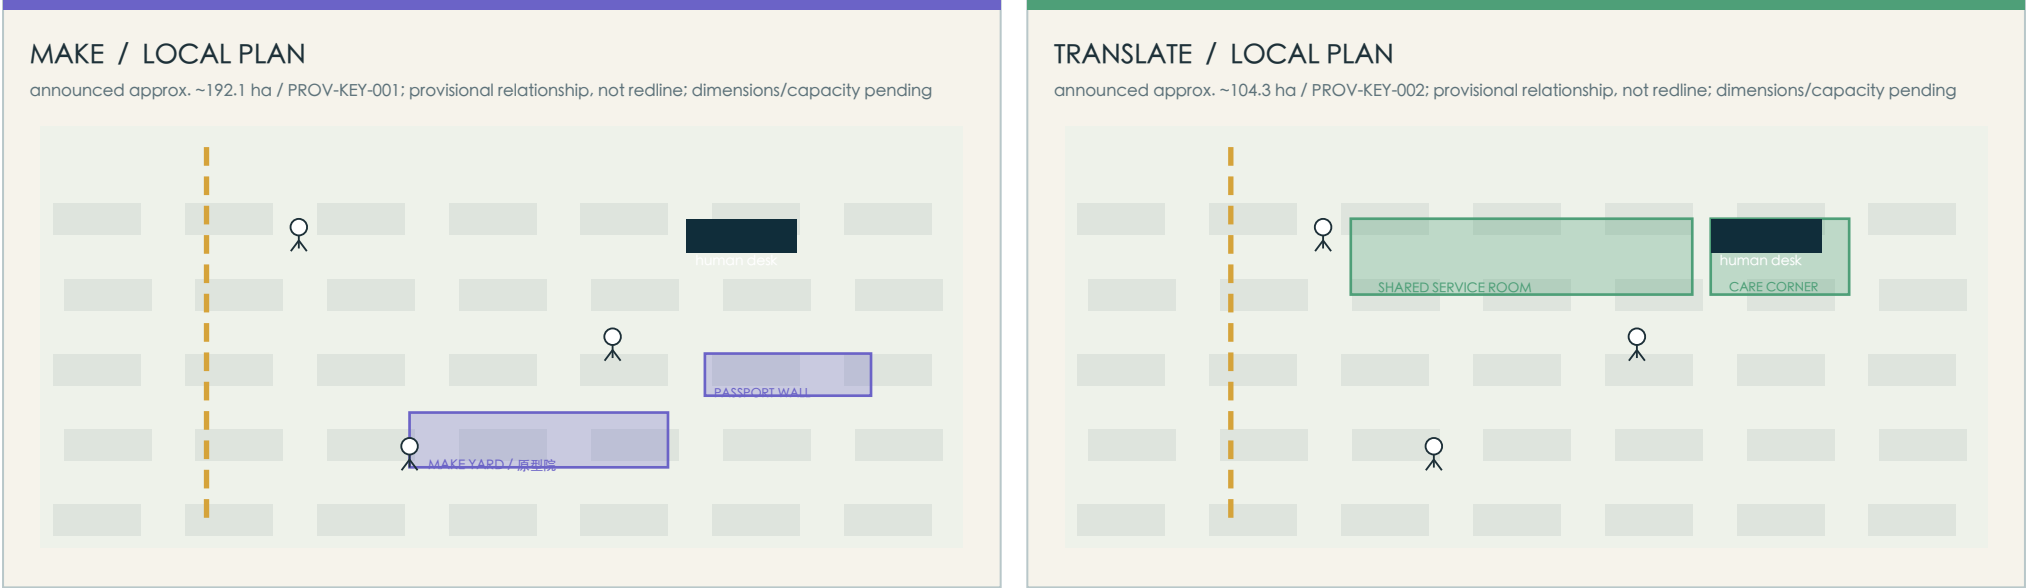

BOUNDARY + EVIDENCE DISCIPLINE

SITE / KEY_AREA are provisional_constraint; roads are relationship centerlines; buildings are 12 conceptual interventions; areas support internal review only. Recompute layers, metrics, drawings and HTML together when official polygons, ownership, road, rail, utility, heritage, fire, flood and energy data arrive.

DRAWING KEY	DESIGN JUDGEMENT	NOT IMPLIED
colour block / node	reversible action + human witness	built status, capacity or approval
dashed / line	relationship connection + low exposure	road redline, width or ownership

MAKE -> TRANSLATE -> USE: THREE DISTINCT SPATIAL ACTIONS

THREE SPATIAL SEQUENCES + DISTINCT OPERATIONS

MAKE

model card -> material issue -> 1:1 trial -> red-team review

Shared passport: version, material, data licence, life, owner, tools, maintenance time, feedback and next destination.

TRANSLATE

research abstract -> adaptable room -> human desk -> community feedback

Shared passport: version, material, data licence, life, owner, tools, maintenance time, feedback and next destination.

USE

station adoption -> repair log -> public retirement -> next site

Shared passport: version, material, data licence, life, owner, tools, maintenance time, feedback and next destination.

SPATIAL ACTION	FIELD OWNER	PASS / STOP	EXIT ACTION
ground interface	operator + maintainer	human/safety/rights	ZONE -> N0: restore

HOW TO READ THE LOCAL PLANS

colour blocks = reversible prototype/service room; dashed = relationship centerline; gold dashed = railway-memory cue; people = human witness; blue route = N0/N1 low-exposure continuity. The drawing does not provide road redlines, building height or engineering dimensions.

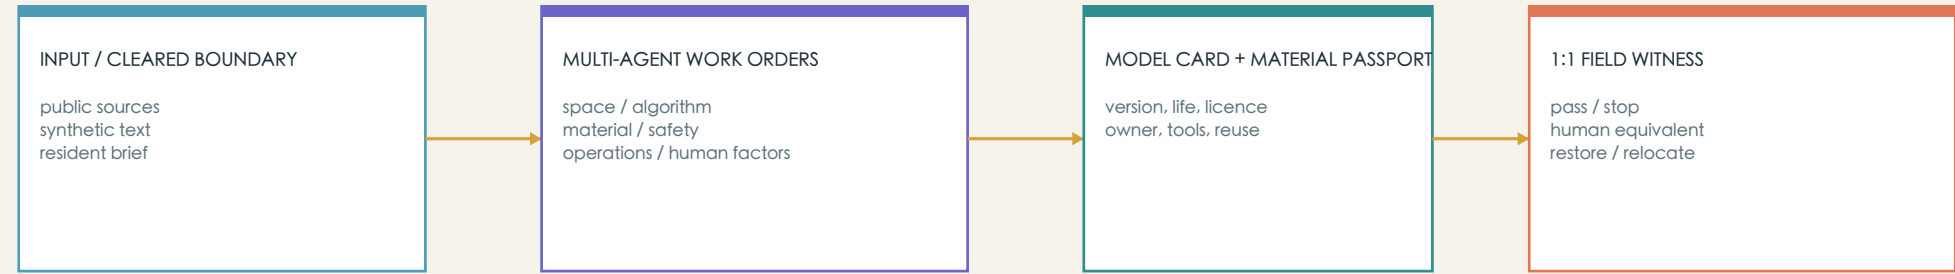

three detailed areas: geometry/key_areas.geojson; spatial objects: buildings/public_space/roads.geojson

CONCEPT / PROVISIONAL / NO STATUTORY REDLINE

FROM WORK ORDER TO DETACHABLE MATTER

HOW AN AI CANDIDATE BECOMES REVIEWABLE SPACE

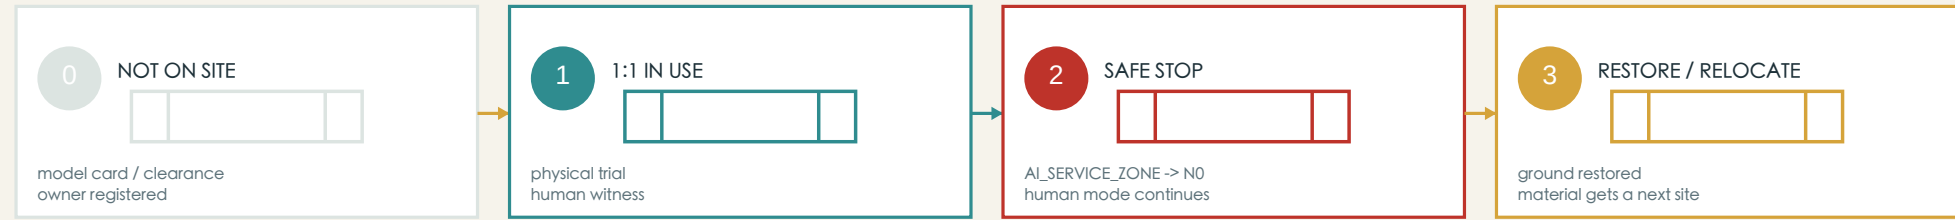

each step records inputs, owner, failure mode and next destination

RED LINE: any safety / privacy / accessibility / rights threshold returns to ordinary public mode; automation never becomes approval, diagnosis or command.

FOUR PHYSICAL STATES OF A PROTOTYPE

stopping is a visible ground-state change, not a backend toggle

Every stop: publish reason -> restore ordinary service -> detach kit -> record next destination.

INDUSTRY PROTOTYPE GATES / CONCEPT FIELDS

PROTOTYPE	ENTRY + PASS EVIDENCE	STOP / HUMAN EQUIVALENT	RESTORE / RETIRE
wayfinding	cleared text; groups complete route	misguidance/bypass; static + human	ZONE -> N0; revise or detach
furniture	passport; stability, clearance, repair witness	pinch/block; ordinary seat + route	isolate, repair or reuse
offline interface	human desk; closes task offline	no non-AI route; desk/paper/phone	close interface, keep service; repair/withdraw

EVERY FIELD WITNESS LEAVES FOUR RECORDS

STOP PRINCIPLE

Any safety / privacy / accessibility / rights threshold: pause the kit, return ZONE -> N0, keep human and offline service; publish the reason before repair, restore, relocate or retire.

LOW-EXPOSURE ROUTE, HUMAN CONTINUITY

Low-exposure public ground | mobility + blue-green

低暴露公共地面 | 交通 + 蓝绿

PUBLIC ROUTE / HUMAN ALTERNATIVE

low-exposure route

9,220.740 m

N0/N1 target; no N2/N3 crossing

minimum clearance

219.868 m

conceptual envelope distance

continuity

1.00

geometry reading; field audit pending

public frame

4,380,279.928 sqm

green + public union

FORECOURTS

23,024,999 sqm

PUBLIC FRAME

4,380,279.928 sqm

TOTAL ROAD LENGTH

21,716.922 m

No sensing is mandatory for access; pause and restore ordinary mode when thresholds are met.

v1.5

Conceptual recommendation · provisional geometry · derived from GeoJSON + metrics

PUBLIC-GROUND SECTION / PEOPLE + MAINTENANCE

conceptual relationship; clear widths, loads and fire controls pending

30y public frame: shade / drainage / light

N0/N1 low-exposure route + human bypass

existing rail / industrial memory base

3y service room: reconfigurable / desk

90d kit: detach / repair / relocate

PUBLIC RIGHTS + HUMAN EQUIVALENT PATH

response times, capacity and remedy are concept fields pending calibration

RAISE

onsite / paper / phone

HUMAN DESK

log + protect maintainer

PAUSE NODE

AI_SERVICE_ZONE -> N0

ORDINARY MODE

human service continues

PUBLIC REVIEW

repair / restore / retire

ACKNOWLEDGE

concept: staffed desk per shift; target time pending

REMEDY

concept: restore ordinary service first, then repair or detach

EVIDENCE

anonymous group logs for completion time, maintenance load and closure; no personal tracks

EVIDENCE SEMANTICS / DO NOT MIX

LOW EXPOSURE

9.22 km

concept

FORECOURTS

0.20%

object-scale ratio

PUBLIC FRAME

38.38%

green + forecourt union

0.20% is not a site-wide public-space rate; 38.38% is not statutory green rate or confirmed public ownership. All readings use provisional geometry and must be recomputed.

REGISTER RESPONSIBILITY BEFORE BUILDING

JZ-01 — JZ-06 IMPLEMENTATION REGISTER (PROPOSED FIELDS)

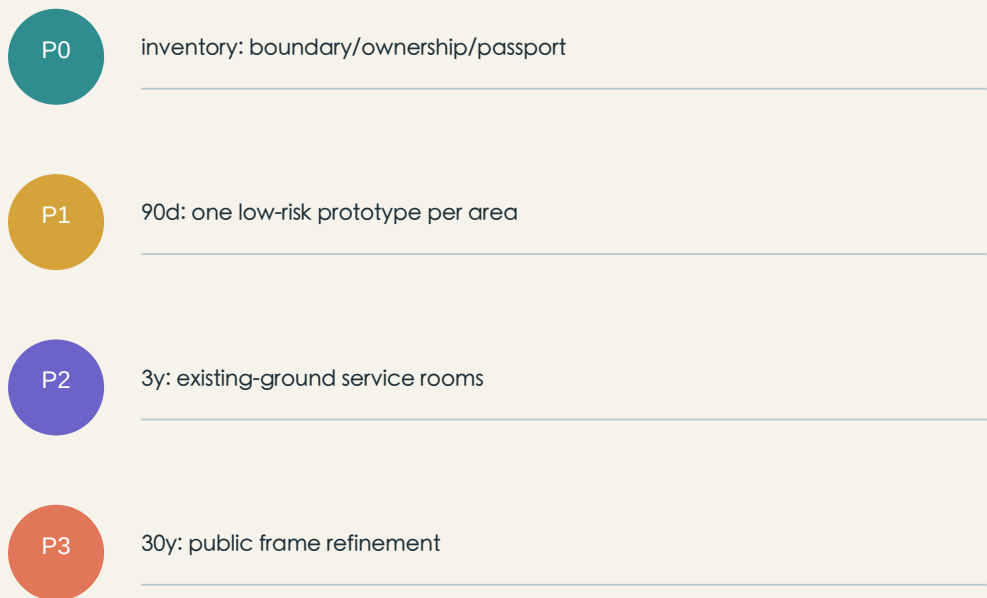

ID / SPATIAL ACTION	ROLE + ASSET	FIRST REVERSIBLE ACTION	PERMIT / STOP GATE	EVIDENCE + NEXT
JZ-01 公园审阅面	park/owner + accessibility adviser (pending)	low-exposure wayfinding, shade, reversible exhibit	ownership/heritage/safety; stop if bypass fails	route audit + public feedback; enter P1
JZ-02 众智园原型院	park operator + safety/structural review (pending)	wayfinding, furniture, passport wall	fire/load/flood; isolate on risk	three prototype gates; 90-day review
JZ-03 原点服务房	community operator + human-desk owner (pending)	offline service, care corner, adaptable partition	ownership/fire/privacy; human path on refusal	offline drill + grouped service time
JZ-04 大钟寺采用门廊	station/retail frontage + maintainer (pending)	human desk, repair bench, replaceable furniture	rail/traffic/fire; complaint can pause	adoption/retirement log; enter P2
JZ-05 维修再利用台	material/facility operator + repair community (pending)	part IDs, tools, detach drill	safety/waste/IP; stop if log missing	passport completeness + next-site match
JZ-06 原型交换周	event operator + public-service representative (pending)	quarterly exchange, annual review, public fault log	displacement/noise/equity; ordinary service protected	post-event restore check; P3 condition

REVIEW ORDER

Roles, funding, capacity, permits and timing await owner/professional confirmation; unverified fields are not hidden by precise-looking graphics.

PHASING / GATES

CORE METRICS / DATA BOUNDARY

SITE	11.4 km²	provisional
PUBLIC FRAME	38.38%	concept union
FORECOURT RATIO	0.20%	object scale
PROTOTYPE / SCENE	3 / 12	registered anchors
PENDING	UNKNOWN	service/equity/load

DELIVERY DISCIPLINE

Register owner, independent review, suggested funding type, permit gate, stop signal, maintenance capacity and next evidence before any project action; unverified fields remain conceptual / benchmark_required / unknown.
