

AI MAIN STREET

JING-ZHANG SHANGJIE

Not another AI axis.
Every system must first earn a Street Pass.

- 1 STREET PASS
- 3 STAMPS
- 7 RIGHTS
- 12 NODES
- 3 TRIALS
- 8 ACTION PACKAGES

One spatial protocol for industry conversion and public rights

空间 / SPACE

One line • three yards • two wings • twelve nodes

Everyday public base + reversible AI layer; ordinary use remains after equipment leaves.

产业 / INDUSTRY

PROVE → TRANSLATE → FIRST USE

Zhongzhiyuan verifies, Origin translates, Dazhongsi hosts first use; two wings add services and real settings.

交付 / DELIVERY

3 trials • 4 data gates • 8 SP packages

No expansion without evidence, human accountability, non-AI baseline and recovery rehearsal.

Review loop: concept → space → dated baseline → falsifiable trial → data gate → action package → correctable honour

Three minimum trial sheets: falsify first, expand later

PILOT-PUBLIC-01

Accessible Journey

ORDINARY-SERVICE BASELINE

Physical map, shade, human help and no-app route

STOP RULE

Stop for blocked access, default tracking or failed recovery

PILOT-INDUSTRY-01

Small-business First Use

ORDINARY-SERVICE BASELINE

Human needs work, paper template and no customer identity

STOP RULE

Stop for discrimination, opacity or processing after withdrawal

PILOT-EMBODIED-01

Embodied-AI Shared Path

ORDINARY-SERVICE BASELINE

Ordinary movement first; safety officer, stop and geofence live

STOP RULE

Stop for boundary escape, slow takeover, blocked access or unreported near miss

All trials are conceptual and not authorised. 90 days is a discussion window, not a schedule or commitment.
