

Civic Relay / Overall Structure and Concept Land Use

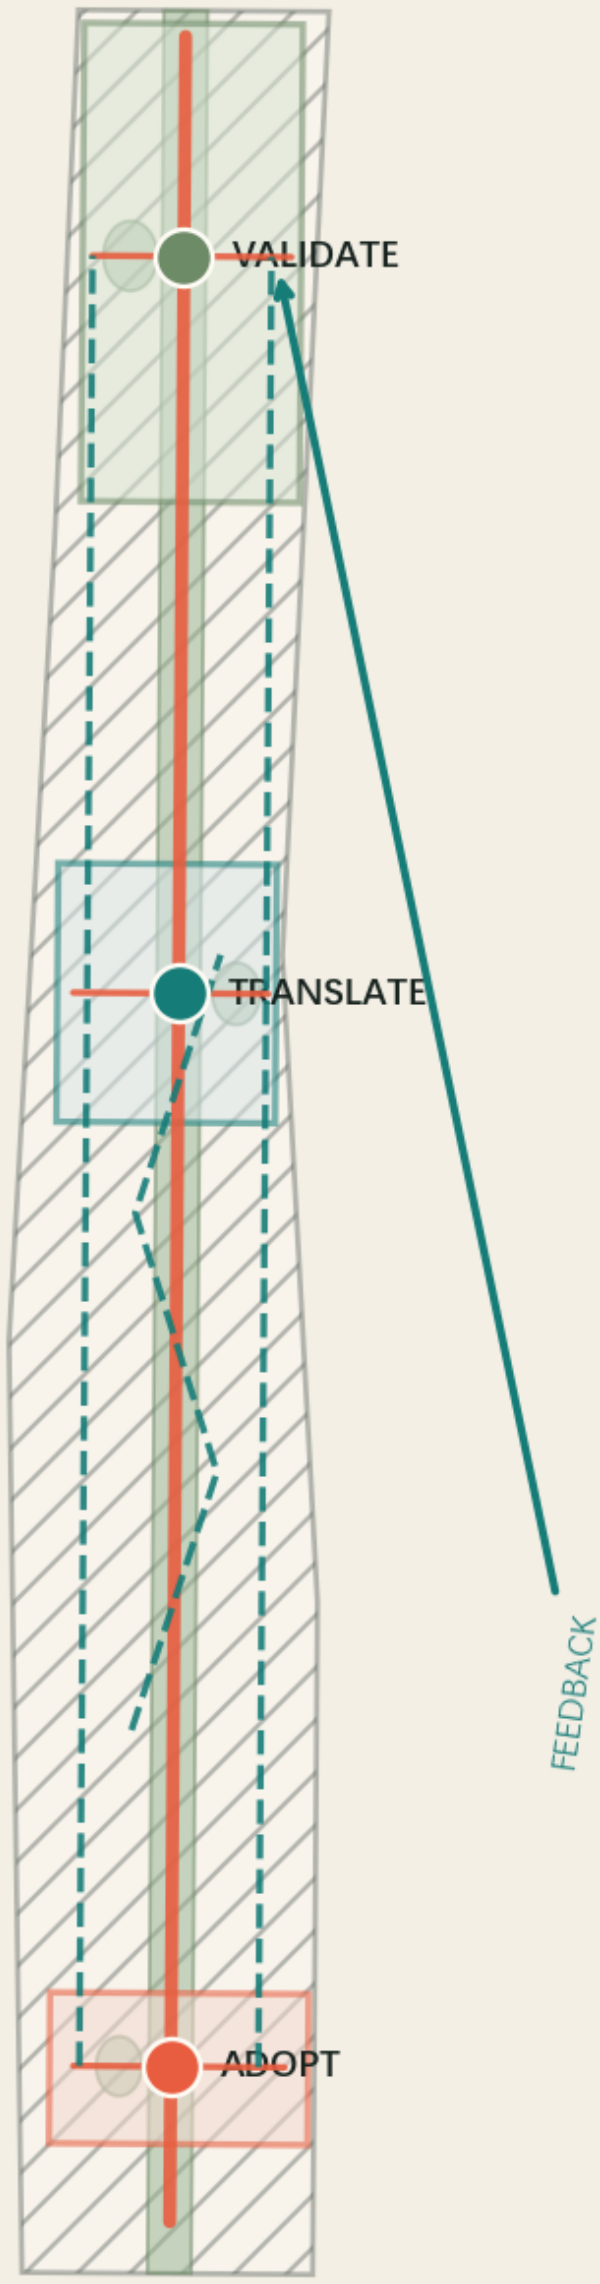

Jing-Zhang Civic AI Relay / PROVISIONAL CONCEPT REFERENCE

01

CIVIC AI RELAY / OPERATING MODEL

NORTH VALIDATE · MIDDLE TRANSLATE · SOUTH ADOPT · WINGS FEED BACK

PROVISIONAL / NOT AN OFFICIAL PLANNING BOUNDARY

NORTH / VALIDATE

Safety Validation Commons

Testing, red teams, energy and interoperability first create failure-visible evidence.

MIDDLE / TRANSLATE

Origin Translation Court

Translate open-source capability, product problems and resident needs into reviewable services.

SOUTH / ADOPT

Four-Quadrant Urban Interface

Bounded adoption keeps staffed service, appeal, deletion and rollback.

LOOP / FEEDBACK

Use returns problems

Decision diffs and negative results enter the next test; exposure is not learning.

RELAY RECEIPT 0.3 / SC-04

A ten-stage executable contract

problem → place → data
permission → Human Gate → test
evidence → adopt / reject → feedback
rollback / retirement

TABLETOP / LOCAL

PASS · 4/4 + 6/6

Synthetic routing, manual lookup, stop, and in-memory rollback can be rerun.

FIELD / REAL PILOT

BLOCKED AT G2

Operator unassigned, site, permission, and real takeover unverified. Performance unknown.

NEXT / CLEAR G0-G2

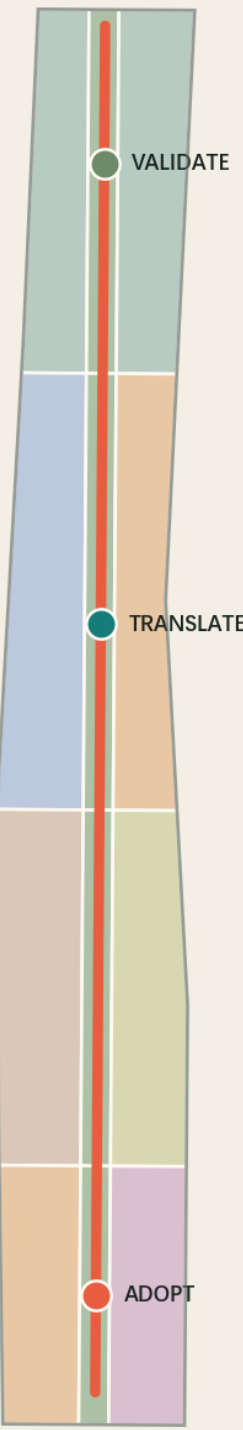

Place + permission + one A

Until then, keep the printed/staffed path; no system connection or recruitment.

02

CONCEPT LAND USE / RELATIONS BEFORE COLOUR BLOCKS

ONE CIVIC SPINE · FOUR RELAY SEGMENTS · COMPLEMENTARY EDGES

STRUCTURE 01 / SPINE

Civic protocol spine

Code 1401 expresses a conceptual public relation and only Official green, heritage and implementation limits are pending.

STRUCTURE 02 / WINGS

West supplies capability; east supplies problems

The service wing organizes legal, IP, safety and translation; the scenario wing organizes field checks and public feedback.

STRUCTURE 03 / PUBLIC LIFE

Daily service is the main path—not the test object

Research, education, community, culture, and park uses adjust through relay relations. Digital facilities remain optional and may not replace passage, rest, or staffed service.

STRUCTURE 04 / REVERSIBILITY

No assumed DRR or development intensity

Nine volumes test rhythm only. Existing stock, floors, site, fire safety, utilities and capacity remain unknown.

LAND-USE CODES

0202 RESEARCH	0204 EDUCATION	0205 BUSINESS	0206 HOUSING
0203 COMMUNITY	0203 CULTURE	1403 PARK GREEN	

Authority order: land_use.geosjon → metrics.json → proposal/figures. Concept land use is not approved RDP.

JING-ZHANG CIVIC AI RELAY / CONCEPT REFERENCE

ONE BELT / THREE DISTINCT HANDOFFS

North TestEvidence → centre AdoptionPackage → south UseFeedback → wings return problems and capability
The ordinary path retains static signs, accessible passage, staffed service, and optional digital aid.

VALIDATE

ENTRY Isolated test and public-observation task
GATE Emergency stop + ethics/engineering sign-off
OUTPUT Failure record / interface rule / retest condition
STOP Site, insurance, data or incident duty unclear

ENTRY → GATE → RECEIPT → STOP

01

TRANSLATE

ENTRY Maintenance issue / product clinic / resident problem
GATE Joint legal, IP, safety and service review
OUTPUT Usable prototype / maintenance list / scenario plan
STOP Building, fire, permit or exit path unclear

ENTRY → GATE → RECEIPT → STOP

02

ADOPT

ENTRY Validated service with staffed alternative
GATE Service-supervisor sign-off + site takeover
OUTPUT Decision diff / use feedback / rollback receipt
STOP Flow, junction safety, consumer protection or shift unclear

ENTRY → GATE → RECEIPT → STOP

03

LOOP

RECEIPT problem / place / data / permission / human / test / evidence / decision / feedback / exit
SC-04 4 fixtures / 6 acceptance / 4 stops / 5 rollback
DISCLOSE Success, failure, refusal and rollback alike
RULE Owner unknown or result null prevents progression

ENTRY → GATE → RECEIPT → STOP

LOOP

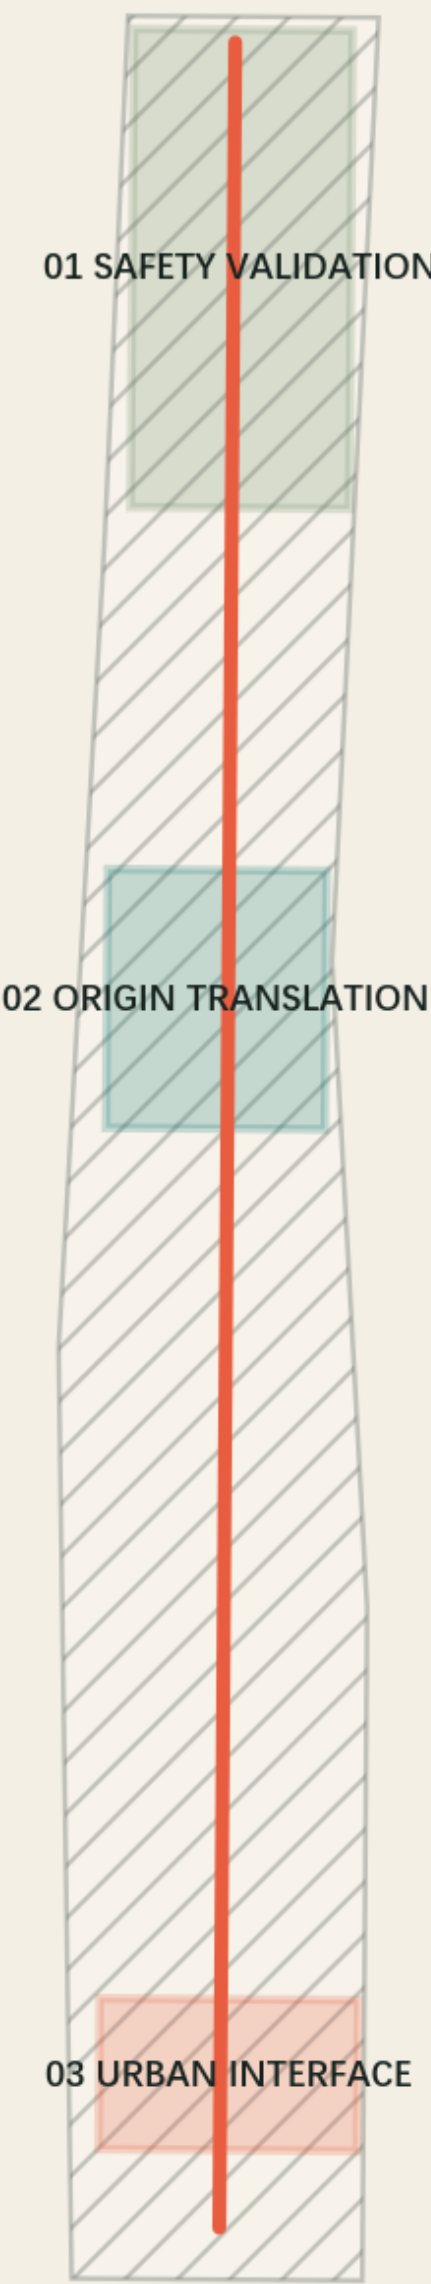

Three Stations / Walking and Blue-Green Public Space

Jing-Zhang Civic AI Relay / PROVISIONAL CONCEPT REFERENCE

03

NORTH PRODUCES TEST EVIDENCE · CENTRE ASSEMBLES AN ADOPTION PACKAGE · SOUTH RETURNS USE FEEDBACK

THREE KEY AREAS / THREE NON-INTERCHANGEABLE DUTIES

PROV-KEY-001 / NORTH / VALIDATE

Safety Validation Commons

PLANNING DUTY Isolatable test boundary + public observation
OBJECT TestEvidence: failure, interface rule, retest condition
HUMAN GATE Emergency stop + ethics/engineering sign-off
NO-GO Site, insurance, data or incident duty unclear

PROV-KEY-002 / MIDDLE / TRANSLATE

Origin Translation Court

PLANNING DUTY Assemble evidence into a maintainable service pack
OBJECT AdoptionPackage: licence, maintenance, ordinary path, exit asset
HUMAN GATE Joint legal/IP/safety/service review
NO-GO Building, fire, permit, maintenance or exit path unclear

PROV-KEY-003 / SOUTH / ADOPT

Four-Quadrant Urban Interface

PLANNING DUTY Protect access, consumers and service continuity; decide
OBJECT UseFeedback: adopt/reject, decision diff, pause/rollback
HUMAN GATE Service-supervisor sign-off + site takeover
NO-GO Station, flow, junction safety, consumer protection or roster unclear

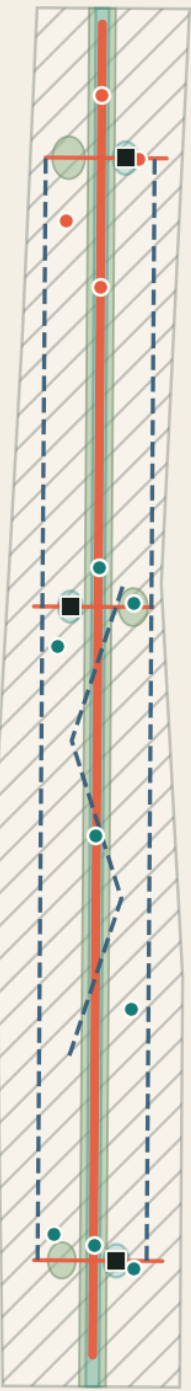

All three key areas are provisional rough. They share one handoff contract, not one spatial duty, output object, or entry condition.

JING-ZHANG CIVIC AI RELAY / CONCEPT REFERENCE

04

CONNECTION BEFORE WORKS: CONTINUOUS · ACCESSIBLE · REJECTABLE

WALKING + BLUE-GREEN PUBLIC SPACE

MOBILITY / NETWORK

Three cross-seams + one spine + two wings
Three east-west seams connect key areas, one north-south civic spine links the belt. Wings express services and feedback only.

GROUND FIRST / USER JOURNEY

A complete path without AI

Static arrival signs → continuous accessible ground → shaded rest → staffed desk → optional digital assistance

FIELD GATE / MISSING EVIDENCE

Find the break before drawing works

Stations, junctions, bridges, title, accessibility, and drainage await field and professional checks. An unresolved critical gap blocks string and implementation.

● INDUSTRY TEST ● PUBLIC SCENARIO ■ HUMAN HANDOFF DESK — RELAY GREENWAY — WING FEEDBACK

roads/geoson expresses conceptual connections only—not alignments, boundaries, bridges, tunnels or engineering feasibility.

JING-ZHANG CIVIC AI RELAY / CONCEPT REFERENCE

GROUND FIRST / A COMPLETE PATH WITHOUT AI

Static wayfinding → continuous accessibility → shaded rest → staffed service → optional digital aid
If purpose, data, human, exit, or review gate fails, the scenario stays out of public space.

CONTINUITY

BASE Accessibility / walking / cycling / shade / rest
FALLBACK Static wayfinding + staffed service always remain
DIGITAL Added only after informed choice
STOP Basic passage depends on technology

THREE SEAMS

ROLE East-west relations in three key areas
KNOWN Concept centreline and nodes only
UNKNOWN Section, title, flow, bridge and underground condition
RULE Not a road work or boundary conclusion

ONE SPINE

ROLE Civic protocol spine carries walking, culture, notice
OUTPUT Scenario entry, staffed desk, feedback, evidence sign
NOT New road, transit alignment or statutory green line
REBUILD Completely when official data arrives

BOUNDARY

STATUS All key areas are provisional rough
GATE Station / boundary / title / heritage / drainage / fire
HUMAN Accessibility and road-safety professional review
STOP No siting if a critical condition is missing

ENTRY → GATE → RECEIPT → STOP

BASE

ENTRY → GATE → RECEIPT → STOP

X

ENTRY → GATE → RECEIPT → STOP

Y

ENTRY → GATE → RECEIPT → STOP

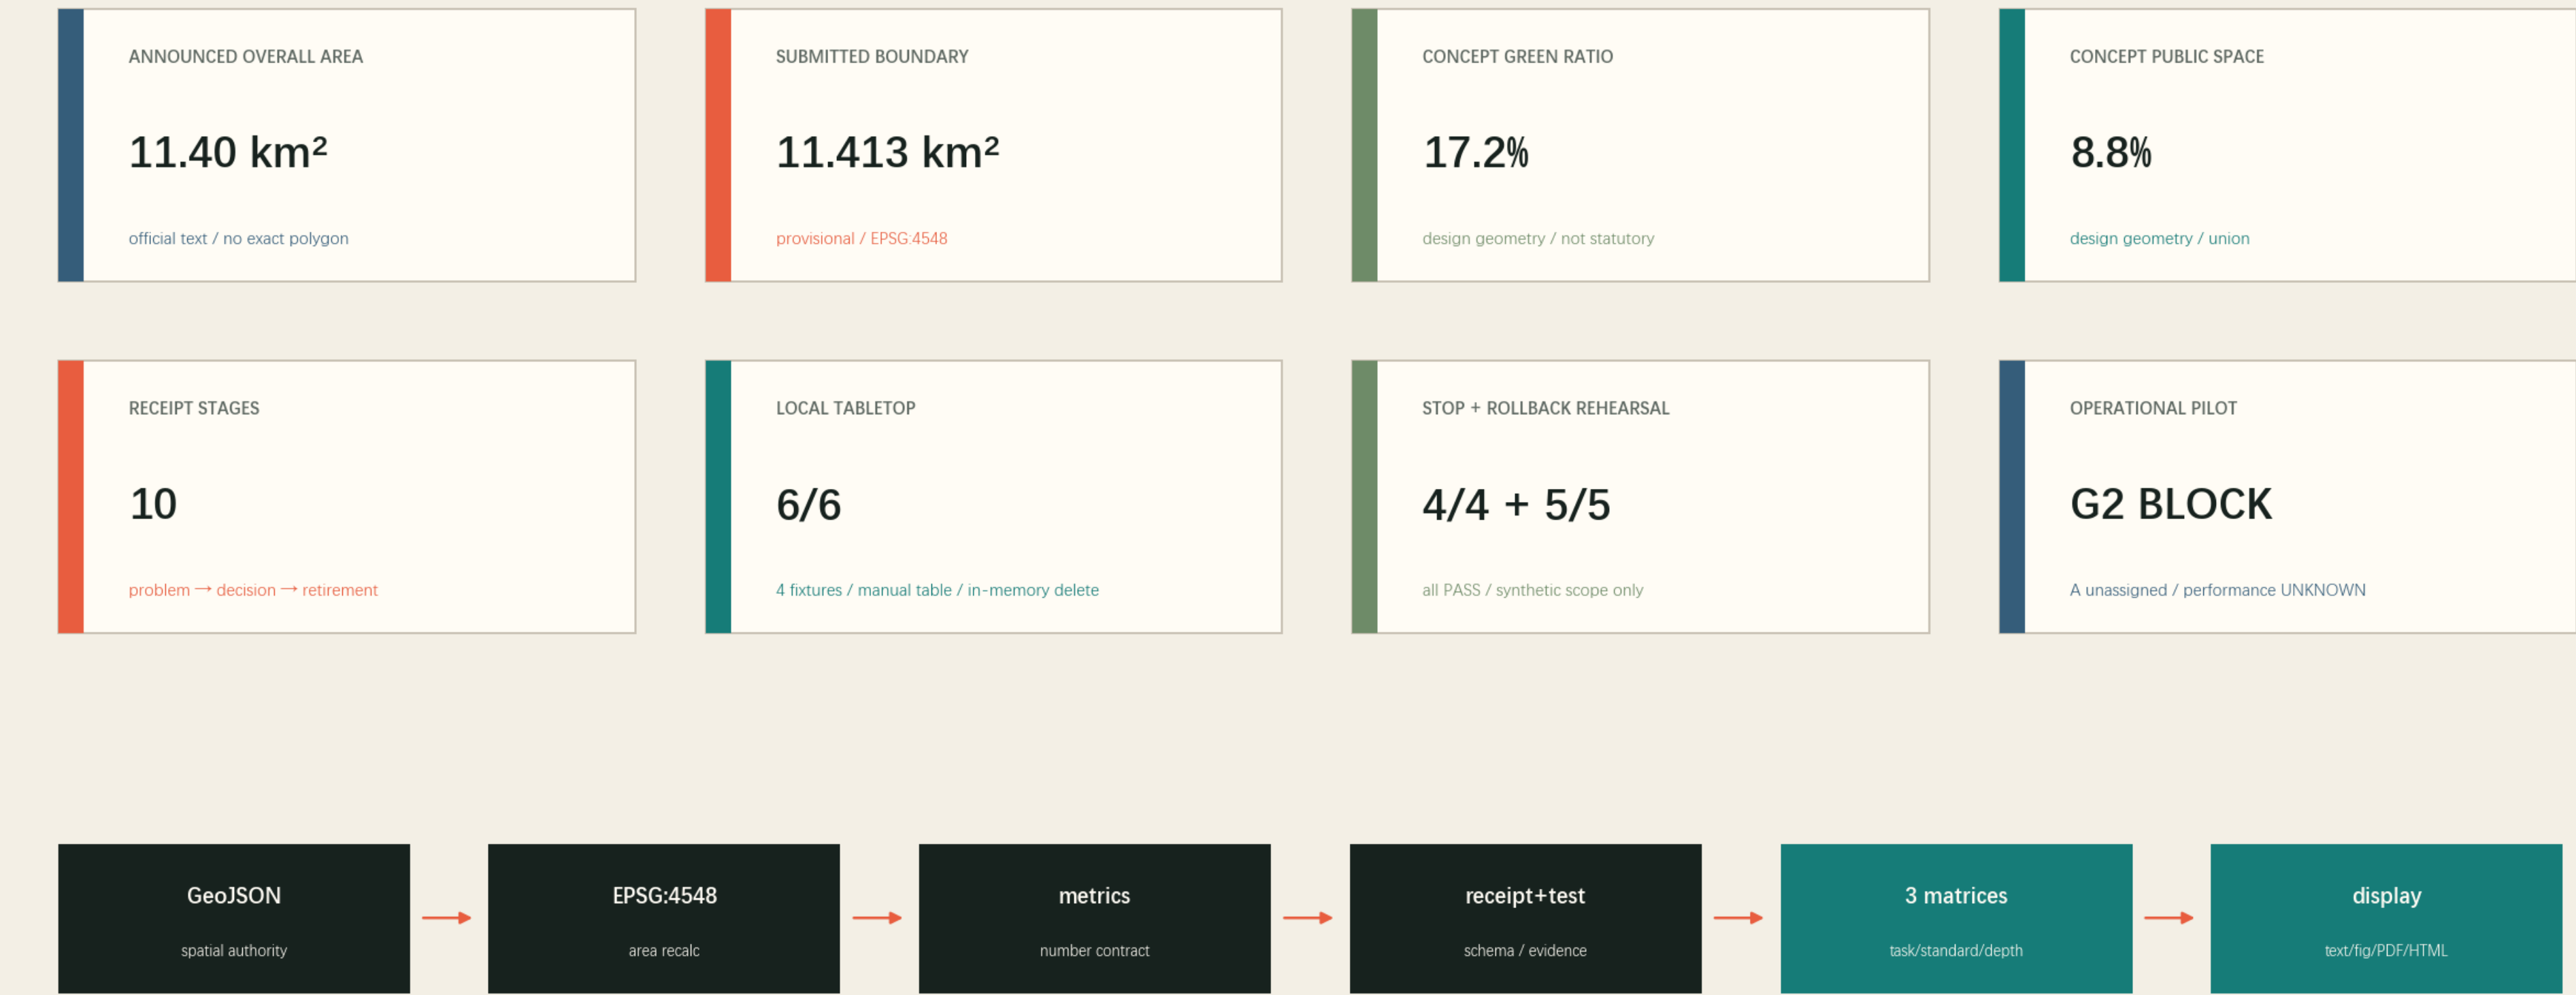

!

SC-04 Minimum Pilot, Scenario Matrix, and Operating Evidence

Jing-Zhang Civic AI Relay / PROVISIONAL CONCEPT REFERENCE

05 METRICS AND EVIDENCE CHAIN

SEPARATE KNOWN - CONCEPT RECALCULATION - UNKNOWN

KEEP UNKNOWN: FAR / HEIGHT / BCR / STATUTORY GREEN RATIO / ROAD AREA / TITLE / CAPACITY / BUDGET / OPERATOR

Replacement: when official polygons arrive, recut land use → rebuild derived layers → recalculate metrics → validate Schema → regenerate every display.

Generated from metrics.json. PASS means deterministic contracts passed. It is not official acceptance or professional approval.

JING-ZHANG CIVIC AI RELAY / CONCEPT REFERENCE

SC-04 MINIMUM PILOT + SCENARIO MATRIX

12 scenarios retained / SC-04 first / one ten-stage human-review and exit protocol

SC-01 Embodied safety MIN DATA / HUMAN / FALLBACK / STOP	SC-02 Edge resilience MIN DATA / HUMAN / FALLBACK / STOP	SC-03 Open red team MIN DATA / HUMAN / FALLBACK / STOP
SC-04 Interface interop MIN DATA / HUMAN / FALLBACK / STOP	SC-05 Product clinic MIN DATA / HUMAN / FALLBACK / STOP	SC-06 Learning partner MIN DATA / HUMAN / FALLBACK / STOP
SC-07 Accessible route MIN DATA / HUMAN / FALLBACK / STOP	SC-08 Health navigation MIN DATA / HUMAN / FALLBACK / STOP	SC-09 Legal triage MIN DATA / HUMAN / FALLBACK / STOP
SC-10 Quadrant walk MIN DATA / HUMAN / FALLBACK / STOP	SC-11 Consumption sandbox MIN DATA / HUMAN / FALLBACK / STOP	SC-12 Jing-Zhang memory MIN DATA / HUMAN / FALLBACK / STOP

SC-04 / PILOT

Relay Receipt 0.3 + 4 synthetic fixtures
TABLETOP 4/4 routes + 6/6 checks + 4/4 stops + 5/5 rollback PASS
FIELD G2 owner unassigned / not_run / performance null
NOT Real interface, staffing, public acceptance, or deployment proof

5 / INTERFACES

Beiwei / Future Science City / Huairou / E-Town / BTH
METHOD Input–minimum output–exit gate
LIMIT No authorized data, joint budget, or recognition
NOT Existing partnership or procurement

8 / RACI

Eight packages each have future A, R/C/I, and stop line
GATE Public value, staffed fallback, appeal, maintenance, exit
UNKNOWN Actor / time / volume / amount
RULE No A or recurring resource means no routine operation

10 / RIGHTS

Ten asset classes record source, generation, licence, limit, replacement
ORIGINAL Text / geometry / diagram / PDF / HTML
EXTERNAL Mechanism summary only; no visual copied
REPLACE Rebuild from the ledger when official material arrives
