

THE STAYING LINE

From talent attraction to an affordable, caring, and reversible daily city

01 THE STAYING LINE: let innovators and the city stay together

One daily green spine · three landing courts · six staying conditions · twelve reversible scenarios

PROVISIONAL GEOMETRY · NOT A STATUTORY PLAN

LIVE

Adaptable types; quantities pending

WORK

Shared labs and low-threshold starts

CARE

Care, childcare, and night human desks

MOVE

Walking, cycling, access; transit pending

MEET

Public ground floors and co-learning

EXIT

Appeal, pause, exit, and handover

Known boundary issue: #846 is background warning only; this figure makes no claim about actual roads, stations, or parcels.

Concept and six staying conditions

01

THE STAYING LINE: let innovators and the city stay together

One daily green spine · three landing courts · six staying conditions · twelve reversible scenarios

Source: repository public brief and provisional geometry; design layer independently generated by Codex and recalculated in EPSG:4548

One daily green spine, three landing courts, six staying conditions, and twelve reversible scenarios.

Complete land-use weave

02

Housing is not an amenity: weaving live, work, and care

One shared grid partitions the provisional envelope for full coverage, shared edges, and chain-wide recalculation

PROVISIONAL GEOMETRY · NOT A STATUTORY PLAN

0701	Housing	264.6 ha*
0702	Community service	160.1 ha*
0802	Research	241.8 ha*
0804	Education	65.6 ha*
05	Commercial service	147.7 ha*
1401	Park green	176.2 ha*

* Recalculated from the temporary design partition; not approved land use or precise area. Unit count, rent, and affordability share remain pending.

Housing, research, care, learning, commerce, and green space are partitioned from one shared grid; approved land use remains pending.

Three landing courts

03

Three landing courts: from attracting talent to supporting daily life

Each key area carries one link; actual boundaries, ownership, buildings, and operators await official confirmation

PROVISIONAL GEOMETRY · NOT A STATUTORY PLAN

01

Zhongzhiyuan · Autonomy Landing Court

- Shared labs and evaluation
- Short-stay housing prototype
- Open safety-governance learning

Gates: boundary / building / ownership / operator

02

AI Origin · Learning and Living Court

- Near-campus translation
- Family and care services
- Open-source residency exchange

Gates: boundary / building / ownership / operator

03

Dazhongsi · Urban Living Room

- International arrival and showcase
- Night services for support workers
- Reversible smart-consumption pilots

Gates: boundary / building / ownership / operator

Source: repository public brief and provisional geometry; design layer independently generated by Codex and recalculated in EPSG:4548

Zhongzhiyuan supports launch and validation; AI Origin supports learning and daily life; Dazhongsi supports urban exchange.

Daily movement and blue-green public realm

04

Reconnect daily life first: walking, care, night return, and a public green spine

Connection relationships precede engineering alignments; pedestrians and accessibility precede devices and spectacle

PROVISIONAL GEOMETRY · NOT A STATUTORY PLAN

01 **ARRIVE**

Station access and crossings need field audit

02 **MOVE**

Continuous walking, cycling, access, and lighting

03 **STAY**

Seating, water, help, and human service

04 **RETURN**

Night return remains usable when AI is paused

Conceptual connection lines 12.7 km*

Source: repository public brief and provisional geometry; design layer independently generated by Codex and recalculated in EPSG:4548

Connection relationships are conceptual. Road redlines, station entrances, accessibility, traffic, and engineering must be surveyed.

Metrics, unknowns, and recalculation

05

Evidence ledger: what is known, unknown, and when to recalculate

Structured data is reproducible without packaging provisional precision as certainty

PROVISIONAL GEOMETRY · NOT A STATUTORY PLAN

Provisional design envelope

Testing scenarios

6

Public landmarks

3

PENDING OFFICIAL DATA

- Housing units / rent / affordability share
- FAR / height / building coverage
- Road redlines / station access / accessibility baseline

CHAIN-WIDE RECALCULATION

* Recalculated from temporary design geometry; not official area or planning control.

Source: repository public brief and provisional geometry; design layer independently generated by Codex and recalculated in EPSG:4548

Known metrics come from temporary geometry. Housing units, rents, affordability, FAR, height, and formal controls remain unknown.

Twelve scenarios and six gates

Required before implementation

Official boundary; regulatory controls; housing baseline; buildings and ownership; mobility and accessibility; facilities and operators
